Indemnification

Indemnification is authorized by the Company to directors, officers or controlling persons acting in their professional capacity pursuant to Delaware law. Indemnification includes expenses such as attorney's fees and, in certain circumstances, judgments, fines and settlement amounts actually paid or incurred in connection with actual or threatened actions, suits or proceedings involving such person, except in certain circumstances where a person is adjudged to be guilty of gross negligence or willful misconduct, unless a court of competent jurisdiction determines that such indemnification is fair and reasonable under the circumstances.

CO-ISSUER

This Offering has the following co-issuer(s): GenAI Works CF Investors SPV, LLC (the “**Co-Issuer**”), located at 838 Walker Road, Suite 21-2, Dover, DE 19904, United States.

The Co-Issuer was organized as a Limited Liability Company in the United States under the jurisdiction of Delaware in the year 2024. There is no website for the Co-Issuer.

The Co-Issuer will serve merely as a conduit for investors to invest in the Company and will not have a separate business purpose. An investment in the Co-Issuer will allow investors to achieve the same economic exposure, voting power (which is none) and ability to assert State and Federal law rights and achieve the same disclosures as if they had invested directly in the Company. The Co-Issuer will maintain a one-to-one relationship between the number, denomination, type and rights of Company securities it owns and the number, denomination, type and rights of its securities outstanding. The Co-Issuer cannot borrow or raise funds on its own account. There will be no material difference between an investment in the Company and the Co-Issuer.

Description of the Business

GenAI Works, Inc. is a media and technology company that offers an AI Hub for its community to discover, learn and grow. The Company was incorporated on May 17, 2023 in Delaware.

Business Plan

The state of generative AI has grown rapidly over the last 36 months. Several companies were first on the scene and significant dollars were invested. However, broad adoption is still unclear. With this rapid arrival comes uncertainty and opportunity. For example, users struggle to navigate the vast array of options to find the best-fit solutions for their needs while companies face immense challenges in gaining visibility in this crowded market and gaining their audience.

The Company's mission is to help society transition to an AI-enabled world by discovering, learning and growing in a centralized AI ecosystem. The Company is seeking to offer a trusted brand and resource for AI information through its hub that is focused on community first. The Company's AI Hub allows firms to attract an AI audience to their brand in a number of ways, including ecommerce, events, creator studio and education. Currently, the Company's AI Hub is accessed by followers through LinkedIn, Atlas, Beehiiv and Instagram with YouTube and TikTok in progress.

The Company plans to significantly expand its business by investing in technology and product development, increasing sales and marketing, and adding key personnel. This includes a plan to build a platform that allows user to connect and operate multiple AI-agents and tools in the same location. The capital we raise here will empower us to expand our technology and product development, increase sales and marketing efforts and grow out our infrastructure as we continue to aggressively grow and expand our business.

RISK FACTORS

Investing in the Securities involves a high degree of risk and may result in the loss of your entire investment. Before making an investment decision with respect to the Securities, we urge you to carefully consider the risks described in this section and other factors set forth in this Form C. The risks discussed below are not the only ones facing its business but do represent those risks that the Company believes are material to it. Additional risks and uncertainties not presently known to it or that the Company currently deems immaterial may also harm its business.

In addition to the risks specified below, the Company is subject to the same risks that all companies in its industry, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently riskier than more developed companies. Prospective Investors should consult with their legal, tax and financial advisors prior to making an investment in the Securities. The Securities should only be purchased by persons who can afford to lose all of their investment.

Before investing, you should carefully read and carefully consider the following:

Risks Related to the Company's Business and Industry

We have a limited operating history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

The Company is still in an early phase and we are just beginning to implement our business plan. There can be no assurance that we will ever operate profitably. The likelihood of our success should be considered in light of the problems, expenses, difficulties, complications and delays usually encountered by early stage companies. The Company may not be successful in attaining the objectives necessary for it to overcome these risks and uncertainties.

The Company's success depends on the experience and skill of its Co-Founders, executive officers and key personnel.

We are dependent on our Co-Founders, executive officers and key personnel. These persons may not devote their full time and attention to the matters of the Company. The loss of any or all of our Co-Founders, executive officers and key personnel could harm the Company's business, financial condition, cash flow and results of operations.

The amount of capital the Company is attempting to raise in this Offering may not be enough to sustain the Company's current business plan.

In order to achieve the Company's near and long-term goals, the Company may need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we may not be able to execute our business plan, our continued operations will be in jeopardy and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our remaining assets, which could cause an Investor to lose all or a portion of their investment.

We may face potential difficulties in obtaining capital.

We may have difficulty raising needed capital in the future as a result of, among other factors, our revenues from sales, as well as the inherent business risks associated with our Company and present and future market conditions. Additionally, our future sources of revenue may not be sufficient to meet our future capital requirements. As such, we may require additional funds to execute our business strategy and conduct our operations. If adequate funds are unavailable, we may be required to delay, reduce the scope of or eliminate one or more of our research, development or commercialization programs, product launches or marketing efforts, any of which may materially harm our business, financial condition and results of operations.

