This offering summary is not for distribution in isolation and must be read together with the accompanying free writing prospectus.

#### Risks Relating to the Structure or Features of the Securities

- The securities do not guarantee the return of any principal and your investment in the securities may result in a loss
- The contingent repayment of principal applies only if you hold the securities to maturity.
- Higher Contingent Coupons or lower downside threshold levels are generally associated with underlying shares with greater expected volatility and therefore can indicate a greater risk of loss.
- Investors will not participate in any appreciation in the price of the underlying shares and will not have the same rights during the term of the securities as holders of the underlying shares.
- The securities may be called prior to the maturity date.

### Risks Relating to the Underlying Shares

- Single stock risk.
- No affiliation with the Company.

#### General Risk Factors

- Credit risk of HSBC USA Inc.
- The estimated initial value of the securities, which will be determined by us on the pricing date, is expected to be less than the price to public and may differ from the market value of the securities in the secondary market, if any.
- The price of your securities in the secondary market, if any, immediately after the pricing date is expected to be less than the price to public.
- If HSBC Securities (USA) Inc. were to repurchase your securities immediately after the original issue date, the price you receive may be higher than the estimated initial value of the securities.
- Hedging and trading activity by our affiliates could adversely affect the value of the securities.
- The calculation agent, which is HSBC USA Inc. or one of its affiliates, will make determinations with respect to the securities.
- As a holder of the securities, you will not have any ownership interest or rights in the underlying shares.
- There is limited anti-dilution protection.
- In some circumstances, the payment you receive on the securities may be based on the shares of another company and not the Company.
- The securities are not insured by any governmental agency of the United States or any other jurisdiction.
- The market price will be influenced by many unpredictable factors.
- The securities will not be listed on any securities exchange and secondary trading may be limited.
