(I.R.S. Employer
Identification No.)

19428

(Zip Code)

(610) 934-2222

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A Common Stock, \$0.001 par value per share	HLNE	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐	Smaller reporting company	☐
Emerging growth company	☐		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of Class A common stock held by non-affiliates of the registrant on September 30, 2025, based on the closing price of \$134.79 as reported by the Nasdaq Stock Market, was approximately \$5,470.9 million.

As of May 19, 2026, there were 43,697,364 shares of the registrant's Class A common stock and 11,836,450 shares of the registrant's Class B common stock outstanding.

This Annual Report on Form 10-K (“Form 10-K”) includes certain information regarding the historical performance of our specialized funds and customized separate accounts. An investment in shares of our Class A common stock is not an investment in our specialized funds or customized separate accounts. In considering the performance information relating to our specialized funds and customized separate accounts contained herein, current and prospective Class A common stockholders should bear in mind that the performance of our specialized funds and customized separate accounts is not indicative of the possible performance of shares of our Class A common stock and is also not necessarily indicative of the future results of our specialized funds or customized separate accounts, even if fund investments were in fact liquidated on the dates indicated, and there can be no assurance that our specialized funds or customized separate accounts will continue to achieve, or that future specialized funds and customized separate accounts will achieve, comparable results. Please note that nothing in this Form 10-K represents an offer to sell, or a solicitation of an offer to purchase, interests in any of Hamilton Lane’s products.

We own or have a license to the trademarks, service marks or trade names that we use in connection with the operation of our business. In addition, our trade names, logos and website names and URL addresses are owned by us or have been licensed to us. We also own or have a license to the copyrights that protect the content of our solutions. Solely for convenience, the trademarks, service marks, trade names and copyrights referred to in this Form 10-K are listed without the ©, ® and ™ symbols, but we will assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensors to these trademarks, service marks, trade names and copyrights.

This Form 10-K may include trademarks, service marks or trade names of other companies. Our use or display of other parties’ trademarks, service marks, trade names or products is not intended to, and does not imply a relationship with, or endorsement or sponsorship of us by, the trademark, service mark or trade name owners.

Unless otherwise indicated or the context otherwise requires, all references in this Form 10-K to “we,” “us,” “our,” the “Company,” “Hamilton Lane” and similar terms refer to Hamilton Lane Incorporated and its consolidated subsidiaries. As used in this Form 10-K, (i) the term “HLA” refers to Hamilton Lane Advisors, L.L.C. and (ii) the terms “Hamilton Lane Incorporated” and “HLI” refer solely to Hamilton Lane Incorporated, a Delaware corporation, and not to any of its subsidiaries.

Available Information

Our website is located at www.hamiltonlane.com, and the Shareholders page of our website is located at <https://shareholders.hamiltonlane.com>. We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and file or furnish reports, proxy statements and other information with the Securities and Exchange Commission (the “SEC”). Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements, statements of changes in beneficial ownership and amendments to those reports are available for free on the Shareholders page of our website as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. We also make certain corporate governance documents available on the Shareholders page of our website, including board committee charters and our code of conduct and ethics. In addition, the SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

We webcast our earnings calls and certain events we participate in or host with members of the investment community on the Shareholders page of our website. We may use our website (www.hamiltonlane.com), including pages therein related to our various strategies and funds, and LinkedIn account as channels of distribution of Company information. The information we post through these channels may be deemed material. Accordingly, investors should monitor these channels, in addition to following our press releases, SEC filings and public conference calls and webcasts. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, press and earnings releases as part of the Shareholders page of our website. Investors and others can receive notifications of new information posted on the Shareholders page of our website in real time by subscribing to email alerts.

The contents of our website are not incorporated by reference into this Form 10-K or in any other report or document we file with the SEC, and any references to our website are intended to be inactive textual references only.

Cautionary Note Regarding Forward-Looking Information

Some of the statements in this Form 10-K may constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), Section 21E of the Exchange Act, and the Private Securities Litigation Reform Act of 1995. Words such as “will”, “expect”, “believe”, “estimate”, “continue”, “anticipate”, “intend”, “plan” and similar expressions, or the negative version of these words or other comparable words, are intended to identify these forward-looking statements. Forward-looking statements discuss management’s current expectations and projections relating to our financial position, results of operations, plans, objectives, future performance and business. All forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause actual results to be materially different, including, risks relating to: the historical performance of our investments may not be indicative of future results or future returns on our Class A common stock; our ability to identify suitable investment opportunities for our clients; the impact of any poorly performing investments on our investment management revenue and earnings as well as our ability to raise capital; intense competition in our industry, including competition for access to investments and for customized separate account and advisory clients; customized separate account and advisory account fee revenue not being a long-term contracted source of revenue; our ability to appropriately deal with conflicts of interest; our ability to retain our senior management team and attract additional qualified investment professionals; our ability to expand our business and formulate new business strategies; the impact of declines in the pace or size of fundraising or investments made by us on behalf of our specialized funds or customized separate accounts; our ability to manage our obligations under our debt agreements and the dependence on leverage by certain funds, customized separate accounts and portfolio companies; our ability to comply with the investment guidelines set by our clients; the impact of misconduct by our employees, advisors or third-party service providers; the unpredictable and sporadic timing at which we receive carried interest distributions; the exercise of redemption or repurchase rights by investors in certain of our funds; the subjectivity of valuation methodologies; our investments may be in relatively high-risk, illiquid assets; extensive government regulation, compliance failures and changes in law or regulation could adversely affect us; our ability to maintain our desired fee structure; failure to maintain the security of our information technology networks, or those of our third-party service providers, or data security breaches; volatile market, economic and geopolitical conditions or catastrophic events, which can adversely affect our fundraising, our business and the investments made by our funds or accounts; and our only material asset is our interest in Hamilton Lane Advisors, L.L.C., and we are accordingly dependent upon distributions from such entity to pay dividends, taxes and other expenses.

The foregoing list of factors is not exhaustive and should be read in conjunction with the other cautionary statements that are included herein and in our other periodic filings. For more information regarding these risks and uncertainties as well as additional risks that we face, you should refer to the “Summary of Risk Factors” below and the more detailed discussion of our Risk Factors included in Part I, Item 1A of this Form 10-K and in our subsequent reports filed from time to time with the Securities and Exchange Commission (the “SEC”), which are accessible on the SEC’s website at www.sec.gov. The forward-looking statements included in this Form 10-K are made only as of the date we filed this report. We undertake no obligation to update or revise any forward-looking statement as a result of new information or future events, except as otherwise required by law.

Summary of Risk Factors

The following is a summary of the principal risk factors associated with investing in our Class A common stock. You should read this summary in conjunction with the more detailed description of these risks in Part I, Item 1A of this report under the heading “Risk Factors” and in other filings that we make from time to time with the SEC.

We are subject to risks related to our business, including risks related to:

- historical investment performance not being indicative of future results or returns;
- the identification and availability of suitable investment opportunities;
- the impact of any poor investments on our revenue and fundraising efforts;
- competition for investment funds and investments;
- conflicts of interest;
- retaining our senior management team and recruiting other qualified professionals;
- expanding our business, formulating new business strategies, entering into new geographic markets and strategic partnerships and integrating acquired businesses with ours;
- declines in the pace or size of fundraising or investments made by us;
- our use of leverage and the dependence on leverage by certain funds, customized separate accounts and portfolio companies and exposure to the credit risks of financial institutions;
- investors not satisfying their contractual obligations to fund capital calls;
- our failure to comply with investment guidelines;
- misconduct by our employees, advisors or third-party service providers;
- the variability at which we receive distributions of carried interest;
- the redemption or repurchase rights of investors in certain of our funds, including the impact of the imposition by us of any limitations on redemptions or repurchases;
- the subjectiveness of valuation methodologies;
- investments in relatively high-risk, illiquid assets;
- the business, regulatory, legal and other complexities of investment opportunities;
- undiversified investments;
- investments in funds and companies that we do not control;
- investments that rank junior to investments made by other investors;
- our ability to sustain the growth of our business;
- our ability to maintain our desired fee structure;
- our compliance with additional regulatory requirements;
- our risk management strategies and procedures;
- limitations in our due diligence process;
- our use of technology to collect and analyze data;
- operational risks;
- the security of our information technology networks and those of our third-party service providers;
- compliance with data security and privacy laws and regulations;
- technological developments in artificial intelligence (“AI”);
- our ability to obtain, maintain, protect and enforce our intellectual property;
- claims for damages and negative publicity;
- our business operations outside of the United States; and
- our commitments and disclosures regarding sustainability, responsible investing and related matters.

We are subject to risks related to our industry, including risks related to:

- intense competition in the investment management industry;

- difficult or volatile market, geopolitical and economic conditions or the occurrence of catastrophic events;
- extensive government regulation of our business by the United States and other jurisdictions;
- federal, state and foreign anti-corruption and sanctions laws;
- regulation of investment advisors internationally; and
- regulator and investor expectations and legislation regarding sustainability, responsible investing and related matters.

We are subject to risks related to our organizational structure, including risks related to:

- our status as a “controlled company” within the meaning of the Nasdaq listing standards;
- our dependence on distributions from HLA to pay dividends, taxes and other expenses;
- challenges by regulators with respect to our tax treatment;
- our obligations to make distributions to current and former members of HLA;
- potential conflicts of interest between members of management who hold most of their economic interest in HLA through other entities and holders of our Class A common stock;
- the disparity in voting rights between the classes of our common stock;
- the sale of a large number of shares of our Class A common stock or the perception that such sales could occur;
- our ability to pay dividends;
- anti-takeover provisions in our charter documents and under Delaware law;
- our certificate of incorporation’s designation of the Court of Chancery in the State of Delaware as the exclusive venue for certain types of lawsuits;
- being deemed an “investment company”; and
- the potential assignment of our investment advisory agreements upon a change of control.

PART I

Item 1. Business

Our Company

We are a global private markets investment solutions provider dedicated to private markets investing. Since our founding in 1991, we have partnered with clients to design, implement and oversee portfolios of private markets funds and direct investments to help them access a diversified set of investment opportunities worldwide. As of March 31, 2026, we had approximately \$142 billion of discretionary assets under management (“AUM”), and approximately \$905 billion of non-discretionary assets under advisement (“AUA”).

Our clients include a broad range of investors from large global institutional investors to private wealth clients. Our clients rely on us for our private markets expertise, industry relationships, differentiated investment access, risk management capabilities, proprietary data advantages and analytical tools to navigate the complexity of private markets investing. While some institutional clients maintain their own internal investment teams, our clients look to us for additional expertise, advice and outsourcing capabilities. We also service a growing number of non-institutional clients from the private wealth channel, including family offices and high-net-worth individuals, who utilize our products and services to gain access to private markets opportunities.

We currently have approximately 785 employees, including approximately 265 investment professionals, operating across 23 global offices supporting our platform and servicing our clients throughout the world.

We offer a variety of investment solutions to address our clients’ needs across a range of private markets, including private equity, private credit, real estate, infrastructure, other real assets, growth equity, venture capital and impact. These solutions are constructed from a range of investment types, including primary investments in funds managed by third-party managers, direct investments alongside such funds and acquisitions of secondary stakes in such funds, with a number of our clients utilizing multiple investment types. These solutions are offered in a variety of formats covering some or all phases of private markets investment programs:

- *Customized Separate Accounts:* We design and build customized portfolios of private markets funds and direct investments to meet our clients’ specific portfolio objectives with regard to return, risk tolerance, diversification and liquidity. We generally have discretionary investment authority over our customized separate accounts, which comprised approximately \$92 billion of our AUM as of March 31, 2026.
- *Specialized Funds:* We invest and manage commingled specialized primary, secondary, private credit, direct equity and multi-strategy investment funds across the private markets, including those that focus on specific markets or strategies such as venture capital, infrastructure, real estate and impact. Our specialized funds include both drawdown funds and evergreen funds. For more information regarding how our specialized funds are structured and other key terms, see “—Fees and Other Key Contractual Terms—Specialized Funds” below. Specialized funds comprised approximately \$50 billion of our AUM as of March 31, 2026.
- *Advisory Services:* We offer non-discretionary investment advisory services to assist clients in developing and implementing their private markets investment programs. Our investment advisory services include asset allocation, strategic plan creation, development of investment policies and guidelines, the screening and recommending of investments, the monitoring of and reporting on investments, and investment manager review and due diligence. Our advisory clients include some of the largest and most sophisticated private markets investors in the world. We had approximately \$905 billion of AUA as of March 31, 2026.

- *Distribution Management:* We offer distribution management services to our clients through active portfolio management to enhance the realized value of publicly traded stock they receive as distributions in-kind from private equity funds.
- *Reporting, Monitoring, Data and Analytics:* We provide our clients with comprehensive reporting and investment monitoring services, usually bundled into our broader investment solutions offerings, but also on a stand-alone, fee-for-service basis. We also provide comprehensive research and analytical services as part of our investment solutions, leveraging our large, global, proprietary and high-quality database to support transparency, decision making and portfolio construction. Our data, as well as our benchmarking and forecasting models, are accessible through our proprietary technology solution, Cobalt LP, on a stand-alone, subscription basis.

Our client and investor base is broadly diversified by type, size and geography. Our client base ranges from those seeking to make an initial investment in private markets to some of the world's largest and most sophisticated investors in the asset class. As we offer a highly customized, flexible service, we are equipped to provide investment services to institutional clients of all sizes and with different needs, internal resources and investment objectives. Our clients include prominent institutional investors in the United States, Canada, Europe, the Middle East, Asia, Australia and Latin America. We provide private markets solutions and services to some of the largest global pension, sovereign wealth and U.S. state pension funds, and believe we are a leading provider of private markets solutions for U.S. labor union pension plans. We also serve a growing number of smaller public and corporate pension plans, sovereign wealth funds, financial institutions and insurance companies, endowments and foundations, as well as family offices and high-net-worth individuals.

Our intermediary clients, which include registered investment advisers, wirehouses and private banks, enable us to provide our investment products to a growing set of high-net-worth individuals and family offices. Historically, this segment of investors has had limited options for gaining exposure to the private markets. Hamilton Lane's private wealth platform offers these investors access to private capital and its wealth creation potential. Our differentiators include a global platform and a range of risk/return offerings via both drawdown funds and semi-liquid evergreen funds and across multiple investment strategies.

We have revenue streams from a variety of client types in multiple geographic regions, with no single client representing more than 2% of management and advisory fee revenues. For the year ended March 31, 2026, our top 10 clients generated approximately 11% of management and advisory fee revenues and our top 20 clients generated approximately 16% of management and advisory fee revenues with all of our top 20 clients having multiple allocations, products or services with us. A significant portion of our management and advisory fee revenue base is contractual in nature and is based on the long-term nature of our specialized funds and customized separate accounts as well as long-term relationships with many of our clients; however, the predictability of our fee revenue is subject to, among other things, the mix of fee bases, the variability of incentive fees and the pace of fundraising and deployment.

Since our inception, we have experienced consistent, strong growth, which continues to be reflected in our more recent AUM and AUA growth. As of March 31, 2026, we had AUM of approximately \$142 billion, reflecting a 7% compound annual growth rate ("CAGR") from March 31, 2022, and our AUM increased in each fiscal year during this timeframe. We had approximately \$905 billion of AUA as of March 31, 2026, reflecting a 3% CAGR from March 31, 2022.

Organizational Structure

HLI was incorporated in the State of Delaware on December 31, 2007 and is a holding company with no direct operations. Its principal asset is an equity interest in HLA. HLI serves as the managing member of HLA and operates and controls all of HLA's business and affairs. HLI conducted its initial public offering ("IPO") in 2017.

We have what is commonly referred to as an “Up-C” structure, which provides our pre-IPO owners with the tax advantage of continuing to own interests in a pass-through structure and provides potential future tax benefits for both the public company and the legacy owners (through the tax receivable agreement) when they ultimately exchange their pass-through interests for shares of Class A common stock or, at our election, for cash. HLI has dual-class common stock, the rights of which are described in more detail below. The below chart summarizes our organizational structure as of March 31, 2026.

- (1) The Class B Holders, who hold Class B units of HLA, and Class C Holders, who hold Class C units of HLA, are pre-IPO owners of our business who continue to hold their interests directly in HLA. Class B units and Class C units may be exchanged on a one-for-one basis for shares of Class A common stock or, at our election, for cash, pursuant to and subject to the restrictions set forth in the exchange agreement.
- (2) We hold all of the Class A units of HLA, representing the right to receive approximately 77.0% of the distributions made by HLA. We act as the sole manager of HLA and operate and control all of its business and affairs.

Class A and Class B Common Stock

Our Class A common stock is our publicly traded stock and is listed on the Nasdaq Stock Market (“Nasdaq”) under the symbol “HLNE”. Our Class B common stock was issued as part of a series of corporate reorganization transactions in connection with our IPO to the holders of our Class B units, who are certain significant outside investors, members of management and significant employee owners. There is no trading market for our Class B common stock.

Economic Rights

Holders of Class A common stock are entitled to full economic rights, including the right to receive dividends when and if declared by our board of directors, subject to any statutory or contractual restrictions on the payment of dividends and to any restrictions on the payment of dividends imposed by the terms of any outstanding preferred stock.

Holders of Class B common stock are entitled to receive only the par value of the Class B common stock upon exchange of the corresponding Class B unit pursuant to the exchange agreement. The exchange of a Class B unit will result in the redemption and cancellation of the corresponding share of Class B common stock.

Voting Rights

Except as provided in our certificate of incorporation or by applicable law, holders of Class A common stock and Class B common stock vote together as a single class. Our Class A common stock entitles the holder to one vote per share. Our Class B common stock entitles the holder to ten votes per share until a sunset becomes effective. After a sunset becomes effective, each share of Class B common stock will then entitle the holder to one vote. A sunset may be triggered upon the occurrence of certain events relating to the ownership of Hamilton Lane equity and employment of our Executive Co-Chairmen Hartley R. Rogers and Mario L. Giannini, and other holders, as described in detail in our certificate of incorporation. Because a sunset may not take place for some time, certain of the Class B Holders will, by virtue of their voting control of us and the stockholders agreement described below, continue to control us for the near future.

Our Class B common stockholders collectively hold 73.2% of the combined voting power of our common stock. Certain of the holders of our Class B common stock who are significant outside investors, members of management and significant employee owners have, pursuant to a stockholders agreement, agreed to vote all of their shares in accordance with the instructions of HLA Investments, LLC (“HLAI”), our controlling stockholder. The parties to the stockholders agreement control approximately 74.5% of the combined voting power of our common stock. This group is therefore able to exercise control over all matters requiring the approval of our stockholders, including the election of our directors and the approval of significant corporate transactions.

When a Class B Holder exchanges Class B units pursuant to the exchange agreement, it will result in the redemption and cancellation of the corresponding number of shares of our Class B common stock in exchange for a cash payment of the par value of such shares and, therefore, will decrease the aggregate voting power of our Class B Holders.

Business Strategy

The alternative investment industry has experienced significant and consistent growth, which we expect to continue and contribute to our future growth in the long term. Given our leading market position and strong reputation for investing and client service, our objective is to continue to leverage the following strategic advantages to exceed the industry growth rate.

Leverage our market leading position as one of the largest allocators of primary capital to the world’s leading fund managers. Given the size and scale of the assets we manage and advise on, we are viewed as a crucial partner to the world’s leading private markets fund managers. We believe we are one of the largest allocators of primary capital to these fund managers and as such, have established ourselves as a trusted partner to these managers. Our clients benefit from this positioning by way of unique investment opportunities and economies of scale.

Develop innovative private markets solutions. Many of our clients engage us because of our ability to create customized programs that meet their particular investment needs and provide access to a broad spectrum of private markets investment opportunities. We believe that a broad range of solutions across almost every private markets asset class enables us to remain a leader in structuring private markets investment portfolios and to continue to provide the best solutions for our existing and future clients. We intend to continue to meet our clients’ demands for alternative investments via primary, secondary and direct investment opportunities, which provide attractive return characteristics, as well as innovative specialized fund products, while at the same time allowing us to benefit from economies of scale. In addition, we continue to expand into adjacent asset classes and newer strategies, which will allow us to further broaden our solutions capabilities, diversify our business mix and allow us to benefit from growth in private markets asset classes. Examples of such expansion include asset classes such as private credit, infrastructure and real assets, as well as expansion of our evergreen fund offerings.

Diversify and grow client base and broaden access to the private markets. We aim to continue to expand our relationships with existing clients and intend to capitalize on significant opportunities with new clients

globally across both our institutional and private wealth channels. In recent years, we have significantly expanded our evergreen fund offerings, which provide access to various private markets strategies, including private equity, secondaries, private credit, infrastructure and venture capital, through continuously offered vehicles with periodic subscription and redemption or repurchase features, subject to applicable law, limitations and available liquidity. We expect our evergreen platform to continue to be a key contributor to our growth. In addition to demand from high-net-worth and other wealth investors, we have seen increased adoption of our evergreen funds by institutional investors, including public pension plans and insurance companies, alongside growing interest from defined contribution channels. In parallel, we plan to continue to broaden our suite of drawdown specialized fund offerings as well as leverage our global platform, proprietary data and analytics, technology solutions and manager relationships to develop customized separate accounts for a broader set of global institutions seeking tailored private markets solutions.

Expand distribution channels. We continue to build a scalable, cost-effective global institutional sales organization, which provides us with a strong local presence in several markets. Our sales organization comprises our institutional client and private wealth solutions groups, which are dedicated to marketing our services and products globally. In addition, we intend to increase our profile with influential intermediaries that advise individual and institutional clients, particularly small and medium-sized institutions and high-net-worth individuals and family offices. We have also entered into strategic distribution partnerships with financial institutions in certain geographical regions and market sectors to gain access to their captive client bases. As we continue to explore different ways to access alternative distribution channels, we are also acting as “sub-advisor” for financial intermediaries with significant distribution strength. In this role, we perform a range of investment services from portfolio construction to investment management, while the distribution partner focuses on product distribution and client service. In the context of these partnerships, the distribution partner often aims to provide its clients with products under its own brand, which we achieve by rebranding our existing offerings or by creating customized offerings carrying the distribution partner’s name. We anticipate increasing sub-advisory opportunities as we continue to target high-net-worth individuals and family offices. We continue to expand our private wealth distribution footprint globally, including through relationships with private banks, independent wealth managers and platforms in Europe and Asia.

Identify unique technology solution providers and strategic partners that we believe can help make us and the industry better and put our balance sheet capital behind them to form mutually beneficial partnerships. We view the implementation of technology into our workflows as critical to maintaining our market-leading position in private markets. Given this status, we are often a sought-after partner for technology-oriented businesses that are developing cutting-edge and innovative solutions that will help grow and improve the industry. We identify and develop strategic partnerships with, and/or opportunistically seek minority stakes in, these companies, and often are either a client of these companies or share in a common vision seeking to provide strategic benefits to both parties. We have also been proactive in partnering with leading digital assets platforms, including initiatives to offer tokenized or on-chain access to certain of our evergreen funds. We expect to continue exploring tokenization and related digital assets opportunities in a disciplined manner, with a focus on improving accessibility, transparency and operating resiliency.

Expand private markets solutions and products to defined contribution plans, retail and similar pools of investable assets. We believe we are pioneers in the creation, distribution and management of products such as specialized secondaries, direct investments and specialty credit strategies that are designed to serve defined contribution retirement plans and similar entities. Many of our defined contribution retirement plan clients are based outside of the United States, ranging across Australia, Europe and Latin America, among other geographies. While these clients tend to have lower private markets allocations than those of defined benefit pension plans, their comfort with, interest in and allocations to private markets alternative investments have tended to increase over time, due in part to significant advancements in the areas of private markets data and benchmarking, where we believe we play a leading role. Therefore, we intend to continue to develop, market and manage investment solutions and products specifically aimed at helping these investors create appropriately structured private markets alternatives programs. In light of federal policy in the United States becoming more favorable to the inclusion of alternative assets in defined contribution plans and similar pools of capital, there may be significant future opportunities to expand our offerings to investors in such plans.

Expand globally. We have substantially grown our global presence, both in terms of clients and investments, by expanding our international offices as well as our client presence. We have established offices throughout the world, from which we serve major institutional clients and review and commit capital to established local private markets funds on behalf of our clients. We expect to continue expanding our global presence through further direct investment in personnel, development of client relationships and increased investments with, and direct investments alongside, established private markets fund managers.

We believe that many institutional investors outside the United States are currently underinvested in private markets asset classes and that capturing capital inflows into private capital investing from non-U.S. global markets represents a significant growth opportunity for us. We think that investors from developing regions will increasingly seek branded multi-capability alternative investment managers with which to invest. We believe that geographically and economically diverse non-U.S. investors will require a highly bespoke approach and will demand high levels of transparency, governance and reporting. We have seen this pattern developing in many places, including Europe, the Middle East, Latin America, Australasia, Japan, South Korea, Southeast Asia and China, and have positioned ourselves to take advantage of it by establishing local presences with global investment capabilities in these regions.

We believe we are particularly well-placed to pursue the opportunities arising from increased allocations among institutional investors and the rapid wealth creation globally among high-net-worth individuals and family offices because of our strong brand recognition, multi-office resources, experienced team of investment professionals and comprehensive suite of products and services.

Leverage proprietary databases and analytics to enhance our existing service offerings and develop new products and services. When compared to more liquid investment areas, the private markets industry is characterized by the limited availability and inconsistency of quality information. We believe that the general trend toward more transparency and consistency in private markets reporting will create new opportunities for us. We intend to use the advantages afforded to us by our proprietary databases, analytical tools and deep industry knowledge to drive our performance and provide our clients with customized solutions across private markets asset classes. We expect that our data and analytical capabilities will play an important role in continuing to differentiate our products and services from those of our competitors.

Investment Types

We provide our clients access to private markets investment opportunities diversified across financing stages, geographic regions and industries through the investment types described below.

- ***Primary Investments.*** Primary investments are investments in private markets funds managed by third-party general partners at the time the funds are initially launched. The investments take the form of a capital commitment, where the fund will call capital from investors over time as investments are made. At the time we commit capital to a fund on behalf of our specialized funds or customized separate accounts, the investments that the fund will make are generally not known and investors typically have very little or no ability to influence the investments that are made during the fund's investment period. Primary funds usually have a contractual duration of between 10 and 15 years, with the capital typically deployed over a period of four to six years. For advisory and customized separate account clients, our investment recommendations and decisions are designed to achieve specific portfolio construction and return objectives mutually developed by us and the clients. Subject to specific client investment guidelines, we rarely invest in "first time" funds unless the management team has previously worked successfully together and built a credible and impressive track record.
- ***Secondary Investments.*** Secondary investments are interests in existing private markets funds that are acquired in privately negotiated transactions, typically after the end of the private markets fund's fundraising period. The private secondary market is a non-regulated private market in which buyers and sellers directly negotiate the terms of transactions. The secondary market has grown dramatically in the last 20 years and today provides a reliable liquidity option for owners of private markets interests across the entire spectrum of strategies as well as attractive buying opportunities for

secondary investors. Institutional investors utilize the secondary market for strategic portfolio rebalancing, rationalizing overlapping positions resulting from mergers and acquisitions or providing liquidity when facing cash constraints. As private markets have evolved, so too have the needs and objectives of both limited partners and general partners. Today, the secondary market extends beyond purchases of existing limited partner interests and now includes a number of liquidity solutions that include, but are not limited to, continuation funds, single-asset purchases and strip sales.

- *Direct investments.* Direct investments (formerly referred to as “co-investments”) are direct equity or credit investments alongside private markets funds in underlying portfolio companies. This strategy aims to partner with leading fund managers to invest capital directly into the companies, generally on the same terms as the lead general partner. Our direct investment strategy starts with actively soliciting the managers of private markets funds in which we have made investments to offer our specialized funds and customized separate accounts all direct investment opportunities that may arise from their investment operations.

The investment team analyzes and considers each deal to select those opportunities that best suit the direct investment funds’ investment objectives and create an appropriate diversity of investment type, industry, geography and manager. We generally make direct investments on a parallel basis with the private markets funds and managers leading the investments, by purchasing similar securities on similar terms with exit provisions that allow the direct investment funds through which we invest to realize their investments at the same time and on a pro rata basis.

Investment Process and Monitoring

Our investment management organization is structured around a series of specialized teams, each dedicated to a distinct focus area within private markets, including fund investments & managed solutions, direct equity, direct credit, secondaries, real assets, venture capital & growth equity, and our portfolio management group. By grouping experienced professionals according to investment discipline, we seek to ensure comprehensive analysis and thoughtful decision-making at every stage of the investment lifecycle. We also believe strategic collaboration across teams drives knowledge sharing, enhances deal sourcing, strengthens oversight and better enables the firm to respond to market development.

Ultimate investment authority at Hamilton Lane resides with the appropriate and relevant investment committees (“ICs”). The ICs are separated by strategy and led by the firm’s most senior professionals in their area of expertise. This includes our primary IC, secondary IC, direct equity IC, direct credit IC, real assets IC, venture capital & growth IC and our responsible investment committee. Our ICs collectively review, opine and make the ultimate decision as to the opportunities in which we will invest. Every investment opportunity is first evaluated by the respective investment team and then formally presented to the IC, which convenes at multiple points throughout the diligence process. Key concerns and issues are addressed collaboratively in committee discussions, allowing for robust challenge and thoughtful debate before any final decisions. Formal committee votes determine investment approvals. An investment is deemed approved unless more than two members vote against it, establishing a high threshold for consensus and quality.

Due Diligence Process

Our due diligence process typically utilizes the same core process and standards across all asset classes, employing a cross-functional approach that allows each of our investment teams to leverage one another’s expertise. The same investment process is adhered to for each opportunity, regardless of prior exposure to any particular fund manager, and includes review of quantitative and qualitative factors. An existing relationship with a manager allows the investment team to focus more quickly on key diligence matters but does not allow for shortcuts in the process. At the core of the process is seeking to gain an in-depth understanding of the manager and consistent involvement by the applicable IC at each phase in diligence. Throughout the years, we have invested heavily and prioritized the ability to share data and information efficiently among all of our investment teams. The teams leverage our technology systems to guide the investment decision process.

Our quantitative process focuses on the manager's investment track record, utilizing our proprietary models to identify past drivers of success and the potential for replicating that performance in the future. We analyze the track record along multiple dimensions such as deal size, lead investment professional, industry and geography to determine if there are any trends or anomalies. We tailor our analysis by strategy with a focus on the key risk and value drivers in buyout, credit and venture and growth investments. Our qualitative analysis is based on in-person meetings, as well as reference calls drawn from both manager-provided lists and our broader professional network. During these meetings, we seek to meet as many members of the manager's team as possible to assess their individual abilities and collective decision-making process. We also benefit from deep relationships with deal sponsors on both the equity and credit side of our direct investment teams.

Operational Due Diligence

Our operational due diligence ("ODD") team operates independently of our investment team and has separate voting rights on each of the firm's primary fund investment opportunities, which means that we will only proceed with primary investments that are approved by both our investment committee and our ODD team. This independent structure is designed to ensure that operational considerations receive equal weight alongside investment merit. Each primary investment diligence completed by our ODD team includes a comprehensive review and results in a report documenting each operational risk area and any existing mitigating factors, our recommendations to each manager and our proprietary risk-rating system. These reports serve as a resource throughout the lifecycle of an investment, enabling ongoing monitoring and informed decision-making as operational conditions evolve.

Responsible Investment

We believe that developing and implementing responsible investment practices and sustainable investing capabilities is critical to creating long-term value. We integrate responsible investing, sustainability and climate considerations into our investment process and evaluate their potential financial impacts in connection with investment decisions. In our due diligence process, we collect and assess data on general partners' sustainability practices, including through the use of Novata, a technology platform for sustainability data collection and benchmarking in the private markets of which we are a founding member, and we evaluate secondaries and direct investment transactions using a structured sustainability due diligence framework. We believe that tracking sustainability-related data and continuing to develop tools and frameworks to assess our deal flow and practices has enhanced our ability to provide solutions, transparency and insights for investors focused in this area.

As long-term investors, we seek to mitigate the risks within our portfolio and have pledged to reach net zero emissions by 2050 or sooner across our discretionary assets under management. As an important first step towards this goal, we became a signatory to Initiative Climate International in 2022, a platform of leading private equity investors and firms dedicated to understanding and reducing carbon emissions of private equity-backed companies. Our responsible investment committee, composed of senior members at the firm, oversees our responsible investment strategy, acts as the IC for impact investments and oversees the implementation of our responsible investment policy. The committee is supported by our sustainability team and by an investment-platform sustainability taskforce with representatives across our investment organization. We expect to continue to review and refine our approach over time, including our policies and procedures.

Allocation of Investment Opportunities

As investments are approved by the relevant investment committees, our portfolio management group utilizes portfolio construction methodologies as it deems appropriate to analyze the portfolios of all clients currently investing and submits a proposed allocation to the chief compliance officer or his designee for review and approval. On at least a quarterly basis, the allocation committee will review the materials presented by the portfolio management group to determine that the allocations among clients are fair and reasonable, were made in accordance with our contractual obligations, fiduciary duties to our clients and

legal requirements and are consistent with our allocation policies. The allocation committee is composed of senior professionals throughout the organization.

Monitoring & Reporting

Within our client service and back-office functions, we have multiple teams dedicated to monitoring and reporting on the investments that we manage for our clients. We maintain a disciplined investment monitoring process designed to adapt portfolio allocation to enhance returns in our advisory and customized separate account portfolios, as well as in our specialized funds. Once a primary or secondary investment is closed, we have frequent conversations with private markets fund managers, hold periodic in-person meetings (conditions permitting) and attend annual meetings and advisory board meetings. Our back-office team also includes a separate fund accounting team that is responsible for creating financial statements for clients with fund vehicle structures.

Our investment monitoring includes real-time recording of cash flows, valuations and granular portfolio company details. We deliver quarterly reports with in-depth analysis for every investment that we manage. We are also able to transition client data and portfolio information from other managers or consultants. We monitor each investment within our clients' portfolios in-house. Cobalt LP., our online, proprietary private markets analytics platform, provides clients with tools to derive and customize advanced analytics related to portfolio performance and exposure, including benchmarks and forecasts.

Client Service

Our client service teams include professionals located strategically throughout the world who are responsible for business development, client relationship management and portfolio design for our institutional and other clients. At the beginning of each advisory and customized separate account engagement, a senior professional (relationship manager) is designated as the principal contact for that client and works with the client to develop a strategic private markets plan and mandate guidelines. This professional coordinates with our portfolio management group and investment teams to align pipeline and investment opportunities with each client's objectives and to provide ongoing updates regarding fundraising activity, portfolio positioning and market conditions.

Assets Under Management and Advisement

As of March 31, 2026, we had total AUA and AUM of approximately \$1.0 trillion, of which \$142 billion represents discretionary AUM from our customized separate accounts and specialized funds, and \$905 billion represents non-discretionary AUA managed on behalf of our advisory accounts. Our AUM and AUA have distinctive terms and fee arrangements, and therefore are presented separately in this section.

AUM

Our AUM, as presented in this Form 10-K, comprise the assets associated with our customized separate accounts and specialized funds. AUM does not include the assets associated with our distribution management services. We classify assets as AUM if we have full discretion over the investment decisions in an account. We calculate our AUM as the sum of:

- (1) the net asset value ("NAV") of our clients' and funds' underlying investments;
- (2) the unfunded commitments to our clients' and funds' underlying investments; and
- (3) the amounts authorized for us to invest on behalf of our clients and fund investors but not committed to an underlying investment.

Management fee revenue is based on a variety of factors and is not linearly correlated with AUM. However, we believe AUM is a useful metric for assessing the relative size and scope of our asset management business.

Our AUM has grown from approximately \$106 billion as of March 31, 2022 to approximately \$142 billion as of March 31, 2026, representing a CAGR of approximately 7%. The following chart summarizes this growth.

AUA

Our AUA comprise assets from clients for which we do not have full discretion to make investments in their account. We generally earn revenue on a fixed fee basis on our AUA client accounts for services including asset allocation, strategic planning, development of investment policies and guidelines, screening and recommending investments, monitoring and reporting on investments and investment manager review and due diligence. Advisory fees vary by client based on the amount of annual commitments, services provided and other factors. Since we earn annual fixed fees from the majority of our AUA clients, the growth in AUA from existing accounts does not have a material impact on our revenues. However, we view AUA growth as a meaningful benefit in terms of the amount of data we are able to collect and the degree of influence we have with fund managers.

Assets related to our advisory accounts have increased from approximately \$795 billion as of March 31, 2022, to approximately \$905 billion as of March 31, 2026, representing a CAGR of approximately 3%. Our AUA clients are predominately large institutional investors, with 45% of AUA related to public pension funds and 31% related to sovereign wealth funds. Our AUA is diversified across geographies with approximately 44% derived from clients based outside of the United States.

The following chart summarizes the growth of our AUA since fiscal year 2022.

Diversification of Assets

Given our goal of achieving strong investment returns and portfolio diversification for clients, investments are made across multiple private markets sub-asset classes, including corporate finance/buyout, growth equity, venture capital, senior credit, mezzanine, distressed debt, real estate, real assets, infrastructure and other special situation funds (e.g., industry-focused funds and multi-stage funds). Because we have a considerable volume of investment opportunities globally, we selectively invest not only across sub-asset classes, but also across all major geographic regions, including North America, Europe, Asia, Australasia, Latin America, the Middle East and Africa.

Fee-Earning Assets Under Management

Fee-earning AUM is a metric we use to measure the assets from which we earn management fees. Our fee-earning AUM comprise assets in our customized separate accounts and specialized funds from which we derive management fees that are generally derived from applying a certain percentage to the appropriate fee base. We classify customized separate account revenue as management fees if the client is charged an asset-based fee, which includes the majority of our discretionary AUM accounts but also includes certain non-discretionary AUA accounts. Our fee-earning AUM is equal to the amount of capital commitments, net invested capital or NAV of our customized separate accounts and specialized funds depending on the fee terms. A substantial portion of our customized separate accounts and specialized funds earn management fees based on capital commitments or net invested capital, which are generally not affected by short-term market appreciation or depreciation. However, certain of our products, earn management fees based on NAV, and accordingly, management fees and fee-earning AUM for those products may be affected by changes in market valuations. As a result, the extent to which our revenues and fee-earning AUM are affected by changes in market value varies based on the mix of fee structures across our products.

Our calculations of fee-earning AUM may differ from the calculations of other asset managers, and as a result, this measure may not be comparable to similar measures presented by other asset managers. Our definition of fee-earning AUM is not based on any definition that is set forth in the agreements governing the customized separate accounts or specialized funds that we manage.