We may implement new lines of business or offer new products and services within existing lines of business.

As an early-stage company, we may implement new lines of business at any time. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved, and price and profitability targets may not prove feasible. We may not be successful in introducing new products and services in response to industry trends or developments in technology, or those new products may not achieve market acceptance. As a result, we could lose business, be forced to price products and services on less advantageous terms to retain or attract clients or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

We rely on other companies to provide services for our products.

We depend on third party vendors to meet our contractual obligations to our customers and conduct our operations. Our ability to meet our obligations to our customers may be adversely affected if vendors do not provide the agreed-upon services in compliance with customer requirements and in a timely and cost-effective manner. Likewise, the quality of our services may be adversely impacted if companies to whom we delegate certain services do not perform to our, and our customers', expectations. Our vendors may also be unable to quickly recover from natural disasters and other events beyond their control and may be subject to additional risks such as financial problems that limit their

ability to conduct their operations. The risk of these adverse effects may be greater in circumstances where we rely on only one or two vendors for a particular service.

We rely on various intellectual property rights in order to operate our business.

The Company relies on certain intellectual property rights, particularly trade secrets, to operate its business. The Company's intellectual property rights are unregistered and may not be sufficiently broad or otherwise may not provide us a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights. As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our intellectual property rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

Although dependent on certain key personnel, the Company does not have any key person life insurance policies on any such people.

We are dependent on certain key personnel in order to conduct our operations and execute our business plan, however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability and has limited recourse should such key personnel die or leave the Company. If any of these personnel die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person(s) could negatively affect the Company and our operations. We have no way to guarantee key personnel will stay with the Company, as many states do not enforce non-competition agreements, and therefore acquiring key man insurance will not ameliorate all of the risk of relying on key personnel.

In order for the Company to compete and grow, it must attract, recruit, retain and develop the necessary personnel who have the needed experience.

Recruiting and retaining highly qualified personnel is critical to our success. These demands may require us to hire additional personnel and will require our existing management and other personnel to develop additional expertise. We face intense competition for personnel, making recruitment time-consuming and expensive. The failure to attract and retain personnel or to develop such expertise could delay or halt the development and commercialization of our product candidates. If we experience difficulties in hiring and retaining personnel in key positions, we could suffer from delays in product development, loss of customers and sales and diversion of management resources, which could adversely affect operating results. Our consultants and advisors may be employed by third parties and may have commitments under consulting or advisory contracts with third parties that may limit their availability to us, which could further delay or disrupt our product development and growth plans.

We need to rapidly and successfully develop and introduce new products and services in a competitive, demanding and rapidly changing environment.

To succeed in our intensely competitive industry, we must continually improve, refresh and expand our product and service offerings to include newer features, functionality or solutions, and keep pace with changes in the industry. Shortened product life cycles due to changing customer demands and competitive pressures may impact the pace at which we must introduce new products or implement new functions or solutions. In addition, bringing new products or solutions to the market entails a costly and lengthy process, and requires us to accurately anticipate changing

customer needs and trends. We must continue to respond to changing market demands and trends or our business operations may be adversely affected. There is no assurance the Company may be successful in this regard.

The development and commercialization of our products and services is highly competitive with an uncertain outcome.

We face competition with respect to any products or services that we may seek to develop or commercialize in the future. Our competitors include major companies worldwide. Many of our competitors have significantly greater financial, technical and human resources than we have and superior expertise in research and development and marketing approved products and services and thus may be better equipped than us to develop and commercialize products and services. These competitors also compete with us in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. Accordingly, our competitors may commercialize products and services more rapidly or effectively than we are able to, which would adversely affect our competitive position, the likelihood that our products and services will achieve initial market acceptance, and our ability to generate meaningful additional revenues from our products and services.

Industry consolidation may result in increased competition, which could result in a loss of customers or a reduction in revenue.

Some of our competitors have made or may make acquisitions or may enter into partnerships or other strategic relationships to offer more comprehensive services than they individually had offered or achieve greater economies of scale. In addition, new entrants not currently considered to be competitors may enter our market through acquisitions, partnerships or strategic relationships. We expect these trends to continue as companies attempt to strengthen or maintain their market positions. The potential entrants may have competitive advantages over us, such as greater name recognition, longer operating histories, more varied services and larger marketing budgets, as well as greater financial, technical and other resources. The companies resulting from combinations or that expand or vertically integrate their business to include the market that we address may create more compelling service offerings and may offer greater pricing flexibility than we can or may engage in business practices that make it more difficult for us to compete effectively, including on the basis of price, sales and marketing programs, technology or service functionality. These pressures could result in a substantial loss of our customers or a reduction in our revenue. As a result, there can be no assurance the Company will be successful in executing its business plan.

If we are unsuccessful in adding users of our AI Hub, or if our AI Hub users decrease their level of engagement, our revenue, financial results, and business may be significantly harmed.

