Plan B Investments, Inc.
Notes to Financial Statements
December 31, 2025

Note 1 – Organization and Nature of Business

Plan B Investments, Inc. (the “Company”) was incorporated in the State of California on September 23, 2004. On October 28, 2005, the Company became a registered broker-dealer in securities under the Securities Exchange Act of 1934, as amended, to provide investment advisory services, and to sell mutual funds, and variable annuities.

The Company became registered as a broker-dealer with the Securities and Exchange Commission (“SEC”) and is a member of the National Association of Securities Dealers (“NASD”). The NASD and NYSE Member Regulation consolidated in 2007 to form the Financial Industry Regulatory Agency (“FINRA”). The Company is headquartered in Carmel Valley, California. The Company is engaged in a single line of business as a securities broker-dealer, which is comprised of several classes of services, including investment advisory, fee-based financial planning and insurance.

Note 2 – Significant Accounting Policies

Basis of Presentation – The Company conducts the following types of business as a securities broker-dealer, which comprises several classes of services, including:

- Mutual fund retailer
- Broker or dealer selling variable life insurance or annuities
- Investment advisory services
- Private placements of securities

Under its membership agreement with FINRA and pursuant to SEA rule 15C3-3, in reliance on footnote 74 to SEC release 34-7003.

Use of Estimates - The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition -Revenue from contracts with customers includes advisory fees and mutual fund, insurance and distribution income. The recognition and measurement of revenue is based on the assessment of individual contract terms. Significant judgment is required to determine whether performance obligations are satisfied at a point in time or over time; how to allocate transaction prices

Plan B Investments, Inc.
Notes to Financial Statements

Revenue Recognition (continued)

where multiple performance obligations are identified; when to recognize revenue based on the appropriate measure of the Company's progress under the contract; whether revenue should be presented gross or net of certain costs; and whether constraints on variable consideration should be applied due to uncertain future events.

Note 2 – Significant Accounting Policies (continued)

Commissions on the sale of mutual funds, insurance and distribution fees are recorded on the trade date. The Company believes that the performance obligation is satisfied on the trade date because that is when the underlying financial instrument or purchaser is identified, the pricing is agreed upon and the risks and rewards of ownership of the securities have been transferred to/from the customer.

The company enters into arrangements with managed accounts or other pooled investment Vehicles (funds) to distribute shares to investors. The Company may receive distribution fees paid by the fund up front, over time, upon the investor's exit from the fund (that is, a contingent deferred sales charge), or as a combination thereof. The Company believes that its performance obligation is the sale of securities to investors and as such this is fulfilled on the trade date. Any fixed amount are recognized on the trade date and variable amounts are recognized to the extent it is probable that a significant revenue reversal will not occur once the uncertainty is resolved. For variable amounts, as the uncertainty is dependent on the value of the shares at future points in time as well as the length of time the investor remains in the fund, both of which are highly susceptible to factors outside the Company's influence, the Company does not believe that it can overcome this constraint until the market value of the fund and the investor activities are known, which are usually monthly or quarterly. Distribution fees recognized in the current period are primarily related to performance obligations that have been satisfied in prior period.

RIA Fees - The Company provides investment advisory services on a daily basis. The Company believes the performance obligation for providing advisory services is satisfied over time because the customer is receiving and consuming the benefits as they are provided by the Company. Fee arrangements are based on a percentage applied to the customer's assets under management. Fees are received quarterly and are recognized as revenue at that time as they relate specifically to the services provided in that period, which are distinct from the services provided on other periods.

Income Taxes - The Company has elected to be taxed under the provisions of subchapter S of the Internal Revenue Code and comparable State of California statutes wherein the Company's taxable federal and state income is taxed directly to the shareholder. Additionally, the state of California imposes a 1-1/2% state franchise tax on the corporation's taxable income.

The accounting principles generally accepted in the United States of America provides accounting and disclosure guidance about positions taken by an organization in its tax returns that might be uncertain.

Plan B Investments, Inc.
Notes to Financial Statements
December 31, 2025

Income Taxes - Continued

Management has considered its tax positions and believes that all of the positions taken by the Company in its Federal and State organization tax returns are more likely than not to be sustained upon examination. The Company is subject to examinations by U.S. Federal and State tax authorities from 2015 to the present, generally for three years after they are filed.