As of March 31, 2026, our fee-earning AUM was approximately \$82 billion compared to \$142 billion in AUM. The difference is due primarily to \$36 billion of discretionary AUM earning a flat fee or fee on number of funds for which we categorize revenue as advisory and reporting. This was partially offset by a decrease of \$4 billion of fee-earning AUM from customized separate accounts clients with non-discretionary AUA. The remaining \$28 billion is non fee-earning AUM, which includes accounts that earn fees as discretionary AUM is invested or considered active as well as accounts past their fee-earning period.

The following chart summarizes the growth of our fee-earning AUM since fiscal year 2022.

* Amounts may not foot due to rounding

Our Clients

Our client base primarily comprises investors that range from those seeking to make an initial investment in the private markets to some of the largest and most sophisticated private markets investors in the asset class. As we offer highly customized, flexible solutions, we are equipped to provide investment services to clients of all sizes and with different needs, internal resources and investment objectives. Our clients include prominent investors located throughout the world. We believe we are a leading provider of private markets solutions for U.S. labor union pension plans, and we serve a growing number of smaller public and corporate pension plans, sovereign wealth funds, financial institutions and insurance companies, endowments and foundations, as well as family offices and high-net-worth individuals.

As of March 31, 2026, our client and investor base included over 2,800 institutions and intermediaries and is broadly diversified by type, size and geography. Our intermediary clients enable us to provide our investment products to an expanded range of high-net-worth individuals and family offices. We have revenue streams from a variety of client types in multiple geographic regions, with no single client representing more than 2% of management and advisory fee revenues. Approximately 61% of our fiscal 2026 management and advisory fee revenues came from clients based outside of the United States. A significant portion of our management and advisory fee revenue base is contractual in nature and is based on the long-term nature of our specialized funds and customized separate accounts as well as long-term relationships with many of our clients; however, the predictability of our fee revenue is subject to, among other things, the mix of fee bases, the variability of incentive fees and the pace of fundraising and deployment. For the year ended March 31,

2026, our top 10 clients generated approximately 11% of management and advisory fee revenues, and our top 20 clients generated approximately 16% of management and advisory fee revenues.

Sales and Marketing

Our client and private wealth solutions groups are comprised of employees located strategically throughout the world, allowing us to be closer to our clients and have a local presence in many key markets. We intend to grow our global sales force as we seek to continue to build our client base and pursue growth opportunities in markets with less established private markets exposure. See “—Business Strategy.” The execution of our marketing strategy relies primarily on our own business development group, which historically has generated the substantial majority of our new client engagements. To enhance our access to markets where we do not currently have a local presence or that are dominated by captive client relationship models, we selectively engage highly respected third-party organizations to market our products and services. For example, we selectively use third-party distributors in Asia and Latin America.

Our client and private wealth solutions groups are responsible for identifying and contacting prospective clients for our products and services. Our sales professionals also work directly with consultants and financial advisors who advise smaller and medium-size institutional investors, high-net-worth individuals and family offices, who often rely on advice in the alternative investment area. Following the initial round of meetings and presentations, prospective advisory and customized separate account clients and specialized fund investors who wish to learn more about us often visit our offices to conduct in-depth due diligence of our firm. Our sales professionals lead this process, coordinate meetings, and continue to be the prospective client’s principal contact with us through the decision-making process.

Fees and Other Key Contractual Terms

Customized Separate Accounts

We enter into written contracts with each of our customized separate account clients. Within agreed-upon investment guidelines, we generally have full discretion to take actions customary for an investment manager with respect to the assets in the account, including buying, selling or otherwise effecting investment transactions in the name of and on behalf of the client and voting actions. In certain cases, clients retain consent or veto rights with respect to specified investments or activities. The discretion to invest committed capital generally is subject to investment guidelines established by our clients or by us in conjunction with our clients.

Structure. Our customized separate accounts are typically structured either through contractual arrangements involving an investment management agreement between us and the client or the establishment of an investment vehicle, generally structured as a limited partnership with the client as the sole limited partner and a wholly owned subsidiary of HLA as the general partner. These vehicles are typically formed in Delaware or a non-U.S. jurisdiction, such as the Cayman Islands or Luxembourg, in accordance with the client’s specifications. Other structures, including Delaware limited liability companies, Cayman unit trusts and/or Luxembourg companies, may also be used.

Our capital commitment to such vehicles is generally 1% of total capital commitments but in certain cases may be higher or lower. We manage these investment vehicles under an investment management agreement between the investment vehicle entity and us, and we manage all aspects of the vehicles, utilizing the services of third parties as needed, including administrators and custodial banks.

Fees. Generally our customized separate account clients are charged asset-based management fees annually on committed capital, net invested capital and/or net asset value (“NAV”), with the applicable fee base often transitioning over time in accordance with contractual terms. Fees frequently decrease over the life of the contract due to contractual step-downs in fee rates and/or a reduction in applicable fee base as capital is returned to clients. In some cases, we charge clients annual fixed fees.

For certain customized separate accounts structured as single client funds in which we have a general partner commitment we earn incentive fees through carried interest and performance fees, subject to the

contract terms and conditions. Incentive fees are inherently variable and can depend on realized investment performance over multi-year periods. Depending on fund structure and performance outcomes, incentive fees, if any, may be earned only after investors achieve specified return thresholds, and amounts received may be subject to potential repayment if overall performance conditions are not ultimately met.

For certain customized separate accounts structured as single client funds we earn performance fees that are based on the aggregate amount of unrealized or realized gains earned, subject to the achievement of defined minimum returns to the clients. Performance fees are based on a fixed percentage of net profits with some subject to a compounded annual preferred return that varies by account. We do not generally recognize performance fees unless the risk of clawback or reversal is not probable.

In certain cases, we also provide advisory and/or reporting services and, therefore, we also receive fees for services such as monitoring and reporting on a client's existing private markets investments. Customized separate accounts may include primary investments in our specialized funds, in which case we may receive management fees and/or incentive fees from those funds. We generally reduce or eliminate the asset-based and/or incentive fees or carried interest charged on such accounts to the extent the assets are invested in our specialized funds on a primary basis.

Duration and Termination. Customized separate account contracts have varying durations of up to 12 years or indefinite terms, and typically can be terminated by our clients generally upon 30 to 90 days' notice for specified reasons, or, in some cases, for any reason. Some contracts provide for termination on shorter or longer notice. Some contracts provide for penalty fees to be paid to us if termination occurs before the end of the stated term in the absence of cause. For contracts that provide for incentive fees based on realized gains, we typically retain the right to continue receiving those fees after no-fault termination with respect to existing investments at time of termination. See "Risk Factors—Risks Related to Our Business—Customized separate account and advisory account fee revenue is not a long-term contracted source of revenue and is subject to intense competition" included in Part I, Item 1A of this Form 10-K.

Specialized Funds

We invest and manage commingled specialized primary, secondary, credit, direct equity and multi-strategy investment funds across the private markets, including those that focus on specific markets or strategies such as venture capital, infrastructure, real estate and impact. The terms of each fund vary. We have described certain key terms below.

Structure. Our specialized funds are structured as drawdown funds and evergreen funds.

Our drawdown funds are primarily structured as limited partnerships (or series thereof) organized by us to accept commitments or funds from investors. The investors become limited partners in the funds, and a separate entity that we form and control acts as the general partner. Our capital commitment to the fund is generally 1% of total capital commitments.

Our evergreen funds are continuously offered investment vehicles with periodic subscription and redemption or repurchase features, in each case subject to the funds' terms, applicable limitations, available liquidity and applicable law. Investors typically subscribe on periodic dealing dates (most often monthly, but for our U.S. interval funds, daily) and may request redemptions or repurchases during specified monthly or quarterly windows, in each case subject to applicable limitations, notice requirements, the fund's discretion and available liquidity. These funds generally maintain investor capital fully or largely deployed without relying on traditional capital call and distribution mechanics. In the United States, our evergreen funds include vehicles registered as investment companies under the Investment Company Act of 1940, as amended (the "Investment Company Act"), whose public offerings are registered under the Securities Act. We also manage and advise evergreen vehicles organized in other jurisdictions, including Luxembourg SICAV and RAIF structures and a European Long-Term Investment Fund.

HLA, which we refer to as the “Manager”, generally serves as the investment manager of our funds. The Manager is registered as an investment advisor under the Investment Advisers Act of 1940 (the “Investment Advisers Act”). Responsibility for helping a fund’s general partner or board of directors with all aspects of the day-to-day operations of the fund generally is delegated to the Manager pursuant to an investment management agreement. Our investment management agreements describe the scope of services to be rendered by the Manager to the applicable funds and certain rights of termination. Other than as described with respect to our U.S. evergreen funds registered under the Investment Company Act, our funds themselves do not register as investment companies under the Investment Company Act, in reliance on exemptions from such registration.

The Manager generally makes all decisions concerning the making, monitoring and disposing of investments pursuant to authority delegated by the specialized fund’s general partner or board of directors. The investors in the funds take no part in the conduct or control of the business of the funds, have no right or authority to act for or bind the funds and have no influence over the voting or disposition of the securities or other assets held by the funds. These decisions are made by us as the Manager, typically in our sole discretion pursuant to authority delegated by the general partner or board of directors (or, for funds domiciled in Luxembourg, the alternative investment fund manager), subject to the investment limitations set forth in the agreements and offering documents governing each fund. With respect to our drawdown funds, the limited partners often have the right to remove the general partner, investment manager, or board members for cause or effect an early dissolution by supermajority vote, or in certain cases by a simple majority vote. In addition, the governing agreements of our drawdown funds typically require the suspension of the investment period if, depending on the fund, between two and ten designated principals of the Manager cease to devote sufficient professional time to or cease to be employed by the Manager, often called a “key person event”, or in connection with certain other events discussed under “—Duration, Redemption and Termination.” See “Risk Factors—Risks Related to our Business—Our ability to retain our senior management team and attract additional qualified investment professionals is critical to our success” included in Part I, Item 1A of this Form 10-K.

Capital Commitments. Investors in our drawdown specialized funds generally make capital commitments at the outset of a fund and deliver capital when called upon by us as investment opportunities emerge and to fund operational expenses and other obligations. The commitments are generally available for investment for three to six years, during what we call the investment period, though certain shorter-duration or opportunistic funds have shorter investment periods. We typically have invested the capital committed to our funds, over a three- to five-year period, depending on the strategy.

The evergreen funds continually accept new capital and reinvest realizations, while offering investors periodic subscription and redemption or repurchase opportunities, subject to applicable law, stated limits, notice requirements and the fund’s discretion and available liquidity. Investors fully fund their investment at the time of subscription, and the proceeds may be invested by the funds at any time.

Fees. For our specialized funds, we generally contract with the fund vehicle over which we exercise discretion as investment manager and, in most cases, through an affiliated general partner or managing member. Fees earned from these specialized funds primarily consist of recurring management fees and, in certain cases, incentive fees.

Management fees earned from these funds are typically based on a percentage of capital commitments to, net invested capital or NAV in, our specialized funds. For our drawdown specialized funds, the management fee during the investment period is often charged on capital commitments. Following the end of the investment period (or a defined anniversary of the fund’s initial closing) fees generally transition to a reduced rate or are charged on net invested capital or NAV. Net invested capital generally reflects invested capital net of realizations, while NAV represents the fair value of a fund’s assets less liabilities. Fee rates may be discounted based on factors such as commitment size, timing of commitment, or participation in other funds we manage. Management fees would be offset in the event that any monitoring, consulting, investment banking, advisory, transaction, directors’ or break-up or similar fees are paid to the fund’s general partner, the Manager or any of their affiliates or principals.

We earn incentive fees through carried interest earned from our specialized funds in which we have a general partner commitment, and performance fees earned on certain other specialized funds. Incentive fees are inherently variable and can depend on realized investment performance over multi-year periods. Depending on fund structure and performance outcomes, incentive fees, if any, may be earned only after investors achieve specified return thresholds, and amounts received may be subject to potential repayment if overall performance conditions are not ultimately met. If, upon the final distribution of any of our specialized funds from which we earn carried interest, we and our affiliates have received cumulative carried interest in excess of the amount to which we would be entitled from the profits calculated for such investments in the aggregate, or if the limited partners have not received distributions equal to those to which they are entitled, the carried interest recipient will typically return such part of any carried interest to the limited partners as is necessary to ensure that they receive the amounts to which they are entitled, less taxes on the carried interest. We refer to these provisions as “clawbacks.” Most of our funds that provide for carried interest require a full return of capital and expenses to investors before any carried interest is paid to us, which minimizes the risk of a clawback obligation. We do not generally recognize performance fees unless the risk of clawback or reversal is not probable.

For our drawdown and evergreen funds that make secondary and direct investments (including both direct equity and direct credit investments), we generally earn carried interest equal to a fixed percentage of net profits, subject to a compounded annual preferred return that varies based on fund type. For our drawdown funds with secondary investments, we generally earn carried interest on a full-return basis when all invested capital and the applicable preferred return has been received. In the case of certain drawdown funds and evergreen funds, we earn carried interest on a deal-by-deal basis when all capital invested and the applicable preferred return has been received either on all realized investments or on each individual investment.

For certain other evergreen funds, we earn performance fees that are based on the aggregate amount of unrealized or realized gains earned, subject to the achievement of defined minimum returns to the clients or a high-water mark. Performance fees are based on a fixed percentage of net profits with some subject to a compounded annual preferred return that varies by account.

Our specialized funds are distributed in a variety of ways, including through third-party intermediaries such as wirehouses, brokers, dealers or enterprises that focus on distributing investment products. These arrangements may require us to enter into bespoke agreements with each distributor of these funds, and the third-party may collect fees from us, the specialized funds and/or investors that the intermediary places into the specialized funds, in order to distribute the funds directly or indirectly (i.e., through a vehicle managed by the third-party), with such fees varying depending on the arrangement.

Duration, Redemption and Termination. Our drawdown specialized funds, generally terminate 10 to 14 years after either the first or last date on which a limited partner is admitted to the fund, or, in the case of certain funds, terminate on a specified anniversary date, inclusive of extensions, with an average term of approximately 12 years. Certain shorter-duration or opportunistic funds have shorter terms of five years after the last date on which a limited partner may be admitted to the fund. Our drawdown specialized funds are generally subject to extension for up to two years at the discretion of the general partner and thereafter if consent of the requisite majority of limited partners or, in some cases, the fund’s advisory committee is obtained. Interests in our drawdown specialized funds are generally not redeemable prior to termination, although funds may terminate early or dissolve upon the occurrence of certain customary events such as key person events, bankruptcy and similar events and the occurrence of fraud, willful malfeasance or gross negligence and other similar events. Such funds also may be terminated upon the affirmative vote, depending on the fund, of 75% to 85% of the total limited partner interests entitled to vote.

Our evergreen funds do not have a fixed term and generally offer periodic subscription and redemption or repurchase opportunities, each subject to advance notice requirements, minimum holding periods, applicable gates, fund discretion and available liquidity, in accordance with governing documents and applicable law. The investment management agreements and governing documents typically permit the suspension or termination of subscriptions and redemptions upon the occurrence of customary events, subject to applicable law. Certain evergreen funds may be terminated, dissolved and/or liquidated by the affirmative vote of

shareholders and/or the fund's board, subject to the specific terms and requirements of such fund's governing documents and applicable law.

Advisory Services

For our advisory services, we enter into written contracts directly with each client and do not exercise discretion over investment decisions. Advisory service fees are generally structured based on the scope of services provided and are not primarily driven by assets under advisement. Most advisory clients are charged fixed annual fees, which vary depending on the nature and extent of the services. In limited cases, advisory clients are charged basis point fees annually based on the amounts they have committed to invest pursuant to their agreements with us. We generally do not earn incentive fees based on advisory contracts.

Our advisory services contracts have varying durations ranging from one year to indefinite terms. A number of our advisory agreements have initial terms of approximately three years and then renew automatically or at the client's option unless terminated earlier. Advisory contracts can typically be terminated by our clients for any reason upon short notice, generally 30 to 90 days, although some contracts provide for termination on shorter or longer notice or can only be terminated for specified reasons. Advisory contracts with governmental pension plans typically are subject to a renewal process involving our submission of information in response to a request for proposal ("RFP") issued by the client. We submit extensive, detailed information pursuant to the RFP procedures, usually on a confidential basis, often in competition with other investment advisors bidding on the contract. In these cases, we generally do not know the identity of the other bidders or the substance of their proposals. The RFP procedures prohibit communications between bidders and the issuer of the RFP relating to the proposals during the bidding process.

Distribution Management

For distribution management services we generally contract directly with institutional clients or investment funds, including certain of our specialized funds, to manage the liquidation or active management of publicly traded securities distributed to those clients. Often this service is built into our investment management agreements with our discretionary clients. While we have discretion over the timing and execution of sales within agreed parameters, fees are primarily transaction-based or asset-based and, in certain agreements, may include an incentive fee component tied to realized or unrealized performance. Our agreements provide for either "managed liquidation" where the securities are sold within 90 days after distribution or "active management" where the securities may be sold over a longer period.

Distribution management fees are generally charged in basis point fees assessed on either (i) the net proceeds received from the sale of the securities or (ii) the aggregate value of assets managed on behalf of the client, depending on the service arrangement. Fee rates vary depending on whether service involves managed liquidation or active management.

For certain active management arrangements, clients may elect an incentive fee structure under which they are charged an asset-based fee plus an incentive fee based on net realized and unrealized gains and income net of realized and unrealized losses. The incentive fee is then credited to a notional account, and we are entitled to a fixed percentage of any positive balance in the notional account on an annual basis. The remaining portion of any positive balance in the notional account is carried forward to the following year. If the incentive fee calculation results in a negative amount in a given year, that amount is applied to reduce the balance in the notional account. We are not required to repay any negative balance in the notional account.

Distribution management contracts have varying durations, some with indefinite terms, and typically can be terminated by our clients for any reason generally upon 30 to 90 days' notice. Some contracts provide for termination on shorter or longer notice.

Reporting, Monitoring, Data and Analytics

We provide our clients with comprehensive reporting and investment monitoring services, usually bundled into our broader investment solutions offerings, but also on a stand-alone, fee-for-service basis. In cases where our services are limited to monitoring and reporting on investment portfolios, clients are generally charged a fee based on the number of investments in their portfolio.

Clients of our Cobalt LP technology product are generally charged an annual subscription fee. The Cobalt LP subscription agreement typically includes provisions for automatic renewal unless notice of cancellation is given, generally at least 60 days prior to renewal. Subscription fees typically increase annually based on an inflation-linked adjustment and may also increase based on the number of authorized users. In some circumstances, we may waive or offset the Cobalt LP subscription fee for clients who pay management fees to us for other services.

Competition

We compete in all aspects of our business with a large number of asset management firms, commercial banks, broker-dealers, insurance companies and other financial institutions. With respect to our specialized funds, we primarily compete with the alternative asset management businesses of a number of large international financial institutions and established local and regional competitors based in the United States, Europe and Asia, including managers offering funds-of-funds, secondary funds and direct investment funds in the private markets. Our principal competition for customized separate accounts is mostly other highly specialized and independent private markets asset management firms. We compete primarily in the advisory services area of the business with firms that are regionally based and with a select number of large consulting firms.

In order to grow our business, we must be able to compete effectively to maintain our existing client base and attract additional clients in advisory services, customized separate account and specialized fund areas of the business. Historically, we have competed principally on the basis of the factors listed below:

- Global access to private markets investment opportunities through our size, scale, reputation and strong relationships with private markets fund managers;
- Brand recognition and reputation within the investing community;
- Performance of investment strategies;
- Quality of service and duration of client relationships;
- Ability to provide a cost effective and comprehensive range of services and products; and
- Clients' perceptions of our independence and the alignment of our interests with theirs created through our investment in our own products.

The asset management business is intensely competitive, and in addition to the above factors, our ability to continue to compete effectively will depend upon our ability to attract highly qualified investment professionals and retain existing employees.

Intellectual Property

We own or have a license to the trademarks, service marks or trade names that we use in connection with the operation of our business. In addition, our trade names, logos and website names and URL addresses are owned by us or have been licensed to us. We also own or have a license to the copyrights that protect the content of our solutions. We believe that the "Hamilton Lane" trade name, logos and website are material to our operations.

Legal and Compliance

Our general counsel reports to Erik Hirsch, one of our co-chief executive officers. Our attorneys are embedded in our corporate legal and investment legal teams. Most of our customized separate account clients, certain of our advisory clients and our specialized funds rely on us to review, analyze and negotiate the terms of the documents relating to primary, secondary and direct investments. Working together with our investment teams, our attorneys, using outside law firms as needed, negotiate directly with fund managers and deal sponsors and their counsel the terms of all limited partnership agreements, subscription documents, side letters, purchase agreements and other documents relating to primary, secondary and direct investments. Our attorneys also review and make recommendations regarding amendments and requests for consents presented by the fund managers from time to time. In addition, our legal team is responsible for preparing, reviewing and negotiating all documents relating to the formation and operation of our specialized funds globally. We utilize the services of outside counsel as we deem necessary.

Our compliance team is led by our chief compliance and risk officer, who reports to our chief operating officer. Our chief compliance and risk officer has day-to-day management responsibility for the compliance team. The compliance team is responsible for overseeing and enforcing our policies and procedures relating to compliance with the Investment Advisers Act and related rules and regulations and our code of ethics, as well as the compliance policies and procedures and laws and regulations that apply to our non-U.S. subsidiaries and operations. In addition, the compliance team is responsible for all regulatory matters relating to Hamilton Lane Securities LLC, our SEC- and Financial Industry Regulatory Authority (“FINRA”)-registered broker-dealer affiliate through which we offer interests in our specialized funds.

Risk Management

Our enterprise risk management committee (“ERM committee”) monitors the adequacy and effectiveness of the firm’s risk management processes, including the identification, assessment, management, mitigation and reporting of risks that may affect the firm’s global business operations, financial performance and reputation. The ERM committee’s primary purpose is to seek to ensure that an effective risk management framework is in place, monitor risk-related activities on an ongoing basis, and opine on issues involving material conflicts of interest. The committee is composed of the chief operating officer, chief compliance and risk officer, general counsel, chief financial officer, co-head of investments and head of investment legal. The ERM committee meets on a quarterly and as-needed basis.

Regulatory Environment

Our business is subject to extensive regulation in the United States at both the federal and state level. Under these laws and regulations, the SEC and relevant state securities authorities have broad administrative powers, including the power to limit, restrict or prohibit an investment advisor from carrying on its business if it fails to comply with such laws and regulations. Possible sanctions that may be imposed include the suspension of individual employees, limitations on engaging in certain lines of business for specified periods of time, revocation of investment advisor and other registrations or licenses, censures and fines.

SEC Regulation

HLA is registered as an investment advisor with the SEC. As a registered investment advisor, it is subject to the requirements of the Investment Advisers Act, and the rules promulgated thereunder, as well as to examination by the SEC's staff. The Investment Advisers Act imposes substantive regulation on virtually all aspects of our business and our relationships with our clients. Applicable requirements relate to, among other things, fiduciary duties to clients, engaging in transactions with clients, maintaining an effective compliance program, incentive fees, solicitation arrangements, allocation of investments, conflicts of interest, advertising, recordkeeping, reporting and disclosure requirements. The Investment Advisers Act regulates the assignment of advisory contracts by the investment advisor. The SEC is authorized to institute proceedings and impose sanctions for violations of the Investment Advisers Act, ranging from fines and censures to termination of an investment advisor's registration. The failure of HLA to comply with the requirements of the Investment Advisers Act and/or the rules and regulations published by the SEC could have a material adverse effect on us.

Most of our customized separate accounts and specialized funds are not registered under the Investment Company Act because they fall outside the scope of the Investment Company Act or qualify for an exemption thereunder. If we were to lose the ability to rely on these exemptions, certain of our funds could be required to register under the Investment Company Act or to restructure, which could adversely affect fund terms, investment strategies and our profitability.

Certain U.S. evergreen funds we manage are registered investment companies under the Investment Company Act. The Investment Company Act and the rules thereunder contain detailed parameters for the organization and operation of our registered evergreen funds, including, among other things, their capital structure, investments and transactions. While we exercise broad discretion over the day-to-day management of our registered evergreen funds, each of them is also subject to significant oversight by a board, a majority of whom are not "interested persons" as defined under the Investment Company Act (the "independent trustees"). The responsibilities of each board include, among other things, approving the advisory contracts between HLA and our registered evergreen funds, approving agreements with other service providers and monitoring and approving transactions involving us and our affiliates. Additionally, the boards of each regulated fund appoints a chief compliance officer who meets independently with the independent trustees on at least a quarterly basis. Further, each board is responsible for overseeing the valuation process for each of our registered evergreen funds and HLA is required to provide the board with a summary or description of material fair value matters that occurred in the prior quarter and on an annual basis, as well as a written assessment of the adequacy and effectiveness of its valuation process.

ERISA-Related Regulation

Some of our specialized funds are treated as holding "plan assets" as defined under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), as a result of investments in those funds by benefit plan investors. By virtue of its role as investment manager of these funds, HLA is a "fiduciary" under ERISA with respect to such benefit plan investors. ERISA and the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), impose certain duties on persons that are fiduciaries under ERISA, prohibit certain transactions involving benefit plans and "parties in interest" or "disqualified persons" to those plans, and provide monetary penalties for violations of these prohibitions. With respect to these funds, HLA relies on particular statutory and administrative exemptions from certain ERISA prohibited transactions, which exemptions are highly complex and may in certain circumstances depend on compliance by third parties whom we do not control. The failure of HLA or us to comply with these various requirements could have a material adverse effect on our business.

In addition, with respect to other investment funds in which benefit plan investors have invested, but which are not treated as holding "plan assets," we and HLA rely on certain rules under ERISA in conducting investment management activities. These rules are sometimes highly complex and may in certain circumstances depend on compliance by third parties that we do not control. If for any reason these rules were

to become inapplicable, we and HLA could become subject to regulatory action or third-party claims that could have a material adverse effect on our business.

Foreign Regulation

We provide investment advisory and other services and raise funds in a number of countries and jurisdictions outside the United States. In many of these countries and jurisdictions, which include the European Union (“EU”), the European Economic Area (“EEA”), the individual member states of each of the EU and EEA, Australia, Canada, Chile, China, Hong Kong, Israel, Japan, Mexico, Singapore, South Korea, Switzerland, the United Arab Emirates and the United Kingdom (“U.K.”), we and our operations, and in some cases our personnel, are subject to regulatory oversight and requirements. In general, these requirements relate to registration, licenses for our personnel, periodic inspections, marketing activities, the provision and filing of periodic reports, and obtaining certifications and other approvals. Across the EU, we are subject to the European Union Alternative Investment Fund Managers Directive (“AIFMD”) requirements regarding, among other things, registration for marketing activities, the structure of remuneration for certain of our personnel and reporting obligations. In 2024, the EU adopted Directive (EU) 2024/927 (“AIFMD II”). AIFMD II introduces changes relating to delegation arrangements and minimum substance requirements for EU alternative investment fund managers (“AIFMs”), liquidity risk management and liquidity-management tools, supervisory reporting, the provision of depository and custody services and the regulation of loan-originating alternative investment funds, including leverage limits and additional conditions for open-ended loan-originating funds. EU member states were required to transpose AIFMD II into national law by April 16, 2026, at which time we became subject to these requirements. In parallel, the U.K. has consulted on, and begun to implement, reforms to its domestic AIFM regime. Switzerland and individual member states of the EU have imposed additional requirements that may include internal arrangements with respect to risk management, liquidity risks, asset valuations, and the establishment and security of depository and custodial requirements. We are also subject to the EU’s Digital Operational Resilience Act (“DORA”), which took effect in 2025, and imposes requirements on financial entities, including AIFMs, relating to information and communications technology risk management, incident reporting, digital operational resilience testing and third-party risk management.

The application of some of these requirements and regulations to our business changed with the exit of the U.K. from the EU (“Brexit”) in 2020. For example, our subsidiaries that are authorized and regulated by the U.K. Financial Conduct Authority no longer have “passporting” privileges under certain EU directives, such as the AIFMD and the Markets in Financial Instruments Directive II (“MiFID II”), which certain of our specialized funds and customized separate accounts relied upon for access to markets throughout the EU. In preparation for this, we engaged with third-party AIFMs based in Luxembourg to replace, prior to Brexit, our U.K.-based AIFM for our funds and certain customized separate accounts for the EU. We have also obtained a MiFID II license for one of our EU-based (non-U.K.) subsidiaries to replace the MiFID II license held by our U.K.-based subsidiary, which is no longer valid after Brexit.

Data Privacy and Cybersecurity Regulation

We collect, store, transmit and otherwise process personal data, confidential investor information and other sensitive information in the course of our business and are therefore subject to a growing patchwork of data protection, privacy and cybersecurity laws and regulations in the United States and abroad. In the EU and the U.K., we are subject to the General Data Protection Regulation (Regulation (EU) 2016/679) and the U.K. data protection regime (collectively, “GDPR”), which impose stringent requirements on the processing and cross-border transfer of personal data and authorize substantial administrative fines (up to the greater of EUR 20 million or 4% of annual worldwide turnover) for non-compliance. In the United States, we are subject to a growing number of state privacy laws, including the California Consumer Privacy Act, as amended by the California Privacy Rights Act, and analogous statutes in other states, as well as Regulation S-P, Regulation S-ID and the SEC’s cybersecurity risk management, strategy, governance and incident disclosure rules applicable to public companies. A failure or perceived failure to comply with these regimes, or a cybersecurity incident affecting our systems or those of our service providers, could result in regulatory investigations, significant fines, civil litigation, remediation costs, reputational harm and an inability to transfer data across jurisdictions, any of which could have a material adverse effect on our business.

Anti-Money Laundering, Sanctions and Anti-Corruption

Our global fundraising and investment activities subject us to economic and trade sanctions administered by the U.S. Department of the Treasury’s Office of Foreign Assets Control (“OFAC”), the U.S. Department of State, the EU, the U.K. and other jurisdictions, as well as to anti-money laundering and counter-terrorist financing laws, including the U.S. Bank Secrecy Act, the USA PATRIOT Act and the beneficial ownership reporting requirements of the Corporate Transparency Act. We are also preparing for compliance with the Financial Crimes Enforcement Network (“FinCEN”) final rule applying anti-money laundering program and suspicious activity reporting requirements to certain registered investment advisors, currently scheduled to take effect on January 1, 2028. In addition, we are subject to anti-bribery and anti-corruption laws, including the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act 2010 and similar laws in other jurisdictions where we operate. The geographic breadth of our investor base and portfolio investments, our use of placement agents and finders, and our reliance on third-party intermediaries and portfolio company management increase the risk that we, our personnel or persons acting on our behalf could violate these laws. Violations could result in significant civil or criminal penalties, disgorgement, debarment, restrictions on our ability to conduct business in certain jurisdictions and substantial reputational harm.

ESG and Sustainability-Related Regulation

In a number of jurisdictions in which we operate, we are subject to evolving sustainability-related disclosure and labeling regimes applicable to financial market participants and large enterprises. In the EU, these include the Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (“SFDR”), and in the U.K., the Financial Conduct Authority’s Sustainability Disclosure Requirements and investment labels regime, and we may become subject to additional regimes such as the Corporate Sustainability Reporting Directive (“CSRD”) in the future. In the United States, we are subject to evolving climate-related disclosure requirements, including those adopted by the State of California and similar measures proposed or adopted in other states. Compliance with these regimes requires significant investment in data, systems and personnel, and the standards continue to evolve. A failure or perceived failure to comply, or a determination that our sustainability-related disclosures are inaccurate, incomplete or constitute “greenwashing,” could subject us to regulatory enforcement, private litigation, reputational harm and loss of investor confidence.

Employees

Our Culture

We believe that our culture is a key factor driving our success in developing and maintaining high-quality relationships among our employees and with our clients, prospects, business partners and the communities within which we live and work. With approximately 785 employees worldwide as of March 31, 2026, we are proud that our culture has been recognized annually by *Pensions & Investments* magazine, a leading

investment publication, as a “Best Place to Work in Money Management” since the inception of the list in 2012.

At Hamilton Lane, we recognize that every individual brings unique experiences, perspectives and talents to our firm. That’s why we are committed to cultivating an environment where all employees feel empowered to bring their whole selves to work, enabling them to perform at their best. We value the richness of our workforce’s varied experiences, perspectives, backgrounds and talents, and we are committed to treating all employees with dignity and respect. These differences make our employees unique and contribute to our organization’s strength. Our dedication to belonging extends beyond our workplace, to the industry in which we operate and the communities and environment in which we live and work. Guided by our corporate value of “Do the Right Thing,” we are committed to promoting a welcoming and merit-based culture in the private markets asset class and the communities we serve. Our comprehensive approach, *Belong@HamiltonLane*, drives inclusive principles into our values, culture and practices. Our success is driven by our people. From our diverse perspectives, we can make more informed decisions designed to benefit our clients, our employees and our competitive edge.

Talent Acquisition, Retention and Development of Human Capital

We invest in a range of talent initiatives aimed at attracting, retaining and developing professionals across levels and geographies. These include early-career programs, in which analysts in various business units participate in intensive training, receive exposure to our investment and client-facing teams, participate in rotations and receive structured mentorship. We also sponsor a summer internship program in which undergraduate students gain exposure to the private markets industry through hands-on work experience, training and mentorship, as well as a co-operative program with a Philadelphia-based university through which undergraduate students are employed by us for six-month periods, gaining exposure to our industry, our company and networking opportunities.

Our Human Resources department, in close collaboration with our *Belong@HamiltonLane* Council, has implemented a core set of competencies and practices that equip employees with the knowledge and skills to create a supportive working environment. This program centers around four pillars: recruiting/retention, education, employee resource groups and external partnerships. Our employees have the opportunity to participate in our formal mentoring program designed to help less tenured employees foster relationships with more experienced colleagues or peers in different departments with the goal of enhancing professional and personal development and growth. Employees can also participate in the leadership of, or take part in the programming offered by, our employee resource groups, which are overseen by our *Belong@HamiltonLane* Council and are designed to support skill development, career progression, work-life balance, continuing education and networking. Employees are also encouraged to get involved in championing and participating in volunteerism efforts overseen by our HL in Action committee. We provide employees with volunteer time off to participate in HL in Action events and other volunteer engagements, which we believe supports our communities while fostering employee engagement and connection.

At Hamilton Lane, we remain fully committed to our efforts to attract, retain and develop talented professionals across all measures of inclusion and individuality and continue to drive a culture of belonging. We are proud of our organization’s history of embracing diverse and global perspectives to drive innovation and growth within our business.

Compensation and Benefits

In order to attract and retain current and prospective employees, we have developed a comprehensive total rewards compensation program. The elements of this program are designed to reward individual performance and recognize contributions that align with and drive positive business results. We believe that a compensation system that incentivizes actions that grow stockholder value closely aligns our employees with

the interests of our stockholders. To further align their interests with those of investors in our funds, certain of our employees also have the opportunity to make investments in certain of our funds.

We offer a market-based mix of compensation elements, including:

- base salary;
- annual discretionary incentive bonuses consisting of both cash and equity;
- long-term equity incentives;
- a carried interest plan; and
- competitive health, wellness, retirement and work/life benefits.

The particular mix and weighting of elements varies depending on the functional area and level of seniority within our organization. We adjust the individual elements of compensation as needed to effectively compete for talent in the jurisdictions in which we do business and to comply with local law. We believe a blend of variable and longer-term components further attracts and incentivizes talent, provides an overall compensation package that is competitive with the market and encourages retention of top performers. As an employee's compensation increases, a greater proportion of that employee's total compensation is paid in the form of long-term equity and other awards relative to short-term cash compensation. We believe this more effectively motivates our senior management team to focus on the long-term growth of our business and corresponding increases in stockholder value.

Our benefits include 12 weeks of fully paid parental bonding leave plus one additional week to be used on demand (regardless of gender identity), lactation and milk shipping services, assisted reproductive technology and adoption support, back-up child, elder and self-care, workplace flexibility, mental health services and a number of financial wellness benefits including educational assistance, a student loan refinancing and repayment program, commuter benefits and our Employee Share Purchase Plan, as amended, through which employees can purchase shares of our Class A common stock at a discounted price.

Corporate Sustainability

We believe that strategically establishing business practices that serve to support our ability to deliver to our clients and investors both today and in the future is imperative. As a financial services company, most of our greenhouse gas emissions arise from purchased energy for our offices and from business travel. To better manage our emissions footprint, we have incorporated climate-related questions into our vendor due diligence, including whether vendors measure their greenhouse gas emissions.

We calculate our carbon footprint based on our Scope 1, 2 and 3 emissions, excluding financed emissions, and have committed to carbon neutrality for our operations going back to 2019. We have voluntarily offset our emissions for calendar years 2019 – 2023, have received carbon neutral certifications for calendar years 2021 – 2023 and are in the process of calculating our operational emissions for calendar years 2024 and 2025. Through this calculation and offsetting exercise, we have sought to understand and align operational decisions with the total costs.

Hamilton Lane is committed to preventing modern slavery and human trafficking in its business and supply chains and publishes a global Modern Slavery Statement under the UK Modern Slavery Act 2015. We seek to align with local legislation and mitigate modern slavery risk through supplier due diligence and monitoring, employee training and related governance frameworks, including the HLA Code of Ethics and whistleblower policy.

For more information on our investment approach to sustainability and responsible investing, see “—Investment Process and Monitoring.”

For more information on our human capital approach, see “—Employees.”

Corporate Social Responsibility

Hamilton Lane's corporate social responsibility program, HL in Action, focuses on employee-driven external volunteer initiatives in the communities where we operate, with an emphasis on key priorities: financial literacy, education and empowerment, climate matters and community development and stakeholder engagement. These opportunities are overseen by our [Belong@HamiltonLane](#) Council and HL in Action committee. As described under "— Employees", each employee receives volunteer time off to participate in HL in Action events and engagements of their choosing. We encourage employees to participate in such events given the multi-faceted benefits that we believe can be derived from community engagement alongside building relationships with colleagues.

Item 1A. Risk Factors

In addition to the other information set forth in this Form 10-K, you should carefully consider the following factors, which could materially affect our business, financial condition or results of operations. The risks described below are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may negatively affect our business, financial condition or results of operations.

Risks Related to Our Business

The historical performance of our investments should not be considered as indicative of the future results of our investments or our operations or any returns expected on an investment in our Class A common stock.

Past performance of our specialized funds and customized separate accounts or the investments that we recommend to our advisory clients is not necessarily indicative of future results or of the performance of our Class A common stock. An investment in our Class A common stock is not an investment in any of our specialized funds or customized separate accounts. In addition, the historical and potential future returns of specialized funds and customized separate accounts that we manage are not directly linked to returns on our Class A common stock. Therefore, you should not conclude that continued positive performance of our specialized funds, customized separate accounts or the investments that we recommend to our advisory clients will necessarily result in positive returns on an investment in our Class A common stock. However, poor performance of our specialized funds or customized separate accounts could cause a decline in our revenue, and could therefore have a negative effect on our performance and on returns on an investment in our Class A common stock.