We offer an AI Hub for our community to discover, learn and grow. The amount of users of our AI Hub and our users level of engagement is critical to our success. Our financial performance is significantly determined by our success in adding, retaining, and engaging active users of our AI Hub and the services offered. If clients do not perceive our AI Hub or the services provided thereunder to be useful, reliable, and trustworthy, we may not be able to attract or retain users or otherwise maintain or increase the frequency and duration of their engagement. There is no guarantee that we will not experience an erosion of or be able to maintain our current or future active client base or engagement levels in the future.

Damage to our reputation could negatively impact our business, financial condition and results of operations.

Our reputation and the quality of our brand are critical to our business and success in existing markets, and will be critical to our success as we enter new markets. Any incident that erodes consumer loyalty for our brand could significantly reduce its value and damage our business. We may be adversely affected by any negative publicity, regardless of its accuracy. Also, there has been a marked increase in the use of social media platforms and similar devices, including blogs, social media websites and other forms of internet-based communications that provide individuals with access to a broad audience of consumers and other interested persons. The availability of information on social media platforms is virtually immediate as is its impact. Information posted may be adverse to our interests or may be inaccurate, each of which may harm our performance, prospects or business. The harm may be immediate and may disseminate rapidly and broadly, without affording us an opportunity for redress or correction. There can be no assurance that, should any of the foregoing occur, that the Company would be able to successfully recover and execute on its business plan.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions.

We may face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of our customers or other third-parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third-parties may contain defects in design or manufacture, including “bugs” and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration or failure of our information infrastructure systems or any of our data centers as a result of software or hardware malfunctions, computer viruses, cyber-attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could materially adversely affect our business and prospects

Security breaches of confidential customer information, in connection with our electronic processing of credit and debit card transactions, or confidential employee information may adversely affect our business.

Our business requires the collection, transmission and retention of personally identifiable information, in various information technology systems that we maintain and in those maintained by third parties with whom we contract to provide services. The integrity and protection of that data is critical to us. The information, security and privacy requirements imposed by governmental regulation are increasingly demanding. Our systems may not be able to satisfy these changing requirements and customer and employee expectations, or may require significant additional investments or time in order to do so. A breach in the security of our information technology systems or those of our service providers could lead to an interruption in the operation of our systems, resulting in operational inefficiencies and a loss of profits. Additionally, a significant theft, loss or misappropriation of, or access to, customers’ or other proprietary data or other breach of our information technology systems could result in fines, legal claims or proceedings.

The use of individually identifiable data by our business, our business associates and third parties is regulated at the state, federal and international levels.

The regulation of individual data and data privacy is changing rapidly, and in unpredictable ways. A change in regulation could adversely affect our business, including causing our business model to no longer be viable. Costs associated with information security – such as investment in technology, the costs of compliance with consumer protection and data privacy laws, regulations and costs resulting from consumer fraud – could materially and adversely affect our business and results of operations could suffer irreparable damage. Additionally, the success of our online operations depends upon the secure transmission of confidential information over public networks, including the use of cashless payments. The intentional or negligent actions of employees, business associates or third parties may undermine our security measures. As a result, unauthorized parties may obtain access to our data systems and misappropriate confidential data. There can be no assurance that advances in computer capabilities, new discoveries in the field of cryptography or other developments will prevent the compromise of our customer transaction processing capabilities and personal data. If any such compromise of our security or the security of information residing with our business associates or third parties were to occur, it could have a material adverse effect on our reputation, operating results, financial condition and business prospects. Any compromise of our data security may materially increase the costs we incur to protect against such breaches and could subject us to additional legal and regulatory risk and penalties.

The Company is not subject to Sarbanes-Oxley regulations and may lack the financial controls and procedures of public companies.

The Company may not have the internal control infrastructure that would meet the standards of a public company, including the requirements of the Sarbanes Oxley Act of 2002. As a privately-held (non-public) Company, the Company is currently not subject to the Sarbanes Oxley Act of 2002, and its financial and disclosure controls and procedures reflect its status as a development stage, non-public company. There can be no guarantee that there are no significant deficiencies or material weaknesses in the quality of the Company’s financial and disclosure controls and procedures. If it were necessary to implement such financial and disclosure controls and procedures, the cost to the Company of such compliance could be substantial and could have a material adverse effect on the Company’s results of operations.

We operate in a regulated environment, and if we are found to be in violation of any of the federal, state, or local laws or regulations applicable to us, our business could suffer.

We are subject to a wide range of federal, state, and local laws and regulations. The violation of these or future requirements or laws and regulations could result in administrative, civil, or criminal sanctions against us, which may include fines, a cease and desist order against the subject operations or even revocation or suspension of our license to operate the subject business. As a result, we may incur capital and operating expenditures and other costs to comply with these requirements and laws and regulations.

Changes in federal, state or local laws and government regulation could adversely impact our business.