Depreciation – Depreciation is provided on a straight-line basis using estimated useful lives of five to ten years. Leasehold improvements are amortized over the lesser of the economic useful life of the improvement or the term of the lease.

Statement of Changes in Financial Condition – The Company has defined cash equivalents as highly liquid investments, with original maturities of less than three months that are not held for sale in the ordinary course of business.

Note 3 – Net Capital Requirements

The Company is subject to the Securities and Exchange Commission Uniform Net Capital Rule (SEC rule 5c3-1) which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. Net capital and aggregate indebtedness change day by day, but on December 31, 2025, the Company had net capital of \$63,859, which was \$58,859 in excess of its required net capital requirement of \$5,000. The Company's percentage of aggregate indebtedness of \$14,958 to net capital was 23.42%.

Note 4 -- Income Taxes

As discussed in the Note 2 - Significant Accounting Policies the company is subject to a 1.5% tax on net income over the minimum tax of \$800. At December 31, 2025, the Company recorded the minimum franchise tax of \$800.

Note 5 - Lease

The company lease is now month to month effective July 1, 2023 at a monthly cost of \$800. The company also leases an outside office space on a month to month basis. The Company has elected not to apply the recognition requirements of Topic 843 relating to its short term office lease and instead has elected to recognize the lease payments as a lease cost on a straight line basis over the lease term. The lease cost is \$11,252 relating to the office lease for the year ended December 31,2025.

Plan B Investments, Inc.

Note 6 - Financial Statement Presentation and Classification

The Company is engaged in a single line of business as a securities broker-dealer, which is comprised of several classes of services, including investment advisory, fee-based financial planning and life insurance. The Company has identified its President as the chief operating decision maker ("CODM"), who uses net income to evaluate the results of the business, predominately in the forecasting process, to manage the Company. Additionally, the CODM uses excess net capital (see Note 3), which is not a measure of profit and loss, to make operational decisions while maintaining capital adequacy, such as whether to reinvest profits or pay dividends. The Company's operations constitute a single operating segment and therefore, a single reportable segment, because the CODM manages the business activities using information of the Company as a whole. The accounting policies used to measure the profit and loss of the segment are the same as those described in the summary of significant accounting policies.

Note 7 - Fair Value Measurements

The Company has certain investments reported in the accompanying statement of financial condition. FASB ASC 820-10-50-1 through 50-3 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Financial assets and liabilities valued using level 1 inputs are based on unadjusted quoted market prices within active markets. Financial assets or liabilities valued using level 2 inputs are based primarily on quoted prices for similar assets or liabilities in active or inactive markets. Financial assets and liabilities using level 3 inputs were primarily valued using management's assumptions about the assumptions market participants would utilize in pricing the asset or liability.

Fair Value Measurement at Reporting Date Using Description

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:			
12/31/2025			
Schwab Gov Money Market	<u>\$55,380</u>	<u>\$55,380</u>	<u>\$</u>
Total	<u>\$55,380</u>	<u>\$55,380</u>	<u>\$</u>

There were no transfers between Level 1,2 and 3 during the year ended December 31, 2025.

Plan B Investments, Inc.
Notes to Financial Statements
December 31, 2025

Note 8 - Commitments and Contingencies

The Company does not have any commitments or contingencies for year ending December 31, 2025.

Note 9 – Subsequent Events

Management has reviewed the results of operations through the date the financial statements were available to be issued, and has determined that no adjustments are necessary to the amounts reported in the accompanying combined financial statements nor have any subsequent events occurred, the nature of which would require disclosure.

Note 10 - Credit Losses

The Company follows ASC Topic 326, Financial Instruments - Credit Losses ("ASC 326"). ASC 326 impacts the impairment model for certain financial assets by requiring a current expected credit loss ("CECL") methodology to estimate expected credit losses over the entire life of the financial asset. Under the accounting update, the Company has the ability to determine that there are no expected credit losses in certain circumstances (e.g., based on the credit quality of the customer). The Company had accounts receivable as of December 31, 2024 and 2025 of \$37,621 and \$30,737 respectively.