The historical performance of our funds should not be considered indicative of the future performance of these funds or of any future funds we may raise, in part because:

- market conditions and investment opportunities during previous periods may have been significantly more favorable for generating positive performance than those we may experience in the future;
- the performance of our funds is generally calculated on the basis of NAV of the funds' investments, including unrealized gains, which may never be realized;
- our historical returns derive largely from the performance of our earlier funds, whereas future fund returns will depend increasingly on the performance of our newer funds or funds not yet formed;
- our newly established funds may generate lower returns during the period that they initially deploy their capital;
- in recent years, there has been increased competition for investment opportunities resulting from increased amount of capital invested in the private markets, which may increase the cost and reduce the availability of suitable investments, thereby reducing our investment returns in the future;
- a fund could face a sudden, unexpected or sustained influx of redemption or repurchase requests from investors, which could result in such fund selling off assets to accommodate these requests and/or such fund having to pro rate redemption or repurchase requests (which may further constrain new subscriptions);
- the performance of particular funds will also be affected by risks of the industries and businesses in which they invest; and
- we may create new funds that reflect a different asset mix and new investment strategies, as well as a varied geographic and industry exposure, compared to our historical funds, and any such new funds could have different returns than our previous funds.

The success of our business depends on the identification and availability of suitable investment opportunities for our clients.

Our success largely depends on the identification and availability of suitable investment opportunities for our clients, and in particular the success of funds in which our specialized funds, customized separate accounts and advisory accounts invest. The availability of investment opportunities will be subject to market conditions and other factors outside of our control and the control of the private markets fund managers with which we invest. For example, markets in the last few years experienced meaningful headwinds, including elevated interest rates and volatile geopolitical conditions. Past returns of our specialized funds, customized separate accounts and advisory accounts have benefited from investment opportunities and general market conditions that may not continue or reoccur, including favorable borrowing conditions in the debt markets during such historical periods, and there can be no assurance that our specialized funds, customized separate accounts, advisory accounts or the underlying funds in which we invest will be able to avail themselves of comparable opportunities and conditions. There can also be no assurance that the private markets funds we select will be able to identify sufficient attractive investment opportunities to meet their investment objectives. Further, the due diligence investigations we conduct before recommending investments to our clients may not uncover all facts relevant to the suitability of such opportunities. See “—The due diligence process that we undertake in connection with investments may not reveal all facts that may be relevant in connection with an investment” for more information on the risks we face in connection with the due diligence process.

If the investments we make on behalf of our specialized funds or customized separate accounts perform poorly, we may suffer a decline in our investment management revenue and earnings, and our ability to raise capital for future specialized funds and customized separate accounts may be materially and adversely affected.

Our revenue from our investment management business is derived from fees earned for our management of our specialized funds, customized separate accounts and advisory accounts, incentive fees, including carried interest and performance fees, with respect to certain of our specialized funds and customized separate accounts, and monitoring and reporting fees. In the event that our specialized funds, customized separate accounts or individual investments perform poorly, our revenues and earnings derived from incentive fees and certain management fees will decline, and it will be more difficult for us to raise capital for new specialized funds or gain new or retain current customized separate account clients in the future. Furthermore, underlying investments within our specialized funds and customized separate accounts reflect valuations reported elsewhere in this Form 10-K that are determined as of December 31, 2025. Decreases in public markets and credit indices as well as decreases in current or future estimated performance of underlying portfolio companies in quarters ending after that date may result in negative valuation adjustments that will be reported on a three-month lag in accordance with our accounting policy. Adverse investment valuations directly impact our investments, equity in income of investees, unrealized carried interest, AUM and AUA for the period. In addition, if carried interest that was previously distributed to us exceeds the amounts to which we are ultimately entitled, we may be required to repay that amount under a “clawback” obligation. The risk of clawback can occur as a result of diminished investment performance. If we are unable to repay the amount of the clawback, we would be subject to liability for a breach of our contractual obligations. If we are unable to raise or are required to repay capital, our business, financial condition and results of operations would be materially and adversely affected.

Finally, the portfolio companies and other investments held by our specialized funds and customized separate accounts involve significant business and financial risk. For example, portfolio companies may experience negative financial results for a variety of reasons. These include, but are not limited to: restructurings, bankruptcy, reorganization or liquidation, insolvency or related bankruptcy proceedings due to defaults on indebtedness, mismanagement, litigation, enforcement actions or fraud, which could reduce investment returns realized by our specialized funds and customized separate accounts. Portfolio companies and other investments are also subject to risks associated with general market and geopolitical conditions, such as market downturns, inflation, public health emergencies and regional instability. In addition, a fund may invest in a portfolio company with a limited operating history, and there is no guarantee that the

information or reports provided to the fund's advisor with respect to the portfolio companies will not be fraudulent, inaccurate or incomplete, which could adversely impact the value of an investment in the fund.

A sudden and/or substantial decrease in price of one of our investments due to, for example, negative performance, could materially impair our specialized fund or customized separate account performance, an outcome that would be amplified in funds or accounts that hold no other or relatively few investments. Such events could negatively affect our operating results and reputation and could result in heightened scrutiny and criticism of our business and investments.

Competition for access to investment funds and other investments we make for our clients is intense.

We seek to maintain excellent relationships with general partners and managers of investment funds, including those in which we have previously made investments for our clients and those in which we may in the future invest, as well as sponsors of investments that might provide direct investment opportunities in portfolio companies alongside the sponsoring fund manager. However, because of the number of investors seeking to gain access to investment funds and direct investment opportunities managed or sponsored by the top performing fund managers, there can be no assurance that we will be able to secure the opportunity to invest on behalf of our clients in all or a substantial portion of the investments we select, or that the size of the investment opportunities available to us will be as large as we would desire or that the terms of the investments will be as favorable as we have come to expect. Access to secondary investment opportunities is also highly competitive and is often controlled by a limited number of general partners, fund managers and intermediaries.

Customized separate account and advisory account fee revenue is not a long-term contracted source of revenue and is subject to intense competition.

Our revenue in any given period is dependent on the number of fee-paying clients and corresponding level of AUM/AUA in such period. Our customized separate account and advisory account business operates in a highly competitive environment where typically there are no long-term contracts. While clients of our customized separate account and advisory account businesses may have multi-year contracts, many of these contracts are terminable upon 30 to 90 days' advance notice to us. We may lose clients as a result of a change in ownership, control or senior management, a client's decision to transition to in-house asset management rather than partner with a third-party provider such as us, competition from other financial advisors and financial institutions, changes to their investment policies and other causes. Isolated departures have occurred in the past but have not had a material impact on our business. Moreover, a number of our contracts with state government-sponsored clients are secured through such government's mandated procurement process, and are subject to periodic renewal. If multiple clients were to exercise their termination rights or fail to renew their existing contracts and we were unable to secure new clients or maintain our levels of AUM/AUA, our customized separate account and advisory account fees would decline materially. A significant reduction in the number of fee-paying clients and/or AUM/AUA levels in any given period could reduce our revenue and materially and adversely affect our business, financial condition and results of operations.

Our failure to deal appropriately with conflicts of interest could damage our reputation and materially and adversely affect our business.

As we expand the scope of our business, as well as the investor channels through which our products are offered, we increasingly confront potential and actual conflicts of interest relating to our advisory and investment management businesses. For example, we may recommend that various advisory clients invest in specialized funds managed by us. Additionally, allocating investment opportunities appropriately frequently involves significant and subjective judgments, and the risk that allocation decisions could be challenged as inconsistent with our obligations under applicable law, governing fund agreements or our own policies cannot be eliminated. It is possible that actual, potential or perceived conflicts could give rise to investor dissatisfaction, litigation or regulatory enforcement actions. As a registered investment advisor, we owe our clients a fiduciary duty and are required to provide disinterested advice. Furthermore, as we form and launch more registered investment companies under the Investment Company Act, the risk of triggering potential issues under Section 17 of the Investment Company Act, which prohibits certain transactions between registered investment companies and their affiliates, increases. Identification of the affiliates affected by Section 17 is complex, and at times, subject to interpretive judgment. The SEC may disagree with our interpretation of these prohibitions, heightening our regulatory risks and the risk that an investor and/or a regulator could claim that a transaction violated these rules.

Appropriately dealing with conflicts of interest is complex and difficult and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential or actual conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation, which could materially and adversely affect our business in a number of ways, including an inability to raise additional funds, attract new clients or retain existing clients.

We have obligations to investors in our specialized funds and customized separate accounts and may have obligations to other third parties that may conflict with your interests.

Our subsidiaries that serve as the general partners of or advisors to our specialized funds and customized separate accounts have fiduciary and contractual obligations to the investors in those funds and accounts, and some of our subsidiaries may have contractual duties to other third parties. As a result, we may take actions with respect to the allocation of investments among our specialized funds and customized separate accounts (including funds and accounts that have different fee structures), the purchase or sale of investments in our specialized funds and customized separate accounts, the structuring of investment transactions for those specialized funds and customized separate accounts, the advice we provide or other actions in order to comply with these fiduciary and contractual obligations. In addition, because many of our senior management and other professionals hold their economic interests in us through HLA and certain of its affiliates, which are not subject to U.S. federal and state entity-level income taxes, and our Class A common stockholders hold their interests through Hamilton Lane Incorporated, which is subject to entity-level taxation as a corporation in the United States, conflicts relating to the selection and structuring of investments or other matters may arise between senior management and our other professionals, on the one hand, and the Class A stockholders of Hamilton Lane Incorporated, on the other hand.

Our ability to retain our senior management team and attract additional qualified investment professionals is critical to our success.

Our success depends on our ability to retain our senior management team and to recruit and retain additional qualified investment, sales and other professionals. However, we may not be successful in our efforts, as the market for investment professionals is extremely competitive. The individuals that comprise our senior management team possess substantial experience and expertise and, in many cases, have significant relationships with certain of our clients. Accordingly, the loss or prolonged absence of any one of our senior management team or other key personnel could adversely affect certain client relationships, reduce our productivity or limit our ability to successfully execute our investment strategies, which, in turn, could have a material adverse effect on our business, financial condition and results of operations. In addition, the governing agreements of our specialized funds typically require the suspension of the investment period if,

depending on the fund, between two and ten designated members of our senior management team either cease to devote sufficient professional time to or cease to be employed by HLA, often called a “key person event,” or in connection with certain other events. Senior managing directors have left the firm in the past and others may do so in the future. While we cannot predict the impact that the departure of any single senior managing director will have on our ability to achieve our investment objectives, any change to our senior management team could materially and adversely affect our business, financial condition and results of operations. In order to retain and attract qualified investment professionals, we expect to continue to experience a general rise in compensation and benefits expense commensurate with expected growth in headcount and with the need to maintain competitive compensation levels, which could cause our total employee compensation and benefits expense as a percentage of our total revenue to increase and adversely affect our profitability. We also expect to continue to invest both in maintaining our corporate culture and in recruitment activities that serve to increase our pipeline of qualified candidates. If we are not successful in maintaining our culture, we may not be successful in retaining our personnel, and the costs to recruit, train, and retain qualified professionals may increase and adversely impact our profitability. In addition, we may not be able to find suitable successors promptly or be successful in integrating them.

Lastly, we may be unable to enforce the non-competition agreements we have in place with the majority of our employees, and there is no guarantee that our other arrangements with our employees, such as our non-solicitation agreements, will be enforceable or will prevent our employees from leaving, joining our competitors or otherwise competing with us.

We intend to expand our business and may formulate new business strategies, offer new products or services or enter into new geographic markets or strategic partnerships, which may result in additional risks and uncertainties in our business.

We currently generate substantially all of our revenue from asset management and advisory services. However, we have grown, and intend to continue to grow, our business by offering additional products and services, by formulating new business strategies, by entering into, or expanding our presence in, new geographic markets and by entering into strategic partnerships and corporate investments. These activities have and could continue to increase our operational costs and subject us to new laws and regulations with which we are not familiar, or from which we are currently exempt, which may lead to increased litigation and regulatory risk. For example, we have recently undertaken business initiatives to reach an increasing number of retail investors in the United States and around the world, including by offering tokenized access to certain of our funds, launching additional evergreen funds, introducing daily-priced interval funds, and establishing new vehicles intended for EEA retail investors and Asia-Pacific investors. These initiatives, as well as our tokenization and digital-distribution initiatives, exposes us to greater levels of risk, including heightened litigation, regulatory enforcement and reputational risks, while also increasing our compliance burden and requiring more complex administration and accounting operations. In addition, distribution of retail products, including through tokenization and digital distribution, whether directly or through market intermediaries, can be complex and could expose us to allegations of improper conduct and/or actions by regulators within and outside the United States with respect to, among other things, product suitability, investor classification, compliance with securities laws, conflicts of interest or the adequacy of disclosure.

To the extent distribution of our retail or other products is through new channels and markets, including through an increasing number of distributors with whom we engage, we may not be able to effectively monitor or control the manner of their distribution, which could result in claims that products distributed through such channels are distributed to customers for whom they are unsuitable or that they are distributed in an otherwise inappropriate manner. Although we engage in due diligence and onboarding procedures that seek to uncover issues relating to the third-party channels through which individual investors access our investment products, we do not control and have limited information regarding many of these third-party channels. Therefore, we are exposed to the risks of reputational damage, regulatory scrutiny and legal liability to the extent such third parties improperly sell our products to investors or otherwise act improperly. These risks have increased as we have increased our third-party distribution partnerships. In addition, such third-

parties could seek to modify our products or offer new products while using our name and brand without our permission, creating increased risk of reputational and brand damage.

In addition, our evergreen funds contain terms that permit investors to request redemption or repurchase of their interests on a periodic basis, subject to certain limitations, including limits on the aggregate amount of such interests that may be redeemed or repurchased in a given period. Challenging market or economic conditions, negative media coverage, changes in intermediary recommendations, increased competition from substitute products and liquidity needs could cause elevated redemption or repurchase requests from investors in such products, which can limit the amount of such redemption or repurchase requests that are fulfilled. We may redeem or repurchase fewer interests than requested or suspend redemptions or repurchases entirely. Such limitations may subject us to reputational harm and may make such vehicles less attractive to investors, which could have a material adverse effect on the cash flows of such vehicles. This may in turn negatively impact the revenues we derive from such vehicles. For more information on the risks associated with our evergreen funds, see “—The exercise of redemption or repurchase rights by investors in our evergreen funds may adversely affect our revenues.”

To the extent we introduce new types of investment structures, products or services, we will face numerous risks and uncertainties, including risks associated with the possibility that we have insufficient expertise to engage in such activities profitably or without incurring inappropriate amounts of risk, that we do not have the required investment of capital and other resources and that we could potentially lose clients due to the perception that we are no longer focusing on our core business. Further, the expansion into new geographies and strategies (including making products available on the blockchain and through tokenization and digital securities exchanges) and the launch of daily-priced vehicles has demanded greater management attention and dedication of resources to manage the increasing complexity of operations and regulatory compliance, thereby increasing the risk of litigation and regulatory enforcement actions being brought against us. Our initiatives to expand our retail investor base, including outside of the United States, requires the investment of significant time, effort and resources, including the hiring of additional personnel, upfront costs in connection with distribution through wirehouses, the implementation of new operational, technological, compliance systems and processes and the development of valuation and liquidity-management frameworks tailored to registered funds and daily-priced products. There is no assurance that our efforts to further grow the assets we manage on behalf of retail investors will be successful. Further, in light of the August 2025 Executive Order on Democratizing Access to Alternative Assets for 401(k) Investors, there may be significant future opportunity for the alternative asset management industry to increase the distribution of products to retail investors through 401(k) accounts. We are likely to face significant competition in addressing such opportunity, which could require us to spend substantial time, effort and resources, and may not ultimately be successful in increasing distribution of our products in this channel. In addition, such expansions increase various risks including the potential for litigation and regulatory scrutiny, oversight or disclosure requirements.

We have and will continue to provide resources to foster the development of new product offerings and business strategies by our investment professionals and launch successor and related products, such that our new strategies seek to achieve a level of scale and profitability. To raise new funds and pursue new strategies, we have and expect to continue to use our balance sheet capital to warehouse seed investments, which may decrease the liquidity available for other parts of our business. In the past, we have supplemented our balance sheet capital for this purpose with proceeds of privately placed debt, and we may choose to issue additional debt in the future to further supplement our capital. If a new strategy or fund does not develop as anticipated or our balance sheet assets cease to provide adequate liquidity, we may be forced to realize losses or become limited in our ability to seed new funds or strategies or support existing ones as currently contemplated. Further, we have from time to time explored, and intend to continue to explore, opportunities to grow our business via acquisitions, partnerships, investments or other strategic transactions and have and may continue to use our balance sheet capital or issue shares of Class A common stock to do so. There can be no assurance that we will successfully identify, negotiate or complete such transactions, that any completed transactions will produce favorable financial results or that we will be able to successfully integrate an acquired business with ours. Further, our strategic initiatives include the acquisition of minority interests in third parties, in

which case we will be subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability for, losses or reputational damage relating to, systems, controls and personnel that are not under our control. In addition, if we choose to issue equity to fund an acquisition, our stockholders may experience dilution.

In addition, certain aspects of our cost structure, such as costs for compensation, occupancy leases, communication and information technology services, and depreciation and amortization are largely fixed, and we may not be able to timely adjust these costs to match fluctuations in revenue related to growing our business. If we are unable to efficiently manage our expanded operations, our business, financial condition and results of operations could be materially and adversely affected.

A decline in the pace or size of fundraising or investments made by us on behalf of our specialized funds or customized separate accounts may adversely affect our revenues.

The revenues that we earn are driven in part by the amount of capital committed by our clients for investment, our fundraising efforts and the pace at which we make investments on behalf of our specialized funds and customized separate accounts. Declines in the pace or the size of fundraising efforts or investments reduce our revenues. The private markets investing environment continues to see increased competition and elevated interest rates, which can make fundraising and the deployment of capital more difficult. In addition, many other factors cause declines in the pace of investment, including a market environment characterized by high prices or uncertainty, the unavailability of suitable opportunities for investors and clients to exit existing investments and redeploy realized capital into new investments, the inability of our investment professionals to identify attractive investment opportunities and decreased availability of financing on attractive terms or decreased availability of investor capital, including potentially as a result of a challenging fundraising environment or heightened requests for redemptions or repurchases in our evergreen funds. Further, we may fail to consummate identified investment opportunities because of business, regulatory or legal complexities or uncertainty and adverse developments in the U.S. or global economy, financial markets or geopolitical conditions, and our ability to deploy capital in certain countries may be adversely impacted by U.S. and foreign government policy changes and regulations. In addition, if we are unable to deploy capital at a pace that is sufficient to offset the pace of realizations, our fee revenues could decrease.

For our specialized funds and customized separate accounts that charge fees based on invested capital, such a decline in the pace of investments may reduce our revenue more acutely. In addition, fees based on invested capital may create an incentive to make investments earlier in the specialized fund's or customized separate account's life than it otherwise would if fees were charged based purely on capital commitments, which has more predictability for revenues.

Our indebtedness may expose us to substantial risks, including to the extent we fail to comply with certain covenants, and our cash balances are exposed to the credit risks of the financial institutions at which they are held.

We maintain a Term Loan and Security Agreement (as amended, the "Term Loan Agreement"), a 2020 Multi-Draw Term Loan and Security Agreement (as amended, the "2020 Multi-Draw Term Loan Agreement"), a 2022 Multi-Draw Term Loan and Security Agreement (the "2022 Multi-Draw Term Loan Agreement") and a Revolving Loan and Security Agreement (as amended, the "Revolving Loan Agreement" and, together with the Term Loan Agreement, the 2020 Multi-Draw Term Loan Agreement and the 2022 Multi-Draw Term Loan Agreement, the "Loan Agreements") with JPMorgan Chase & Co. ("JPMorgan"). Additionally, in 2024, we issued \$100,000,000 aggregate principal amount of 5.28% senior notes due October 15, 2029 (the "Senior Notes"), pursuant to a note purchase agreement (the "Note Purchase Agreement") in a private placement among HLA and the purchasers party thereto.

The Term Loan Agreement matures on July 1, 2029, the 2020 Multi-Draw Term Loan Agreement matures on April 1, 2030, the 2022 Multi-Draw Term Loan Agreement matures on October 1, 2029 and the Revolving Loan Agreement matures on October 7, 2027. For more information on our Loan Agreements and

Senior Notes, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Senior Notes and Loan Agreements”.

We expect to continue to utilize debt to finance and grow our business and operations, including warehousing investments for our funds, which will expose us to the typical risks associated with the use of leverage. An increase in leverage could make it more difficult for us to withstand adverse economic conditions or business plan variances, to take advantage of new business opportunities, or to make necessary capital expenditures. Any portion of our cash flow required for debt service will not be available for our operations, distributions, dividends, stock repurchases or other purposes. Any substantial decrease in net operating cash flows or any substantial increase in expenses could make it difficult for us to meet our debt service requirements or force us to modify our operations. Further, there is no guarantee that we will be able to obtain new borrowings or refinance existing borrowings on favorable terms when they mature. Our level of indebtedness may make us more vulnerable to economic downturns and reduce our flexibility in responding to changing business, regulatory and economic conditions, which could materially and adversely affect our business, financial condition and results of operations.

The risks related to our use of indebtedness may be heightened by the dependence on leverage by certain funds, customized separate accounts and portfolio companies. See “—Dependence on leverage by certain funds, customized separate accounts and portfolio companies subjects us to volatility and contractions in the debt financing markets and could adversely affect the ability of our specialized funds and customized separate accounts to achieve attractive rates of return on those investments, and cash balances maintained for investments are exposed to the credit risks of the financial institutions at which they are held.”

In addition, the availability of capital from our Loan Agreements and our cash balances are exposed to the credit risks of the financial institutions at which they are held. Events involving limited liquidity, defaults, non-performance or other adverse developments that affect financial institutions, transactional counterparties or the financial services industry generally, or concerns or rumors about any such events or other similar risks, have in the past and may in the future lead to market-wide liquidity problems or the fear of market-wide liquidity problems. Our material credit facility consists of our Loan Agreements, which are now held at JPMorgan. If any of the financial institutions at which we maintain account balances or upon which we rely for credit were to become unstable or insolvent, our ability to access existing cash, cash equivalents and investments, or to access existing or enter into new banking arrangements or facilities to pay operational and other costs, could be threatened or lost, which could have a material adverse effect on our business and financial condition. Our account balances at each institution typically exceed Federal Deposit Insurance Corporation (“FDIC”) insurance coverage of \$250,000 per depositor, and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. In some cases, we have transferred uninsured cash balances to money market mutual funds.

The Loan Agreements and the Note Purchase Agreement contain, and any future debt instruments may contain, financial and other covenants that impose requirements on us and limit our and our subsidiaries’ ability to engage in certain transactions or activities, including but not limited to: incurring additional debt; providing guarantees in respect of obligations of other persons; making loans, advances and investments; maintaining account balances at other financial institutions; making certain payments in respect of equity interests (including the payment of dividends and other distributions, redemptions and similar payments, payments in respect of warrants, options and other rights, and payments in respect of subordinated indebtedness); and entering into transactions with investment funds and affiliates. Additionally, we are required to maintain a consolidated leverage ratio within a specified range, specified amounts of management fees, a specified amount of adjusted EBITDA, and a specified minimum tangible net worth (as defined in those agreements). These restrictions may limit our flexibility in operating our business, and any failure to comply with these financial and other covenants, if not waived, would cause a default or event of default. Our obligations under the Loan Agreements are secured by substantially all of our assets. In the case of an event of default, creditors may exercise rights and remedies, including the rights and remedies of a secured party, under such agreements and applicable law, which could materially and adversely affect our business, financial condition and results of operations.

In addition, if any of our clients, investors, suppliers or other parties with whom we conduct business are unable to access funds pursuant to their lending arrangements with such a financial institution, their ability to pay their obligations to us, provide services to us or enter into new commercial arrangements requiring additional payments to us could be adversely affected, which could have a material adverse effect on our operations and cash flows.

Although we assess our banking relationships as we believe necessary or appropriate, our access to funding sources and other credit arrangements in amounts adequate to finance or capitalize our current and projected future business operations could be significantly impaired by factors that affect our company, the financial institutions with which we have credit agreements or arrangements, including the Loan Agreements, directly, or the financial services industry or economy in general.

Dependence on leverage by certain funds, customized separate accounts and portfolio companies subjects us to volatility and contractions in the debt financing markets and could adversely affect the ability of our specialized funds and customized separate accounts to achieve attractive rates of return on those investments, and cash balances maintained for investments are exposed to the credit risks of the financial institutions at which they are held.

Certain of the specialized funds and customized separate accounts we manage, the funds in which we invest and portfolio companies within our funds and customized separate accounts currently rely on leverage and are expected to continue to do so. Certain of our specialized funds and customized separate accounts, as well as the companies in which our specialized funds or customized separate accounts invest, raise capital in structured credit, leveraged loan and high yield bond markets. If elevated interest rates persist or further increase or credit markets experience continued or increasing dislocations, contractions or volatility, the results of operations of our specialized funds and customized separate accounts, as well as the companies in which our specialized funds or customized separate accounts invest, may suffer. Any such events could adversely impact the availability of credit to businesses generally, the cost or terms on which lenders are willing to lend, or the strength of the overall economy.

Reductions in available sources of debt financing, an extended or increased tightening in credit markets, or an increase in either the general levels of interest rates or in the risk spread demanded by sources of indebtedness would make it more expensive to finance investments made by our specialized funds and customized separate accounts and, in the case of rising interest rates, decrease the value of fixed-rate debt investments made by our funds. Certain investments may also be financed through fund-level credit facilities, which may or may not be available for refinancing on favorable terms, or at all, at the end of their respective terms. Further, the cost of borrowing may not be covered by the appreciation of the assets in the investment, which could be exacerbated in difficult market conditions and adversely impact our revenues. We also make arrangements with financial institutions for loans and to hold cash balances on behalf of our clients to fund contributions to and hold distributions from investments. The availability of capital from these debt facilities and cash balances is exposed to the credit risks of the financial institutions at which they are held. Adverse developments that affect financial institutions or the financial services industry generally, or concerns or rumors about any such events or other similar risks, have in the past and may in the future lead to market-wide liquidity problems or the fear of market-wide liquidity problems. If the financial institutions at which our specialized funds', customized separate accounts', clients' or investors' credit facilities or cash account balances are held were to be placed into receivership or become insolvent, their ability to access existing cash, cash equivalents and investments, or to access existing or new banking arrangements or facilities to fund commitments, could be threatened or lost, which could have a material adverse effect on our reputation and results of operations. Account balances at these institutions typically exceed FDIC insurance coverage of \$250,000 per depositor, and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. Finally, limitations on the deductibility of interest expense on indebtedness used to finance our specialized funds' investments reduce the after-tax rates of return on the affected investments and make it more costly to use debt financing. Any of these factors may have an adverse impact on our business, results of operations and financial condition.

In addition, we may invest in businesses with capital structures that have significant leverage. The leveraged capital structure of such businesses increases the exposure of the funds' portfolio companies to adverse economic factors such as rising interest rates, decreases in credit availability, financial institution risks discussed above, downturns in the economy or deterioration in the condition of such business or its industry. Tighter credit conditions or higher interest rates may also make it more difficult or more expensive for portfolio companies to refinance or extend existing indebtedness, comply with financial covenants or access incremental debt financing, which could increase the risk of default or restructuring. These factors may make such companies less able to cope with changes in business and economic conditions and may impair the operations, value or sustainability of such companies. If the portfolio companies in our funds default on their indebtedness, or otherwise seek or are forced to restructure their obligations or declare bankruptcy, we could lose some or all of our investment and suffer reputational harm. Any adverse impact caused by the use of leverage by portfolio companies in which we directly or indirectly invest could in turn adversely affect the returns of our specialized funds, customized separate accounts and advisory accounts.

Defaults by clients and third-party investors in certain of our specialized funds and customized separate accounts could adversely affect that fund's operations and performance.

Our business is exposed to the risk that clients that owe us money for our services may not pay us, and investors may default on their obligations to fund their commitments. We believe that these risks increase during periods of economic uncertainty, such as in the case of difficult or volatile market and geopolitical conditions, and if the financial institutions holding cash to be used for funding commitments are in financial distress. If investors in our specialized funds and certain customized separate accounts default on their obligations to fund commitments, there may be adverse consequences on the investment process, and we could incur losses and be unable to meet underlying capital calls. For example, investors in many of our specialized funds make capital commitments to those funds that we are entitled to call from those investors at any time during prescribed periods. We depend on investors fulfilling and honoring their commitments when we call capital from them for those funds to consummate investments and otherwise pay their obligations when due. In addition, certain of our funds and customized separate accounts utilize lines of credit to fund investments. Because interest expense and other costs of borrowings under lines of credit are an expense of the fund or account, the fund's or account's net multiple of invested capital may be reduced, as well as the amount of carried interest generated. Any material reduction in the amount of carried interest generated may adversely affect our revenues. We have not had clients or investors fail to honor capital calls to any meaningful extent.

Any investor that did not fund a capital call would be subject to several possible penalties, including having a meaningful amount of its existing investment forfeited in that fund. However, the impact of the penalty is directly correlated to the amount of capital previously invested by the investor in the fund. For instance, if an investor has invested little or no capital early in the life of the fund, then the forfeiture penalty may not be as meaningful. A failure of clients or investors to honor capital calls to a significant degree could have a material adverse effect on our business, financial condition and results of operations.

Our failure to comply with investment guidelines set by our clients could result in damage awards against us or a reduction in AUM, either of which would adversely affect our business.

When clients retain us to manage assets on their behalf as discretionary manager of a customized separate account, they specify certain guidelines regarding investment allocation and strategy that we are required to observe in the management of their portfolios. Our failure to comply with these guidelines and other limitations could result in clients terminating their investment management agreement with us, as these agreements generally are terminable without cause on 30 to 90 days' notice. Clients could also sue us for breach of contract and seek to recover damages from us. Even if we comply with all applicable investment guidelines, a client may be dissatisfied with its investment performance or our services or fees, and may terminate their customized separate accounts or advisory accounts or be unwilling to commit new capital to our specialized funds, customized separate accounts or advisory accounts. Any of these events could cause a reduction to our AUM and consequently cause our earnings to decline and materially and adversely affect our business.

Misconduct by our employees, advisors or third-party service providers could harm us by impairing our ability to attract and retain clients and subjecting us to significant legal liability and reputational harm.

There is a risk that our employees, advisors or third-party service providers could engage in misconduct that adversely affects our business. We are subject to a number of laws, obligations and standards arising from our advisory and investment management businesses and our discretionary authority over the assets we manage. The violation of these laws, obligations and standards by any of our employees, advisors or third-party service providers would adversely affect our clients and us by subjecting us to, among other things, civil and criminal penalties or material fines, profit disgorgement, injunctions on future conduct, securities litigation, reputational damage and a general loss of investor confidence. Our business also often requires that we deal with confidential matters of great significance to companies and funds in which we may invest for our clients. If our employees, advisors or third-party service providers were to engage in fraudulent activity, violate regulatory standards or improperly use or disclose sensitive or confidential information, we could be subject to legal or regulatory action and suffer serious harm to our reputation, financial position and current and future business relationships. The pervasiveness of social media and electronic communications and the increasing prevalence of AI could also lead to faster and wider dissemination of any adverse publicity or inaccurate information about us, making effective remediation more difficult and further magnifying the reputational risks associated with negative publicity. It is not always possible to detect or deter misconduct, and the precautions we take that seek to detect and prevent undesirable activity may not be effective. In addition, we allow our employees to work on a hybrid schedule or remotely, which has required us to develop and implement additional precautions in order to detect and prevent employee misconduct. Such additional precautions, which may include the implementation of security and other restrictions, may make our systems more difficult and costly to operate and may not be effective in preventing employee misconduct in a remote work environment. If one of our employees, advisors or third-party service providers were to engage in misconduct or were to be accused of misconduct, our business and our reputation could be materially and adversely affected. See “—Risks Related to Our Industry—Extensive government regulation, compliance failures and changes in law or regulation could adversely affect us.”

The timing at which we receive distributions of carried interest, an element of our revenues, can be sporadic and unpredictable, which may make it difficult for us to achieve steady earnings growth on a quarterly basis and may cause the price of our Class A common stock to decline.

Our cash flow may fluctuate significantly due to the fact that we typically receive carried interest distributions only when investments are realized and achieve a certain preferred return based on performance. It takes a substantial period of time to identify attractive investment opportunities, raise all funds needed to make an investment and then realize the cash value (or other proceeds) of an investment. Even if an investment proves to be profitable, it may be a number of years before any profits can be realized in cash (or other proceeds). In addition, carried interest distributions have in the past and may in the future decrease in difficult, volatile or uncertain economic environments as the ability of general partners to exit and realize value from existing investments may be even more limited than in more stable economic environments. We cannot predict when, or if, any realization of investments will occur, and thus, we cannot predict the timing or amounts of carried interest distributions to us. If we were to receive a distribution of carried interest in a particular quarter, it may have a significant impact on our results for that particular quarter, which may not be replicated in subsequent quarters. As a result, achieving steady growth in net income and cash flow on a quarterly basis may be difficult, which could in turn lead to large adverse movements or general increased volatility in the price of our Class A common stock.

The exercise of redemption or repurchase rights by investors in our evergreen funds may adversely affect our revenues.

Unlike traditional drawdown funds, which generally do not permit redemptions of fund interests until the liquidation of the fund upon scheduled termination dates, our evergreen funds, including our funds registered under the Investment Company Act, contain investor liquidity features that permit investors to redeem or repurchase their interests from time to time. Our evergreen funds have grown substantially in recent years and now represent a more significant portion of our AUM and our management and revenues. As these products

expand across strategies, geographies and investor types, the potential impact of material redemption or repurchase activity on our business has increased. Factors that could result in investors leaving our evergreen funds include changes in interest rates or market conditions that make other investments more attractive, changes in or rebalancing due to investors' asset allocation policies, changes in investor perception regarding our focus or alignment of interest, unhappiness with a fund's performance or investment strategy or liquidity profile, changes in our reputation, negative media coverage of us, our peers or the private markets more broadly, departures or changes in responsibilities of key personnel, performance and liquidity needs of fund investors and legal or regulatory issues that investors perceive to have a bearing on the fund. In a declining market, our evergreen funds, including our funds registered under the Investment Company Act, may experience declines in value, and the pace of redemptions or repurchases and consequent reduction in our assets under management could accelerate. Such declines in value may be both provoked and exacerbated by forced selling of assets, as further described below. Actions taken to meet substantial redemption requests could result in a material adverse effect on the fund's investments, ability to make new investments or ability to achieve its investment objectives.

To the extent appropriate and permissible under a vehicle's constituent documents and applicable law, we may limit redemptions or repurchases in such vehicle for a period of time. While the use of such tools (or "gates") is meant to avoid forced asset sales and protect remaining investors in a fund, the use of such tools may be negatively received by investors, as well as distributors or regulators and could lead to negative publicity, which may lead to volatility in the price of our Class A common stock, regulatory inquiries or litigation. Such events may subject us to reputational harm, make such vehicles less attractive to investors in the future and negatively impact future subscriptions to such vehicles, which could have a material adverse effect on the cash flows of such vehicles and may negatively impact the revenues we derive from them. In addition such events could negatively impact future fundraising for our platform more broadly.

In addition, multiple and sustained redemption or repurchase requests could exhaust a fund's sources of liquidity and create pressure to dispose of investments by a fund sooner than anticipated to satisfy such requests. The investments of such funds are generally illiquid in nature and disposing of such investments within the necessary timeframe could reduce the price at which counterparties are willing to transact and require the fund to sell investments it would otherwise prefer to continue to hold. In most cases, transferring such investments requires the consent of a third-party sponsor, and, if such sponsors are unwilling to consent, a fund may need to liquidate a less desirable investment as an alternative. Such accelerated disposition could reduce or eliminate our potential carried interest associated with such investment, and the reduction in such fund's NAV resulting from the redemption or repurchase would reduce the management fees payable to us and may reduce or eliminate any incentive fees or carried interest to which we might otherwise have been entitled.

Finally, the inclusion of redemption or repurchase rights in our evergreen funds create heightened risk of operational error, including with respect to the calculation of NAV. Any such errors could adversely affect the exercise of redemption rights and could adversely affect our revenues and profitability, including as a result of investors' indemnification requirements, litigation and/or regulatory investigations. As we launch and scale funds that strike NAV more frequently, including those that calculate NAV on a daily basis, the complexity and frequency of these operational processes increase as do the potential consequences of any errors.

Valuation methodologies for certain assets in our specialized funds and customized separate accounts can be highly subjective, and the values of assets established pursuant to such methodologies may never be realized, which could result in significant losses for our specialized funds and customized separate accounts.

The values of our specialized funds' and discretionary customized separate accounts' investments are determined in accordance with the firm's valuation policies and procedures, as then-currently in effect and approved by the operative documents for the particular specialized fund or customized separate account.

Our specialized funds, customized separate accounts, advisory accounts and the funds in which we invest generally invest in, among other things, illiquid investments or financial instruments for which there is little, if any, market activity and, accordingly, no readily available market price. We determine the value of fund investments held by our specialized funds and customized separate accounts periodically, based on the fair value of such investments as reported by the underlying fund managers to us. Thus, our valuation of the underlying funds in which we invest is largely dependent upon the processes employed by the underlying fund managers of those funds. The fair value of a fund investment's underlying assets is determined using a number of methodologies described in the particular fund's valuation policies, and such fund may engage a third-party valuation agent to assist with such valuation. These valuation methodologies are based on a number of factors, including the nature of the investment, the expected cash flows from the investment, the length of time the investment has been held, restrictions on transfer, local market conditions, control premiums, illiquidity discounts and other generally accepted valuation methodologies, which involve a significant degree of subjective management judgment.

The value of direct investments in portfolio companies held by our specialized funds and customized separate accounts is determined periodically by us using generally accepted valuation methodologies, and we may use independent third-party valuation firms for corroborative assistance in determining the fair value of these investments. These methodologies may include references to market multiples, valuations for comparable companies, public or private market transactions, subsequent developments concerning the companies to which the securities relate, results of operations, financial condition, cash flows, and projections of such companies made accessible to us and such other factors that we may deem relevant.

The methodologies we use in valuing individual investments held by our specialized funds and customized separate accounts are based on a variety of estimates and assumptions specific to the particular investments, and actual results related to the investment may vary materially as a result of the inaccuracy of such assumptions or estimates. For instance, it is possible that a material fact related to the target of the valuation might be inadvertently omitted from our or an underlying fund manager's analysis, resulting in an inaccurate valuation. In addition, because the illiquid investments held by our specialized funds, customized separate accounts, advisory accounts and the funds in which we invest may be in industries or sectors that are unstable, in distress, or undergoing some uncertainty, such investments are subject to rapid changes in value caused by sudden company-specific or industry-wide developments.