The Company is subject to legislation and regulation at the federal, state and local levels. New laws and regulations may impose new and significant disclosure obligations and other operational, marketing and compliance-related obligations and requirements, which may lead to additional costs, risks of non-compliance, and diversion of our management's time and attention from strategic initiatives. Additionally, federal, state and local legislators or regulators may change current laws or regulations which could adversely impact our business. Further, court actions or regulatory proceedings could also change our rights and obligations under applicable federal, state and local laws, which cannot be predicted. Modifications to existing requirements or imposition of new requirements or limitations could have an adverse impact on our business.

Changes in employment laws or regulation could harm our performance.

Various federal and state labor laws govern employment relationships and affect operating costs. These laws include minimum wage requirements, overtime pay, healthcare reform and the implementation of the Patient Protection and Affordable Care Act, unemployment tax rates, workers' compensation rates, citizenship requirements, union membership and sales taxes. A number of factors could adversely affect our operating results, including compliance with or violations of additional government-imposed increases in minimum wages, overtime pay, paid leaves of absence and mandated health benefits and training/changing regulations from the National Labor Relations Board and increased litigation including claims relating to the Fair Labor Standards Act.

Risks Related to the Offering

The Issuer could potentially be found to have not complied with securities law in connection with this Offering related to a Reservation Campaign (also known as "Testing the Waters").

Prior to filing this Form C, the Issuer engaged in a Reservation Campaign (also known as "testing the waters") permitted under Regulation Crowdfunding (17 CFR 227.206), which allows issuers to communicate to determine whether there is interest in the offering. All communication sent is deemed to be an offer of securities for purposes of the antifraud provisions of federal securities laws. Any Investor who expressed interest prior to the date of this Offering should read this Form C thoroughly and rely only on the information provided herein and not on any statement made prior to the Offering. The communications sent to Investors prior to the Offering are attached as Exhibit I. Some of these communications may not have included proper disclaimers required for a Reservation Campaign.

The U.S. Securities and Exchange Commission does not pass upon the merits of the Securities or the terms of the Offering, nor does it pass upon the accuracy or completeness of any Offering document or literature.

You should not rely on the fact that our Form C is accessible through the U.S. Securities and Exchange Commission's EDGAR filing system as an approval, endorsement or guarantee of compliance as it relates to this Offering. The U.S. Securities and Exchange Commission has not reviewed this Form C, nor any document or literature related or prior to this Offering.

Neither the Offering nor the Securities have been registered under federal or state securities laws.

No governmental agency has reviewed or passed upon this Offering or the Securities. Neither the Offering nor the Securities have been registered under federal or state securities laws. Investors will not receive any of the benefits available in registered offerings, which may include access to quarterly and annual financial statements that have been audited by an independent accounting firm. Investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering based on the information provided in this Form C and the accompanying exhibits.

The Securities are offered on a "Best Efforts" basis and the Company may not raise the maximum amount being offered.

Since the Company is offering the Securities on a “best efforts” basis, there is no assurance that the Company will sell enough Securities to meet its capital needs. If you purchase Securities in this Offering, you will do so without any assurance that the Company will raise enough money to satisfy the full Use of Proceeds which the Company has outlined in this Form C or to meet the Company’s working capital needs.

The Company's management may have broad discretion in how the Company uses the net proceeds of the Offering.

Unless the Company has agreed to a specific use of the proceeds from the Offering, the Company’s management will have considerable discretion over the use of proceeds from the Offering. As is the case with any business, particularly one without a proven business model, it should be expected that certain expenses unforeseeable to management at this juncture will arise in the future. There can be no assurance that management’s use of proceeds generated through this Offering will prove optimal or translate into revenue or profitability for the Company. You are urged to review the Use of Proceeds in this Offering Statement but to understand that the actual use of the net proceeds of this Offering may vary significantly. In all cases, you should consult with their attorneys, accountants and personal investment advisors prior to making any decision to invest in the Company. You may not have the opportunity, as part of your investment decision, to assess whether the proceeds are being used appropriately.

The Company has the right to limit individual Investor commitment amounts based on the Company’s determination of an Investor’s sophistication.

The Company may prevent any Investor from committing more than a certain amount in this Offering based on the Company’s determination of the Investor’s sophistication and ability to assume the risk of the investment. This means that your desired investment amount may be limited or lowered based solely on the Company’s determination and not in line with relevant investment limits set forth by the Regulation CF rules. This also means that other Investors may receive larger allocations of the Offering based solely on the Company’s determination.

The Company has the right to extend the Offering Deadline.

The Company may extend the Offering Deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Target Offering Amount even after the Offering Deadline stated herein is reached. While you have the right to cancel your investment in the event the Company extends the Offering Deadline, if you choose to reconfirm your investment, your investment will not be accruing interest during this time and will simply be held until such time as the new Offering Deadline is reached without the Company receiving the Target Offering Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Target Offering Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after the release of such funds to the Company, the Securities will be issued and distributed to you.

The Company may also end the Offering early.

