#### 2021 WINNER - REFINITIV LIPPER FUND AWARD

The Johnson Equity Income Fund is a 2021 winner of the Refinitiv Lipper Fund Award for "Best Fund over 5 Years" for Equity Income Funds.

Lipper Equity Income Funds Universe is composed of funds that, by prospectus language and portfolio practice, seek relatively high current income and growth of income by investing at least 65% of their portfolio in dividend-paying equity securities.

The Refinitiv Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The Refinitiv Lipper Fund Awards are based on the Refinitiv Lipper Fund Awards Methodology. Classification averages are calculated with all eligible share classes for each eligible classification. The calculation periods extend over 36, 60 and 120 months. The highest Lipper Leader® for Consistent Return (Effective Return) value within each eligible classification winner over three, five or 10 years. The Lipper leader for Consistent Return rating is a risk-adjusted performance measure based on the Effective Return computation. Lipper Ratings for Consistent Return are computed for all Lipper classifications with five or more distinct portfolios and span both equity and fixed-income funds (e.g., large cap core, General U.S. Treasury, etc.). The ratings are subject to change every month and are calculated for the following periods: three-year, 10-year, and overall. The overall calculation is based on an equal-weighted average of percentile rankings of the Consistent Return metrics over three-, five- and 10-year periods (if applicable). The highest 20% of funds in each classification are named Lipper Leaders for Consistent Return, the next 20% receive a rating of 4, the middle 20% are rated 3, the next 20% are rated 2 and the lowest 20% are rated 1. # INVESTMENT OBJECTIVE

#### **Objective**

The Johnson Equity Income strategy seeks to consistently outperform the S&P 500 Index over a full market cycle. We seek to protect and enhance the spending power of capital over time through a focused discipline on quality and yield.

We build structural advantage into portfolios by:

- > Eliminating low quality securities from our investment universe
- > Focusing on providing lasting and growing investment income
- Reducing volatility to maximize the power of compounding returns

#### **Portfolio**

- > U.S. large cap equity universe
- Bottoms-up security selection
- Market cap over \$1 billion
- Diversified portfolio of 40-60 securities
- ➤ Historically lower volatility than the S&P 500
- > Expected annual turnover between 20 40%
- > Emphasis on quality companies with reliable income

# WHAT IS "QUALITY" AND WHY IS IT IMPORTANT?

When times are tough, investments in the best companies can provide a safe port in the storm. It is for this reason we invest solely in high quality companies.

Most investors claim they invest in high quality companies, but fewer can succinctly describe what that means. For us, high quality investments are those in companies with high returns on investment, stable earnings, and low leverage. Over time, investing in companies with these characteristics has reduced risk and increased returns.

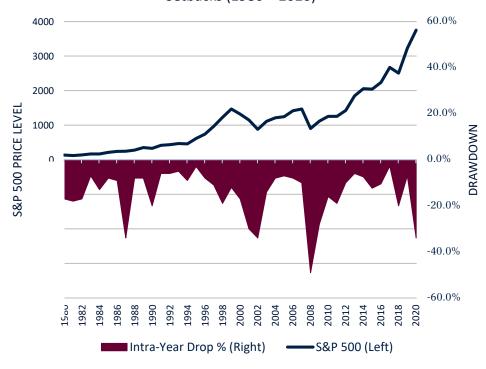

Note: "High Quality" is defined as top quintile and "Low Quality" is defined as bottom quintile of Russell 1000 Universe based on the average of the following 7 quality factors: 3 year average CFROIC, CFROIC – WACC, 3 year standard deviation of sales growth, 3 year standard deviation of gross margins, 3 year standard deviation of EBIT margins, net debt/CFFO, and pretax interest coverage.

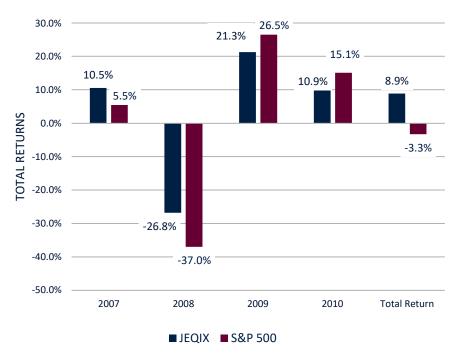

# OUR QUALITY FOCUS HELPS REDUCE VOLATILITY

While the stock market is a proven wealth compounder over time, periods of significant volatility are normal and expected. Simply reducing portfolio volatility is an effective return enhancer over time even if it means not getting 100% of the market's upside.

# The Market Has Risen Steadily Over Time Despite Frequent Setbacks (1980 – 2020)\*

#### Reduced Volatility Leads to Superior Compounding

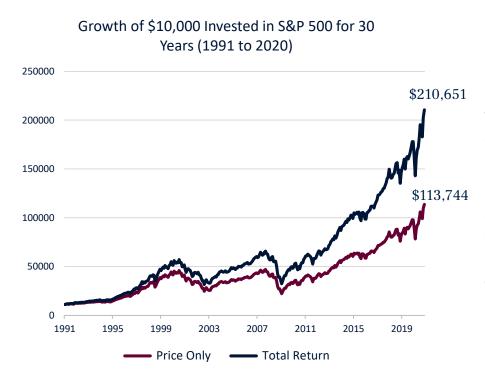

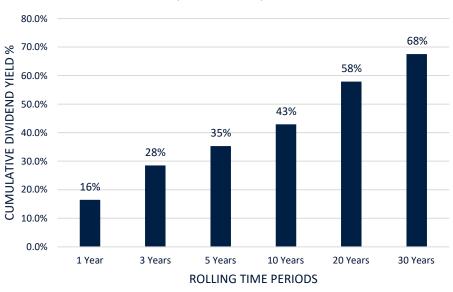

#### DIVIDENDS MATTER - ESPECIALLY FOR THE LONG RUN

Dividends may seem like a small component of total return but the longer your time horizon, the more important they become. That is why we are devoted to providing above average dividend yields and dividend growth to our investors.