Unforeseen market, economic and geopolitical conditions and events could significantly and abruptly impact the valuation of an investment from period to period, and valuation methodologies may change across periods. Because the valuation methodologies described herein generally only occur on a periodic basis, subsequent events that may have a material impact on those valuations may not be reflected until the next periodic valuation date. The impact of factors not accounted for in valuation models and the potential exercise of our subjective judgment in determining valuation might cause some of our investors or regulators to question our valuations or methodologies. There can be no assurance that our policies, or the policies of underlying funds, will address all necessary valuation factors, minimize uncertainty or completely eliminate potential conflicts of interest in such determinations. In addition, as we launch and scale daily-priced interval funds and other evergreen vehicles, we may increasingly rely on quantitative models, regression-based approaches and third-party data inputs to support more frequent NAV calculations. Unlike monthly or quarterly products, for which valuation procedures may be completed over a longer period of time, daily-priced vehicles require that all procedures necessary to strike a NAV be condensed into a shorter window of time, which further increases our exposure to model, data and operational risk.

Because there is significant uncertainty in the valuation of, or in the stability of the value of, illiquid investments, the fair values of such investments as reflected in a specialized fund's or customized separate account's NAV do not necessarily reflect the prices that would actually be obtained if such investments were sold. For example, there may be known or unknown liabilities such as tax exposures with respect to investments, especially those outside the United States, which may not be fully reflected in valuations. Realizations at values significantly lower than the values at which investments have been reflected in specialized fund or customized separate account NAVs would result in reduced gains or increased losses for the applicable fund or customized separate account, a decline in certain asset management fees and the loss of

potential incentive fees by us. A situation in which specialized fund or customized separate account asset values are overstated, whether due to error or otherwise, could result in overstated management and incentive fees for a particular period. Further, while it is unlikely that one single instance, or even multiple concurrent instances, of a misstated valuation would have a material impact on our financial condition or results of operations given our large and increasing base of assets under management, a situation in which asset values turn out to be materially different from values reflected in specialized fund or customized separate account NAVs as a result of any factor or circumstance could trigger various notification requirements, cause investors to lose confidence in us and may result in an unanticipated increase in redemption or repurchase requests for certain of our specialized funds or customized separate accounts and difficulties in our ability to raise additional capital, retain clients or attract new clients, particularly if such issues persist. NAV errors or valuation adjustments in vehicles that strike NAV daily could result in a larger number of impacted shareholders and a greater volume of subscriptions and repurchases executed at incorrect prices than in products that strike NAV monthly or quarterly, which could increase the size and frequency of any required reimbursement, re-processing or other remediation.

The SEC continues to focus on issues related to valuation of private investment vehicles, including consistent application of the methodology, disclosure and conflicts of interest, in its enforcement, examination, and rulemaking activities. Our increased use of registered interval funds and daily-priced evergreen products may subject our valuation practices to heightened scrutiny. If the SEC were to investigate and find errors in our methodologies or procedures, we and/or members of our management could be subject to penalties and fines, which could harm our reputation and our business, financial condition and results of operations could be materially and adversely affected. In addition, changes in the factors considered by the SEC in its enforcement, examination, and rulemaking activities could have a significant effect on the results of the valuation methodologies used to value our portfolio, and our reported fair values for these assets could vary materially if these factors from prior quarters were to change significantly.

Our investment management activities may involve investments in relatively high-risk, illiquid assets, and we and our clients may lose some or all of the amounts invested in these activities or fail to realize any profits from these activities for a considerable period of time.

The investments made by our specialized funds and customized separate accounts and recommended by our advisory services may include high-risk, illiquid assets. We generally have made and expect to continue to make principal investments alongside our investors, as the general partner, in our existing private markets funds and certain customized separate accounts and in any new private markets funds we may establish in the future. The private markets funds in which we invest capital generally invest in securities that are not publicly traded. Even if such securities are publicly traded, many of these funds may be prohibited by contract or applicable securities laws from selling such securities for a period of time. Such funds will generally not be able to sell these securities publicly unless their sale is registered under applicable securities laws, or unless an exemption from such registration requirements is available. Accordingly, the private markets funds in which we invest our clients' capital may not be able to sell securities when they desire and therefore may not be able to realize the full value of such securities. This risk is magnified during times of volatile market conditions and economic and geopolitical uncertainty. The ability of private markets funds to dispose of investments is dependent in part on the public equity and debt markets, to the extent that the ability to dispose of an investment may depend upon the ability to complete an IPO of the portfolio company in which such investment is held or the ability of a prospective buyer of the portfolio company to raise debt financing to fund its purchase. The exit environment across many of our private markets strategies remains challenging and attractive opportunities to dispose of investments may be limited. Furthermore, large holdings of publicly traded equity securities can often be disposed of only over a substantial period of time, exposing the investment returns to risks of downward movement in market prices during the disposition period. Contributing capital to these funds is risky, and we may lose some or the entire amount of our specialized funds' and our clients' investments.

The portfolio companies in which private markets funds have invested or may invest will sometimes involve a high degree of business and financial risk. These companies may be in an early stage of development, may not have a proven operating history, may be operating at a loss or have significant

variations in operating results, may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence, may be subject to extensive regulatory oversight, may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position, may have a high level of leverage, or may otherwise have a weak financial condition. See “—Dependence on leverage by certain funds, customized separate accounts and portfolio companies subjects us to volatility and contractions in the debt financing markets and could adversely affect the ability of our specialized funds and customized separate accounts to achieve attractive rates of return on those investments, and cash balances maintained for investments are exposed to the credit risks of the financial institutions at which they are held.” In addition, these portfolio companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Portfolio companies in non-U.S. jurisdictions may be subject to additional risks, including tariffs and trade barriers, changes in currency exchange rates, exchange control regulations, risks associated with different types (and lower quality) of available information, less developed or efficient financial markets, expropriation or confiscatory taxation and a less developed or stable or an adverse political and regulatory environment.

In addition, during periods of difficult market conditions or slowdowns in a particular investment category, industry or region, portfolio companies may experience decreased revenues, financial losses, difficulty in obtaining access to financing and increased costs. During these periods, these companies may also have difficulty in expanding their businesses and operations and may be unable to pay their expenses as they become due. A general market downturn or a specific market dislocation may result in lower investment returns for the private markets funds or portfolio companies in which our specialized funds and customized separate accounts invest, which consequently would materially and adversely affect investment returns for our specialized funds and customized separate accounts. Furthermore, if the portfolio companies default on their indebtedness, or otherwise seek or are forced to restructure their obligations or declare bankruptcy, we could lose some or all of our investment and suffer reputational harm.

We may pursue investment opportunities that involve business, regulatory, legal or other complexities.

We may pursue investment opportunities that have unusually complex business, regulatory and/or legal aspects to them. Some of our investments may be structured as an investment in which we only acquire a minority interest or in which two or more investors serve together or collectively as equity sponsors, which generally means that any governance rights must be shared with the other investors. Accordingly, decisions relating to the investment may be made by third parties, which could have a material adverse effect on the returns achieved by us on the investment. Complexity presents risks, as such transactions can be more difficult, expensive and time-consuming to finance and execute, it can be more difficult to manage or realize value from the assets acquired in such transactions and such transactions sometimes involve a higher level of regulatory scrutiny or a greater risk of contingent liabilities. Any of these risks could materially and adversely affect our business, financial condition and results of operations.

Our specialized funds and customized separate accounts may face risks relating to undiversified investments.

We cannot give assurance as to the degree of diversification that will be achieved in any of our specialized funds or customized separate accounts. In addition, certain of our specialized funds and customized separate accounts may have overlapping investment exposure. Difficult market conditions or slowdowns affecting a particular asset class, industry, geographic region or other category of investment could have a significant adverse impact on a given specialized fund or customized separate account if its investments are concentrated in that area and could adversely affect multiple specialized funds and customized separate accounts if they have overlapping investments. Accordingly, a lack of diversification on the part of a specialized fund or customized separate account could adversely affect its investment performance and affect our ability to raise new funds. If an overlapping investment performs poorly, becomes impaired or otherwise underperforms, the adverse effects may be felt by more than one specialized fund or customized separate account at the same time and the effect of adverse investment performance may be magnified on our business. All of these factors could, as a result, affect our business, financial condition and results of operations.

Our specialized funds and customized separate accounts make investments in funds and companies that we do not control.

Investments by most of our specialized funds and customized separate accounts will include debt instruments and equity securities of companies that we do not control. Our specialized funds and customized separate accounts may invest through direct investment arrangements or acquire minority equity interests and may also dispose of a portion of their equity investments in portfolio companies over time in a manner that results in their retaining a minority investment. Consequently, the performance of our specialized funds and customized separate accounts will depend significantly on the investment and other decisions made by third parties, which could have a material adverse effect on the returns achieved by our specialized funds or customized separate accounts. Portfolio companies in which the investment is made may make business, financial or management decisions with which we do not agree. In addition, the majority stakeholders or their management may take risks or otherwise act in a manner that does not serve our interests. If any of the foregoing were to occur, the values of our investments and the investments we have made on behalf of clients could decrease and our financial condition, results of operations and cash flow could suffer as a result.

Investments by our specialized funds, customized separate accounts and advisory accounts may in many cases rank junior to investments made by other investors.

In many cases, the companies in which our specialized funds, customized separate accounts or advisory accounts invest have indebtedness or equity securities, or may be permitted to incur indebtedness or to issue equity securities, that rank senior to our clients' investments in our specialized funds, customized separate accounts or advisory accounts. By their terms, these instruments may provide that their holders are entitled to receive payments of dividends, interest or principal on or before the dates on which payments are to be made in respect of our clients' investments. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a company in which one or more of our specialized funds, customized separate accounts or advisory accounts hold an investment, holders of securities ranking senior to our clients' investments would typically be entitled to receive payment in full before distributions could be made in respect of our clients' investments. After repaying senior security holders, the company may not have any remaining assets to use for repaying amounts owed in respect of our clients' investments. To the extent that any assets remain, holders of claims that rank equally with our clients' investments would be entitled to share on an equal and ratable basis in distributions that are made out of those assets. Also, during periods of financial distress or following an insolvency, our ability to influence a company's affairs and to take actions to protect investments by our specialized funds, customized separate accounts or advisory accounts may be substantially less than that of those holding senior interests.

The substantial growth of our business in recent years may be difficult to sustain, and it may place significant demands on our resources and employees and will increase our expenses.

The substantial growth of our business has placed, and if it continues, will continue to place, significant demands on our infrastructure, our investment team and other employees, and will increase our expenses. We strive to maintain a work environment that reinforces our culture of collaboration, motivation and doing the right thing. If we do not continue to develop and implement appropriate processes and tools to maintain this culture, particularly in light of rapid and significant growth in our employee population and our permitting hybrid and remote/office work, our ability to compete successfully and achieve our business objectives could be impaired, which could negatively impact our business, financial condition and results of operations.

In addition, we are required to develop our infrastructure continuously in response to the increasingly complex investment management industry and increasing sophistication of investors. Legal and regulatory developments also contribute to the level of our expenses. The future growth of our business will depend, among other things, on our ability to maintain the appropriate infrastructure and staffing levels to sufficiently address our growth and will require us to incur significant additional expenses and commit additional senior management and operational resources. We may face significant challenges in maintaining adequate financial and operational controls as well as implementing new or updated information and financial systems and procedures. Training, managing and appropriately sizing our work force and other components of our business on a timely and cost-effective basis may also pose challenges. In addition, our efforts to retain and attract qualified investment professionals are expected to result in significant additional expenses. There can be no assurance that we will be able to manage our growing business effectively or that we will be able to continue to grow, and any failure to do so could adversely affect our ability to generate revenue and control our expenses.

We may not be able to maintain our desired fee structure as a result of industry pressure from private markets investors to reduce fees, which could have a material adverse effect on our profit margins and results of operations.

We may find it harder to retain and raise funds, and we may lose investment opportunities in the future, if we do not offer prices, structures and terms competitive with those offered by our competitors. We may not be able to maintain our current fee structure as a result of industry pressure from private markets investors to reduce fees. In order to maintain our desired fee structure in a competitive environment, we must be able to continue to provide clients with investment returns and service that incentivize our investors to pay our desired fee rates. We cannot assure you that we will succeed in providing investment returns and service that will allow us to maintain our desired fee structure. Fee reductions on existing or future new business could have a material adverse effect on our profit margins and results of operations.

Our operation of registered investment companies and compliance with the restrictions of the Investment Company Act or other regulations could adversely affect us.

Our business activities are subject to additional regulatory requirements that could adversely impact profitability. Certain evergreen funds we offer are registered investment companies under the Investment Company Act or are subject to other rules applicable to our evergreen funds, notably those of the Luxembourg supervisory authority, the Commission de Surveillance du Secteur Financier (the “CSSF”) with respect to our evergreen funds domiciled in Luxembourg. The Investment Company Act and the rules thereunder, the rules applicable to our evergreen funds domiciled in Luxembourg as well as applicable European legislation contain detailed parameters for the organization and operation of these evergreen funds. Among other things, the Investment Company Act and the rules thereunder limit or prohibit transactions with affiliates, impose limitations on the issuance of debt and equity securities, prohibit the issuance of stock options and impose certain governance and board independence requirements. In addition, we depend on third parties to assist us in servicing and complying with regulatory obligations with respect to our evergreen funds. These limitations, obligations and reliance on third-party service providers used to assist us in servicing our evergreen funds could materially and adversely affect our business, financial condition and results of operations.

In addition, the failure to comply with any of the regulations that we are subject to, could subject us to enforcement actions, which may materially and adversely affect our business, financial condition and results of operations.

Our risk management strategies and procedures may leave us exposed to unidentified or unanticipated risks.

Risk management applies to our operations as well as to the investments we make for our specialized funds and customized separate accounts. We have developed and continue to update strategies and procedures specific to our business for identifying, assessing, managing and mitigating risks, which include market risk, liquidity risk, operational risk and reputational risk. Management of these risks can be very complex. These strategies and procedures may fail under some circumstances, particularly if we are confronted with risks that we have underestimated or not identified, including those related to difficult market or geopolitical conditions. Given the large number and size of our funds, we often have large positions with a single counterparty. For example, we and most of our funds have credit lines. If the lender under one or more of those credit lines were to freeze the account in response to sanctions or become insolvent, we may have difficulty replacing the credit line and the affected fund(s) or we may face liquidity challenges, which may adversely affect our business operations or the fund's ability to close on an investment. If that counterparty is unable to perform its obligations or performs below our standards, we, our specialized funds, customized separate accounts and other investments may be adversely affected. In addition, some of our methods for managing the risks related to our clients' investments are based upon our analysis of historical private markets behavior. Statistical techniques are applied to these observations in order to arrive at quantifications of some of our risk exposures. Historical analysis of private markets returns requires reliance on valuations performed by fund managers, which may not be reliable measures of current valuations. These statistical methods may not accurately quantify our risk exposure if circumstances arise that were not observed in our historical data. In particular, as we introduce new types of investment structures, products or services, our historical data may be incomplete. Failure of our risk management techniques could materially and adversely affect our business, financial condition and results of operations, including our right to receive incentive fees.

The due diligence process that we undertake in connection with investments may not reveal all facts that may be relevant in connection with an investment.

Before making or recommending investments for our clients, we conduct due diligence that we deem reasonable and appropriate based on the facts and circumstances applicable to each investment. When conducting due diligence, we may be required to evaluate important, complex, and sometimes evolving, business, financial, credit, tax, accounting, technological, environmental, social, governance and legal and regulatory issues. Outside consultants, legal advisors and accountants may be involved in the due diligence process in varying degrees depending on the type of investment and the parties involved. Nevertheless, when conducting due diligence and making an assessment regarding an investment, we rely on the information available to us, including information provided by the target of the investment and, in some circumstances, third-party investigations, and such an investigation will not necessarily result in the investment ultimately being successful or in identifying all risks. In addition, we may not identify or foresee future developments that could have a material adverse effect on an investment, including, for example, rapidly changing fundamentals in a certain sector, geography or asset class, or technological disruption of a specific company or asset or an entire industry, including as a result of the rapid development and implementation of AI.

Moreover, the due diligence investigation that we will carry out with respect to any investment opportunity may not detect or highlight all relevant facts (including bribery, fraud or other illegal activities) or risks that are necessary or helpful in evaluating such investment opportunity. Instances of bribery, fraud, accounting irregularities and other improper, illegal or corrupt practices can be difficult to detect and may be more widespread in certain jurisdictions. Many of our specialized funds, customized separate accounts or advisory accounts have invested in emerging market countries that may not have established laws and regulations that are as stringent as in more developed nations, or where existing laws and regulations may not be consistently enforced. Due diligence on investment opportunities in these jurisdictions is frequently more complicated because consistent and uniform commercial practices in such locations may not have developed,

and bribery, fraud, accounting irregularities and corrupt practices can be especially difficult to detect in such locations. Such misconduct may undermine our due diligence efforts with respect to such companies and could negatively affect the valuations of investments in such companies. Further, we may not identify or foresee future developments that could have a material adverse effect on an investment, such as misconduct by personnel at companies in which our specialized funds, customized separate accounts or advisory accounts invest. Isolated incidents involving such matters have occurred in the past but have not had a material impact on our financial condition or results of operations. Financial fraud or other deceptive practices, or failures by personnel at such third-party companies to comply with anti-bribery, trade sanctions or other legal and regulatory requirements, could cause significant legal, reputational and business harm to us.

In addition, a substantial portion of our specialized funds are funds-of-funds, and therefore we are dependent on the due diligence investigation of the general partner or direct investment partner leading such investment. We have little or no control over their due diligence process, and any shortcomings in their due diligence could be reflected in the performance of the investment we make with them on behalf of our clients. Poor investment performance could lead clients to terminate their agreements with us and/or result in negative reputational effects, either of which could materially and adversely affect our business, financial condition and results of operations.

Finally, some matters covered by our due diligence process, such as responsible investing and sustainability considerations, are subject to evolving market and regulatory standards, which we may not accurately or fully anticipate. Our responsible investing and sustainability due diligence framework does not represent a universally recognized standard, as we continue to observe different frameworks and methodologies being implemented throughout the industry. Selecting and evaluating sustainability risks in connection with investing is subjective by nature. The materiality of sustainability risks and potential impacts on an individual investment or portfolio depend on many factors, including the relevant industry, country, asset class and investment strategy. There is no guarantee that the criteria utilized, or judgment exercised by us or a third-party sustainability specialist we may engage will always reflect the beliefs, values, internal policies or preferred practices of any particular client or stakeholder. Further, the nature and scope of our due diligence with respect to responsible investing and sustainability will vary based on the investment, which may present challenges in complying with a globally recognized standard, if one emerges in the future.

Restrictions on our ability to collect and analyze data regarding our clients' investments could adversely affect our business.

Our database of private markets investments includes funds and direct investments that we monitor and report on for our specialized funds, customized separate accounts and advisory accounts. We rely on our database to provide regular reports to our clients, to research developments and trends in private markets and to support our investment processes. We depend on the continuation of our relationships with the general partners and sponsors of the underlying funds and investments in order to maintain current data on these investments and private markets activity. We also rely on the strength of our relationships to encourage voluntary data sharing and engagement on evolving topics, such as responsible investing and sustainability. The termination of such relationships or the imposition of restrictions on our ability to use the data we obtain for our reporting and monitoring services could adversely affect our business, financial condition and results of operations. We are also highly dependent upon the technology platforms within which our data is stored and analyzed, and any disruption in the services provided by such platforms, whether temporary or permanent, could have a material adverse effect on our ability to effectively continue to operate our business without interruption. See “—Operational risks may disrupt our business, damage our reputation, result in financial losses or limit our growth.”

Operational risks may disrupt our business, damage our reputation, result in financial losses or limit our growth.

We rely heavily on our and our third-party service providers' financial, accounting, compliance, monitoring, administration, reporting and other data processing systems and technology platforms, including those of our fund administrators and AIFMs, to conduct our business. If any of these systems do not operate

properly, or are disabled or fail, including the loss of or unauthorized access to data, whether caused by fire, natural disaster, power or telecommunications failure, cyberattack, ransomware, computer viruses, malicious actors, negligence, acts of terrorism or war or otherwise, or if our third-party service providers fail to perform as expected, we could suffer a disruption of our business, financial loss, liability to clients, regulatory intervention or reputational damage, which could materially and adversely affect our business, financial condition and results of operations. Isolated incidents involving such matters have occurred in the past but have not had a material impact on our financial condition or results of operations. If any of our third-party service providers access or use our information for the purpose of competing with us or undermining our efforts, we may lose clients and opportunities, which may adversely affect our financial condition. In addition, we have experienced errors in the execution, confirmation or settlement of transactions, as well as errors in recording, evaluating and accounting for them. While these occurrences have been immaterial to our operations as a whole, the repeated occurrence of such events in the future could cause us to lose clients and opportunities. Our and our third-party service providers' data processing systems and technology may be unable to accommodate our growth or adequately protect the information of our clients or address security risks, and the cost of maintaining and improving such systems and technology may increase from our current level. Such a failure or an increase in costs related to such information systems and technology or transaction errors, could have a material adverse effect on our results of operations, financial condition, cash flow and reputation. A disaster or a disruption in technology or infrastructure that supports our business, including a disruption involving electronic communications, cloud-based infrastructure or other services used by us, our third-party service providers or other third parties with whom we conduct business, or a disruption directly affecting our principal offices, could negatively impact our ability to continue to operate our business without interruption. Our business continuation or disaster recovery programs may not be sufficient to mitigate the harm that could result from such a disaster or disruption, and insurance and other safeguards may not reimburse us for the full amount of our losses. For more information on this risk, please see “—Failure to maintain the security of our information technology networks, or those of our third-party service providers, or data security breaches could result in loss of data, interruptions in our business, harm to our reputation and could have a material adverse effect on our results of operations, financial condition and cash flow.”

We are also subject to the risk that the financial institutions with which we maintain credit facilities or cash account balances fail. For more information on this risk, please see “—Our indebtedness may expose us to substantial risks, and our cash balances are exposed to the credit risks of the financial institutions at which they are held.”

Failure to maintain the security of our information technology networks, or those of our third-party service providers, or data security breaches could result in loss of data, interruptions in our business, harm to our reputation and have a material adverse effect on our results of operations, financial condition and cash flow.

We rely on the reasonably secure processing, storage and transmission of confidential and other sensitive information in our computer systems, hardware, software, technology infrastructure, online sites and networks, and those of our third-party service providers and their vendors. In the ordinary course of our business, we collect and store a range of data, including our proprietary business information and intellectual property, and personally identifiable and other sensitive information relating to our employees, our clients, our portfolio companies, in cloud applications and on our networks, as well as on systems operated by third parties on our behalf. The secure processing, maintenance and transmission of this information are critical to our operations.

We, our service providers and their vendors face a variety of security threats on a regular basis, including ongoing cybersecurity threats and attacks that are intended to gain unauthorized access to and steal our sensitive or proprietary information, destroy or corrupt data, disable, disrupt or degrade systems, divert or otherwise steal funds, or impersonate us or our employees using technologies such as generative AI and deepfakes. Cyber-attack techniques are continually evolving, may not immediately be recognized, can originate from a wide variety of sources and may be difficult to detect or fully remediate. There has been an increase in the frequency, sophistication and ingenuity of the data security threats we and our service providers face, which has been exacerbated with the advancement of AI, which malicious third parties are

using to create new, sophisticated and more frequent attacks. We, our employees and certain of our third-party service providers have been and expect to continue to be the target of hacking attacks, “phishing” or other forms of social engineering attacks, business-email compromise and other efforts to obtain unauthorized access to data and systems, and the subject of impersonations and fraudulent requests for money and other activities. Attacks range from those common to businesses generally to those that are more advanced and persistent, and attackers may target us because members of our senior management team may have public profiles or because, as an alternative investment management firm, we hold a significant amount of confidential and sensitive information about our clients and potential investments. Attackers have in the past gained unauthorized access to sensitive information about us, our clients and investors by attacking our systems and the systems of certain of our service providers. Such prior events, to date, have not had a material impact on our financial condition or results of operations.

Further, we allow employees to work on a hybrid schedule or remotely, which introduces operational risks, including heightened cybersecurity risk, as remote working environments can be less secure and more susceptible to hacking attacks. We are aware of unauthorized use of non-approved consumer AI tools by our employees. Such use increases the risk that confidential information, including material non-public information, trade secrets or personally identifiable information, has been or may be input into those tools, which could result in such information becoming part of a dataset that is accessible by third-party applications and users, including our competitors.

We are dependent on the effectiveness of our and our service providers’ information security policies, procedures and capabilities designed to protect our and their computer, network and telecommunications systems, the data such systems contain or transmit and rely on these policies and systems to enable timely escalation of any cyberattack, assessment of materiality and, where required, regulatory and other disclosures. Measures taken to ensure the integrity of our or our third-party service providers’ systems may not provide adequate protection, may not operate as intended and may not be adequate in the face of new or unforeseen threats, including those exploiting vulnerabilities in widely-used software, AI tools or third-party platforms. Our and our third-party service providers’ computer systems, software and networks may be vulnerable to unauthorized access, theft, misuse, computer viruses, bugs, ransomware or other malicious code, employee, vendor or contractor error or malfeasance, and other events that could have a negative impact on the security of our technology systems and data.

A successful cyberattack, intrusion, compromise of credentials, ransomware event, destruction or corruption of data, loss or misuse of sensitive information or other cybersecurity incident affecting us or our service providers could result in, among other things, loss or unauthorized use or disclosure of confidential or proprietary information, operational disruptions, loss of availability or integrity of critical systems or data, inability to timely process transactions or calculate and report NAV, loss of intellectual property, theft or diversion of funds and damage to equipment and systems. Such an incident, or the perception that one has occurred, could subject us to significant costs and liabilities, including incident response, remediation and system hardening costs, restoring data and systems, legal and consulting fees, costs associated with notification to and remediation for affected individuals, responding to regulatory investigations or examinations, litigation and indemnity obligations, increased insurance premiums, coverage limitations or the unavailability of cyber insurance and reputational damage that could adversely affect our ability to attract and retain clients or raise capital for our products.

Additionally, although the prevalence and scope of applications of distributed ledger technology, digital assets, cryptocurrency and similar technologies is growing, the technology is new and may be vulnerable to cyberattacks or have other inherent technological weaknesses. We and the specialized funds and customized separate accounts we manage are exposed to risks, and may become exposed to additional risks, related to distributed ledger technology and the financial products that use it, such as blockchain, cryptocurrencies and other digital assets, or decentralized finance and related applications, including through our offering funds and other products in tokenized formats, our partnering with and reliance on companies that use, develop, or rely on distributed ledger technology and use of distributed ledger technology by third-party vendors, clients, counterparties and other financial intermediaries with who we transact. Market volatility of financial products

using distributed ledger technology may increase these risks and may also expose us to increased compliance risks.

Cybersecurity, privacy and data protection are a top priority for regulators in the United States and around the world. Many jurisdictions in which we operate have laws and regulations relating to privacy, data protection and cybersecurity, such as the General Data Protection Regulation (“GDPR”) in the EU and U.K., the Personal Information Protection Law (“PIPL”) in China, the SEC’s cybersecurity disclosure rules and the California Privacy Rights Act (“CPRA”). Some jurisdictions have also enacted laws requiring companies to notify individuals and governmental agencies of data security breaches involving certain types of personal data. These rules could increase our compliance costs and potential regulatory liability. There are substantial financial penalties for breach of the GDPR. If we fail to comply with relevant laws and regulations or fail to provide the appropriate regulatory or other notifications of breach in a timely manner, it could result in regulatory investigations and material penalties, which could lead to negative publicity and may cause our clients to lose confidence in the effectiveness of our security measures and us more generally. See “—Rapidly developing and changing data security and privacy laws and regulations could increase compliance costs and subject us to enforcement risks and reputational damage.”

Finally, our technology platforms, data and intellectual property are also subject to a heightened risk of theft or compromise to the extent we engage in operations outside the United States, in particular in those jurisdictions that do not have comparable levels of protection of proprietary information and assets such as intellectual property, trademarks, trade secrets, know-how and customer information and records. In addition, we may be required to compromise protections or forego rights to technology, data and intellectual property in order to operate in or access markets in a foreign jurisdiction. We have seen limited instances of fraudulent actors in foreign jurisdictions seeking to mimic or impersonate us through software applications or the like; these actions, to date, have not had a material impact on our financial condition or results of operations. Any such direct or indirect compromise of these assets could have a material adverse impact on us.

Rapidly developing and changing data security and privacy laws and regulations could increase compliance costs and subject us to enforcement risks and reputational damage.

We are subject to various risks and costs associated with the collection, processing, storage and transmission of personal data and other sensitive and confidential information. Personal data is wide ranging and relates to our clients, employees, counterparties and other third parties. Any actual or perceived inability by us to adequately address privacy concerns, or comply with applicable data security or privacy laws, regulations, policies, industry standards and guidance, contractual obligations, or other legal obligations, even if unfounded, could result in significant regulatory and third-party liability, increased costs, disruptions to our business and operations, and a loss of client confidence and other reputational damage.

As new privacy and data protection laws and regulations are implemented, the time and resources needed for us to seek compliance with such laws and regulations continues to increase. Our compliance obligations include those relating to U.S. state laws and regulations, including, without limitation the CPRA, which provides for enhanced privacy protections for California residents, a private right of action for data breaches and statutory fines and damages for data breaches or other CPRA violations, as well as a requirement of “reasonable” cybersecurity. Further, the SEC has adopted amendments to Regulation S-P requiring covered institutions, including registered investment advisors, to adopt written policies and procedures creating incident response programs to address unauthorized access to customer information, including procedures for notifying affected customers and clients within 30 days, and requiring formal policies for the oversight of service providers handling customer information.

We are also required to comply with foreign data collection and privacy laws, including the GDPR in the EU and U.K., the PIPL in China, and laws in various other jurisdictions in which we have offices or conduct business, including Switzerland, Japan, Hong Kong, Singapore, Australia, Canada, the United Arab Emirates, Chile and Mexico. Financial regulators and data protection authorities throughout the EU and U.K. have broad audit and investigatory powers under the GDPR to probe how personal data is being used and processed. Penalties for non-compliance can be material. Global laws in this area are rapidly increasing in the

scale and depth of their requirements, and are also often extra-territorial in nature. In addition, many regulators have indicated an intention to take more aggressive enforcement actions regarding data privacy, and private actors are seeking to enforce these laws across regions and borders. Furthermore, we frequently have privacy compliance requirements set forth in our contractual arrangements with counterparties. These legal, regulatory and contractual obligations heighten our privacy obligations in the ordinary course of conducting our business in the United States and globally. As new data protection and privacy-related laws and regulations are implemented, the time and resources needed for us to comply with such laws and regulations continues to increase.

While we have taken various measures to help ensure that our policies, processes and systems are in compliance with our obligations, our potential liability remains, particularly given the continued and rapid development of privacy laws and regulations around the United States and the world, varied requirements from jurisdiction to jurisdiction, increased enforcement action and significant monetary penalties.

Technological developments in AI could disrupt the markets in which we operate and subject us to increased competition, legal and regulatory risks and compliance costs.

AI, including machine learning technology and generative and agentic AI, is rapidly evolving. While we may not be able to anticipate, prevent, mitigate or remediate all of the potential risks, challenges or impacts of such development, AI could significantly disrupt the business models and markets in which we operate and subject us to increased competition, legal and regulatory risks and compliance costs, which could have a material adverse effect on our business, financial condition and results of operations.

We currently use, and plan to expand our use of, AI tools and technologies in the operation of our business, including to support investment research and portfolio analytics, enhance client reporting and investor education, assist with software development and other technology workflows, and help automate certain operational, compliance and legal processes. These uses come with potential risks, including, but not limited to, generation of inaccurate, incomplete or biased results, misappropriation of our confidential information, potential cybersecurity vulnerabilities and regulatory burdens. Data in models that AI technologies use are likely to contain a degree of inaccuracy and error, which could result in flawed algorithms and the generation of incomplete, inaccurate or biased results. This could adversely impact our operations to the extent we rely on such technologies. Further if the data we, or the third parties whose services we rely on, use in connection with the application of AI technologies is incomplete, inaccurate or biased in some way, our products, services, and businesses could suffer. There is also a risk that AI tools or applications may be misused or misappropriated by our employees and/or third parties engaged by us. For example, employees may input confidential information, including material non-public information, trade secrets, or personally identifiable information, into AI technologies, resulting in such information becoming part of a dataset that is accessible by third-party AI applications and users, including our competitors. Such actions could subject us to legal and regulatory investigations and/or actions. Further, we may not be able to control how third-party AI technologies that we choose to use are developed or maintained, or how data we input is used or disclosed, even where we have sought contractual protections with respect to these matters. The misuse or misappropriation of our data could have an adverse impact on our reputation and could subject us to legal and regulatory investigations and/or actions. In addition, errors or failures in how we design, implement, monitor, document or govern our internal use of AI tools (including with respect to training data, model selection, human oversight and recordkeeping) could result in operational disruptions, flawed analyses or recommendations, inconsistent treatment of clients or portfolio companies, or non-compliance with our own policies and procedures.

We may also be exposed to competitive risks related to the adoption of AI or other new technologies by others within our industry. If our competitors are more successful than us in the use of AI or development of services or products based on AI, or we do so at a slower pace than others, we may be at a competitive disadvantage. In addition, our investments in technology systems and AI may not deliver the benefits we expect, which could be costly for our business.

Regulators in a number of jurisdictions, including the EU, the United States and various U.S. states, have begun to adopt or consider laws and regulations governing the development and use of AI systems. These frameworks are evolving and in some cases not yet harmonized, and may impose requirements relating to risk assessment, data governance, transparency, human oversight and recordkeeping. We also face risk that our public disclosures about our use of AI tools, products or strategies could be alleged to be incomplete, inaccurate or misleading, including claims that we have overstated the capabilities or impact of AI in our business, also known as AI-washing. Any regulatory change, investigation or allegation could result in increased compliance costs, delay or limit our use of AI technologies, subject us or our portfolio companies to fines or other penalties, or otherwise adversely affect our business, reputation, financial condition and results of operations.

Our failure or inability to obtain, maintain, protect and enforce our trademarks, service marks, trade names and other intellectual property rights could adversely affect our business, including the value of our brands.

We own or have a license to the trademarks, service marks or trade names that we use in connection with the operation of our business. In addition, our trade names, logos and website names and URL addresses are owned by us or have been licensed to us. We also own or have a license to the copyrights that protect the content of our solutions. Despite our efforts to obtain, maintain, protect and enforce our trademarks, service marks, trade names and other intellectual property rights in the United States and other jurisdictions, there can be no assurance that these protections will be available in all cases, and our trademarks, service marks, trade names or other intellectual property rights could be challenged, invalidated, declared generic, circumvented, infringed or otherwise violated, including by being registered in foreign jurisdictions by parties that are unaffiliated with Hamilton Lane, which may lead to customer confusion. We may be unable to successfully resolve conflicts to our satisfaction. In some cases, there may be trademark owners who have prior rights to trademarks similar to ours. During trademark registration proceedings, we may receive and have in some cases received rejections of our applications. Additionally, opposition, invalidation or cancellation proceedings have been and may in the future be filed against our trademark applications or registrations, and our trademarks may not survive such proceedings. In the event that our trademarks, service marks or trade names are successfully challenged, we could be forced to rebrand our products, services or business, which could result in loss of brand recognition and could require us to devote resources towards advertising and marketing new brands. Over the long term, if we are unable to establish name recognition based on our trademarks, service marks and trade names, then we may not be able to compete effectively. Any claims or customer confusion related to our trademarks, service marks or trade names could damage our reputation and brand and substantially harm our business, liquidity, financial condition and results of operations.

We may be required to protect our trademarks, service marks and other intellectual property rights in an increasing number of jurisdictions. The laws of some foreign countries do not protect intellectual property rights to the same extent as the laws of the United States. Accordingly, we may choose not to seek protection in certain countries, and we will not have the benefit of protection in such countries. Moreover, any changes in, or unexpected interpretations of, intellectual property laws in any jurisdiction may compromise our ability to obtain, maintain, protect and enforce our intellectual property rights. Policing and enforcing our intellectual property rights is difficult, costly and may not always be effective.

We may face damage to our professional reputation and legal liability if our services are not regarded as satisfactory or for other reasons.

As a financial services firm, we depend to a large extent on our relationships with our clients and our reputation for integrity and high-caliber professional services to attract and retain clients. As a result, if a client is not satisfied with our services, such dissatisfaction may be more damaging to our business than to other types of businesses.

In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings against financial advisors has been increasing. Our asset management and advisory activities may subject us to the risk of significant legal liabilities to our clients and third parties, including our clients'

stockholders or beneficiaries, under securities or other laws and regulations for materially false or misleading statements made in connection with securities and other transactions. In our investment management business, we make investment decisions on behalf of our clients, or make investment recommendations to our clients, that could result in substantial losses. Any such losses also may subject us to the risk of legal and regulatory liabilities or actions alleging negligent misconduct, fraud, breach of fiduciary duty or breach of contract. These risks often may be difficult to assess or quantify, and their existence and magnitude often remain unknown for substantial periods of time. From time to time, we have been and may in the future be subject to legal action and incur significant legal expenses in defending such litigation. In addition, negative publicity and press speculation about us, our investment activities or the private markets in general, whether or not based in truth, or litigation or regulatory action against us or any third-party managers recommended by us or involving us may tarnish our reputation, harm our ability to attract and retain clients, introduce volatility into the price of our Class A common stock and materially adversely affect our financial condition or results of operations. In addition, market participants have in the past, and may in the future, publish negative reports or commentary about us or our industry, including while holding short positions in our Class A common stock, which could damage our reputation, divert management attention, trigger regulatory or other scrutiny and cause the market price of our Class A common stock to decline, regardless of whether such statements contain mischaracterizations. Also, events that damage the reputation of our industry generally, such as highly publicized incidents of fraud or other scandals, could have a material adverse effect on our business, regardless of whether any of these events directly relate to our specialized funds, customized separate accounts or advisory accounts. Substantial legal or regulatory liability could materially and adversely affect our business, financial condition or results of operations or cause significant reputational harm to us, which could seriously harm our business.

Our international operations are subject to certain risks, which may affect our revenue.