If the Target Offering Amount is met after 21 calendar days, but before the Offering Deadline, the Company can end the Offering by providing notice to Investors at least 5 business days prior to the end of the Offering. This means your failure to participate in the Offering in a timely manner, may prevent you from being able to invest in this Offering – it also means the Company may limit the amount of capital it can raise during the Offering by ending the Offering early.

The Company has the right to conduct multiple closings during the Offering.

If the Company meets certain terms and conditions, an intermediate close (also known as a rolling close) of the Offering can occur, which will allow the Company to draw down on Investor proceeds committed and captured in the Offering during the relevant period. The Company may choose to continue the Offering thereafter. Investors should be mindful that this means they can make multiple investment commitments in the Offering, which may be subject to different cancellation rights. For example, if an intermediate close occurs and later a material change occurs as the Offering continues, Investors whose investment commitments were previously closed upon will not have the right to re-confirm their investment as it will be deemed to have been completed prior to the material change.

Risks Related to the Securities

You will not be investing directly into the Company, but into a special purpose vehicle.

Changes to the securities laws that went into effect March 15, 2021, permit us to use a “special purpose vehicle” or “SPV” in this offering. That means that you will invest in GenAI Works CF Investors SPV, LLC, becoming a member of the SPV, and that investment purchases your Class B Common Stock. A condition to using an SPV is that the SPV passes on the same economic and governance rights that are set out in the Class B Common Stock. You will also be relying on us, as the Manager of the SPV, to make sure the SPV complies with Delaware law and functions in accordance with securities law. The structure of the SPV is explained further in the section entitled, “CAPITALIZATION AND OWNERSHIP”. The SPV will terminate and distribute the securities it holds to you, so that you may hold them directly, in certain circumstances. Due to this structure, there may be delays, complications and unexpected risks.

An investment in the Company's Securities could result in a loss of your entire investment.

An investment in the Company's Securities offered in this Offering involves a high degree of risk and you should not purchase the Securities if you cannot afford the loss of your entire investment. You may not be able to liquidate your investment for any reason in the near future.

The Securities will not be freely tradable under the Securities Act until one year from the initial purchase date. Although the Securities may be tradable under federal securities law, state securities regulations may apply, and each Investor should consult with their attorney.

You should be aware of the long-term nature of this investment. There is not now and may never be a public market for the Securities. Because the Securities have not been registered under the Securities Act or under the securities laws of any state or foreign jurisdiction, the Securities have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be effected. Limitations on the transfer of the Securities may also adversely affect the price that you might be able to obtain for the Securities in a private sale. In addition, even if a trading market develops, there is absolutely no assurance that the Securities could be sold under Rule 144 or otherwise unless the Company becomes a current public reporting company with the Securities and Exchange Commission and otherwise is current in the Company's business, financial and management information reporting, and applicable holding periods have been satisfied. Investors should be aware of the long-term nature of their investment in the Company. Each Investor in this Offering will be required to represent that they are purchasing the Securities for their own account, for investment purposes and not with a view to resale or distribution thereof.

The Company is controlled by the Founder and Co-Founders and they will exercise voting control.

Prior to the Offering, the Company's Founder and Co-Founders beneficially own nearly all of the Company. Subject to any fiduciary duties owed to investors under Delaware law, the Founder and Co-Founders will be able to exercise significant influence over matters requiring stockholder approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. The Founder and Co-Founders may have interests that are different from yours. For example, the Founder and Co-Founders may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, the Founder and Co-Founders could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to stockholder approval.

The securities in this Offering have no protective provisions.

The Securities in this Offering have no protective provisions. As such, you will not be afforded protection, by any provision of the Securities or as a Shareholder, in the event of a transaction that may adversely affect you, including a reorganization, restructuring, merger or other similar transaction involving the Company. If there is a liquidation event, or change of control for the Company, the Securities being offered do not provide you with any protection. In addition, there are no provisions attached to the Securities in the Offering that would permit you to require the Company to repurchase the Securities in the event of a takeover, recapitalization or similar transaction involving the Company.

Investors will not have voting rights.

Investors will not have the right to vote upon matters of the Company. Under the terms of the Securities, GenAI Works, Inc. will exercise voting control over the Securities and the Company will be subject to the provisions of the Stockholders Agreement. Thus, Investors will essentially never be able to vote upon any matters of the Company unless otherwise provided for by the Company.

Investors will not be entitled to any inspection or information rights other than those required by law.

Investors will not have the right to inspect the books and records of the Company or to receive financial or other information from the Company, other than as required by law. Other security holders of the Company may have such rights. Regulation CF requires only the provision of an annual report on Form C and no additional information. Additionally, there are numerous methods by which the Company can terminate annual report obligations, resulting in no information rights, contractual, statutory or otherwise, owed to Investors. This lack of information could put Investors at a disadvantage in general and with respect to other security holders, including certain security holders who have rights to periodic financial statements and updates from the Company such as quarterly unaudited financials, annual projections and budgets, and monthly progress reports, among other things.

The Securities may be significantly diluted as a consequence of subsequent equity financings.