Unlike other accounting-based measures of corporate profitability, dividend yield and dividend growth are easily measured and difficult to manipulate. A healthy and growing dividend is often a sign of a healthy and growing business.

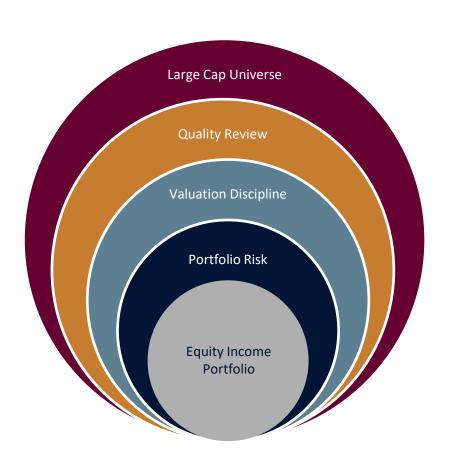

# INVESTMENT PROCESS: IDEA GENERATION

#### **Equity Income Universe**

- Market cap over \$1 billion
- Increasing shareholder yield through dividend increases, buybacks and/or debt reduction
- > Social responsibility criteria

#### **Quality Review**

- > Strong management team
- Sustainable competitive advantage
- Strong balance sheet
- > High quality earnings stream

#### Valuation Discipline

- Securities will not be purchased unless there is a compelling valuation opportunity
- > Primary tool is discounted cash flow

#### Portfolio Risk

Every name is evaluated in the context of portfolio volatility and bear market sensitivity

#### **Equity Income Portfolio**

➤ Diversified portfolio of 40-60 securities

# INVESTMENT PROCESS: FUNDAMENTAL ANALYSIS

Dedicated sector analysts leverage their depth of company and industry knowledge to further analyze and assess companies based on quality and valuation.

#### **QUALITY**

- · Reliability and experience of management team
- Superior industry fundamentals
- Sustainable competitive advantage
- Balance sheet strength
- High quality of earnings

#### **VALUATION**

- · Detailed financial modeling
- Discounted cash flow analysis
- Relative valuation versus sector, industry and peers
- · Industry specific measures

# ANALYST RECOMMENDATION TEAM DISCUSSION INVESTMENT DECISION

# RISK MANAGEMENT & SELL DISCIPLINE

#### **RISK MANAGEMENT**

#### SECURITY LEVEL

- Quality companies with solid fundamentals
- Strong cash flows to support balance sheet
- Experienced management teams
- Avoid aggressive accounting methods
- Avoid major legal/regulatory issues
- Maximum initiation size of 4%

#### PORTFOLIO LEVEL

- Diversification by company, sector and industry
- Diversified portfolio of 40-60 securities
- Lower volatility than the index
- Deliver dividend yield greater than the S&P 500 Index
- Maintain a lower valuation than the market
- Maximum sector weight of 30%
- Maximum weight within foreign securities of 30%

#### SELL DISCIPLINE

- Price of a security has surpassed our fair value estimate
- We find a more compelling opportunity
- Security falls out of the investment universe
- · Original fundamental thesis is no longer valid or has materially changed

#### ESG FACTORS

The Fund uses the following environmental, social and corporate governance factors when evaluating investment opportunities and shareholder proxy voting:

#### **Proxy Voting**

- Vote against/withhold from the chair of the nominating committee (or other directors) at companies where there are no women on the company's board
- · Vote against/withhold from non-independent directors serving on Audit, Compensation, and Nominating committees
- · Vote against the members of the Audit Committee if problematic audit-related practices have been identified
- Vote against the members of the Compensation Committee in egregious situations such as significant misalignment between CEO pay and company performance or problematic pay practices at the company
- Vote on a case-by-case basis if there are significant controversies, fines, penalties, or litigation associated with the company's environmental or social practices

#### **Investment Opportunities**

The Fund does not invest in securities that predominately operate in the following industries:

- Alcohol
- Casino
- Embryonic Stem-Cell Research
- Tobacco

# PORTFOLIO CHARACTERISTICS

#### **COMMENTARY**

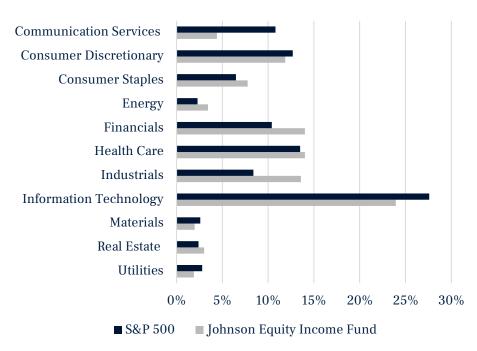

- > Quality bias is evident in both the higher return profile of portfolio companies (CFROI) and relative overweighting in more highly rated securities (balance sheet quality)
- Higher quality historically leads to lower volatility (Beta)