We intend to continue to grow our non-U.S. business, including growth into new regions with which we have less familiarity and experience, and we believe this growth is important to our overall success. In addition, many of our clients are non-U.S. entities seeking to invest in U.S. funds and operating companies. Our international operations carry special financial and business risks, which could include the following:

- greater difficulties in managing and staffing foreign operations;
- fluctuations in foreign currency exchange rates that could adversely affect our results;
- additional costs of complying with, and exposure to liability under, foreign regulatory regimes;
- unexpected changes in trading policies, regulatory requirements, tariffs and other barriers;
- longer transaction cycles;
- higher operating costs;
- local labor conditions and regulations;
- adverse consequences or restrictions on the repatriation of earnings;
- potentially adverse tax consequences, such as trapped foreign losses;
- less developed, stable or adverse political and economic environments;
- less developed and efficient financial markets;
- the absence of uniform accounting, auditing, and financial reporting standards, practices, and disclosure requirements and less government supervision and regulation;
- potentially heightened risk of theft or compromise of data and intellectual property, in particular in those jurisdictions that do not have levels comparable to the United States of protection of proprietary

information and assets such as intellectual property, trademarks, trade secrets, know-how and client information and records;

- political hostility to investments by foreign or private equity investors;
- potentially compromised protections or rights to technology, data and intellectual property due to government regulation;
- tariffs, terrorism, political hostilities, war, public health crises and other civil disturbances or other catastrophic events, which may reduce business activity, threaten the safety of our international offices, employees and clients, and affect our plans to expand in particular regions;
- cultural and language barriers and the need to adopt different business practices in different geographic areas; and
- difficulty collecting fees and, if necessary, enforcing judgments.

As part of our day-to-day operations outside the United States, we are required to create compensation programs, employment policies, compliance policies and procedures and other administrative programs that comply with the laws of multiple countries. We also must communicate and monitor standards and directives across our global operations. Our failure to successfully manage and grow our geographically diverse operations could impair our ability to react quickly to changing business and market conditions and to enforce compliance with non-U.S. standards and procedures. If our international business increases relative to our total business, these factors could have a more pronounced effect on our results of operations or growth prospects.

Our international investment vehicles are also subject to different reporting requirements. Information pertaining to such vehicles may be disseminated on a different cadence than the information we are required to report to our stockholders, and local regulations may require that such information be available to investors in certain jurisdictions.

A significant amount of the investments of our specialized funds, customized separate accounts and advisory accounts include private markets funds that are located outside the United States or that invest in portfolio companies located outside the United States. Such non-U.S. investments involve certain factors not typically associated with U.S. investments, including risks related to (i) currency exchange matters, such as exchange rate fluctuations between the U.S. dollar and the foreign currency in which the investments are denominated or commitments to the specialized funds or portfolio funds are denominated, and costs associated with conversion of investment proceeds and income from one currency to another, (ii) differences between the U.S. and foreign capital markets, including the absence of uniform accounting, auditing, financial reporting and legal standards, practices and disclosure requirements and less government supervision and regulation, (iii) certain economic, social and political risks, including exchange control regulations and restrictions on foreign investments and repatriation of capital, tariffs and trade barriers, the risks of war, political, economic or social instability, and (iv) the possible imposition of foreign taxes with respect to such investments or confiscatory taxation. These risks could adversely affect the performance of our specialized funds, customized separate accounts and advisory accounts that are invested in securities of non-U.S. companies, which would adversely affect our business, financial condition and results of operations.

Any payment of distributions, loans or advances to and from our subsidiaries could be subject to restrictions on or taxation of dividends or repatriation of earnings under applicable local law, monetary transfer restrictions, foreign currency exchange regulations in the jurisdictions in which our subsidiaries operate or other restrictions imposed by current or future agreements, including debt instruments, to which our non-U.S. subsidiaries may be a party. As a result, there is a risk that we may not be able to send capital to or receive capital from our operating subsidiaries. Our business, financial condition and results of operations could be adversely impacted, possibly materially, if we are unable to successfully manage these and other risks of international operations in a volatile environment. If our international business increases relative to

our total business, these factors could have a more pronounced effect on our operating results or growth prospects.

We may face increased costs, damage to our professional reputation or face regulatory scrutiny over our commitments, disclosures and practices regarding sustainability, responsible investing and related matters.

We may communicate certain initiatives, commitments and goals regarding our approach to responsible investing and sustainability in our SEC filings or in other public disclosures by us or our specialized funds, which could subject us to scrutiny.

For example, we have committed to offset our operational greenhouse gas (“GHG”) emissions going back to 2019, including our Scope 1, Scope 2 and select Scope 3 emissions, and we have established a goal to reach net zero GHG emissions across our discretionary assets under management on or before 2050. These goals could be difficult and expensive to implement, the personnel, processes and technologies needed to implement them may not be cost effective and may not advance at a sufficient pace to support improvement, and we may not be able to accomplish them within the timelines we seek or at all. We could, for example, determine that it is not feasible or practical to implement or complete certain of such initiatives, commitments or goals due to cost, timing or other considerations. We may come under scrutiny for the scope or nature of our goals, and progress towards or revisions to our goals, which could lead to regulatory scrutiny or penalties, damage to our reputation, and a reduction of stakeholder trust, any of which could ultimately adversely affect our profitability. Our reputation may be harmed if certain stakeholders, such as our clients or stockholders, believe that we are not adequately or appropriately responding to climate change, or conversely, are focusing on climate change in a way that is inconsistent with fiduciary or investor obligations, including through the way in which we operate our business, the composition of our specialized funds’ and customized separate accounts’ existing portfolios, the new investments made by them, or the decisions we make to continue or change our activities in response to climate change considerations. Stakeholder views regarding sustainability- and responsible-investing matters are increasingly divergent and, in some jurisdictions, politically contested, and we may face reputational harm, loss of clients or investors, or increased scrutiny regardless of whether we are perceived as doing too much or too little with respect to such matters.

We could be scrutinized for the accuracy, adequacy or completeness of our disclosure related to our or our specialized funds’ or customized separate accounts’ responsible investing- and sustainability-related policies, practices, initiatives, commitments and goals, and associated progress. Such disclosure may be based on frameworks and standards for measuring progress that are not yet standardized and are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future. Further, as part of our sustainability and responsible investing practices, we rely from time to time on third-party data, services and methodologies and such data, services and methodologies could prove to be incomplete or inaccurate. If our or such third parties’ data, processes or reporting are incomplete or inaccurate, or if we fail to achieve progress with respect to our responsible investing- or sustainability- related goals, we may be subject to enforcement action and our reputation could be adversely affected, particularly if we were to be accused of “greenwashing” in connection with such matters.

We may publish climate-related and stewardship reports that draw on emerging disclosure frameworks in advance of any binding legal requirements. Statements we make regarding these matters may be communicated across multiple channels (including SEC filings, websites, investor presentations, marketing materials, and third-party platforms), and we may face increased risk that such statements are alleged to be inconsistent, incomplete, or misleading when viewed collectively or in hindsight. Our reporting may also be compared against third-party ratings, benchmarks or methodologies that are not uniform, may conflict with one another and may change over time. We cannot control how third parties evaluate or characterize our disclosures or practices, and adverse ratings or assessments could negatively affect our reputation or our ability to attract and retain clients and investors.

Risks Related to Our Industry

The investment management business is intensely competitive.

The investment management business is intensely competitive. Competition is based on a variety of factors, including investment performance, the quality of service provided to clients, investor availability of capital and willingness to invest, investment terms and conditions (including fees and liquidity terms), brand recognition and business reputation. Our investment management business competes with a variety of traditional and alternative asset managers, commercial banks, investment banks and other financial institutions. We expect that competition will continue to increase. A number of factors serve to increase our competitive risks:

- some of our competitors have more relevant experience, greater financial and other resources and more personnel than we do;
- if, as we expect, allocation of assets to alternative investment strategies increases, there will be increased competition for alternative investments and access to fund general partners and managers;
- some of our specialized funds and customized separate accounts or the investments that we recommend to our clients may not perform as well as competitors' funds or other available investment products;
- there are relatively few barriers to entry impeding new asset management firms, including a relatively low cost of entering these lines of business, and the successful efforts of new entrants into our various lines of business is expected to continue to result in increased competition;
- some of our competitors may have a lower cost of capital and access to funding sources that are not available to us, which may create competitive disadvantages for us with respect to our specialized funds, particularly funds that directly use leverage or rely on debt financing of their portfolio companies to generate superior investment returns;
- some of our competitors may be more successful than us in the development of new products to address investor demand for new or different investment strategies and/or regulatory changes or products targeted toward retail;
- further innovations in financial technology (or fintech) have the potential to disrupt the financial industry and change the way financial institutions, as well as investment managers, do business, and could exacerbate these competitive pressures;
- some of our competitors may be more successful than us in the development and implementation of new technology, including AI technology, to service clients and address investor demand for product and strategy innovation;
- some of our competitors may have instituted, or may institute, low cost, high speed financial applications and services based on AI, and new competitors may enter the investment management space using new investment platforms based on AI;
- some of our competitors may be subject to less regulation and accordingly may have more flexibility to undertake and execute certain strategies or investments than us and/or bear less compliance expense than us;
- some of our competitors may have more flexibility than us in raising certain types of investment funds under the investment management contracts they have negotiated with their clients;
- some of our competitors may have more expertise or be regarded by investors as having more expertise in a specific strategy or geographic region;

- certain investors may prefer to invest with private partnerships; and
- other industry participants will from time to time seek to recruit our investment professionals and other employees away from us.

This competitive pressure could adversely affect our ability to make successful investments and restrict our ability to raise future funds, either of which would materially and adversely impact our business, financial condition and results of operations.

Difficult or volatile market, economic and geopolitical conditions and catastrophic events can adversely affect our business and the investments made by our specialized funds, customized separate accounts and advisory accounts in many ways, each of which could materially reduce our revenue, earnings and cash flow.

Our business and the performance of investments made by our specialized funds, customized separate accounts and advisory accounts can be materially affected by difficult or volatile market, economic and geopolitical conditions and events in the United States or throughout the world that are outside our control, including interest rates, inflation, economic recession, the availability and cost of credit, changes in laws, tariffs and trade barriers, sanctions and export controls, currency exchange rates, public health crises, natural disasters and other catastrophic events, climate-related events, civil unrest, trade conflicts, war or threat of war, terrorism or political uncertainty. These factors may affect the level and volatility of securities and other asset prices and the liquidity and valuations and realizable value of investments, and we may not be able to or may choose not to manage our exposure to them in a way that fully mitigates their impact.

During 2025 and early 2026, trade tension and uncertainty persisted with the imposition of tariffs by the United States against trading partners around the world and retaliatory tariffs from other countries. In addition, interest rates remain elevated relative to recent historical levels and inflation remains above target levels. Geopolitical conflicts outside of our control, including wars with Iran and in the Middle East and between Russia and Ukraine, have caused significant volatility in the global financial markets. Disruptions to global energy markets and to key shipping routes, can further increase inflationary pressures and impair economic growth. Such global market volatility and global economic uncertainty add to the various risks and uncertainties in the business environment in which we operate and may have various negative impacts on our business and results of operations, including with respect to decreased valuations of investments by our specialized funds and customized separate accounts, decreased deployments and/or realizations, and adverse impacts on our fundraising activities. Further, if market volatility and uncertainty were to result in a global economic recession, our performance and the performance of our specialized funds and customized separate accounts could be adversely impacted in various ways, as discussed further below.

In addition, our fundraising efforts in non-U.S. jurisdictions may be adversely impacted by negative reactions abroad to the U.S. administration's actions on trade and other policies. For example, there is a risk that other countries, including the EU, could impose tariffs on services from the United States or put other trade barriers in place that would make it less desirable for clients in impacted jurisdictions to do business with us by effectively increasing the price of our services in such areas. We could lose existing clients and/or be unable to attract new ones in impacted jurisdictions. Further, although we are a global company, we are headquartered in the United States. An increase in anti-American sentiment globally or a deterioration in perceptions of U.S.-based financial institutions could have a negative impact on our fundraising with clients and investors outside of the United States. A decline in the pace or size of our fundraising could in turn reduce our revenues. See “—A decline in the pace or size of fundraising or investments made by us on behalf of our specialized funds or customized separate accounts may adversely affect our revenues.”

We are also affected by natural disasters or catastrophes, such as public health crises, pandemics, epidemics, security events, and weather events, any of which could have an adverse impact on our ability to conduct our business. Such events outside of our control could: limit or even materially prohibit our ability to conduct any operations or investment activities in certain locations; restrict our ability to travel and meet with prospective and current clients in person; impede our ability to market our funds and attract new business

(which may result in lower or delayed revenue growth); restrict our ability to conduct onsite due diligence (which may impede our ability to identify investment risk); cause a slowdown in fundraising activity (which could result in delayed or decreased management fees); cause a slowdown in our deployment of capital (which could adversely affect our revenues and our ability to raise capital for new funds); limit the ability of general partners to exit existing investments (which could decrease incentive fee revenue and adversely impact our liquidity and cash flows); and adversely impact our liquidity and cash flows due to declines in revenues. Further, our specialized funds and customized separate accounts could be invested in industries materially impacted by such events outside our control, and such companies in those industries could suffer materially, become insolvent or cease operations altogether, which would decrease the value of our investments and/or cause significant volatility in valuations. These events outside of our control, and actions taken in response to them, may contribute to significant volatility in the financial markets, resulting in increased volatility in equity prices (including our common stock), valuation, material interest rate changes, supply chain disruptions, such as simultaneous supply and demand shock to global, regional and national economies, and an increase in inflationary pressures. These events and the disruptions that they cause, alone or in combination, also have the potential to strain or deplete our infrastructure and response capabilities generally, and to increase costs, each of which could materially and adversely affect us.

Market deterioration has caused, and may in the future cause, us, the specialized funds and customized separate accounts we manage and the funds in which they invest and their underlying portfolio companies to experience tightening of liquidity, reduced earnings and cash flow and impairment charges, as well as challenges in raising and deploying capital, obtaining investment financing and making investments on attractive terms. We have also been required by applicable accounting rules to write down the valuations of investments. These market conditions have also impacted our ability and the ability of funds in which we and our clients invest to liquidate positions in a timely and efficient manner. In times of economic volatility and/or downturn, there are fewer IPOs and sales of the portfolio companies in our funds. To the extent periods of volatility are coupled with a lack of realizations from clients' existing private markets portfolios, such clients may be left with disproportionately outsized remaining commitments, which significantly limits their ability to make new commitments. In addition, during periods of adverse market, economic or geopolitical conditions our specialized funds may have difficulty accessing financial markets, which could make it more difficult or impossible for them to obtain funding for additional investments. More costly and restrictive financing may also adversely affect the investment returns of our specialized funds with direct investments in leveraged buyout transactions and therefore adversely affect the results of operations and financial condition of these funds. A general market downturn, or a specific market dislocation, may result in lower investment returns for our funds, which would adversely affect our revenues. Furthermore, such conditions could also increase the risk of default with respect to investments held by our funds that have significant debt investments. To the extent our specialized funds' investments are concentrated in certain geographies or sectors experiencing periods of slowdown or challenging fundamentals, the impact on these funds may be exacerbated.

Our business could generate lower revenue in a general economic downturn or recession or a tightening of global credit markets. A general economic downturn, recession or tightening of global credit markets may cause us to write down the valuations of investments and result in reduced opportunities to find suitable investments and make it more difficult for us, or the funds in which we and our clients invest, to exit and realize value from existing investments, potentially resulting in a decline in the value of the investments held in our clients' portfolios and a decrease in incentive fee revenue. Any reduction in the market value of the assets we manage will not likely be reported until one or more quarters after the end of the applicable performance period due to an inherent lag in the valuation process of private markets investments. This can result in a mismatch between stated valuation and current market conditions and can lead to delayed revelations of changes in performance and, therefore, delayed effects on our clients' portfolios. If our clients reduce their investments in private markets in favor of investments they perceive as offering greater opportunity or lower risk, our revenue or net income could decline as a result of lower fees being paid to us. Further, if, due to the lag in reporting, their decision to do so is made after the initial effects of a market downturn are felt by the rest of the economy, the adverse effect we experience as a result of that decision could likewise adversely affect our results of operations on a delayed basis. In addition, adverse market or

economic conditions may cause investors in our evergreen funds to increase redemption requests, which may put pressure on the redemption limits of these funds and adversely impact our revenues, see “—The exercise of redemption or repurchase rights by investors in our evergreen funds may adversely affect our revenues.”

In addition, our ability to find high-quality investment managers with whom to invest could become more limited in deteriorating or difficult market environments. Any such occurrence could delay our ability to invest capital, lead to lower returns on invested capital and have a material adverse effect on our business, financial condition and results of operations.

Our profitability may also be adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in revenue relating to changes in market and economic conditions. This risk may be further exacerbated if, as a result of poor fund performance or difficult market and fundraising environments, investors and clients negotiate lower fees or fee concessions that are materially less favorable to us than our desired fee structure. If our revenue declines without a commensurate reduction in our expenses, our net income will be reduced.

In recent years, lending markets experienced challenges amid the failure of multiple regional banks in the United States and elsewhere, which created bank-specific and broader financial institution liquidity risk concerns. Future adverse developments with respect to specific financial institutions or the broader financial services industry may lead to market-wide liquidity shortages and could have a negative impact on the economy and business activity globally, and therefore could adversely affect the performance of our business, specialized funds, customized separate accounts and advisory accounts. For information regarding risks related to our indebtedness, see “—Our indebtedness may expose us to substantial risks, and our cash balances are exposed to the credit risks of the financial institutions at which they are held”. Furthermore, any new or incremental regulatory measures for the U.S. financial services industry may increase costs and create regulatory uncertainty and additional competition for our products. In addition, if the United States were to default on its debt, the negative ramifications on the U.S. and global economies could be unprecedented and long-lasting and may dramatically exacerbate risks highlighted here and elsewhere in this Form 10-K.

Extensive government regulation, compliance failures and changes in law or regulation could adversely affect us.

Our business activities are subject to extensive and evolving laws, rules and regulations with which we seek to comply, and we are subject to periodic, routine and for cause examinations by governmental agencies, including the SEC, and self-regulatory organizations in the jurisdictions in which we operate. Any changes or potential changes in the regulatory framework applicable to our business may impose additional expenses or capital requirements on us, limit our fundraising activities, have an adverse effect on our results of operations, financial condition, reputation or prospects, impair employee retention or recruitment and require substantial attention by senior management. Recently adopted and currently proposed new rules and amendments to existing rules—including the SEC’s amended Marketing Rule, Form PF amendments, beneficial ownership reporting changes, the SEC’s proposal to permit optional semiannual reporting by public companies, and proposals relating to cybersecurity, the use of AI and predictive data analytics, custody, outsourcing and advisor-led secondary transactions—could significantly impact us and our operations, including by increasing compliance burdens and associated regulatory costs and complexity. In addition, new or changed rules enhance the risk of regulatory action, which could adversely impact our reputation and our fundraising efforts, including as a result of public regulatory sanctions and increased regulatory enforcement activity in the financial services industry. It is impossible to determine the extent of the impact of any new laws, regulations, initiatives or regulatory guidance that may be proposed or may become law on our business or the markets in which we operate, but they could make it more difficult for us to operate our business.

Governmental authorities around the world have implemented or are implementing financial system and participant regulatory reform in reaction to volatility and disruption in the global financial markets, financial institution failures and financial frauds. Such reform includes, among other things, additional regulation of investment funds, as well as their managers and activities, including: compliance, risk management and anti-money laundering procedures; expense allocation policies and practices; restrictions on specific types of

investments and the provision and use of leverage; implementation of capital requirements; limitations on compensation to managers; and books and records, reporting and disclosure requirements. We cannot predict with certainty the impact on us, our specialized funds or customized separate accounts, or on private markets funds generally, of any such reforms. Any regulatory reform measures could have an adverse effect on our specialized funds' and customized separate accounts' investment strategies or our business model. We may incur significant expense in order to comply with such reform measures and may incur significant liabilities if regulatory authorities determine that we are not in compliance.

We could also be adversely affected by changes in applicable tax laws, regulations, or administrative interpretations thereof. In 2025, President Trump signed into law the One Big Beautiful Bill Act (the "OBBBA"), which makes significant changes to the U.S. Internal Revenue Code and other federal tax laws. Among other changes, the OBBBA made permanent many of the provisions enacted by the Tax Cuts and Jobs Act of 2017, including the tax rate brackets for individuals and capital expensing provisions. How the OBBBA will be implemented will depend on future administrative guidance and court rulings. The U.S. Congress may also pass additional tax reform legislation in the future. The timing and details of any such guidance, rulings and legislation and the impact on us are uncertain. It is unclear whether additional legislation will be enacted into law under the current administration or, if enacted, what form it would take, and it is also unclear whether there could be further regulatory or administrative action that could affect U.S. tax rules. See "—Risks Related to our Organizational Structure—In certain circumstances, HLA is required to make distributions to us and the direct and indirect owners of HLA, and the distributions that HLA will be required to make may be substantial." Other changes that could be enacted in the future, including changes to tax laws enacted by state or local governments in jurisdictions in which we operate, could result in further changes to state and local taxation and materially adversely affect our financial position and results of operations.

In addition, our effective tax rate and tax liability are based on the application of current income tax laws, regulations and treaties. These laws, regulations and treaties are complex, and the manner in which they apply to us and our funds is sometimes open to interpretation. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. The tax authorities could challenge our interpretation of laws, regulations and treaties, resulting in additional tax liability or adjustment to our income tax provision that could increase our effective tax rate. Changes to tax laws may also adversely affect our ability to attract and retain key personnel.

Our advisory and investment management businesses are subject to regulation in the United States, including by the SEC, the Commodity Futures Trading Commission, the Internal Revenue Service (the "IRS"), FINRA and other regulatory agencies, pursuant to, among other laws, the Investment Advisers Act, the Securities Act, the Internal Revenue Code, the Commodity Exchange Act, the Investment Company Act and the Exchange Act. Any change in such regulation or oversight may have a material adverse impact on our operating results.

We regularly rely on exemptions from various applicable laws. These exemptions are sometimes highly complex and may in certain circumstances depend on compliance by third parties whom we do not control. If, for any reason, these exemptions were to be revoked or challenged or otherwise become unavailable to us, we could be subject to regulatory action or third-party claims, and our business could be materially and adversely affected. Our failure to comply with applicable laws, regulations or regulatory processes could result in fines, suspensions of personnel or other sanctions, including revocation of our registration as an investment advisor or the registration of our broker-dealer subsidiary. Even if an investigation does not result in sanctions, or results in a sanction imposed against us or our personnel that is small in monetary amount, the adverse publicity relating to the investigation or the imposition of sanctions against us by regulators could harm our reputation and cause us to lose existing clients or fail to gain new clients.

In recent years, the SEC has increased its regulation of the asset management and private equity industries, focusing on private advisors' fees, allocation of expenses to funds, marketing practices, allocation of fund investment opportunities, disclosures to fund investors, the allocation of broken-deal expenses,

general conflicts of interest disclosures, valuation practices and other fiduciary obligations. The SEC has also increased its focus on investment advisors' use of AI and predictive data analytics, custody of client assets and outsourcing to service providers. In addition, the SEC will be responsible for examining investment advisors' compliance with a new FinCEN rule, currently scheduled to take effect on January 1, 2028, that will require certain investment advisors to adopt formal anti-money laundering programs and to file suspicious activity reports, and a related joint FinCEN-SEC customer identification program rule for investment advisors. The lack of readily ascertainable market prices for many of the investments made by our specialized funds or customized separate accounts or the funds in which we invest could subject our valuation policies and processes to increased scrutiny by the SEC. In addition, the SEC and other regulators have continued to bring enforcement actions, and to impose substantial monetary penalties, against investment advisors and broker-dealers for insufficient monitoring and preservation of "off-channel" business communications conducted on personal devices and unapproved messaging applications. We may be adversely affected as a result of new or revised legislation or regulations imposed by the SEC, other U.S. or foreign governmental regulatory authorities or self-regulatory organizations that supervise the financial markets by increasing our compliance costs, requiring changes to our policies and procedures or subjecting us to additional examination and enforcement risk. We also may be adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organizations.

To the extent that HLA is a "fiduciary" under ERISA, with respect to benefit plan clients, it is subject to ERISA, and to regulations promulgated thereunder. ERISA and applicable provisions of the Internal Revenue Code impose certain duties on persons who are fiduciaries under ERISA, prohibit certain transactions involving ERISA plan clients and provide monetary penalties for violations of these prohibitions. Our failure to comply with these requirements could have a material adverse effect on our business.

In addition, HLA is registered as an investment advisor with the SEC and is subject to the requirements and regulations of the Investment Advisers Act. Such requirements relate to, among other things, restrictions on entering into transactions with clients, maintaining an effective compliance program, incentive fees, solicitation arrangements, allocation of investments, recordkeeping and reporting requirements, disclosure requirements, limitations on agency cross and principal transactions between an advisor and their advisory clients, as well as general anti-fraud prohibitions. As a registered investment advisor, HLA has fiduciary duties to its clients. Similarly, our subsidiary, Hamilton Lane Securities LLC, is registered as a broker-dealer with the SEC and FINRA, and it is subject to their rules and regulations. We regularly are subject to requests for information, inquiries and routine informal or formal examinations by the SEC and other regulatory authorities with which we cooperate. Such examinations can result in fines, suspensions of personnel, changes in policies, procedures or disclosure or other sanctions, including censure, the issuance of cease-and-desist orders, the suspension or termination of our investment advisor or broker-dealer registrations or the commencement of a civil or criminal lawsuit against us or our personnel. SEC actions and initiatives can have an adverse effect on our financial results. Even if an investigation or proceeding did not result in a sanction, or the sanction imposed against us or our personnel by a regulator were small in monetary amount, the adverse publicity relating to the investigation, proceeding or imposition of these sanctions could harm our reputation and cause us to lose existing clients or fail to gain new clients. The requirements imposed by our regulators under the Investment Advisers Act are designed primarily to ensure the integrity of the financial markets and to protect our clients and are not designed to protect our stockholders.

In addition, a number of jurisdictions, including the United States, have restrictions on foreign direct investment pursuant to which their respective heads of state and/or regulatory bodies have the authority to block or impose conditions with respect to certain transactions, such as investments, acquisitions and divestitures, if such transaction threatens to impair national security. In the United States, the Committee on Foreign Investment in the United States has the authority to review and potentially block, unwind or impose conditions on certain foreign investments in U.S. companies or real estate, which may reduce the number of potential buyers and limit the ability of our funds to realize value from certain existing and future investments. Further, in August 2023, the prior United States presidential administration issued an executive order prohibiting certain investments by U.S. persons in advanced technology sectors in China and jurisdictions designated as "countries of concern." In February 2025, the current United States presidential

administration issued a memorandum describing enhanced restrictions on outbound investments into China, as well as on Chinese investments in the United States. These actions could negatively impact our ability to raise capital from and deploy capital in such jurisdictions, including if the administration seeks to expand such limitations. Even state regulatory agencies may impose restrictions on investments in certain types of assets, which could affect our ability to find attractive and diversified investments and to complete such investments in a timely manner. Other countries continue to establish and/or strengthen their own national security investment clearance regimes, which could have a corresponding effect of limiting our ability to make investments in such countries. Complying with these laws imposes potentially significant costs and complex additional burdens, and any failure by us, our specialized funds, customized separate accounts or the portfolio companies in which they invest to comply with them could expose us to significant penalties, sanctions, loss of future investment opportunities, additional regulatory scrutiny, and reputational harm.

Lastly, governmental actions related to the imposition of tariffs or other trade barriers or changes to international trade agreements or policies could adversely impact our investments, deployments, realizations, fundraising, and revenues. See “—Difficult or volatile market, economic and geopolitical conditions and catastrophic events can adversely affect our business and the investments made by our specialized funds, customized separate accounts and advisory accounts in many ways, each of which could materially reduce our revenue, earnings and cash flow.”

Federal, state and foreign anti-corruption and sanctions laws create the potential for significant liabilities and penalties and reputational harm.

We are also subject to a number of laws and regulations governing payments and contributions to political persons or other third parties, including restrictions imposed by the Foreign Corrupt Practices Act (“FCPA”) as well as sanctions and export control laws administered by the Office of Foreign Assets Control (“OFAC”), the U.S. Department of Commerce and the U.S. Department of State. The FCPA is intended to prohibit bribery of foreign governments and their officials and political parties, and requires public companies in the United States to keep books and records that accurately and fairly reflect those companies’ transactions. OFAC, the U.S. Department of Commerce and the U.S. Department of State administer and enforce various export control laws and regulations, including economic and trade sanctions based on U.S. foreign policy and national security goals against targeted foreign states, organizations and individuals. These laws and regulations relate to a number of aspects of our business, including servicing existing fund investors, finding new fund investors, and sourcing new investments, as well as activities by the portfolio companies in our investment portfolio or other controlled investments.

Similar laws in non-U.S. jurisdictions, such as EU sanctions or the U.K. Bribery Act, as well as other applicable anti-bribery, anti-corruption, anti-money laundering, or sanction or other export control laws in the United States and abroad, may also impose stricter or more onerous requirements than the FCPA, OFAC, the U.S. Department of Commerce and the U.S. Department of State, and implementing them may disrupt our business or cause us to incur significantly more costs to comply with those laws. Different laws may also contain conflicting provisions, making compliance with all laws more difficult. Further, because different interpretations of current sanctions laws may exist, we could become involved in disputes with respect to actions taken in compliance with our understanding of such laws. If we fail to comply with these laws and regulations, we could be exposed to claims for damages, civil or criminal financial penalties, reputational harm, incarceration of our employees, restrictions on our operations and other liabilities, which could negatively affect our business, operating results and financial condition. In addition, we may be subject to successor liability for FCPA violations or other acts of bribery, or violations of applicable sanctions or other export control laws committed by companies in which we or our funds invest or which we or our funds acquire. While we have developed and implemented policies and procedures designed to ensure strict compliance by us and our personnel with the FCPA and other anti-corruption, sanctions and export control laws in jurisdictions in which we operate, such policies and procedures may not be effective to prevent violations. Any determination that we have violated the FCPA or other applicable anti-corruption, sanctions or export control laws could subject us to, among other things, civil and criminal penalties, material fines, profit disgorgement, injunctions on future conduct, securities litigation and a general loss of investor

confidence, any one of which could adversely affect our business prospects, financial condition, results of operations or the market value of our Class A common stock.

Regulation of investment advisors outside the United States could adversely affect our ability to operate our business.

We provide investment advisory and other services and raise funds in a number of countries and jurisdictions outside the United States. In many of these countries and jurisdictions, which include the EU, the EEA, certain of the individual member states of each of the EU and EEA, Australia, Canada, Chile, China, Hong Kong, Israel, Japan, Mexico, Singapore, South Korea, Switzerland, the United Arab Emirates and the U.K., we and our operations, and in some cases our personnel, are subject to regulatory oversight and requirements. In general, these requirements relate to registration, licenses for our personnel, periodic inspections, marketing activities, the provision and filing of periodic reports, and obtaining certifications and other approvals. Failure to maintain compliance with applicable laws and regulations in any such jurisdictions could result in regulatory intervention (including censures, fines, limits on our activities or the suspension or revocation of regulatory authorizations), could adversely affect our business or ability to provide services to our clients and could harm our reputation.

Across the EU and U.K., we are subject to the AIFMD, which regulates, among other things, registration for marketing activities, the structure of remuneration for certain of our personnel and reporting obligations. Certain requirements of the AIFMD and the interpretation thereof remain uncertain and may be subject to change. In 2024, the EU adopted AIFMD II, which introduces changes relating to delegation arrangements and minimum substance requirements for EU AIFMs, liquidity risk management and liquidity-management tools, supervisory reporting, the provision of depositary and custody services and the regulation of loan-originating alternative investment funds, including leverage limits and additional conditions for open-ended loan-originating funds. EU member states were required to transpose AIFMD II into national law by April 16, 2026. In parallel, the U.K. has consulted on, and begun to implement, reforms to its domestic alternative investment fund manager regime. These developments may increase the compliance, operational and reporting burdens for certain of our funds and could affect our ability to market and manage our products efficiently in these jurisdictions. Individual member states of the EU, as well as Switzerland, have imposed additional requirements that may include internal arrangements with respect to risk management, liquidity risks, asset valuations, and the establishment and security of depositary and custodial requirements. In certain other jurisdictions, we are subject to various securities and other laws relating to fundraising and other matters. In some cases, these regimes restrict the ability of non-local firms to market funds or provide advisory services without obtaining local authorizations or complying with specific conduct and disclosure rules, and may change with limited notice. Any such changes, or any inability or perceived failure to comply with applicable local laws and regulations, could require us to alter or cease certain activities in affected jurisdictions, limit our ability to raise capital or provide services there, subject us to sanctions, fines or other penalties, or otherwise adversely affect our business or reputation.

In the EU, MiFID II requires, among other things, all MiFID II investment firms to comply with prescriptive disclosure, transparency, reporting and recordkeeping obligations and obligations in relation to the receipt of investment research, best execution, product governance and marketing communications. As we operate investment firms which are subject to MiFID II, we have implemented policies and procedures to comply with MiFID II where relevant, including where certain rules have an extraterritorial impact on us. Compliance with MiFID II has resulted in greater overall complexity, higher compliance, administration and operational costs, and less overall flexibility.

We are also subject to DORA in the EU, which took effect in 2025, and imposes requirements on financial entities, including AIFMs, relating to information and communications technology risk management, incident reporting, digital operational resilience testing and third-party risk management. In addition, certain regulatory requirements and proposals in the EU and U.K. intended to enhance protection for retail investors and impose additional obligations on the distribution of certain products to retail investors may impose additional costs on our operations and limit our ability to raise capital from retail investors in such jurisdictions.

These laws and regulations, and any changes in them, may affect our costs and manner of conducting business in one or more markets, the risks of doing business, the assets that we manage or advise, and our ability to raise capital from investors. Any failure by us to comply with either existing or new laws or regulations could have a material adverse effect on our business, financial condition and results of operations.

We are subject to shifting and divergent demands with respect to sustainability, responsible investing and related matters from our investors, regulators and other stakeholders across the jurisdictions in which we operate.

We, our specialized funds and customized separate accounts and portfolio companies in which our specialized funds and customized separate accounts invest are subject to shifting and increasingly divergent demands with respect to responsible investing and sustainability-related matters, including with respect to the role of responsible investing principles in the investment process. These expectations are evolving and are not uniform, and in some cases can be in tension with one another, including between certain U.S. jurisdictions and European jurisdictions where regulators and many investors generally expect greater consideration and disclosure of sustainability-related factors. These shifting pressures could impact us in the following ways:

- Certain investors may condition capital commitments in ways that may constrain our capital deployment opportunities, including by limiting investment opportunities in certain sectors, or taking certain actions, or refraining therefrom. These investor-driven preferences or constraints may limit the investable universe or the actions we are able to take within a mandate and, as a result, could affect the risk and return profile of the relevant portfolios.
- As investor and client perspectives evolve and further diverge, we may not be able to adequately anticipate or successfully meet the changing needs of our clients and investors. This could lead to adverse impacts on our fundraising capabilities, exclusion from or loss of certain investment mandates, reputational harm and regulatory scrutiny.
- Certain clients and investors have also begun to request or require data and/or use third-party benchmarks and sustainability ratings to allow them to monitor the impact of their investments. Clients may also require the achievement of certain science-based targets related to climate action in their investments. We may be unable to generate the necessary data or results on the timelines or in the formats requested, or at a reasonable cost, which could negatively affect our relationships with such clients and investors.
- Adopting specific sustainability-related investment restrictions may impair our ability to access capital from certain clients and investors. In the EU, the U.K. and certain other jurisdictions, regulatory frameworks and related guidance for products classified or marketed with sustainability characteristics or objectives increasingly include requirements to limit exposure to certain sectors or activities viewed as presenting heightened sustainability or climate-related risks (for example, thermal coal, oil sands or other high-emitting activities). Regulators and many investors in those jurisdictions have generally encouraged or required increased consideration of sustainability factors in the investment process and in disclosures, and may expect asset managers to limit exposure to, or engage actively with, issuers in such sectors. At the same time, government authorities of certain U.S. states have requested information from, and publicly scrutinized, asset managers with respect to whether such managers have adopted sustainability or responsible investing policies that would restrict investing in certain industries or sectors, such as fossil fuel-based energy, and have indicated that such asset managers may lose opportunities to manage money belonging to these states and their pension funds to the extent the asset managers boycott or take similar actions with respect to certain industries.
- The needs of various investors, clients, and stakeholders may also conflict, and we may be subject to increasing operational complexity and costs to meet their divergent needs or otherwise be required to

make strategic choices around our priorities. There is no guarantee we will be successful in our choices.

- Regulatory penalties and legal actions related to insufficient adaptation to or compliance with sustainability-related laws and regulations, and/or related to the clarity of our disclosures, may lead to reputational damage or financial penalties, which could adversely affect our profitability. Rapidly evolving regulations and laws increase these risks.

In addition, there is increasing scrutiny of workforce development and management programs in the United States and other jurisdictions, including through legislation, executive orders, regulatory initiatives and private litigation. Governmental authorities and private plaintiffs have signaled a willingness to challenge corporate workforce related initiatives under civil-rights and other statutes. Any such challenge involving us, our funds or portfolio companies, whether or not successful, could result in regulatory inquiries or enforcement, litigation, monetary penalties, adverse judgments or settlements, or harm to our reputation, each of which could adversely affect our business.

Climate change and associated regulations, and transitional and physical risks, could adversely affect our business and the operations of portfolio companies in which our specialized funds and customized separate accounts invest.

We, our specialized funds and customized separate accounts and portfolio companies in which our specialized funds and customized separate accounts invest, face risks associated with climate change, including risks related to the impact of climate- and sustainability-related legislation and regulation (both domestically and internationally), risks related to technology- and climate change-related business trends (such as the process of transitioning to a lower-carbon economy) and risks stemming from the physical impacts of climate change. These risks could impact us in many ways including by increasing our compliance costs, increasing our risk of regulatory actions, and potentially adversely impacting the returns that we are able to generate on behalf of clients and investors.

Climate change and sustainability-related regulations have resulted and are likely to continue to result in enhanced disclosure obligations, which could negatively affect us, our specialized funds and customized separate accounts and portfolio companies in which they invest and materially increase the regulatory burden and cost of compliance. Additionally, climate-related rules and disclosure regulations continue to evolve, leading to uncertainty over costs and creating increased complexity. We cannot guarantee that our current approach will meet future regulatory requirements, reporting frameworks or best practices. New global regulatory frameworks have detailed disclosure requirements that could impact us and/or certain of our funds and may conflict with certain of our other regulatory obligations. As a consequence, we may be unable to fully comply with some requirements of these new regimes, which could result in regulatory actions against us. Moreover, collecting, measuring and reporting the information and metrics required under the various existing regulations has imposed administrative burden and increased cost on us, and such burden and cost are likely to increase as new regulations are enacted, particularly if the requirements imposed on us by various regulations lack harmonization on a global basis.