The Company's equity securities will be subject to dilution. The Company intends to issue additional equity to employees and third-party financing sources in amounts that are uncertain at this time, and as a consequence holders of the Securities will be subject to dilution in an unpredictable amount. Such dilution may reduce the Investor's control and economic interests in the Company.

The amount of additional financing needed by the Company will depend upon several contingencies not foreseen at the time of this Offering. Generally, additional financing (whether in the form of loans or the issuance of other securities) will be intended to provide the Company with enough capital to reach the next major corporate milestone. If the funds received in any additional financing are not sufficient to meet the Company's needs, the Company may have to raise additional capital at a price unfavorable to their existing investors, including the holders of the Securities. The availability of capital is at least partially a function of capital market conditions that are beyond the control of the Company. There can be no assurance that the Company will be able to accurately predict the future capital requirements necessary for success or that additional funds will be available from any source. Failure to obtain financing on favorable terms could dilute or otherwise severely impair the value of the Securities.

In addition, the Company has promised to issue certain equity grants which will be issued after the filing of this Form C. Should the Company enter into a financing that would trigger any conversion rights, the converting securities would further dilute the holders of the Securities upon a qualifying financing.

Our valuation and our offering price have been established internally and are difficult to assess.

The Offering price was not established in a competitive market. We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our asset value, net worth, revenues or other established criteria of value. The Company has set the price of its Class B Common Stock at \$7.35 per share, plus a 3% Investor Processing Fee, see "Offering" for further details on this fee. The Investor Processing Fee is intended to offset transaction costs and, though this fee is counted towards the amount the Company is seeking to raise under Regulation Crowdfunding and the limit each investor may invest pursuant to Regulation Crowdfunding, we did not value it in determining our valuation. Including this fee will increase our valuation for which you are paying for shares in our Company accordingly. Valuations for companies at this stage are generally purely speculative. Our valuation has not been validated by any independent third party and may decrease precipitously in the future. It is a question of whether you, the investor, are willing to pay this price for a percentage ownership of an early-stage company. We cannot guarantee that the Securities can be resold at the Offering price or at any other price.

The Investor Processing Fee may not count toward your cost basis for tax purposes.

The IRS and/or another relevant tax authority may consider the price of the share before including the Investor Processing Fee as the cost basis for determining any gain or loss at a realization event. You should discuss with your tax advisor the appropriate way to determine the relevant tax obligation.

There is no guarantee of a return on an Investor's investment.

There is no assurance that an Investor will realize a return on their investment or that they will not lose their entire investment. For this reason, each Investor should read this Form C and all Exhibits carefully and should consult with their attorney and business advisor prior to making any investment decision.

IN ADDITION TO THE RISKS LISTED ABOVE, RISKS AND UNCERTAINTIES NOT PRESENTLY KNOWN, OR WHICH WE CONSIDER IMMATERIAL AS OF THE DATE OF THIS FORM C, MAY ALSO HAVE AN ADVERSE EFFECT ON OUR BUSINESS AND RESULT IN THE TOTAL LOSS OF YOUR INVESTMENT.

Co-Issuer

The Co-Issuer is GenAI Works CF Investors SPV, LLC (the “Co-Issuer”), located at 838 Walker Road, Suite 21-2, Dover, DE 19904, United States. The Co-Issuer was organized as a Limited Liability Company in the United States under the jurisdiction of Delaware in the year 2024. There is no website for the Co-Issuer, but information with respect to the Co-Issuer shall be hosted on the website of the Company at <https://genai.works>, or for the Offering at <https://invest.genai.works>. The Company has formed the 100% owned Co-Issuer solely for issuing the Securities under this Offering. The Co-Issuer will serve merely as a conduit for investors to invest in the Company and will not have a separate business purpose. An investment in the Co-Issuer will allow investors to achieve the same economic exposure, voting power (which is none) and ability to assert State and Federal law rights and achieve the same disclosures as if they had invested directly in the Company. The Co-Issuer will maintain a one-to-one relationship between the number, denomination, type and rights of Company securities it owns and the number, denomination, type and rights of its securities outstanding. The Co-Issuer cannot borrow or raise funds on its own account.

The proceeds from the Offering will be received by the Co-Issuer and invested immediately in the Securities issued by the Company. The Co-Issuer will be the legal owner of the Class B Common Stock.

There will be no material difference between an investment in the Company and the Co-Issuer.

Investor Confirmation Process

In order to purchase the Securities, you must make a commitment to purchase by completing the subscription process hosted by the Intermediary, including complying with the Intermediary's know your customer (KYC) and anti-money laundering (AML) policies. If an Investor makes an investment commitment under a name that is not their legal name, they may be unable to redeem their Security indefinitely, and neither the Intermediary nor the Company are required to correct any errors or omissions made by the Investor.

Investor funds will be held in escrow with a qualified third party escrow agent, Enterprise Bank and Trust ("**Escrow Agent**") until the Target Offering Amount has been met or exceeded and one or more closings occur. Investors may cancel an investment commitment until up to 48 hours prior to the Offering Deadline or an intermediate close, using the cancellation mechanism provided by the Intermediary. If an investor does not cancel an investment commitment before the 48-hour period prior to the Offering Deadline, the funds will be released to the Issuer and the investor will receive their Securities.

The Company will notify Investors when the Target Offering Amount has been reached. If the Company reaches the Target Offering Amount prior to the Offering Deadline, it may close the Offering early *provided* (i) the expedited Offering Deadline must be twenty-one (21) days from the time the Offering was opened, (ii) the Company must provide at least five (5) business days' notice prior to the expedited Offering Deadline to the Investors and (iii) the Company continues to meet or exceed the Target Offering Amount on the date of the expedited Offering Deadline.

Material Changes

If any material change occurs related to the Offering prior to the current Offering Deadline the Company will provide notice to Investors and receive reconfirmations from Investors who have already made commitments. If an Investor does not reconfirm their investment commitment after a material change is made to the terms of the Offering within five (5) business days of receiving notice, the Investor's investment commitment will be cancelled and the committed funds will be returned without interest or deductions. If an Investor does not cancel an investment commitment before the Target Offering Amount is reached, the funds will be released to the Company upon the closing of the Offering and the Investor will receive the Securities in exchange for their investment.

If an Investor does not reconfirm his or her investment commitment after a material change is made to the Offering, the Investor's investment commitment will be cancelled and the committed funds will be returned.

Cancellations

Investors may cancel an investment commitment until 48 hours prior to the deadline identified in these Offering Materials.

The Company will notify investors when the Target Offering Amount has been met. If the Company reaches the Target Offering Amount prior to the deadline identified in the Offering Materials, it may close the Offering early if it provides notice about the new offering deadline at least five business days prior to such new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). If an investor does not cancel an investment commitment before the 48-hour period prior to the stated offering deadline, the funds will be released to the Company upon closing of the Offering and the investor will receive Securities in exchange for his or her investment.

Rolling and Early Closings

The Company may elect to undertake rolling closings, or an early closing after it has received investment interests for its Target Offering Amount. During a rolling closing, those investors that have committed funds will be provided five days' notice prior to acceptance of their subscriptions, release of funds to the Company, and issuance of the Securities to the investors. During this time, the Company may continue soliciting investors and receiving additional investment commitments. Investors should note that if investors have already received their Securities, they will not be required

to reconfirm upon the filing of a material amendment to the Form C. In an early closing, the Offering will terminate upon the new target date, which must be at least five days from the date of the notice.

Oversubscriptions

The Target Offering Amount is \$10,303.35, but investments in excess of the Target Offering Amount and up to the Maximum Offering Amount of \$4,716,883.20, will be accepted. Oversubscriptions will be allocated at the discretion of the Company.

The Company requests that you please review this Form C and the Subscription Agreement in Exhibit C (along with all attachments and exhibits thereto), in conjunction with the following summary information.

As an Investor in this Offering, you will be purchasing membership interests in the Co-Issuer, which will be the entity holding the Securities and which will have the rights of a stockholder of the Company. The Co-Issuer is purchasing the following Securities:

Securities: Class B Common Stock

Offering Minimum: \$10,303.35

Offering Maximum: \$4,716,883.20

Purchase Price Per Share of Security Offered: \$7.35 (does not include a 3% Investor Processing Fee charged to each Investor for the first \$10,000.00 of their investment in the Offering (subject to a maximum fee of \$300.00))

Offering Deadline: April 30, 2026

The Securities have no voting rights (either with regard to actions by the Co-Issuer or the Company's Class B Common Stock being held by the Co-Issuer). The rights of the Class B Common Stock may be changed by an amendment to the Company's Bylaws or Amended and Restated Certificate of Incorporation. Investors do not have the right to vote on any such amendment.

The primary documents governing voting and rights of Investors holding the Securities are the Amended and Restated Certificate of Incorporation (the "COI") attached as Exhibit D, the Company's Bylaws (the "Bylaws") attached as Exhibit E, the Stockholders Agreement (the "Stockholders Agreement") attached as Exhibit F, together with the COI and Bylaws, the "Governing Documents"). The shares of Class A Common Stock outstanding have superior voting rights to the Securities being sold in this Offering.

Restrictions on Transfer

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Investor of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are transferred: (1) to the Company; (2) to an accredited investor, as defined by Rule 501(d) of Regulation D promulgated under the Securities Act; (3) as part of an IPO; or (4) to a member of the family of the Investor or the equivalent, to a trust controlled by the Investor, to a trust created for the benefit of a member of the family of the Investor or the equivalent, or in connection with the death or divorce of the Investor or other similar circumstances. Each Investor should be aware that although the Securities may legally be able to be transferred, there is no guarantee that another party will be willing to purchase them.

In addition to the foregoing restrictions, prior to making any transfer of the Securities or any capital stock into which they are convertible, such transferring Investor must either make such transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel reasonably satisfactory to the Company stating that a registration statement is not necessary to effect such transfer. Furthermore, upon the event of an IPO, the capital stock into which the Securities are converted will be subject to a lock-up period and may not be lent, offered, pledged, or sold for up to 180 days following such IPO.