We may also communicate certain climate-related initiatives, commitments and goals in our SEC filings, on our website, or in other disclosures, which subjects us to additional risks, including the risk of being accused of “greenwashing”. Such perception or accusation could damage our reputation, result in litigation or regulatory actions, and adversely impact our ability to raise capital and attract new investors. Certain portfolio companies in which our specialized funds and customized separate accounts invest are also subject to similar regulatory scrutiny, and many face increased costs and potential regulatory risks as it relates to their own approaches, reporting frameworks and climate disclosures. For these companies, not addressing these costs and risks adequately and successfully could adversely impact their competitive position and profitability, leading to greater challenges in achieving our expected returns.

Certain portfolio companies in which our specialized funds and customized separate accounts invest operate in sectors that could face risks as a result of a transition to a lower-carbon economy. For certain of

these portfolio companies, business trends related to climate change may require capital expenditures, product or service redesigns, and changes to operations and supply chains to meet changing customer expectations. Changing preferences could reduce the economic viability or useful life of assets tied to carbon-intensive industries. Portfolio companies may be exposed to heightened physical climate risks, may experience rising insurance costs or reduced availability of insurance coverage. Failure to address these changed expectations could create business risks for portfolio companies, which could negatively impact the returns in our specialized funds and customized separate accounts. Further, significant chronic or acute physical effects of climate change, including extreme weather events such as hurricanes, floods or wildfires, can have an adverse impact on certain portfolio companies and investments, especially those that rely on physical factories, plants or stores located in the affected areas, or that focus on tourism or recreational travel.

Risks Related to Our Organizational Structure

We are a “controlled company” within the meaning of the Nasdaq listing standards and, as a result, qualify for, and intend to continue to rely on, exemptions from certain corporate governance requirements. You will not have the same protections afforded to stockholders of companies that are subject to such requirements.

Holders of our Class B common stock, which is not publicly traded, control a majority of the voting power of our outstanding common stock. As a result, we qualify as a “controlled company” within the meaning of the corporate governance standards of Nasdaq. Under these rules, a listed company of which more than 50% of the voting power is held by an individual, group or another company is a “controlled company” and may elect not to comply with certain corporate governance requirements, including the requirement that (i) a majority of our board of directors consist of independent directors, (ii) director nominees be selected or recommended to the board by independent directors and (iii) we have a compensation committee that is composed entirely of independent directors.

We have elected to rely on these exemptions and expect to continue to do so. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of Nasdaq.

Our only material asset is our interest in HLA, and we are accordingly dependent upon distributions from HLA to pay dividends, taxes and other expenses.

HLI is a holding company and has no material assets other than its ownership of membership units in HLA and certain deferred tax assets. As such, HLI does not have any independent means of generating revenue. We intend to cause HLA to make pro rata distributions to its members, including us, in an amount at least sufficient to allow us to pay all applicable taxes, to make payments under the tax receivable agreement we have entered into with the direct and indirect members of HLA, and to pay our corporate and other overhead expenses. To the extent that HLI needs funds, and HLA is restricted from making such distributions under applicable laws or regulations, or is otherwise unable to provide such funds, it could materially and adversely affect our liquidity and financial condition.

The IRS might challenge the tax basis step-up we received in connection with our IPO and the related transactions and in connection with subsequent acquisitions of membership units in HLA.

We have used a portion of the proceeds from our IPO and from subsequent registered offerings to purchase membership units in HLA from certain of the legacy direct or indirect members of HLA, which resulted in an increase in our share of the tax basis of the assets of HLA that otherwise would not have been available. The HLA membership units held directly and indirectly by the members of HLA other than HLI, including members of our senior management team, may in the future be exchanged for shares of our Class A common stock or, at our election, for cash. These exchanges are likely to result in increases in our share of the tax basis of the assets of HLA that otherwise would not have been available. The increases in tax basis may reduce the amount of tax that we would otherwise be required to pay in the future, although it is possible that the IRS might challenge all or part of that tax basis increase, and a court might sustain such a challenge. Our ability to achieve benefits from any tax basis increase will depend upon a number of factors, as discussed below, including the timing and amount of our future income.

We are required to pay over to legacy direct or indirect members of HLA most of the tax benefits we receive from tax basis step-ups attributable to our acquisition of membership units of HLA, and the amount of those payments could be substantial.

We have entered into a tax receivable agreement for the benefit of the direct and indirect members of HLA other than us, pursuant to which we will pay them 85% of the amount of the tax savings, if any, that we realize (or, under certain circumstances, are deemed to realize) as a result of increases in tax basis (and certain other tax benefits) resulting from our acquisition of membership units or as a result of certain items of loss

being specially allocated to us for tax purposes in connection with dispositions by HLA of certain investment assets. HLI will retain the benefit of the remaining 15% of these tax savings.

The term of the tax receivable agreement commenced upon the completion of our IPO and will continue until all tax benefits that are subject to the tax receivable agreement have been utilized or have expired, unless we exercise our right to terminate the tax receivable agreement (or the tax receivable agreement is terminated due to a change of control or our breach of a material obligation thereunder), in which case, we will be required to make the termination payment specified in the tax receivable agreement. In addition, payments we make under the tax receivable agreement will be increased by any interest accrued from the due date (without extensions) of the corresponding tax return.

The actual increase in tax basis, as well as the amount and timing of any payments under the tax receivable agreement, will vary depending on a number of factors, including, but not limited to, the price of our Class A common stock at the time of the purchase or exchange, the timing of any future exchanges, the extent to which exchanges are taxable, the amount and timing of our income and the tax rates then applicable. We expect that, as a result of the increases in the tax basis of the tangible and intangible assets of HLA attributable to the exchanged HLA interests, the payments that we may make to the legacy direct or indirect members of HLA could be substantial. There may be a material negative effect on our liquidity if, as described below, the payments under the tax receivable agreement exceed the actual benefits we receive in respect of the tax attributes subject to the tax receivable agreement and/or distributions to us by HLA are not sufficient to permit us to make payments under the tax receivable agreement.

In certain circumstances, payments under the tax receivable agreement may be accelerated and/or significantly exceed the actual tax benefits we realize.

The tax receivable agreement provides that if we exercise our right to early termination of the tax receivable agreement, in whole or in part, we experience a change in control, or we materially breach our obligations under the tax receivable agreement, we will be obligated to make an early termination payment to the legacy direct or indirect members of HLA equal to the net present value of all payments that would be required to be paid by us under the tax receivable agreement. The amount of such payments will be determined on the basis of certain assumptions in the tax receivable agreement, including (i) the assumption (except in the case of a partial termination) that we would have enough taxable income in the future to fully utilize the tax benefit resulting from any increased tax basis that results from an exchange and (ii) the assumption that any units (other than those held by Hamilton Lane Incorporated) outstanding on the termination date are deemed to be exchanged for shares of Class A common stock on the termination date. We have in the past exercised our right to terminate the tax receivable agreement with respect to certain individuals who had exchanged all of their HLA units and paid the related early termination payments, and we may elect to do so with respect to other individuals in the future. Any early termination payment may be made significantly in advance of the actual realization, if any, of the future tax benefits to which the termination payment relates.

Moreover, as a result of an elective early termination, a change of control or our material breach of our obligations under the tax receivable agreement, we could be required to make payments under the tax receivable agreement that exceed our actual cash savings under the tax receivable agreement. Thus, our obligations under the tax receivable agreement could have a substantial negative impact on our liquidity and could have the effect of delaying, deferring or preventing certain mergers, asset sales, or other forms of business combinations or changes of control. There can be no assurance that we will be able to finance any such early termination payment. It is also possible that the actual benefits ultimately realized by us may be significantly less than were projected in the computation of the early termination payment.

We will not be reimbursed for any payments previously made under the tax receivable agreement if the basis increases described above are successfully challenged by the IRS or another taxing authority. As a result, in certain circumstances, payments could be made under the tax receivable agreement in excess of our ultimate cash tax savings.

In certain circumstances, HLA is required to make distributions to us and the direct and indirect owners of HLA, and the distributions that HLA will be required to make may be substantial.

HLA is treated as a partnership for U.S. federal income tax purposes and, as such, is not subject to U.S. federal income tax. Instead, taxable income is allocated to members, including us. Pursuant to the limited liability company agreement of HLA (“HLA Operating Agreement”), HLA makes pro rata cash distributions (“tax distributions”) to the members, including us, calculated using an assumed tax rate, to help each of the members to pay taxes on such member’s allocable share of taxable income. Under applicable tax rules, HLA is required to allocate net taxable income disproportionately to its members in certain circumstances. Because tax distributions are based on an assumed tax rate that is the highest possible rate applicable to any member, HLA is required to make tax distributions that, in the aggregate, will likely exceed the amount of taxes that HLA would have paid if it were taxed on its net income at the assumed rate. The pro rata distribution amounts will also be increased if and to the extent necessary to ensure that the amount distributed to HLI is sufficient to enable HLI to pay its actual tax liabilities and its other expenses and costs (including amounts payable under the tax receivable agreement).

Funds used by HLA to satisfy its tax distribution obligations are not available for reinvestment in our business. Moreover, the tax distributions HLA is required to make may be substantial, and may exceed (as a percentage of HLA’s income) the overall effective tax rate applicable to a similarly situated corporate taxpayer. In addition, because these payments are calculated with reference to an assumed tax rate, and because of the disproportionate allocation of net taxable income, these payments will likely significantly exceed the actual tax liability for many of the legacy owners of HLA.

As a result of (i) potential differences in the amount of net taxable income allocable to us and to the direct and indirect owners of HLA, (ii) the lower tax rate applicable to corporations than individuals and (iii) the use of an assumed tax rate in calculating HLA’s distribution obligations, we may receive distributions significantly in excess of our tax liabilities and obligations to make payments under the tax receivable agreement. If we do not distribute such cash balances as dividends on our Class A common stock and instead, for example, hold such cash balances or lend them to HLA, the existing owners of HLA would benefit from any value attributable to such accumulated cash balances as a result of their right to acquire shares of Class A common stock or, at our election, an amount of cash equal to the fair market value thereof, in exchange for their Class B units or Class C units.

Because many members of our senior management team hold their economic interest in HLA through other entities, conflicts of interest may arise between them and holders of shares of our Class A common stock or us.

Because many members of our senior management team hold their economic interest in HLA through holding companies and other vehicles rather than through ownership of shares of our Class A common stock, they may have interests that do not align with, or conflict with, those of the holders of Class A common stock or with us. For example, members of our senior management team have different tax positions from Class A common stockholders and from us, which could influence their decisions regarding whether and when to dispose of assets, whether and when to incur new or refinance existing indebtedness, and whether and when we should terminate the tax receivable agreement and accelerate the obligations thereunder. In addition, the structuring of future transactions and investments may take into consideration the members’ tax considerations even where no similar benefit would accrue to us.

The disparity in the voting rights among the classes of our common stock and limited ability of the holders of our Class A common stock to influence decisions submitted to a vote of our stockholders may have an adverse effect on the price of our Class A common stock.

Holders of our Class A common stock and Class B common stock vote together as a single class on almost all matters submitted to a vote of our stockholders. Shares of our Class A common stock and Class B common stock entitle the respective holders to identical non-economic rights, except that each share of our Class A common stock entitles its holder to one vote on all matters to be voted on by stockholders generally, while each share of our Class B common stock entitles its holder to ten votes until a Sunset becomes

effective. See “Organizational Structure—Class A and Class B Common Stock.” After a Sunset becomes effective, each share of our Class B common stock will entitle its holder to one vote. Certain of the holders of our Class B common stock who are significant outside investors, members of management and significant employee owners have agreed to vote all of their shares in accordance with the instructions of HLAI, and will therefore be able to exercise control over all matters requiring our stockholders’ approval, including the election of our directors, as well as any significant corporate transactions. The difference in voting rights could adversely affect the value of our Class A common stock to the extent that investors view, or any potential future purchaser of our Company views, the superior voting rights and implicit control of the Class B common stock to have value.

Our share price may decline due to the large number of shares eligible for future sale and for exchange.

The market price of our Class A common stock could decline as a result of the perception that sales of a large number of shares of Class A common stock in the market could occur and has declined as a result of such sales. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate. Shares of Class A common stock that were issued in connection with our IPO to the original members of HLA who became HLI stockholders are “restricted securities”, and their resale is subject to future registration or reliance on an exemption from registration.

The approximately 12.3 million shares of Class A common stock issuable upon exchange of the Class B units and Class C units that are held by Class B Holders and Class C Holders will be eligible for resale from time to time, subject to certain exchange timing and volume and Securities Act restrictions.

We have entered into a registration rights agreement with certain Class B Holders who are significant outside investors, members of management and significant employee owners. Under that agreement, subject to certain limitations, those persons have the ability to cause us to register the resale of shares of our Class A common stock that they acquire upon exchange of their Class B units and Class C units in HLA. Registration of these shares would result in them becoming freely tradable in the open market unless restrictions apply.

We expect to continue to pay dividends to our stockholders, but our ability to do so is subject to the discretion of our board of directors and may be limited by our holding company structure and applicable provisions of Delaware and Pennsylvania law.

Since our IPO, our board of directors has declared regular quarterly dividends on our Class A common stock. Although we expect to continue to pay cash dividends to our stockholders, our board of directors may, in its discretion, increase or decrease the level of dividends or discontinue the payment of dividends entirely. In addition, as a holding company, we are dependent upon the ability of HLA to generate earnings and cash flows and distribute them to us so that we may pay our obligations and expenses (including our taxes and payments under the tax receivable agreement) and pay dividends to our stockholders. We expect to cause HLA to make distributions to its members, including us. However, the ability of HLA to make such distributions will be subject to its operating results, cash requirements and financial condition, restrictive covenants in the Loan Agreements and the Note Purchase Agreement and applicable Pennsylvania law (which may limit the amount of funds available for distribution to its members). Our ability to declare and pay dividends to our stockholders is likewise subject to Delaware law (which may limit the amount of funds available for dividends). If, as a consequence of these various limitations and restrictions, we are unable to generate sufficient distributions from our business, we may not be able to make, or may be required to reduce or eliminate, the payment of dividends on our Class A common stock.

Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of us more difficult, limit attempts by our stockholders to replace or remove our current management and may negatively affect the market price of our Class A common stock.

Provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing a change of control or changes in our management. Our certificate of incorporation and bylaws include provisions that:

- provide that vacancies on our board of directors may be filled only by a majority of directors then in office, even though less than a quorum;
- establish that our board of directors is divided into three classes, with each class serving three-year staggered terms;
- require that any action to be taken by our stockholders be effected at a duly called annual or special meeting and not by written consent, except that action by written consent will be allowed for as long as we are a controlled company;
- specify that special meetings of our stockholders can be called only by our board of directors or the chairman of our board of directors;
- establish an advance notice procedure for stockholder proposals to be brought before an annual meeting, including proposed nominations of persons for election to our board of directors;
- authorize our board of directors to issue, without further action by the stockholders, up to 10,000,000 shares of undesignated preferred stock; and
- reflect two classes of common stock, as discussed above.

These and other provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors, which is responsible for appointing the members of our management. Also, the tax receivable agreement provides that, in the event of a change of control, we will be required to make a payment equal to the present value of estimated future payments under the tax receivable agreement, which would result in a significant payment becoming due in the event of a change of control. In addition, we are a Delaware corporation and governed by the Delaware General Corporation Law (the “DGCL”). Section 203 of the DGCL generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with any “interested” stockholder, in particular those owning 15% or more of our outstanding voting stock, for a period of three years following the date on which the stockholder became an “interested” stockholder. While we have elected in our certificate of incorporation not to be subject to Section 203 of the DGCL, our certificate of incorporation contains provisions that have the same effect as Section 203 of the DGCL, except that they provide that HLAI, its affiliates, groups that include HLAI and certain of their direct and indirect transferees will not be deemed to be “interested stockholders,” regardless of the percentage of our voting stock owned by them, and accordingly will not be subject to such restrictions.

The provision of our certificate of incorporation requiring exclusive venue in the Court of Chancery in the State of Delaware or in the federal district courts of the United States of America for certain types of lawsuits may have the effect of discouraging lawsuits against our directors and officers.

Our certificate of incorporation requires, to the fullest extent permitted by law, that (A) the Court of Chancery in the State of Delaware will be the sole and exclusive forum for (1) any derivative action or proceeding brought on our behalf, (2) any action asserting a claim of breach of a fiduciary duty owed by any of our current or former directors, officers or stockholders to us or our stockholders, (3) any action asserting a claim arising pursuant to any provision of the DGCL or our certificate of incorporation or bylaws, (4) any action to interpret, apply, enforce or determine the validity of our certificate of incorporation or bylaws or (5) any action asserting a claim governed by the internal affairs doctrine and (B) the federal district courts of the

United States of America will be the sole and exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act. Although we believe this provision benefits us by making us less susceptible to forum shopping and providing increased consistency in the application of law, the provision may have the effect of discouraging lawsuits against our directors and officers.

If Hamilton Lane Incorporated were deemed an “investment company” under the Investment Company Act as a result of its ownership of HLA, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business.

An issuer will generally be deemed to be an “investment company” for purposes of the Investment Company Act if, absent an applicable exemption:

- it is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities (commonly referred to as the “orthodox investment company test”); or
- it owns or proposes to acquire investment securities having a value exceeding 40% of the value of its total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis (commonly referred to as the “inadvertent investment company test” or “40% test”).

We believe that we are engaged primarily in the business of providing asset management services and not in the business of investing, reinvesting or trading in securities. We also believe that the primary source of income from our business is properly characterized as income earned in exchange for the provision of services. We hold ourselves out as an asset management firm and do not propose to engage primarily in the business of investing, reinvesting or trading in securities. Accordingly, we believe that Hamilton Lane Incorporated and HLA are not “orthodox” investment companies as defined in section 3(a)(1)(A) of the Investment Company Act and described in the first bullet point above. In addition, with respect to the inadvertent investment company test, we do not believe that we or HLA have significant assets that are investment securities for purposes of that test. Accordingly, we believe that Hamilton Lane Incorporated and HLA are not investment companies by virtue of the inadvertent investment company test in section 3(a)(1)(C) of the Investment Company Act as described in the second bullet point above. In addition, we believe Hamilton Lane Incorporated is not an investment company under section 3(b)(1) of the Investment Company Act because it is primarily engaged in a non-investment company business.

The Investment Company Act and the rules thereunder contain detailed parameters for the organization and operations of investment companies. Among other things, the Investment Company Act and the rules thereunder limit or prohibit transactions with affiliates, impose limitations on the issuance of debt and equity securities, prohibit the issuance of stock options, and impose certain governance requirements. We intend to continue to conduct our operations so that Hamilton Lane Incorporated will not be deemed to be an investment company under the Investment Company Act. However, if anything were to happen that would cause Hamilton Lane Incorporated to be deemed to be an investment company under the Investment Company Act, requirements imposed by the Investment Company Act, including limitations on our capital structure, ability to transact business with affiliates (including HLA) and ability to compensate key employees, could make it impractical for us to continue our business as currently conducted, impair the agreements and arrangements between and among HLA, us or our senior management team, or any combination thereof and materially and adversely affect our business, financial condition and results of operations.

A change of control of our Company, including the occurrence of a “sunset,” could result in an assignment of our investment advisory agreements.

Under the Investment Advisers Act, each of the investment advisory agreements for the funds and other accounts we manage must provide that it may not be assigned without the consent of the particular fund or other client. An assignment may occur under the Investment Advisers Act if, among other things, HLA undergoes a change of control. After a “sunset” becomes effective (as described in “Organizational Structure—Class A and Class B Common Stock—Voting Rights” and as described in further detail in our certificate of

incorporation), the Class B common stock will have one vote per share instead of ten votes per share, and the stockholders agreement will expire, meaning that the Class B Holders party thereto will no longer control the appointment of directors or be able to direct the vote on all matters that are submitted to our stockholders for a vote. These events could be deemed a change of control of HLA, and thus an assignment. If such an assignment occurs, we cannot be certain that HLA will be able to obtain the necessary consents from our funds and other clients, which could cause us to lose the management fees and performance fees we earn from such funds and other clients.

Item 1B. Unresolved Staff Comments.

None.

Item 1C. Cybersecurity.

Cybersecurity Risk Management and Strategy

We maintain a comprehensive cybersecurity program designed to protect our systems, operations and data from unauthorized access, theft and destruction. Our program is built around written policies and procedures, including our information security policy and incident response policy, which apply across Hamilton Lane and are reviewed and updated on a recurring basis.

As part of this program, we utilize a variety of preventive and detective measures, including:

- reviews of network access rights and controls;
- vulnerability management and penetration testing performed by independent third parties, with identified issues triaged, remediated and validated through our documented change process;
- patch management and configuration hardening of critical infrastructure and endpoints;
- annual security awareness training for all employees and contingent workers, supplemented by ongoing monthly phishing simulations, micro-trainings and a security champions recognition program;
- centralized security information and event management tooling, which aggregates logs and telemetry to identify anomalies and trigger alerts; high-severity events are routed to our managed detection and response service provider, which provides around-the-clock monitoring and response capabilities;
- periodic security review meetings and risk assessments designed to identify vulnerabilities, track remediation, and inform risk treatment decisions; and
- a vendor risk management program that evaluates cybersecurity controls at third-party service providers, including diligence questionnaires, review of independent assurance reports where available, and contractual provisions addressing security, audit and breach notification obligations.

We also conduct periodic tabletop exercises and scenario-based drills, including cloud-focused incident simulations, to test our ability to coordinate across technology, legal, compliance, risk and business teams and to translate policies into practical playbooks.

Incident Response and Management

Our incident response policy provides the framework for identifying, escalating and responding to security incidents. Among other things, it:

- defines what constitutes a “security breach” and a “cybersecurity incident”;
- sets breach response goals, including verification that an incident occurred, maintenance or restoration of business continuity, reduction of impact, root-cause analysis, prevention of recurrence, and documentation in an incident repository; and
- establishes timelines and responsibilities for triage, mitigation, remediation and communication.

For significant events, our incident response policy designates an incident manager, a cross-functional security incident response team and a crisis response team to coordinate containment, investigation, remediation and communications across the technology, compliance, legal and finance teams and business leadership.

Our incident response policy includes procedures to:

- classify incidents by severity (low, medium, high, critical) and align escalation and response timelines accordingly;
- preserve forensic evidence and maintain appropriate chain of custody; and
- assess the materiality of cybersecurity incidents and determine whether disclosure on Form 8-K is required under SEC rules.

These processes apply both to our own information systems and, where applicable, to third-party systems that process or store our data.

Integration With Enterprise Risk Management and Strategy

Cybersecurity risk management is integrated into our broader enterprise risk management framework. Our ERM committee meets at least quarterly and considers cybersecurity as part of its regular agenda. The Head of End User Technology and Information Security provides formal cybersecurity updates to the ERM committee at least twice annually, with additional updates as needed in response to specific issues or incidents.

Cybersecurity risk is also incorporated into our client and product strategy. For example, we routinely provide institutional clients with responses to cybersecurity questionnaires, participate in diligence discussions on our security controls (including penetration testing results, monitoring capabilities and recovery objectives), and adjust our control environment and documentation in response to evolving client and regulatory expectation.

To date, we do not believe that any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, have materially affected or are reasonably likely to materially affect us, including our business strategy, results of operations or financial condition. As discussed more fully under “Risk Factors” in Part I, Item 1A of this Form 10-K, the sophistication of cyber threats continues to increase, and the preventative actions we take to reduce the risk of cyber incidents and protect our systems and information may be insufficient. No matter how well designed or implemented our cybersecurity controls are, we will not be able to anticipate all security breaches, and we may not be able to implement effective preventive measures against cybersecurity breaches in a timely manner. See “Risk Factors— Failure to maintain the security of our information technology networks, or those of our third-party service providers, or data security breaches could result in loss of data, interruptions in our business, harm to our reputation and have a material adverse effect on our results of operations, financial condition and cash flow” in Part I, Item 1A of this Form 10-K.

Cybersecurity Governance

Board Oversight

Our board of directors has delegated primary oversight of our cybersecurity risks to the audit committee. The audit committee:

- reviews our information technology and data protection strategies;
- oversees and assesses risk with respect to cyberattacks and data privacy matters; and
- receives regular updates from management on our cybersecurity program, key risks, significant incidents (if any) and related remediation activities, at least twice annually in connection with its broader risk and cybersecurity agenda.

Following these sessions, the audit committee reports to the full board on material cybersecurity matters and, where appropriate, provides recommendations regarding our cybersecurity strategy, risk posture and incident response readiness.

Management's Role and Expertise

Management is responsible for day-to-day cybersecurity risk management, including implementation and operation of our cybersecurity program. Key roles include:

- our chief compliance and risk officer, who has ultimate accountability for cybersecurity strategy and is responsible for regulatory compliance and breach reporting to applicable authorities, including leading materiality assessments and regulatory notice decisions for cybersecurity incidents. Before joining Hamilton Lane in 2021, he held senior compliance roles at Sixth Street Partners, GCM Grosvenor and Apollo Global Management, with responsibility for implementing and overseeing global compliance programs, conducting strategic risk analysis, enhancing controls in response to regulatory and business developments, supervising regulatory filings and examinations, and managing compliance across multiple jurisdictions. This officer also has experience overseeing compliance matters relating to cybersecurity, confidentiality, recordkeeping, and vendor risk management, and previously practiced securities law at an international law firm.
- our head of end user technology and information security, who leads our security engineering, security operations and end-user technology functions and serves as a primary incident commander and technical lead under our incident response policy. He has over 15 years of experience in information technology and cybersecurity, including leadership of our end-user technology and information security functions and prior technical roles at Amazon and General Electric.
- other senior leaders, including our chief operating officer, general counsel and chief financial Officer, participate in the cybersecurity incident disclosure response team and crisis response team as appropriate based on the nature and severity of a given issue.

Management is informed about the prevention, detection, mitigation and remediation of cybersecurity incidents through:

- periodic risk assessments and security review meetings that escalate significant findings and remediation plans;
- results of independent audits, penetration tests and System and Organization Controls examinations; and
- output from tabletop exercises and incident post-mortems, including action items and ownership for improvements.

Information about cybersecurity risks and incidents is communicated to the board and its committees through:

- twice annual and ad hoc presentations by our chief compliance and risk officer or senior technology and security leaders to the audit committee covering threat trends, control enhancements, incident activity and key initiatives;

- periodic reporting to the ERM committee and other management committees, which in turn inform the board on enterprise-wide risk; and
- escalation provisions in our incident response policy that require timely notification of senior management and, where appropriate, the board of directors for high and critical incidents or potentially material events.

Through this governance structure, we seek to ensure that cybersecurity considerations are embedded in our overall risk management and strategic decision-making processes and that the board and management receive timely, decision-useful information about material cybersecurity risks and incidents, consistent with Regulation S-K Item 106 and related SEC guidance.

Item 2. Properties

We lease our corporate headquarters and principal offices, which are located at 110 Washington Street, Suite 1300, Conshohocken, Pennsylvania 19428. We also lease additional office space in Denver, Dubai, Frankfurt, Herzliya, Israel (a suburb of Tel Aviv), Hong Kong, London, Mexico City, Miami, Milan, New York, Philadelphia, Portland (Oregon), San Francisco, Scranton, Seoul, Shanghai, Singapore, Stockholm, Sydney, Tokyo, Toronto and Zürich. We do not own any real property. We believe our current facilities are adequate for our current needs and that suitable additional space will be available as and when needed.

Item 3. Legal Proceedings

In the ordinary course of business, we may be subject to various legal, regulatory and/or administrative proceedings from time to time. Although there can be no assurance of the outcome of such proceedings, our management does not believe it is probable that any pending or, to our knowledge, threatened legal proceeding or claim would individually or in the aggregate materially affect our consolidated financial statements. See “Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements — Note 16. Commitments and Contingencies — Litigation” in Part II, Item 8 of this Form 10-K.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Shares of our Class A common stock trade on the Nasdaq Global Select Market under the symbol "HLNE".

There is no established public trading market for our Class B common stock. Class B common stock may not be transferred independently of the corresponding Class B units, which are subject to significant restrictions on transfer as set forth in the HLA Operating Agreement. Holders of Class B common stock are entitled to receive only the par value (\$0.001) of the Class B common stock upon exchange of the corresponding Class B unit pursuant to the exchange agreement.

Holders of Record

As of May 19, 2026, there were five stockholders of record of our Class A common stock. The number of record holders does not include persons who held shares of our Class A common stock in nominee or "street name" accounts through brokers. As of May 19, 2026, there were 26 stockholders of record of our Class B common stock.

Dividend Policy

We declared a quarterly dividend of \$0.54 per share of Class A common stock to record holders in each quarter of fiscal 2026. On May 21, 2026, we declared a quarterly dividend of \$0.60 per share of Class A common stock to record holders at the close of business on June 18, 2026. The payment date will be July 7, 2026. We do not pay dividends on our Class B common stock.

The declaration and payment by us of any future dividends to holders of our Class A common stock is at the sole discretion of our board of directors. Our board intends to cause us to continue to pay a comparable cash dividend on a quarterly basis. Subject to funds being legally available, we intend to cause HLA to make pro rata distributions to its members, including us, in an amount at least sufficient to allow us to pay all applicable taxes, to make payments under the tax receivable agreement, and to pay our corporate and other overhead expenses, including dividend payments to our stockholders.

Stock Performance Graph

The following graph and table depict the total return to stockholders from the closing price on March 31, 2021 through March 31, 2026, relative to the performance of the S&P 500 Index and the Dow Jones U.S. Asset Managers Index. The graph and table assume \$100 invested on March 31, 2021, and dividends reinvested in the security or index.

The performance graph and table are not intended to be indicative of future performance. The performance graph and table shall not be deemed “soliciting material” or to be “filed” with the SEC for purposes of Section 18 of the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any of the Company’s filings under the Securities Act or the Exchange Act.

Total Return Performance

	3/31/21	3/31/22	3/31/23	3/31/24	3/31/25	3/31/26
Hamilton Lane Incorporated	\$ 100.00	\$ 88.69	\$ 86.93	\$ 135.02	\$ 178.55	\$ 117.02
S&P 500	100.00	115.63	106.67	138.53	149.08	172.23
Dow Jones US Asset Managers Index	100.00	106.70	93.61	120.24	132.05	127.88

Issuer Purchases of Equity Securities

The following table provides information about our repurchase activity with respect to shares of our Class A common stock for the quarter ended March 31, 2026:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽²⁾	Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽²⁾
January 1-31, 2026	—	\$ —	—	\$ 50,000,000
February 1-28, 2026	92,950	\$ 107.56	92,950	\$ 40,000,000
March 1-31, 2026 ⁽¹⁾	144,958	\$ 94.90	106,050	\$ 30,000,000
Total	237,908		199,000	\$ 30,000,000

(1) Total shares purchased in March 2026 includes 38,908 shares of Class A common stock tendered by employees as payment of taxes withheld on the vesting of restricted stock granted under the Amended and Restated Hamilton Lane Incorporated 2017 Equity Incentive Plan (the “2017 Equity Plan”).

(2) On November 6, 2018, we announced that our board of directors authorized a program to repurchase, in the aggregate, up to 6% of the outstanding shares of our Class A common stock as of the date of the authorization, not to exceed \$50 million (the “Stock Repurchase Program”). Our board of directors re-approved the Stock Repurchase Program in December 2024. The authorization provides us the flexibility to repurchase shares in the open market or in privately negotiated transactions from time to time, based on market conditions and other factors, and expires 12 months after the date of the first acquisition under the authorization, which occurred on February 20, 2026. During the three months ended March 31, 2026, we repurchased 199,000 shares of our Class A common stock under the Stock Repurchase Program at a weighted-average price of \$100.43 per share, for an aggregate purchase price of approximately \$20.0 million under the Stock Repurchase Program. On May 21, 2026, we announced that our board of directors had approved an increase in the authorization under the Stock Repurchase Program to permit us to purchase up to \$100 million of our Class A common stock, net of amounts already repurchased under the pre-existing authorization, with no share count or duration limitations. As of May 21, 2026, the total repurchase capacity available under the Stock Repurchase Program authorization was approximately \$80.0 million.

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with the accompanying consolidated financial statements and related notes. See “Index to Consolidated Financial Statements of Hamilton Lane Incorporated.”

The following discussion may contain forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those discussed below and elsewhere in this Form 10-K, particularly in “Risk Factors”, the “Summary of Risk Factors” and the “Cautionary Note Regarding Forward-Looking Information.” Unless otherwise indicated, references in this Annual Report on Form 10-K to fiscal 2026, fiscal 2025 and fiscal 2024 are to our fiscal years ended March 31, 2026, 2025 and 2024, respectively.

This section of this Form 10-K generally discusses fiscal 2026 and fiscal 2025 items and year-over-year comparisons between fiscal 2026 and fiscal 2025. A detailed discussion of fiscal 2024 items and year-over-year comparisons between fiscal 2025 and fiscal 2024 that are not included in this Form 10-K can be found in “Management’s Discussion and Analysis of Financial Conditions and Results of Operations” in Part II, Item 7. of our Annual Report on Form 10-K for the fiscal year ended March 31, 2025, as filed with the SEC on May 30, 2025.

Business Overview

We are a global private markets investment solutions provider and operate our business in a single segment. We offer a variety of investment solutions to address our clients’ needs across a range of private markets, including private equity, private credit, direct equity, real estate, infrastructure, other real assets, growth equity, venture capital and impact. These solutions are constructed from a range of investment types, including primary investments in funds managed by third-party managers, direct investments alongside such funds and acquisitions of secondary stakes in such funds, with a number of our clients utilizing multiple investment types. These solutions are offered in a variety of formats covering some or all phases of private markets investment programs:

- *Customized Separate Accounts:* We design and build customized portfolios of private markets funds and direct investments to meet our clients’ specific portfolio objectives with regard to return, risk tolerance, diversification and liquidity. We generally have discretionary investment authority over our customized separate accounts, which comprised \$91.7 billion of our AUM as of March 31, 2026.
- *Specialized Funds:* We invest and manage commingled specialized primary, secondary, private credit, direct equity and multi-strategy investment funds across the private markets, including those that focus on specific markets or strategies such as venture capital, infrastructure, real estate and impact. Our specialized funds include both drawdown funds and evergreen funds. For more information regarding how our specialized funds are structured and other key terms, see “Business—Fees and Other Key Contractual Terms—Specialized Funds” in Part I, Item 1 of this Form 10-K. Specialized funds comprised \$50.1 billion of our AUM as of March 31, 2026.
- *Advisory Services:* We offer non-discretionary investment advisory services to assist clients in developing and implementing their private markets investment programs. Our investment advisory services include asset allocation, strategic plan creation, development of investment policies and guidelines, the screening and recommending of investments, the monitoring of and reporting on investments, and investment manager review and due diligence. Our advisory clients include some of the largest and most sophisticated private markets investors in the world. We had \$905.3 billion of AUA as of March 31, 2026.

- *Distribution Management:* We offer distribution management services to our clients through active portfolio management to enhance the realized value of publicly traded stock they receive as distributions in-kind from private equity funds.
- *Reporting, Monitoring, Data and Analytics:* We provide our clients with comprehensive reporting and investment monitoring services, usually bundled into our broader investment solutions offerings, but also on a stand-alone, fee-for-service basis. We also provide comprehensive research and analytical services as part of our investment solutions, leveraging our large, global, proprietary and high-quality database to support transparency, decision making and portfolio construction. Our data, as well as our benchmarking and forecasting models, are accessible through our proprietary technology solution, Cobalt LP, on a stand-alone, subscription basis.

Our client and investor base is broadly diversified by type, size and geography. Our client base ranges from those seeking to make an initial investment in private markets to some of the world's largest and most sophisticated private markets investors. As we offer a highly customized, flexible service, we are equipped to provide investment services to institutional clients of all sizes and with different needs, internal resources and investment objectives. Our clients include prominent institutional investors in the United States, Canada, Europe, the Middle East, Asia, Australia and Latin America. We provide private markets solutions and services to some of the largest global pension, sovereign wealth and U.S. state pension funds, and believe we are a leading provider of private markets solutions for U.S. labor union pension plans. We also serve a growing number of smaller public and corporate pension plans, sovereign wealth funds, financial institutions and insurance companies, endowments and foundations, as well as family offices and high-net-worth individuals.

Our intermediary clients, which include registered investment advisors, enable us to provide our investment products to a growing set of high-net-worth individuals and family offices. Historically, this segment of investors has had limited options for gaining exposure to the private markets. Hamilton Lane's private wealth platform offers these investors access to private capital and its wealth creation potential. Our differentiators include a global platform, a range of risk/return offerings via both drawdown funds and semi-liquid evergreen funds and across multiple investment strategies.

Trends Affecting Our Business

Our results of operations are affected by a variety of factors, including conditions in the global financial markets and the economic and political environments, particularly in the United States, Western Europe and Asia. Interest rates remain elevated relative to recent historical levels, inflationary pressures have persisted and public equity volatility continues, contributing to a wider range of equity returns. Against this backdrop, we continue to see investor demand for alternative investments as investors seek attractive yield, return and diversification opportunities, and some investors have increased their allocation to private markets relative to other asset classes. In addition, the opportunities in private markets continue to expand as firms have created new vehicles and products in which to access private markets across different geographies and opportunity sets.

In addition to the aforementioned macroeconomic and sector-specific trends, we believe the following factors will influence our future performance:

- *The extent to which investors favor alternative investments.* Our ability to attract new capital is partially dependent on investors' views of alternative assets relative to traditional publicly listed equity and debt securities. We believe fundraising efforts will continue to be impacted by certain fundamental asset management trends that include: (1) the increasing importance and market share of alternative investment strategies to investors (including smaller institutions and high-net-worth individuals) in light of an increased focus on lower-correlated and absolute levels of return; (2) the

increasing demands of the investing community, including the potential for fee compression and changes to other terms; (3) shifting asset allocation policies of institutional investors; and (4) increasing barriers to entry and growth.