Capitalization

The following description summarizes the most important terms of the Company's capital stock. This summary does not purport to be complete and is qualified in its entirety by the provisions of our Amended and Restated Certificate of Incorporation. For a complete description of our capital stock, you should refer to our Amended and Restated Certificate of Incorporation and to the applicable provisions of Delaware law.

On June 25, 2024, the Company's board of directors and shareholders approved an amendment to the Company's Certificate of Incorporation to effect a 1 for 10,000 forward stock split and create additional classes of capital stock, including Class A Common Stock and Class B Common Stock. All shares of Common Stock as of the stock split were converted into Class A Common Stock. As a result, the Company's authorized capital stock now consists of 100,000,000 shares of common stock, par value \$0.00001 per share (the "**Common Stock**"), of which (i) 50,000,000 shares of Common Stock are designated as "**Class A Common Stock**" and (ii) 50,000,000 shares are designated as "**Class B Common Stock**". The Class A Common Stock and Class B Common Stock have the same rights and privileges, except that the Class A Common Stock have voting rights. Additionally, the Company intends to establish a 2025 Equity Incentive Plan and the amount of shares authorized for issuance thereunder has yet to be determined.

*These options have been promised to key personnel and remain subject to the establishment of the 2025 Equity Incentive Plan, receipt of board approval and the execution of definitive documentation.

Voting and Control

As a condition of subscribing to this Offering, the Co-Issuer (and thus investors in this Offering) will become a party to the Stockholders Agreement as entered into by and among the Company and the Company's stockholders. The material terms of these agreements are summarized below. See Exhibit F for the full terms of the Stockholders Agreement.

The Issuer is a party to a certain Stockholders Agreement, dated as of June 11, 2023, under which the Company and the initial holders of Common Stock (now owners of the Class A Common Stock) agreed to, among other things (i) voting provisions regarding the Board, including the size of the Board (three (3) directors) and composition of the Issuer's board of directors, with the Founder and Co-Founders each entitled to designate one representative on the Issuer's Board of Directors, so long as they own at least seven percent (7%) of the issued and outstanding capital stock of the Issuer.

Voting and Control

Each Investor who purchases the Securities is not entitled to vote on any matter or to call for an annual or special shareholders meeting. As a result of purchasing Securities in this Offering, the Investors will have no voting or control over any corporate matters of the Company, including additional issuance of securities, Company repurchase of securities, a sale of the Company or its significant assets, or Company transactions with related parties. Investors in the Co-Issuer will indirectly hold only Class B Common Stock and are completely passive investors. Investors should not purchase the Securities if they are not comfortable with this lack of voting and control.

Dilution

The Securities do not have anti-dilution rights, which means that future equity issuances and other events will dilute the ownership percentage that Investors may eventually have in the Company. Investors should understand and expect the potential for dilution. The Investor's stake in the Company could be diluted due to the Company issuing additional shares of stock or other convertible securities to other parties. In other words, when the Company issues more shares, the percentage of the Company that you own will go down, even though the value of the Company may go up (there is no guarantee that it will). You will own a smaller piece of a larger Company (or, if the value goes down, then a smaller piece of a smaller company). This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock. If the Company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the company offers dividends, and most early-stage companies are unlikely to offer dividends, preferring to invest any earnings into the company).

The type of dilution that hurts early-stage investors most occurs when the company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings. An example of how this might occur is as follows (numbers are for illustrative purposes only):

- In June 2024 Jane invests \$20,000 for shares that represent 2% of a company valued at \$1 million.
- In December the company is doing very well and sells \$5 million in shares to venture capitalists on a valuation (before the new investment) of \$10 million. Jane now owns only 1.3% of the company but her stake is worth \$200,000.
- In June 2025 the company has run into serious problems and in order to stay afloat it raises \$1 million at a valuation of only \$2 million (the "down round"). Jane now owns only 0.89% of the company and her stake is worth only \$26,660.

This type of dilution might also happen upon conversion of convertible notes into shares. Typically, the terms of convertible notes issued by early-stage companies provide that in the event of another round of financing, the holders of the convertible notes get to convert their notes into equity at a "discount" to the price paid by the new investors, i.e., they get more shares than the new investors would for the same price. Additionally, convertible notes may have a "price cap" on the conversion price, which effectively acts as a share price ceiling. Either way, the holders of the convertible notes get more shares for their money than new investors. In the event that the financing is a "down round"

the holders of the convertible notes will dilute existing equity holders, and even more than the new investors do, because they get more shares for their money. Investors should pay careful attention to the aggregate total amount of convertible notes that the company has issued (and may issue in the future, and the terms of those notes.

If you are making an investment expecting to own a certain percentage of the company or expecting each share to hold a certain amount of value, it's important to realize how the value of those shares can decrease by actions taken by the company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.