- *Our ability to generate strong returns.* We must continue to generate strong returns for our investors through our disciplined investment diligence process in an increasingly competitive market. The ability to attract and retain clients is partially dependent on returns we are able to deliver versus our peers. The capital we are able to attract drives the growth of our AUM and AUA and the management and advisory fees we earn.
- *Our ability to source investments with attractive risk-adjusted returns.* An increasing part of our management fee and incentive fee revenue has been from our direct investment and secondary investment platforms. The continued growth of this revenue is dependent on our continued ability to source attractive investments and deploy the capital that we have raised or manage on behalf of our clients. Because we are selective in the opportunities in which we invest, the capital deployed can vary from year to year. Our ability to identify attractive investments and execute on those investments is dependent on a number of factors, including the general macroeconomic environment, valuation, transaction size, and expected duration of such investment opportunity. A significant decrease in the quality or quantity of potential opportunities could adversely affect our ability to source investments with attractive risk-adjusted returns.
- *Our ability to maintain our data advantage relative to competitors.* We believe that the general trend towards transparency and consistency in private markets reporting will create new opportunities for us to leverage our databases and analytical capabilities. We intend to use these advantages afforded to us by our proprietary databases, analytical tools and deep industry knowledge to drive our performance, provide our clients with customized solutions across private markets asset classes and continue to differentiate our products and services from those of our competitors. Our ability to maintain our data advantage is dependent on a number of factors, including our continued access to a broad set of private market information on an ongoing basis, as well as our ability to maintain our investment scale, considering the evolving competitive landscape and potential industry consolidation.
- *Our ability to continue to expand globally.* We believe that many institutional investors outside the United States are currently underinvested in private markets asset classes and that capturing capital inflows into private capital investing from non-U.S. global markets represents a significant growth opportunity for us. Our ability to continue to expand globally is dependent on our ability to continue building successful relationships with investors internationally and subject to the evolving macroeconomic and regulatory environment of the various countries where we operate or in which we invest.
- *Increased competition to work with top private equity fund managers.* There has been a trend among private markets investors to consolidate the number of general partners in which they invest. At the same time, an increasing flow of capital to the private markets has often times resulted in certain funds being oversubscribed. This has resulted in some investors, primarily smaller investors or less strategically important investors, not being able to gain access to certain funds. Our ability to invest and maintain our sphere of influence with these high-performing fund managers is critical to our investors' success and our ability to maintain our competitive position and grow our revenue.

- *Unpredictable, volatile and uncertain macroeconomic conditions.* Global economic conditions, including political environments, financial market performance, tariff policies, interest rates, credit spreads or other conditions beyond our control, all of which affect the performance of the assets underlying private market investments, are unpredictable and could negatively affect the performance of our clients' portfolios or the ability to raise funds in the future. The United States and countries around the world continue to experience elevated levels of market volatility and uncertainty driven in part by geopolitical conflicts and global trade concerns. This volatility and uncertainty adds to the risks and uncertainties in the business environment in which we operate and may have various negative impacts on our business and results of operations, including with respect to decreased valuations of investments by our specialized funds and customized separate accounts, deployments, realizations, and fundraising activities.
- *Increasing regulatory requirements.* The complex regulatory and tax environment could restrict our operations and subject us to increased compliance costs and administrative burdens, as well as restrictions on our business activities.
- *Expansion of private markets solutions and product innovation.* We believe opportunities in private markets will continue to broaden as investors seek access across a wider range of asset classes, structures and themes. Our ability to benefit from this trend will depend on our ability to develop, scale and distribute compelling products and solutions that meet evolving client objectives and remain competitive with existing and new market participants.
- *Our ability to execute strategic partnerships successfully.* We may seek to broaden our capabilities, expand our geographic reach, enhance our distribution channels or deepen our expertise in certain strategies through strategic partnerships, minority investments and acquisitions. The success of these efforts depends on our ability to identify attractive opportunities and realize the expected strategic and financial benefits of such transactions.
- *Artificial intelligence and technological change.* AI and related technologies are evolving rapidly and are increasingly being applied across investment processes, data analysis, client service and workplace productivity. Our ability to remain competitive will depend in part on our ability to keep pace with the evolution and practical application of these technologies, invest appropriately in our systems and workflows, and adapt our operating model as the use of AI across the workplace continues to expand.

Recent Transactions

Stock Repurchases

In November 2018, we authorized a program to repurchase up to 6% of the outstanding shares of our Class A common stock, not to exceed \$50 million (the "Stock Repurchase Program"). Our board of directors periodically reviews the Stock Repurchase Program, and on May 21, 2026, we announced that our board of directors had approved an increase in the authorization under the Stock Repurchase Program to permit us to purchase up to \$100 million of our Class A common stock, net of amounts already repurchased under the pre-existing authorization, with no share count or duration under the limitations. During the three months ended March 31, 2026, we repurchased 199,000 shares of our Class A common stock under the Stock Repurchase Program at a weighted-average price of \$100.43 per share, for an aggregate purchase price of approximately \$20 million under the Stock Repurchase Program. As of May 21, 2026, the total repurchase available under the Stock Repurchase Program authorization was approximately \$80.0 million.

Key Financial and Operating Measures

Our key financial measures are discussed below.

Revenues

We generate revenues primarily from management and advisory fees, and to a lesser extent, incentive fees. See “—Critical Accounting Estimates—Revenue Recognition of Incentive Fees” and Note 2 of the consolidated financial statements included in Part II, Item 8 of this Form 10-K for additional information regarding the manner in which management and advisory fees and incentive fees are generated.

Management and advisory fees comprise specialized fund and customized separate account management fees, advisory fees and reporting, monitoring data and analytic fees and distribution management fees.

Revenues from customized separate accounts are generally based on a contractual rate applied to committed capital, net invested capital and/or net asset value (“NAV”). These fees often decrease over the life of the contract due to built-in declines in contractual rates and/or as a result of lower net invested capital balances as capital is returned to clients. In certain cases, we also provide advisory and/or reporting services, and, therefore, we also receive fees for services such as monitoring and reporting on a client’s existing private markets investments. In addition, we may provide for investments in our specialized funds as part of our customized separate accounts. In these cases, we generally reduce the asset-based and/or incentive fees on customized separate accounts to the extent that assets in the accounts are invested in our specialized funds so that our clients do not pay duplicate fees.

Revenues from specialized funds are based on a percentage of limited partners’ capital commitments to, net invested capital or NAV in, our specialized funds. The management fee during the investment period is often charged on capital commitments and after the investment period (or a defined anniversary of the fund’s initial closing) is typically reduced by a percentage of the management fee for the preceding year or charged on net invested capital or NAV. In the case of certain funds, we charge management fees on capital commitments, with the management fee increasing during the early years of the fund’s term and declining in the later years. Management fees for certain funds are discounted based on the amount of the limited partners’ commitments, whether the limited partners commit early in the offering period or if the limited partners are investors in our other funds. Revenues from specialized funds that charge management fees during their fundraising periods include retroactive fees. Retroactive fees are management fees earned from investors that commit to a specialized fund after the first close of the fund and are required to pay a catch-up management fee as if they had committed to the fund at the first closing.

Revenues from advisory and reporting, monitoring, data and analytics services are generally annual fixed fees, which vary depending on the services we provide, and are recognized over the service term. In limited cases, advisory service clients are charged basis point fees annually based on the amounts they have committed to invest pursuant to their agreements with us. In other cases where our services are limited to monitoring and reporting on investment portfolios, clients are charged a fee based on the number of investments in their portfolio.

Distribution management fees are generally earned by applying a percentage to AUM or proceeds received. Certain active management clients may elect a fee structure under which they are charged an asset-based fee plus a fee based on net realized and unrealized gains and income net of realized and unrealized losses.

Incentive fees comprise carried interest earned from our specialized funds and certain customized separate accounts structured as single-client funds in which we have a commitment, and performance fees earned on certain other specialized funds and customized separate accounts.

For each of our secondary funds, direct investment funds, strategic opportunity funds and some of our evergreen funds, we generally earn carried interest equal to a fixed percentage of net profits, usually 10.0% to 12.5%, subject to a compounded annual preferred return that is generally 6.0% to 8.0%. To the extent that our primary funds also directly make secondary investments and direct investments, they generally earn carried interest on a similar basis. Furthermore, certain of our primary funds earn carried interest on their investments in other private markets funds on a primary basis that is generally 5.0% of net profits, subject to the fund's compounded annual preferred return. We recognize carried interest when it is probable that a significant reversal will not occur.

Performance fees are based on the aggregate amount of unrealized or realized gains earned by the applicable specialized fund or customized separate account, subject to the achievement of defined minimum returns to the clients or high-water marks. Performance fees range from 5.0% to 12.5% of net profits, with some subject to a compounded annual preferred return that varies by account but is generally 6.0% to 8.0%. Performance fees are recognized when it is probable that a significant reversal will not occur.

The primary contingency regarding incentive fees is the "clawback," or the obligation to return distributions in excess of the amount prescribed by the applicable fund or separate account documents. Incentive fees are typically only required to be returned on a net of tax basis due to a clawback. As such, the tax-related portion of incentive fees is typically not subject to clawback and is therefore recognized as revenue immediately upon receipt. In the event that a payment is made before it can be recognized as revenue, this amount would be included as deferred incentive fee revenue on our Consolidated Balance Sheets and recognized as income in accordance with our revenue recognition policy.

Expenses

Compensation and benefits is our largest expense and consists of (a) base compensation comprising salary, bonuses and benefits paid and payable to employees, (b) equity-based compensation associated with the grants of restricted stock and performance awards and (c) incentive fee compensation, which consists of carried interest and performance fee allocations. We expect to continue to experience a general rise in compensation and benefits expense commensurate with expected growth in headcount and with the need to maintain competitive compensation levels as we expand geographically and create new products and services.

Our compensation arrangements with our employees contain a significant bonus component driven by the results of our operations. Therefore, as our revenues, profitability and the amount of incentive fees earned by our customized separate accounts and specialized funds increase, our compensation costs rise.

Certain current and former employees participate in a carried interest program whereby approximately 25% of incentive fees from certain of our specialized funds and customized separate accounts are awarded to plan participants. We record compensation expense payable to plan participants as the incentive fees become estimable and collection is probable.

General, administrative and other includes travel, accounting, legal and other professional fees, commissions, placement fees, office expenses, depreciation, fund reimbursement expense and other costs associated with our operations. Our occupancy-related costs and professional services expenses, in particular, generally increase or decrease in relative proportion to the number of our employees and the overall size and scale of our business operations. Commissions and placement fees generally fluctuate based on the level and timing of fundraising activity, capital raised for our products and the extent to which we engage third-party placement agents and other distribution channels. Fund reimbursement expenses generally fluctuate in connection with the timing of new fund formations.

Other Income (Expense)

Equity in income of investees primarily represents our share of earnings from our investments in our specialized funds and certain customized separate accounts in which we have a commitment. Equity income primarily comprises our share of the net realized and unrealized gains (losses) and investment income partially offset by the expenses from these investments.

We have commitments in our specialized funds and certain customized separate accounts that invest solely in primary funds, secondary funds and direct investments, as well as those that invest across investment types. Equity in income of investees will increase or decrease as the change in underlying fund investment valuations increases or decreases. Since our direct investment funds invest in underlying portfolio companies, their quarterly and annual valuation changes are more affected by individual company movements than our primary and secondary funds that have exposures across multiple portfolio companies in underlying private markets funds. Our specialized funds and customized separate accounts invest across industries, strategies and geographies, and therefore our investments do not include any significant concentrations in a specific sector or area outside the United States.

Interest expense includes interest paid and accrued on our outstanding debt, along with the amortization of deferred financing costs, amortization of original issue discount and the write-off of deferred financing costs due to the repayment of previously outstanding debt.

Interest income is income earned on cash and cash equivalents.

Non-operating gain (loss), net consists primarily of gains and losses on certain investments, changes in liability under the tax receivable agreement and other non-recurring or non-cash items.

Other income (expense) of Consolidated Funds and Partnerships consists of earnings from consolidated funds and consolidated general partners entities, that are not wholly-owned by us, have commitments as well as interest income, unrealized gains on investments and interest expense on consolidated funds.

Income Tax Expense

We are a corporation for U.S. federal income tax purposes and therefore are subject to U.S. federal and state income taxes on our share of taxable income generated by HLA. HLA is treated as a pass-through entity for U.S. federal and state income tax purposes. As such, income generated by HLA flows through to its members and is generally not subject to U.S. federal or state income tax at the partnership level. Accordingly, the tax liability with respect to income attributable to non-controlling interests (“NCI”) in HLA is generally borne by the holders of such NCI. Our non-U.S. subsidiaries generally operate as corporate entities in non-U.S. jurisdictions and are subject to non-U.S. income taxes.

On July 4, 2025, the One Big Beautiful Bill Act (“OBBBA”) was signed into law in the United States. The OBBBA contains several provisions revising the U.S. federal corporate income tax by, among other things, extending many expiring provisions from the Tax Cuts and Jobs Act of 2017, modifying the international tax framework, and restoring favorable tax treatment for certain business provisions.

As of March 31, 2026, the OBBBA did not have a material impact on our income tax expense.

Non-controlling interests

NCI reflect the portion of income or loss and the corresponding equity attributable to third-party equity holders and employees in certain consolidated subsidiaries that are not 100% owned by us. NCI are presented as separate components in our Consolidated Statements of Income to clearly distinguish between our interests and the economic interests of third parties and employees in those entities.

Fee-Earning AUM

Fee-earning AUM is a metric we use to measure the assets from which we earn management fees. Our fee-earning AUM comprise assets in our customized separate accounts and specialized funds from which we derive management fees that are generally derived from applying a certain percentage to the appropriate fee base. We classify customized separate account revenue as management fees if the client is charged an asset-based fee, which includes the majority of our discretionary AUM accounts but also includes certain non-discretionary AUA accounts. Our fee-earning AUM is equal to the amount of capital commitments, net invested capital and NAV of our customized separate accounts and specialized funds depending on the fee terms. A substantial portion of our customized separate accounts and specialized funds earn management fees based on capital commitments or net invested capital, which are generally not affected by short-term market appreciation or depreciation. However, certain of our products, earn management fees based on NAV, and accordingly, management fees and fee-earning AUM for those products may be affected by changes in market valuations. As a result, the extent to which our revenues and fee-earning AUM are affected by changes in market value varies based on the mix of fee structures across our products.

Our calculations of fee-earning AUM may differ from the calculations of other asset managers, and as a result, this measure may not be comparable to similar measures presented by other asset managers. Our definition of fee-earning AUM is not based on any definition that is set forth in the agreements governing the customized separate accounts or specialized funds that we manage.

Annual Consolidated Results of Operations

The following is a discussion of our consolidated results of operations for fiscal 2026 and 2025. This information is derived from our accompanying consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”).

(in thousands)	Years Ended March 31,	
	2026	2025
Revenues		
Management and advisory fees	\$ 584,216	\$ 513,864
Incentive fees	170,575	198,296
Consolidated Funds and Partnerships:		
Incentive fees	4,202	803
Total revenues	758,993	712,963
Expenses		
Compensation and benefits	299,575	274,497
General, administrative and other	132,078	120,929
Consolidated Funds and Partnerships:		
General, administrative and other	2,397	985
Total expenses	434,050	396,411
Other income (expense)		
Equity in income of investees	51,923	29,016
Interest expense	(14,952)	(13,332)
Interest income	11,083	7,874
Non-operating gain (loss), net	2,466	8,434
Consolidated Funds and Partnerships:		
Equity in income of investees	1,509	1,613
Net gain on investments	83,750	11,915
Interest expense	—	—
Interest income	2,201	205
Total other income (expense)	137,980	45,725
Income before income taxes	462,923	362,277
Income tax expense	75,203	48,509
Net income	387,720	313,768
Less: Income attributable to non-controlling interests in Consolidated Funds and Partnerships	44,166	3,508
Less: Income attributable to non-controlling interests in Hamilton Lane Advisors, L.L.C.	94,374	92,843
Net income attributable to Hamilton Lane Incorporated	<u>\$ 249,180</u>	<u>\$ 217,417</u>

Revenues

The following table shows our total revenues (excluding consolidated funds and general partner entities that are not wholly-owned (“Consolidated Funds and Partnerships”)):

(in thousands)	Year Ended March 31,			Total Change
	2026	2025		
Revenues				
Management and advisory fees				
Specialized funds	\$ 374,405	\$ 315,214	\$ 59,191	
Customized separate accounts	141,535	134,400	7,135	
Advisory	20,473	22,806	(2,333)	
Reporting, monitoring, data and analytics	35,766	29,244	6,522	
Distribution management	2,170	2,619	(449)	
Fund reimbursement revenue	9,867	9,581	286	
Total management and advisory fees	584,216	513,864	70,352	
Incentive fees				
Specialized funds	146,293	182,092	(35,799)	
Customized separate accounts	24,282	16,204	8,078	
Total incentive fees	170,575	198,296	(27,721)	
Total revenues	\$ 754,791	\$ 712,160	\$ 42,631	

Total revenues increased \$42.6 million for fiscal 2026 compared to fiscal 2025, due to an increase in management and advisory fees, partially offset by a decrease in incentive fees.

Management and advisory fees increased \$70.4 million for fiscal 2026 compared to fiscal 2025. Specialized funds revenue increased by \$59.2 million compared to the prior year, due primarily to increases of \$72.1 million in revenue from our evergreen funds and \$11.9 million in revenue from our latest direct equity fund which added \$7.1 billion and \$0.9 billion, respectively, in fee-earning AUM year-over-year. Revenue from our specialized funds was partially offset by \$20.7 million of retroactive fees from our latest secondary fund recognized during fiscal 2025 compared to \$3.3 million from our latest direct equity fund during fiscal 2026. Customized separate accounts revenue increased \$7.1 million compared to the prior year due primarily to a \$1.6 billion increase in fee-earning AUM from the addition of new accounts, additional allocations from existing accounts and continued investment activity during the fiscal year. Reporting, monitoring, data and analytics revenue increased \$6.5 million compared to the prior year due primarily to increased Cobalt LP subscriptions during fiscal 2026. Advisory revenue decreased \$2.3 million in fiscal 2026 compared to the prior year due primarily to advisory agreements reaching the end of their term.

Incentive fees decreased \$27.7 million for fiscal 2026 compared to fiscal 2025 due primarily to decreases in the tax-related portion of carried interest distributions and proceeds realized on the sale of underlying investments in one of our specialized funds in the prior year, partially offset by an increase in evergreen-related performance fees.

Expenses

The following table shows our total expenses (excluding Consolidated Funds and Partnerships):

(in thousands)	Year Ended March 31,		Total Change
	2026	2025	
Expenses			
Compensation and benefits			
Base compensation and benefits	\$ 228,630	\$ 208,222	\$ 20,408
Incentive fee compensation	20,078	34,868	(14,790)
Equity-based compensation	50,867	31,407	19,460
Total compensation and benefits	299,575	274,497	25,078
General, administrative and other	132,078	120,929	11,149
Total expenses	<u>\$ 431,653</u>	<u>\$ 395,426</u>	<u>\$ 36,227</u>

Total expenses increased \$36.2 million for fiscal 2026 compared to fiscal 2025, due to increases in both compensation and benefits expenses and general, administrative and other expenses.

Compensation and benefits expenses increased \$25.1 million for fiscal 2026 compared to fiscal 2025. Base compensation and benefits increased \$20.4 million for fiscal 2026 compared to fiscal 2025, due primarily to an increase in salary expense from additional headcount and an increase in our bonus plan accrual related to stronger operating performance compared to the prior fiscal year. Equity-based compensation increased \$19.5 million in fiscal 2026 compared to fiscal 2025, driven primarily by the performance awards granted during fiscal 2025. Incentive fee compensation decreased \$14.8 million for fiscal 2026 compared to fiscal 2025 due to a decrease in incentive fee revenue in fiscal 2026.

General, administrative and other expenses increased \$11.1 million for fiscal 2026 compared to fiscal 2025. This change consisted primarily of an increase of \$5.6 million in consulting and professional fees, an increase of \$3.8 million in third-party commissions attributed to the increase in gross subscriptions to our evergreen funds and increases in fundraising activity on our drawdown funds.

Other Income (Expense)

The following table shows our total other income (expense) (excluding Consolidated Funds and Partnerships):

(in thousands)	Year Ended March 31,		Total Change
	2026	2025	
Other income (expense)			
Equity in income of investees			
Primary funds	\$ 3,622	\$ 82	\$ 3,540
Direct investment funds	8,085	7,498	587
Secondary funds	6,486	3,174	3,312
Customized separate accounts	13,405	7,219	6,186
Evergreen funds	20,711	12,234	8,477
Other equity method investments	(386)	(1,191)	805
Total equity in income of investees	51,923	29,016	22,907
Interest expense	(14,952)	(13,332)	(1,620)
Interest income	11,083	7,874	3,209
Non-operating gain (loss), net	2,466	8,434	(5,968)
Total other income (expense)	<u>\$ 50,520</u>	<u>\$ 31,992</u>	<u>\$ 18,528</u>

Other income (expense) increased \$18.5 million for fiscal 2026 compared to fiscal 2025, due primarily to an increase in equity in income of investees, partially offset by a decrease in non-operating gain (loss).

Equity in income of investees increased \$22.9 million for fiscal 2026 compared to fiscal 2025 due primarily to larger increases in investment valuations due to market conditions in fiscal 2026.

Non-operating gain (loss), net decreased \$6.0 million for fiscal 2026 compared to fiscal 2025, due primarily to the recognition of \$10.8 million of gains on our technology investments in fiscal 2025 that did not recur in fiscal 2026, partially offset by a decrease in our liability under the tax receivable agreement in fiscal 2026.

Consolidated Funds and Partnerships

The following table shows the results of operations of Consolidated Funds and Partnerships:

(in thousands)	Year Ended March 31,		
	2026	2025	Total Change
Revenue			
Incentive fees	\$ 4,202	\$ 803	\$ 3,399
Expenses			
General, administrative and other	\$ 2,397	\$ 985	\$ 1,412
Other income (expense)			
Equity in income of investees	\$ 1,509	\$ 1,613	\$ (104)
Net gain on investments	83,750	11,915	71,835
Interest income	2,201	205	1,996
Total other income (expense)	\$ 87,460	\$ 13,733	\$ 73,727

Incentive fees increased \$3.4 million for fiscal 2026 compared to fiscal 2025, due to increased carried interest from our specialized funds.

Other income (expense) of Consolidated Funds and Partnerships increased \$73.7 million for fiscal 2026 compared to fiscal 2025, due primarily to a \$71.8 million increase in net gain on investments held by Consolidated Funds. The increase in net gain on investments was driven by the significant increase of investment activity within our Consolidated Fund vehicles during fiscal 2026 as these funds attracted additional investor subscriptions and accelerated capital deployment into private markets investments.

Income Tax Expense

Our effective income tax rate in fiscal 2026 and 2025 was 16.3% and 13.4%, respectively. The fiscal 2026 effective income tax rate was different from the statutory tax rate primarily due to the portion of income allocated to NCI and change in valuation allowance recorded against deferred tax assets. The effective income tax rate for fiscal 2026 was higher than fiscal 2025 primarily due to changes in the valuation allowance recorded against deferred tax assets in fiscal 2025.

Non-Controlling Interests

The following table shows income attributable to NCI:

(in thousands)	Year Ended March 31,		Total Change
	2026	2025	
Income attributable to non-controlling interests in Consolidated Funds and Partnerships	\$ 44,166	\$ 3,508	\$ 40,658
Income attributable to non-controlling interests in Hamilton Lane Advisors, L.L.C.	94,374	92,843	1,531
Net income attributable to non-controlling interest	<u>\$ 138,540</u>	<u>\$ 96,351</u>	<u>\$ 42,189</u>

Net income attributable to NCI increased by \$42.2 million in fiscal 2026 compared to fiscal 2025, due primarily to increases in overall net income.

Net income attributable to NCI in Consolidated Funds and Partnerships increased by \$40.7 million due primarily to net gains on investments held by Consolidated Funds that increased investment activity during fiscal 2026 and increased NCI holder subscriptions.

Net income attributable to NCI in HLA increased by \$1.5 million due primarily to an overall increase in net income.

Fee-Earning AUM

The following table provides the year to year roll-forward of our fee-earning AUM:

(in millions)	Year Ended March 31,			Year Ended March 31,		
	2026			2025		
	Customized Separate Accounts	Specialized Funds	Total	Customized Separate Accounts	Specialized Funds	Total
Balance, beginning of period	\$ 39,343	\$ 32,704	\$ 72,047	\$ 37,574	\$ 28,175	\$ 65,749
Contributions ⁽¹⁾	6,213	8,771	14,984	6,652	7,124	13,776
Distributions ⁽²⁾	(4,986)	(2,621)	(7,607)	(4,903)	(3,268)	(8,171)
Foreign exchange, market value and other ⁽³⁾	373	1,715	2,088	20	673	693
Balance, end of period	\$ 40,943	\$ 40,569	\$ 81,512	\$ 39,343	\$ 32,704	\$ 72,047

⁽¹⁾ Contributions represent (i) new commitments from customized separate accounts and specialized funds that earn fees on a committed capital fee base and (ii) capital contributions to underlying investments from customized separate accounts and specialized funds that earn fees on a net invested capital or NAV fee base.

⁽²⁾ Distributions represent (i) returns of capital in customized separate accounts and specialized funds that earn fees on a net invested capital or NAV fee base, (ii) reductions in fee-earning AUM from separate accounts and specialized funds that moved from a committed capital to net invested capital fee base and (iii) reductions in fee-earning AUM from customized separate accounts and specialized funds that are no longer earning fees.

⁽³⁾ Foreign exchange, market value and other consists primarily of (i) the impact of foreign exchange rate fluctuations for customized separate accounts and specialized funds that earn fees on non-U.S. dollar denominated commitments and (ii) market value appreciation (depreciation) from customized separate accounts and specialized funds that earn fees on a NAV fee base.

Year ended March 31, 2026 compared to year ended March 31, 2025

Fee-earning AUM increased \$9.5 billion for fiscal 2026 compared to fiscal 2025 due to contributions from customized separate accounts and specialized funds.

Customized separate accounts fee-earning AUM increased \$1.6 billion for fiscal 2026 compared to fiscal 2025. Customized separate accounts contributions were \$6.2 billion for fiscal 2026 due primarily to new allocations from existing clients. Distributions were \$5.0 billion for fiscal 2026 due primarily to \$2.0 billion from returns of capital in accounts earning fees on a net invested capital or NAV fee base, \$1.6 billion from accounts reaching the end of their fund term and \$1.4 billion from accounts moving from a committed to net invested capital fee base.

Specialized funds fee-earning AUM increased \$7.9 billion for fiscal 2026 compared to fiscal 2025. Specialized fund contributions were \$8.8 billion for fiscal 2026, due primarily to \$6.6 billion from our evergreen funds. Distributions were \$2.6 billion for fiscal 2026, due primarily to \$2.0 billion from returns of capital and redemptions in funds earning fees on a net invested capital or NAV fee base and \$0.5 billion from accounts reaching the end of their fund term.

Non-GAAP Financial Measures

Below is a description of our unaudited non-GAAP financial measures. These are not measures of financial performance under GAAP and should not be considered a substitute for the most directly comparable GAAP measures, which are reconciled below. These measures have limitations as analytical tools, and when assessing our operating performance, you should not consider these measures in isolation or as a substitute for GAAP measures. Other companies may calculate these measures differently than we do, limiting their usefulness as a comparative measure.

Fee Related Earnings

Fee Related Earnings (“FRE”) is used to highlight earnings from revenues that are measured and received on a recurring basis. FRE represents net income excluding (a) incentive fees, net of fee related performance revenues, and related compensation, (b) equity-based compensation, (c) interest income and expense, (d) income tax expense, (e) equity in income of investees, (f) non-operating gain (loss), net and (g) certain other significant items that we believe are not indicative of our core performance. We believe FRE is useful to investors because it provides additional insight into the operating profitability of our business. FRE is presented before income taxes.

Fee related performance revenues (“FRPR”) are incentive fees expected to be measured and received from certain of our funds on a recurring basis and are not dependent on realization events of the fund’s underlying investments. FRPR includes incentive fees earned from Consolidated Funds that are eliminated under GAAP. We believe FRPR is useful to investors because it provides additional insight into our recurring revenues.

Beginning in the fourth quarter of fiscal 2025, we modified our definition of FRE to exclude equity-based compensation and include FRPR. Equity-based compensation is non-cash compensation provided to retain employees and align employee and stockholder interest. It is not directly correlated with our operating results. FRPR is expected to be received on a recurring basis depending upon performance of certain funds that pay incentive fees on a high-water mark basis. We believe that reporting non-GAAP results inclusive of these changes provides a supplemental view of our ongoing performance that is useful and relevant to our investors. As a result of the change, prior period amounts have been recast to reflect the updated presentation.

Adjusted EBITDA

Adjusted EBITDA is an internal measure of profitability. We believe Adjusted EBITDA is useful to investors because it enables them to better evaluate the performance of our core business across reporting periods. Adjusted EBITDA represents net income excluding (a) interest expense on our outstanding debt, (b) income tax expense, (c) depreciation and amortization expense, (d) equity-based compensation expense, (e) non-operating gain, net and (f) certain other significant items that we believe are not indicative of our core performance. Adjusted EBITDA also includes FRPR related to Consolidated Funds and management fees related to Consolidated Funds.

The following table shows a reconciliation of net income attributable to Hamilton Lane Incorporated to FRE and Adjusted EBITDA for fiscal 2026, 2025, and 2024:

	Year Ended March 31,		
	2026	2025	2024
(in thousands)			
Net income attributable to Hamilton Lane Incorporated	\$ 249,180	\$ 217,417	\$ 140,858
Income attributable to non-controlling interests in Consolidated Funds and Partnerships	44,166	3,508	5,514
Income attributable to non-controlling interests in Hamilton Lane Advisors, L.L.C.	94,374	92,843	80,835
Incentive fees	(174,777)	(199,099)	(101,906)
Incentive fee related compensation ⁽¹⁾	38,148	66,254	47,277
Fee related performance revenues	102,502	59,587	2,378
Equity-based compensation	50,867	31,407	12,133
Consolidated Fund related general, administrative and other expenses	2,357	980	566
Management fees related to Consolidated Funds	470	—	394
Non-operating income related compensation	—	784	59
Income tax expense	75,203	48,509	54,454
Other income (expense)	(137,980)	(45,725)	(35,843)
Fee Related Earnings	<u>\$ 344,510</u>	<u>\$ 276,465</u>	<u>\$ 206,719</u>
Depreciation and amortization	9,878	9,285	8,186
Incentive fees	174,777	199,099	101,906
Incentive fees attributable to non-controlling interests	(179)	(29)	—
Incentive fee related compensation ⁽¹⁾	(38,148)	(66,254)	(47,277)
Fee related performance revenues	(102,502)	(59,587)	(2,378)
Non-operating income related compensation	—	(784)	(59)
Fee related performance revenues related to Consolidated Funds	8,217	—	—
Interest income	11,083	7,874	5,427
Adjusted EBITDA	<u>\$ 407,636</u>	<u>\$ 366,069</u>	<u>\$ 272,524</u>

⁽¹⁾ Incentive fee related compensation includes incentive fee compensation expense and bonus related to carried interest that is classified as base compensation.

Non-GAAP Earnings Per Share

Non-GAAP earnings per share (“EPS”) measures our per-share earnings excluding certain significant items that we believe are not indicative of our core performance and assuming all Class B and Class C units in HLA were exchanged for Class A common stock in HLI. Non-GAAP EPS is calculated as adjusted net income divided by adjusted shares outstanding. Adjusted net income is income before taxes fully taxed at our estimated statutory tax rate and excludes any impact of changes in carrying amount of our redeemable NCI. Adjusted shares outstanding for the years ended March 31, 2026 and 2024 are equal to weighted-average shares of Class A common stock outstanding - diluted. We believe adjusted net income and non-GAAP EPS are useful to investors because they enable them to better evaluate total and per-share operating performance across reporting periods.

The following table shows a reconciliation of adjusted net income to net income attributable to Hamilton Lane Incorporated and adjusted shares outstanding to weighted-average shares of Class A common stock outstanding for fiscal 2026, 2025, and 2024:

	Year Ended March 31,		
	2026	2025	2024
(in thousands, except share and per-share amounts)			
Net income attributable to Hamilton Lane Incorporated	\$ 249,180	\$ 217,417	\$ 140,858
Income attributable to non-controlling interests in Hamilton Lane Advisors, L.L.C.	94,374	92,843	80,835
Income tax expense	75,203	48,509	54,454
Adjusted pre-tax net income	418,757	358,769	276,147
Adjusted income taxes ⁽¹⁾	(97,570)	(85,028)	(64,618)
Adjusted net income	<u>\$ 321,187</u>	<u>\$ 273,741</u>	<u>\$ 211,529</u>
Weighted-average shares of Class A common stock outstanding - diluted	54,469,393	40,307,818	53,902,467
Exchange of Class B and Class C units in HLA ⁽²⁾	—	14,016,324	—
Adjusted shares outstanding ⁽²⁾	<u>54,469,393</u>	<u>54,324,142</u>	<u>53,902,467</u>
Non-GAAP EPS	<u>\$ 5.90</u>	<u>\$ 5.04</u>	<u>\$ 3.92</u>

⁽¹⁾ For the years ended March 31, 2026, 2025, and 2024, represents corporate income taxes at our estimated statutory tax rate of 23.3%, 23.7%, and 23.4% respectively, applied to adjusted pre-tax income. The estimated statutory tax rates are based on federal statutory tax rate of 21.0% and a combined state income tax rate of 2.3%, 2.7%, and 2.4%, respectively.

⁽²⁾ Assumes the full exchange of Class B and Class C units in HLA for Class A common stock of HLI pursuant to the exchange agreement. For the years ended March 31, 2026 and 2024, the full exchange of Class B and Class C units is already included within the GAAP weighted-average shares of Class A common stock outstanding - diluted.

Investment Performance

The following tables present information relating to the historical performance of our significant specialized funds. The data are presented from the date indicated through December 31, 2025 and have not been adjusted to reflect acquisitions or disposals of investments subsequent to that date.

When considering the data presented below, note that the historical results of our specialized funds are not indicative of the future results you should expect from such investments, from any future investment funds we may raise or from an investment in our Class A common stock, in part because:

- market conditions and investment opportunities during previous periods may have been significantly more favorable for generating positive performance than those we may experience in the future;
- the performance of our funds is generally calculated on the basis of the NAV of the funds' investments, including unrealized gains, which may never be realized;
- our historical returns derive largely from the performance of our earlier funds, whereas future fund returns will depend increasingly on the performance of our newer funds or funds not yet formed;
- our newly-established funds may generate lower returns during the period that they initially deploy their capital;
- in recent years, there has been increased competition for investment opportunities resulting from the increased amount of capital invested in private markets alternatives and high liquidity in debt markets, and the increased competition for investments may reduce our returns in the future;
- the performance of particular funds also will be affected by risks of the industries and businesses in which they invest; and
- we may create new funds that reflect a different asset mix and new investment strategies, as well as a varied geographic and industry exposure, compared to our historical funds, and any such new funds could have different returns than our previous funds.

The historical and potential future returns of the investment funds we manage are not directly linked to returns on our Class A common stock. Therefore, you should not conclude that continued positive performance of the investment funds we manage will necessarily result in positive returns on an investment in our Class A common stock. As used in this discussion, internal rate of return ("IRR") is calculated on a pooled basis using daily cash flows. See "—Performance Methodology" below for more information on how our returns are calculated.

Specialized Fund Performance

We invest and manage commingled specialized primary, secondary, private credit, direct equity and multi-strategy investment funds across the private markets, including those that focus on specific markets or strategies such as venture capital, infrastructure, real estate and impact. Below is performance information across our various specialized funds. Our specialized funds include both drawdown and evergreen funds. Substantially all of these funds are globally focused, and they are grouped by the investment strategy utilized.

Evergreen Fund Performance

Fund	Inception date	NAV (\$M)	Total Annualized Return Since Inception (Net) ⁽¹⁾
Global Multi-Strategy Evergreen Fund ⁽¹⁾	May 2019	6,436	12.6 %
US Multi-Strategy Evergreen Fund ⁽¹⁾⁽²⁾	January 2021	5,313	16.0 %
Global Credit Evergreen Fund ⁽¹⁾⁽³⁾	January 2023	1,877	9.3 %
Global Infrastructure Evergreen Fund ⁽¹⁾⁽⁴⁾	February 2024	697	25.2 %

- (1) Returns are presented for the institutional share class of the applicable fund(s). Performance varies by share class due to differing fee structures. Returns for other share classes may be lower due to higher management fees, distribution fees, selling commissions or other class-specific expenses.
- (2) Total Annualized Return Since Inception reflects the monthly performance of the Evergreen Private Fund L.P. from September 1, 2020 through December 31, 2020, and the Fund from January 4, 2021 through the end of the reporting period. The Fund was under common management of Evergreen Private Fund L.P.
- (3) The Fund's Class I-USD Shares commenced operations on January 1, 2023. Therefore, the returns shown for the periods prior to that time are based on the returns of the Class F-USD Shares, adjusted for the higher expenses of the I-USD Shares.
- (4) I-USD (Acc.) share class performance prior to September 2, 2024 reflects the performance of HL Private Infra Fund Cayman Holdings LP ("Holdings") and is not direct past performance of the Fund.

Performance Methodology

Drawdown Fund Performance Methodology

The indices presented for comparison are the S&P 500, MSCI World, Dow Jones Brookfield Global Infrastructure ("DJBI GI"), MSCI World Infrastructure ("MSCI Infra"), ICE BofA US High Yield Index ("ICE BofA US HY") and Credit Suisse Leverage Loan ("CS LL"), calculated on a public market equivalent ("PME") basis. We believe these indices are commonly used by private markets and credit investors to evaluate performance. The PME calculation methodology allows private markets investment performance to be evaluated against a public index and assumes that capital is being invested in, or withdrawn from, the index on the days the capital was called and distributed from the underlying fund managers. The S&P 500 Index is a total return capitalization-weighted index that measures the performance of 500 U.S. large cap stocks. The DJBI GI Index includes companies domiciled globally that qualify as "pure-play" infrastructure companies, which are companies whose primary business is the ownership and operation of infrastructure assets, activities that generally generate long-term stable cash flows. The MSCI Infra Index covers mid and large cap infrastructure assets across the 23 developed market countries. The MSCI World Index is a free float-adjusted market capitalization-weighted index of over 1,600 world stocks that is designed to measure the equity market performance of developed markets. The ICE BofA HY Index tracks the performance of US dollar denominated below investment grade rated corporate debt publicly issued in the US domestic market. The ICE BofA HY Index is rebalanced monthly. The CS LL Index is an index designed to mirror the investable universe of the U.S. dollar denominated leveraged loan market. Loans must be rated 5B or lower and the index frequency is monthly.

Our IRR represents the pooled IRR for all discretionary investments for the period from inception to December 31, 2025. Gross IRR is presented net of management fees, carried interest and expenses charged by the general partners of the underlying investments, but does not include our management fees, carried interest or expenses. Our gross IRR would decrease with the inclusion of our management fees, carried interest and expenses. Net IRR is net of all management fees, carried interest and expenses charged by the general partners of the underlying investments, as well as by us. Net IRR figures for our funds do not include cash flows attributable to the general partner. Note that secondary portfolio IRRs can be initially impacted by purchase discounts (or premiums) paid at the closing of a transaction, the impact of which will diminish over time.

“Capital Invested” refers to the total amount of all investments made by a fund, including commitment-reducing and non-commitment-reducing capital calls. “Multiple” represents total distributions from underlying investments to the fund plus the fund’s market value divided by total contributed capital. “Gross Multiple” is presented net of management fees, carried interest and expenses charged by the fund managers of the underlying investments.

Specialized fund and pre-fund performance does not include ten funds-of-funds that have investor-specific investment guidelines.

Many of our specialized funds utilize revolving credit facilities, which provide capital that is available to fund investments or pay partnership expenses and management fees. Borrowings may be paid down from time to time with investor capital contributions or distributions from investments. The use of a credit facility affects the fund’s return and magnifies the performance on the upside or on the downside.

Evergreen Fund Performance Methodology

For our evergreen funds, total return is calculated on a NAV-per-unit (or per-share) basis and reflects the percentage change in NAV per unit over the applicable measurement period, inclusive of reinvested distributions and net of all management fees, incentive fees and fund-level expenses. Returns are presented for the institutional share class of the applicable funds. Total return since inception represents the annualized compounded return from the fund’s inception date through December 31, 2025. Total return assumes the reinvestment of all distributions received during the period at NAV. Total return does not reflect the impact of any applicable sales charges or taxes payable by investors. Each of our evergreen funds offers multiple share classes with varying fee structures, and returns for other share classes may differ, and in some cases may be lower, due to higher management fees, distribution fees, selling commissions or other class-specific expenses.

All evergreen fund performance information is presented on a 90-day lag from our fiscal year end. Performance results presented are historical and do not guarantee future results.

Liquidity and Capital Resources

Historical Liquidity and Capital Resources

We have managed our historical liquidity and capital requirements primarily through the receipt of management and advisory fee revenues. Our primary cash flow activities involve: (1) generating cash flow from operations, which largely includes management and advisory fees; (2) realizations generated from our investment activities; (3) funding capital commitments that we have made to certain of our specialized funds and customized separate accounts; (4) making dividend payments to our stockholders and distributions to holders of HLA units; and (5) borrowings, interest payments and repayments under our outstanding debt. As of March 31, 2026 and March 31, 2025, our cash and cash equivalents were \$361.0 million and \$229.2 million, respectively.

Our material sources of cash from our operations include: (1) management and advisory fees, which are collected monthly or quarterly; (2) incentive fees, which are volatile and largely unpredictable as to amount and timing; and (3) fund distributions related to investments in our specialized funds and certain customized separate accounts that we manage. We use cash flow from operations primarily to pay compensation and related expenses, general, administrative and other expenses, debt service, capital expenditures and distributions to our owners and to fund commitments to certain of our specialized funds and customized separate accounts. If cash flow from operations was insufficient to fund distributions to our owners, we expect that we would suspend paying such distributions.

We have also accessed the capital markets and used proceeds from sales of our Class A common stock to settle in cash exchanges of HLA membership interests by direct and indirect owners of HLA pursuant to our exchange agreement.

Finally, we have used available cash and borrowings from our Loan Agreements (defined below) and Senior Notes (defined below) to make strategic investments in companies that seek to offer technology-driven private markets data and wealth management solutions, to seed new specialized funds and for general corporate purposes.

Senior Notes and Loan Agreements

In 2024, HLA issued \$100 million aggregate principal amount of 5.28% senior notes due October 15, 2029 (the “Senior Notes”) pursuant to a note purchase agreement (the “Note Purchase Agreement”) among HLA and the institutional purchasers party thereto in a private placement transaction. Interest on the Senior Notes is payable semi-annually in arrears and commenced on April 15, 2025. Interest on the Senior Notes accrues from and including October 8, 2024. The Senior Notes will mature on October 15, 2029.

We maintain our Term Loan and Security Agreement (as amended, the “Term Loan Agreement”), Revolving Loan and Security Agreement (as amended, the “Revolving Loan Agreement”), 2020 Multi-Draw Term Loan and Security Agreement (as amended, the “2020 Multi-Draw Term Loan Agreement”), and 2022 Multi-Draw Term Loan Agreement (as amended, the “2022 Multi-Draw Term Loan Agreement” and, together with the Term Loan Agreement, the Revolving Loan Agreement, and the 2020 Multi-Draw Term Loan Agreement, the “Loan Agreements”) with JPMorgan Chase Bank, N.A. (“JPMorgan”). The Loan Agreements are cross-collateralized and cross-defaulted and the aggregate principal amount of loans that may be outstanding under all of the Loan Agreements is subject to an aggregate cap of \$325 million (the “Cap”).

The Term Loan Agreement has a maturity date of July 1, 2029 and the interest rate is a floating per annum rate equal to the prime rate minus 1.25% subject to a floor of 3.00%. As of March 31, 2026, we had an outstanding balance of \$84.4 million under the Term Loan Agreement.

The Revolving Loan Agreement provides that the aggregate outstanding balance will not exceed \$50 million, subject to the Cap, and has a maturity date of October 6, 2027. The interest rate is a floating per annum rate equal to the prime rate minus 1.50% subject to a floor of 2.25%. As of March 31, 2026, we did not have an outstanding balance under the Revolving Loan Agreement.

The 2020 Multi-Draw Term Loan Agreement provides for a term loan in the aggregate principal amount of \$100 million with a maturity date of April 1, 2030. The interest rate is a fixed per annum rate of 3.50%. As of March 31, 2026, we had an outstanding balance of \$96.3 million under the 2020 Multi-Draw Term Loan Agreement.

The 2022 Multi-Draw Term Loan Agreement has a maturity date of October 1, 2029. On October 1, 2025, we amended our 2022 Multi-Draw Term Loan Agreement to, among other things, (a) change the aggregate principal amount of term loans from \$75 million to \$50 million, subject to the Cap, (b) change certain dates related to interest payments and repayments of the term loan thereunder, and (c) change the interest rate for borrowings thereunder to equal the greater of (i) the prime rate minus 1.35% and (ii) 3.00%. As of March 31, 2026, we did not have an outstanding balance under the 2022 Multi-Draw Term Loan Agreement. We are entitled to request term loans not to exceed \$50 million in the aggregate, subject to the Cap, through October 6, 2027.

The Loan Agreements and the Note Purchase Agreement contain covenants that, among other things, limit HLA's ability to incur indebtedness, transfer or dispose of assets, merge with other companies, create, incur or allow liens, make investments, pay dividends or make distributions, engage in transactions with affiliates and take certain actions with respect to management fees. The Loan Agreements also require HLA to maintain, among other requirements, (a) a specified amount of management fees, (b) a specified amount of adjusted EBITDA minus dividend distributions (other than tax distributions), as defined in the Loan Agreements, and (c) a specified minimum tangible net worth, during the term of each of the Loan Agreements. The Note Purchase Agreement contains certain covenants, including (a) a Consolidated Leverage Ratio (as defined in the Note Purchase Agreement) of 3.50 to 1.00 as of March 31 and September 30 of each calendar year (each, a "Test Date"), (b) a minimum annual Management Fees (as defined in the Note Purchase Agreement) covenant as of each Test Date of not less than the greater of (i) \$185 million and (ii) the amount equal to 80% of the Management Fees received by HLA during the six calendar month period ended on the immediately preceding Test Date, and other customary covenants. The obligations under the Loan Agreements are secured by substantially all the assets of HLA. As of March 31, 2026 and 2025, the principal amount of debt outstanding equaled \$280.6 million and \$293.1 million, respectively. We had \$144.4 million in availability under the Loan Agreements as of March 31, 2026.

Cash Flows

(in millions)	Year Ended March 31,		
	2026	2025	2024
Net cash provided by operating activities	\$ 424.9	\$ 300.8	\$ 120.9
Net cash used in investing activities	\$ (494.8)	\$ (117.6)	\$ (122.2)
Net cash provided by (used in) financing activities	\$ 155.8	\$ (19.2)	\$ 4.4

Operating Activities

Our operating activities generally reflect our earnings in the respective periods after adjusting for significant non-cash activity, including equity in income (loss) of investees, equity-based compensation, lease expense, fair value adjustments to investments and depreciation and amortization, all of which are included in earnings. For the years ended March 31, 2026, 2025 and 2024, net cash provided by operating activities was driven primarily by receipts of management fees and incentive fees, partially offset by payment of operating expenses, which includes compensation and benefits and general, administrative and other expenses. During the year ended March 31, 2026, cash provided by operating activities was impacted by a change in the timing of bonus payments, with a portion paid in January 2026 and the remaining balance paid in May 2026 after fiscal year end. Additionally, the years ended March 31, 2025 and 2024 were impacted by cash relinquished upon deconsolidation of a previously consolidated fund.

Investing Activities

Our investing activities generally reflect cash used for fixed asset purchases and contributions to and distributions from our investments. For the years ended March 31, 2026, 2025 and 2024, our net cash used in investing activities was driven primarily by purchases of furniture, fixtures and equipment, purchases of investments, and net contributions to our Funds. The increase in net cash used in investing activities for the year ended March 31, 2026 compared to the prior year, was primarily driven by higher purchases of investments by our Consolidated Funds, reflecting increased investment activity in funds consolidated in the prior year that had lower levels of activity during the earlier stages of their deployment. This increase was partially offset by proceeds from the sale of a wholly owned Consolidated Fund to a related-party fund for which we serve as the investment manager.

Financing Activities

Our financing activities generally reflect cash received from debt and equity financings, payments to owners in the form of dividends, distributions and repurchases of shares and scheduled drawdowns and repayments of our outstanding debt. For the years ended March 31, 2026, 2025 and 2024, our net cash provided by (used in) financing activities was driven primarily by dividends paid to stockholders, payments under the tax receivable agreement, distributions to HLA members, repayment of our outstanding debt and contributions from NCI in Consolidated Funds. Net cash provided by (used in) financing activities for the year ended March 31, 2026 was also driven by the repurchase and retirement of shares of our Class A common stock.

Future Sources and Uses of Liquidity

We generate significant cash flows from operating activities. We believe that we will be able to continue to meet our short-term and long-term liquidity and capital requirements through our cash flows from operating activities, existing cash and cash equivalents and our ability to obtain future external financing. However, the availability of capital from the Loan Agreements and our cash balances are exposed to the credit risks of the financial institutions at which they are held. If events involving limited liquidity, defaults, non-performance or other adverse developments that affect financial institutions or the financial services industry generally, or concerns or rumors about any such events, occur, our ability to access existing cash, cash equivalents and investments, or to access existing or enter into new banking arrangements or facilities to pay operational and other costs, may be threatened or lost.

We will also continue to evaluate opportunities, based on market conditions, to access the capital markets for working capital or to use proceeds from sales of our Class A common stock to settle in cash exchanges of HLA membership interests by direct and indirect owners of HLA pursuant to our exchange agreement. The timing or size of any potential transactions will depend on a number of factors, including market opportunities and our views regarding our capital and liquidity positions and potential future needs. There can be no assurance that any such transactions will be completed on favorable terms, or at all.

We will also continue to evaluate opportunities to make strategic investments in companies that seek to offer technology-driven private markets data and wealth management solutions and to use cash to seed new specialized funds.

In November 2018, our board of directors authorized a program to repurchase up to 6% of the outstanding shares of our Class A common stock, not to exceed \$50 million (the “Stock Repurchase Program”). Our board of directors periodically reviews the Stock Repurchase Program, and on May 21, 2026, we announced that our board of directors approved an increase in the authorization under the Stock Repurchase Program to permit us to purchase up to \$100 million of our Class A common stock, net of amounts already repurchased under the pre-existing authorization, with no share count or duration limitation. As of May 21, 2026, the total repurchase capacity available under the Stock Repurchase Program authorization was approximately \$80.0 million. The Stock Repurchase Program does not include specific price targets or timetables and may be suspended or terminated by us at any time. We intend to finance the purchases using available working capital and/or external financing. The amended authorization does not have an expiration date. During the three months ended March 31, 2026, we repurchased 199,000 shares of our Class A common stock under the Stock Repurchase Program at a weighted-average price of \$100.43 per share, for an aggregate purchase price of approximately \$20 million.

We expect that our primary short-term and long-term liquidity needs will comprise cash to: (1) provide capital to facilitate the growth of our business; (2) fund commitments to our investments; (3) pay operating expenses, including cash compensation to our employees; (4) make payments and/or exercise early termination buyout rights under the tax receivable agreement; (5) fund capital expenditures, make strategic investments and warehouse investments for our Funds; (6) pay interest and principal due on our outstanding debt; (7) pay income taxes; (8) make dividend payments to our stockholders and distributions to holders of HLA units in accordance with our distribution policy; (9) settle exchanges of HLA membership interests by direct and indirect owners of HLA pursuant to our exchange agreement from time to time; (10) settle in cash any exercises of the warrant we issued to The Guardian Life Insurance Company of America in a private placement transaction related to a maximum of 400,000 shares of our Class A common stock; and (11) fund purchases of our Class A common stock pursuant to the Stock Repurchase Program.

We are required to maintain minimum net capital balances for regulatory purposes for certain of our foreign subsidiaries and our broker-dealer subsidiary, and minimum cash balances related to our self-funded medical insurance plan put in place as of January 1, 2025. The net capital requirements are met by retaining cash. As a result, we may be restricted in our ability to transfer cash between different operating entities and jurisdictions. As of each of March 31, 2026 and March 31, 2025, we were required to maintain approximately \$8.0 million and \$6.3 million, respectively, in liquid net assets to meet regulatory net capital and capital adequacy requirements. We are in compliance with these regulatory requirements as of each such date.

Dividend Policy

The declaration and payment by us of any future dividends to holders of our Class A common stock is at the sole discretion of our board of directors. We intend to continue to pay a cash dividend on a quarterly basis. Subject to funds being legally available, we will cause HLA to make pro rata distributions to its members, including us, in an amount at least sufficient to allow us to pay all applicable taxes, to make payments under the tax receivable agreement, and to pay our corporate and other overhead expenses.

Tax Receivable Agreement

We expect that periodic exchanges of membership units of HLA by members of HLA will result in increases in the tax basis in our share of the assets of HLA that otherwise would not have been available. These increases in tax basis are expected to increase our depreciation and amortization deductions and create other tax benefits and therefore may reduce the amount of tax that we would otherwise be required to pay in the future. The tax receivable agreement will require us to pay 85% of the amount of these and certain other tax benefits, if any, that we realize (or are deemed to realize in the case of an early termination payment, a

change in control or a material breach by us of our obligations under the tax receivable agreement) to the pre-IPO members of HLA.

Contractual Obligations, Commitments and Contingencies

The following table represents our contractual obligations as of March 31, 2026, aggregated by type:

(in millions)	Contractual Obligations, Commitments and Contingencies				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating leases	\$ 91.6	\$ 9.7	\$ 17.8	\$ 15.5	\$ 48.6
Debt obligations payable ⁽¹⁾	280.7	21.9	87.5	171.3	—
Interest on debt obligations payable ⁽²⁾	37.6	12.8	20.8	4.0	—
Capital commitments to our investments ⁽³⁾	272.2	272.2	—	—	—
Commitments of Consolidated Funds ⁽⁴⁾	73.5	73.5	—	—	—
Total	<u>\$ 755.6</u>	<u>\$ 390.1</u>	<u>\$ 126.1</u>	<u>\$ 190.8</u>	<u>\$ 48.6</u>

⁽¹⁾ Represents scheduled debt obligation payments under our Loan Agreements and the Senior Notes.

⁽²⁾ Represents interest to be paid over the maturity of the related debt obligations, which has been calculated assuming no pre-payments will be made and debt will be held until its final maturity date. The future interest payments are calculated using the variable interest rate of 5.50% on our Term Loan Agreement and the fixed interest rate of 3.50% on our 2020 Multi-Draw Term Loan Agreement.

⁽³⁾ Represents commitments by us to fund a portion of each investment made by our specialized funds and certain customized separate account entities. These amounts are generally due on demand and are therefore presented in the less than one year category.

⁽⁴⁾ Represents uncalled commitments of our Consolidated Funds, excluding our portion of uncalled commitments to the respective funds. Because capital contributions are due on demand, the above commitments have been presented as falling due within one year.

We have entered into a tax receivable agreement with our pre-IPO owners pursuant to which we will pay them 85% of the amount of tax benefits, if any, that we realize (or are deemed to realize in the case of an early termination payment by us, a change in control or a material breach by us of our obligations under the tax receivable agreement) as a result of increases in tax basis (and certain other tax benefits) resulting from purchases or exchanges of membership units of HLA. Because the timing of amounts to be paid under the tax receivable agreement cannot be determined, this contractual commitment has not been presented in the table above. The tax savings achieved may be substantial and we may not have sufficient cash available to pay this liability, in which case, we might be required to incur additional debt to satisfy this liability.

We offer an Employee Investment Program (“EIP”) through which certain employees are able to invest directly into certain company managed funds as individual limited partners (“LPs”). Our non-executive employees also have an option to enter into a loan agreement with a third-party lender to fund committed capital. The loan is collateralized by the underlying LP interest in the fund and return of capital distributions are utilized to pay the outstanding loan balance. We entered into a separate arrangement with the third-party lender to backstop the employee’s performance under the loan with a commitment to purchase the LP interest from the lender at the greater of fair value or the outstanding balance of the loan in the event of default by the employee. As of March 31, 2026 and 2025, the total amount of outstanding loans under the EIP was \$1.7 million and \$1.3 million, respectively, and we believe the risk of default by an employee to be remote.

Critical Accounting Estimates

We prepare our consolidated financial statements in accordance with GAAP. In applying many of these accounting principles, we need to make assumptions, estimates or judgments that affect the reported amounts of assets, liabilities, revenues and expenses in our combined and consolidated financial statements. We base our estimates and judgments on historical experience and other assumptions that we believe are reasonable under the circumstances. These assumptions, estimates or judgments, however, are both subjective and subject to change, and actual results may differ from our assumptions and estimates. If actual amounts are ultimately different from our estimates, the revisions are included in our results of operations for the period in which the actual amounts become known. We believe the following critical accounting estimates could potentially produce materially different results if we were to change underlying assumptions, estimates or judgments. See Note 2, “Summary of Significant Accounting Policies,” to our consolidated financial statements included in Part II, Item 8 of this Form 10-K for a summary of our significant accounting policies.

Consolidation

We consolidate general partnerships and subsidiaries that are wholly owned. Additionally, we consolidate funds (“Consolidated Funds”) and general partner entities that are not wholly-owned (“Partnerships”) over which we exercise control either by holding majority voting interests or as the primary beneficiary, possessing both decision making authority and the right to receive economic benefits or the obligation to absorb expected losses of the entity that could potentially be significant to the entity. The Consolidated Funds and Partnerships are included in our consolidated financial statements. The portion of the Consolidated Funds and Partnerships owned by third parties is presented as non-controlling interests in the Consolidated Balance Sheets and income attributable to non-controlling interests in the Consolidated Statements of Income.

The assets of the Partnerships represent investments in Funds and the assets of the Consolidated Funds generally represent cash and investments. The assets may only be used to settle obligations of the respective Consolidated Fund or Partnership, if any. In addition, we have no recourse for the consolidated liabilities, except for certain entities in which there could be a clawback of previously distributed carried interest. Once we no longer qualify as the primary beneficiary or hold a majority voting interest, we deconsolidate all the assets and liabilities of the respective Partnership or Consolidated Fund from the Consolidated Balance Sheets and record any remaining interest in the entity using the equity method within investments in the Consolidated Balance Sheets.

We hold variable interests in entities that are considered VIEs because limited partners lack the ability to remove the general partner or dissolve the entity without cause by simple majority vote (i.e., the limited partners do not have substantive “kick out” or “liquidation” rights). Our variable interest in such entities is in the form of direct equity interests in the Funds in which we also serve as the general partner or managing member. In our role as general partner or managing member, we generally consider ourselves the sponsor of the applicable Funds and make all investment and operating decisions. We consolidate VIEs in which we are determined to be the primary beneficiary.

At each reporting date, we determine whether any reconsideration events have occurred that require us to revisit the consolidation analysis and will consolidate or deconsolidate accordingly.

Revenue Recognition of Incentive Fees

Incentive fees include both carried interest and performance fees earned from certain specialized funds and customized separate accounts. We recognized \$174.8 million of incentive fees in fiscal 2026 and have \$1.5 billion of unrecognized carried interest as of March 31, 2026.

Contracts with specialized funds and certain customized separate accounts provide incentive fees, which generally range from 5.0% to 12.5% of profits, when investment returns exceed minimum return levels or other performance targets. Incentive fees are generally payable after the achievement of performance targets or after all contributed capital and the preferred return on that capital has been distributed to investors.

Some incentive fees are subject to a “clawback,” or the obligation to return distributions in excess of the amount prescribed by the applicable fund or separate account documents. Incentive fees are typically only required to be returned on a net of tax basis due to a clawback. As such, the tax-related portion of incentive fees is typically not subject to clawback and is therefore recognized as revenue immediately upon receipt. Investment returns are highly susceptible to market factors and judgments and actions of third parties that are outside of our control which could impact the probability of a significant reversal occurring. Accordingly, incentive fees are not recognized until it is probable that a significant reversal will not occur.

We estimate the amount and probability of additional future capital contributions to specialized funds and customized separate accounts, which could impact the probability of a significant reversal occurring. The additional future capital contributions relate to unfunded commitments or follow-on investment opportunities in underlying portfolio investments. Incentive fees received before the revenue recognition criteria have been met are deferred and recorded within deferred incentive fee revenue in the Consolidated Balance Sheets.

Income Taxes

We account for income taxes using the asset and liability method. Deferred income taxes are recognized for the expected future tax consequences attributable to temporary differences between the carrying amount of the existing tax assets and liabilities and their respective tax basis using enacted tax rates expected to be applied in the years in which temporary differences are expected to be recovered or settled. As of March 31, 2026, we had deferred tax assets of \$293.1 million due primarily to our acquisitions of HLA units. Realization of the deferred tax assets is dependent primarily upon (1) historic earnings, (2) forecasted taxable income, (3) future tax deductions of tax basis step-ups related to our IPO and subsequent unit exchanges, (4) future tax deductions related to payments under the tax receivable agreement, and (5) our share of HLA’s temporary differences that result in future tax deductions. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. As of March 31, 2026, we had a valuation allowance of \$69.6 million. Changes in judgment as it relates to the realizability of these assets, as well as potential changes in corporate tax rates, would have the effect of significantly reducing the value of the deferred tax assets.

We analyze our tax filing positions in all of the U.S. federal, state, local and foreign tax jurisdictions where we are required to file income tax returns, as well for all open tax years in these jurisdictions. We evaluate tax positions taken or expected to be taken in the course of preparing an entity’s tax returns to determine whether it is “more-likely-than-not” that each tax position will be sustained by the applicable tax authority.

Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties under GAAP. We review our tax positions quarterly and adjust our tax balances as new legislation is passed or new information becomes available.

Tax Receivable Agreement

Our purchase of HLA Class A units concurrent with the IPO, and subsequent exchanges by holders of HLA units for shares of our Class A common stock pursuant to the exchange agreement, result in increases in our share of the tax basis of the tangible and intangible assets of HLA, which increases the tax depreciation and amortization deductions that otherwise would not have been available to us. These increases in tax basis

and tax depreciation and amortization deductions are expected to reduce the amount of cash taxes that we would otherwise be required to pay in the future. We entered into the tax receivable agreement with the other members of HLA, which requires us to pay exchanging HLA unitholders (the “TRA Recipients”) 85% of the amount of cash savings, if any, in U.S. federal, state, and local income tax that we actually realize (or, under certain circumstances, are deemed to realize) as a result of the increases in tax basis in connection with exchanges by the TRA Recipients described above and certain other tax benefits attributable to payments under the tax receivable agreement. Generally, if we do not generate sufficient cumulative taxable income in the future to utilize the tax benefits, then we will not be required to make the related tax receivable agreement payments—the exception being that our obligation to make such payments may be accelerated if we elect to terminate the tax receivable agreement, in whole or in part, or if a change in control of us, or a breach of the tax receivable agreement by us, occurs. Therefore, we will generally only recognize a liability for payments under the tax receivable agreement for financial reporting purposes to the extent we determine it is probable that we will generate sufficient future taxable income to utilize the related tax benefits. Estimating and projecting future taxable income is inherently uncertain and requires judgment. Actual taxable income may differ from estimates, which could significantly affect the liability under the tax benefit arrangements and our consolidated results of operations.

Based on current projections, we anticipate having sufficient taxable income to utilize these tax attributes and receive corresponding tax deductions in future periods. As of March 31, 2026, the tax receivable agreement resulted in a liability of \$235.4 million. Significant changes in the projected liability resulting from the tax receivable agreement may occur based on changes in anticipated future taxable income, changes in applicable tax rates or other changes in tax attributes that may occur and could affect the expected future tax benefits to be received by us.

Recent Accounting Pronouncements

Information regarding recent accounting developments and their impact on our results can be found in Note 2, “Summary of Significant Accounting Policies” in the notes to the consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

In the normal course of business, we are exposed to a broad range of risks inherent in the financial markets in which we participate, including price risk, interest-rate risk, access to and cost of financing risk, liquidity risk, counterparty risk and foreign exchange-rate risk. Potentially negative effects of these risks may be mitigated to a certain extent by those aspects of our investment approach, investment strategies, fundraising practices or other business activities that are designed to benefit, either in relative or absolute terms, from periods of economic weakness, tighter credit or financial market dislocations.

Our predominant exposure to market risk is related to our role as general partner or investment manager for our specialized funds and customized separate accounts and the sensitivities to movements in the fair value of their investments, which may adversely affect our equity in income of investees. During the year ended March 31, 2026, our market-risk sensitivity increased compared to the prior year primarily due to a greater proportion of fee-earning arrangements that use NAV as the fee base. While the majority of our management fees are based on commitments or net invested capital, a portion of our management fees are based NAV and, accordingly, are sensitive to changes in the fair value of the underlying investments. In addition, a portion of our incentive fees are performance fees that are subject to a high-water mark, and, as a result, declines in NAV may increase the amount of future appreciation required before such incentive fees are earned.

Fair value of the financial assets and liabilities of our specialized funds and customized separate accounts may fluctuate in response to changes in the value of securities, foreign currency exchange rates, commodity prices and interest rates. The impact of investment risk is as follows:

- Equity in income of investees changes along with the realized and unrealized gains of the underlying investments in our specialized funds and certain customized separate accounts in which we have a general partner commitment. Our general partner investments include thousands of unique underlying portfolio investments with no significant concentration in any industry or country outside of the United States.
- Management fees from our specialized funds and customized separate accounts are derived from applying a contractual fee rate to a specified fee base, which is generally capital committed or net invested capital. For those arrangements in which the applicable fee base is NAV, changes in the fair value of the underlying investments will impact management fees. As of March 31, 2026, we estimate that a hypothetical 10% decrease in the NAV-based fee base (holding all other variables constant) would decrease management fee revenue by approximately \$23.8 million over the next 12 months.
- Incentive fees from our specialized funds and certain customized separate accounts are inherently variable and are generally dependent on realized investment performance and achievement of performance criteria. In addition, for certain evergreen funds and customized separate accounts, performance fees are based on the aggregate amount of unrealized or realized gains and are subject to achievement of defined minimum returns and/or a high-water mark. A high-water mark feature generally requires that NAV exceed the highest period-end NAV (as adjusted pursuant to the applicable governing documents) before performance fees are earned. Accordingly, declines in NAV may delay or reduce future incentive fees by increasing the amount of subsequent NAV appreciation required to exceed the applicable high-water mark.

Exchange Rate Risk

Several of our specialized funds and customized separate accounts hold investments denominated in non-U.S. dollar currencies that may be affected by movements in the rate of exchange between the U.S. dollar and foreign currency, which could impact investment performance. The currency exposure related to investments in foreign currency assets is limited to our general partner interest, which is typically one percent of total capital commitments. We do not possess significant assets in foreign countries in which we operate or engage in material transactions in currencies other than the U.S. dollar. Therefore, changes in exchange rates are not expected to materially impact our financial statements.

Interest Rate Risk

As of March 31, 2026, we had \$180.6 million in borrowings outstanding under our Loan Agreements, consisting of \$84.4 million outstanding under the Term Loan Agreement and \$96.3 million outstanding under the 2020 Multi-Draw Term Loan Agreement. We did not have any borrowings outstanding under the Revolving Loan Agreement or the 2022 Multi-Draw Term Loan Agreement as of March 31, 2026.

The annual interest rate on the Term Loan Agreement, which is at the prime rate minus 1.25% and subject to a floor of 3.00%, was 5.50% as of March 31, 2026. The interest rate under the 2020 Multi-Draw Term Loan Agreement is fixed.

Our \$100.0 million aggregate principal amount of Senior Notes due October 15, 2029 have a fixed interest rate of 5.28%.

Based on the floating rate component of our Loan Agreements payable as of March 31, 2026, we estimate that a 100 basis point increase in interest rates would result in increased interest expense of approximately \$0.8 million over the next 12 months.

Credit Risk

We are party to agreements providing for various financial services and transactions that contain an element of risk in the event that the counterparties are unable to meet the terms of such agreements. In such agreements, we depend on the respective counterparty to make payment or otherwise perform. We generally endeavor to minimize our risk of exposure by limiting the counterparties with which we enter into financial transactions to reputable financial institutions. In other circumstances, availability of financing from financial institutions may be uncertain due to market events, and we may not be able to access these financing markets.

There have been no material changes in our market risk exposures since March 31, 2025.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Hamilton Lane Incorporated

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Hamilton Lane Incorporated (the Company) as of March 31, 2026 and 2025, the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended March 31, 2026, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at March 31, 2026 and 2025, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2026, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of March 31, 2026, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated May 21, 2026 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Recognition of Net Deferred Tax Asset from Equity Offering and Unit Exchange

Description of the Matter

As further discussed in Note 12 to the consolidated financial statements, in connection with the Company's equity offering and unit exchanges during the current year (the "Transactions"), the Company recorded a net deferred tax asset of \$12.4 million. As further discussed in Note 2 to the consolidated financial statements, the resulting basis differences arising from the Transactions represent a temporary difference for which the Company records a deferred tax asset if it is more likely than not the deferred tax asset will be realized. Realization of this deferred tax asset is dependent upon, among other things, the future tax deductions of tax basis step-ups related to the Transactions.

Auditing the Company's recognition of the net deferred tax asset related to the Transactions is especially challenging, as the Company's determination of the tax basis step-ups and related future tax deductions requires the application of complex tax laws and regulations for partnerships and the identification of historical basis differences.

*How We
Addressed the
Matter in Our
Audit*

We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's net deferred tax asset recognition process, including controls over management's review of the determination of the tax basis step-ups and related future tax deductions and the identified historical basis differences described above.

To test the recognition of the net deferred tax asset resulting from the Transactions, we involved tax subject matter professionals and performed procedures that included, among others, evaluating the technical merit of the Company's determination of the tax basis step-ups and the related future tax deductions based on relevant tax law and regulations. We also used available tax-related information to evaluate the historical basis differences the Company used in its determination.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2008.
Philadelphia, Pennsylvania
May 21, 2026

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Hamilton Lane Incorporated

Opinion on Internal Control Over Financial Reporting

We have audited Hamilton Lane Incorporated's internal control over financial reporting as of March 31, 2026, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Hamilton Lane Incorporated (the Company) maintained, in all material respects, effective internal control over financial reporting as of March 31, 2026, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of March 31, 2026 and 2025, the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended March 31, 2026, and the related notes and our report dated May 21, 2026 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

1. Organization

Hamilton Lane Incorporated (“HLI”) was incorporated in the State of Delaware on December 31, 2007 and, following its 2017 initial public offering (“IPO”), is a holding company whose principal asset is a controlling equity interest in Hamilton Lane Advisors, L.L.C. (“HLA”). As the sole managing member of HLA, HLI operates and controls all of the business and affairs of HLA, and through HLA, conducts its business. As a result, HLI consolidates HLA’s financial results and reports a non-controlling interest (“NCI”) related to the portion of HLA units not owned by HLI. The assets and liabilities of HLA represent substantially all of HLI’s consolidated assets and liabilities with the exception of certain cash, certain deferred tax assets and liabilities, payables to related parties pursuant to a tax receivable agreement, and dividends payable. Unless otherwise specified, the “Company” refers to the consolidated entity of HLI, HLA and subsidiaries throughout the remainder of these notes. As of March 31, 2026 and 2025, HLI held approximately 77.3% and 76.6%, respectively, of the economic interest in HLA. As future exchanges of HLA units occur pursuant to the exchange agreement, the economic interest in HLA held by HLI will increase.

HLA is a registered investment advisor with the United States Securities and Exchange Commission (“SEC”), providing asset management and advisory services to design, build and manage private markets portfolios. HLA generates revenues primarily from management and advisory fees, comprised of specialized fund and customized separate account management fees, advisory and reporting fees and distribution management fees and, to a lesser extent, incentive fees, comprised of carried interest earned from the Company’s specialized funds and certain customized separate accounts structured as single-client funds in which the Company has a general partner commitment, and performance fees earned on certain other specialized funds and customized separate accounts. HLA sponsors the formation, and serves as the general partner, managing member and/or investment manager, of various specialized funds and certain single client separate account entities (“Funds”) that acquire interests in third-party managed investment funds that make private markets and related investments or otherwise invest directly in such investments. The Company, which includes certain subsidiaries that serve as the general partner or managing member of the Funds, may invest its own capital in the Funds and generally makes all investment and/or operating decisions for the Funds. HLA operates several wholly owned entities through which it conducts its foreign operations.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The accompanying financial statements include the accounts of the Company, its wholly owned subsidiaries, and entities that the Company controls. Certain of the Company’s consolidated funds are investment companies that follow specialized accounting guidance and reflect their investments at estimated fair value. All intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include, among others, the valuation of investments, the estimation of variable consideration related to incentive fees, and the assessment of whether a significant reversal of revenue is probable. Actual results could differ from those estimates.

Consolidation

The Company consolidates general partnerships and subsidiaries that are wholly owned. Additionally, the Company consolidates Funds (“Consolidated Funds”) and general partner entities that are not wholly-owned (“Partnerships”) over which it exercises control either by holding majority voting interests or as the primary beneficiary, possessing both decision making authority and the right to receive economic benefits or the obligation to absorb expected losses of the entity that could potentially be significant to the entity. The Consolidated Funds and Partnerships are included in the Company’s consolidated financial statements. The portion of the Consolidated Funds and Partnerships owned by third parties is presented as non-controlling interests in the Consolidated Balance Sheets and income attributable to non-controlling interests in the Consolidated Statements of Income.

The assets of the Partnerships represent investments in Funds and the assets of the Consolidated Funds generally represent cash and investments. The assets may only be used to settle obligations of the respective Consolidated Funds or Partnerships, if any. In addition, there is no recourse to the Company for the Consolidated Partnerships and Funds’ liabilities, except for certain entities in which there could be a clawback of previously distributed carried interest. Once the Company no longer qualifies as the primary beneficiary or holds a majority voting interest, it deconsolidates all the assets and liabilities of the respective Partnership or Consolidated Fund from the Consolidated Balance Sheets and records any remaining interest in the entity using the equity method within investments in the Consolidated Balance Sheets. Accordingly, the Company’s economic exposure to these entities is generally limited to its capital committed or invested and its entitlement to management and incentive fees.

At each reporting date, the Company determines whether any reconsideration events have occurred that require it to revisit the consolidation analysis and will consolidate or deconsolidate accordingly.

See Note 6 for additional disclosure on variable interest entities (“VIEs”).

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Accounting for Differing Fiscal Periods

The Funds primarily have a fiscal year end as of December 31, and the Company accounts for its investments in the Funds using a three-month lag due to the timing of financial information received from the investments held by the Funds. The Funds primarily invest in private equity funds, which generally require at least 90 days following the calendar year end to present audited financial statements.

The results of the Consolidated Funds are reported on a three-month lag, due to the timing of the receipt of related financial statements.

The Company records its share of capital contributions to and distributions from the Funds in investments in the Consolidated Balance Sheets during the three month lag period.

The Company's revenue earned from Funds, including both management and advisory fee revenue and incentive fee revenue, is not accounted for on a lag.

To the extent that management is aware of material events that affect the Consolidated Funds and Partnerships during the intervening period, the impact of the events would be disclosed in the Notes to Consolidated Financial Statements.

Foreign Currency

The Company and substantially all of its foreign subsidiaries utilize the U.S. dollar as their functional currency. The assets and liabilities of the Company's foreign subsidiaries with non-U.S. dollar functional currencies are translated at exchange rates prevailing at the end of each reporting period. The results of foreign operations are translated using the exchange rate on the respective transaction dates. Translation adjustments are included in other comprehensive income (loss) within the consolidated financial statements until realized. Foreign currency transaction gains and losses are included in general, administrative and other expenses in the Consolidated Statements of Income.

Cash, Cash Equivalents and Restricted Cash

Cash deposits in interest-bearing money market accounts and highly liquid investments, with an original maturity of three months or less, are classified as cash equivalents. Interest earned on cash and cash equivalents is recorded as interest income in the Consolidated Statements of Income.

Restricted cash at March 31, 2026 and 2025 was primarily cash held by the Company's foreign subsidiaries to meet applicable government regulatory capital requirements and cash related to self-funded medical insurance for U.S. employees.

Fees Receivable

Fees receivable are equal to contractual amounts reduced for allowances, if applicable. The Company considers fees receivable to be fully collectible; accordingly, no allowance for credit losses has been established as of March 31, 2026 or 2025.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Due from Related Parties

Due from related parties in the Consolidated Balance Sheets consists primarily of advances made on behalf of the Funds for the payment of certain operating costs, expenses for which the Company is subsequently reimbursed and amounts due from current employees.

Furniture, Fixtures and Equipment

Furniture, fixtures and equipment consist primarily of leasehold improvements, office equipment, furniture and fixtures, and computer hardware and software and are recorded at cost, less accumulated depreciation. Depreciation is recognized in accordance with the straight-line method over the estimated useful lives as follows:

Computer hardware and software	3 - 7 years
Furniture and fixtures	5 years
Office equipment	3 years

Leasehold improvements are capitalized and depreciated over the shorter of their useful life or the life of the lease. Expenditures for improvements that extend the useful life of an asset are capitalized. Expenditures for ordinary repairs and maintenance are expensed as incurred.

Leases

The Company determines whether an arrangement contains a lease at inception. A lease is a contract that provides the right to control an identified asset for a period of time in exchange for consideration. For identified leases, the Company determines whether it should be classified as an operating or finance lease. The Company accounts for lease components and non-lease components as a single lease component. Lease right of use ("ROU") assets and lease liabilities are recognized at the commencement date of the lease and measured based on the present value of lease payments over the lease term. Lease ROU assets include initial direct costs incurred by the Company and are presented net of deferred rent and lease incentives. Generally, the Company's leases do not provide an implicit rate and as a result, the Company uses its incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. Some leases have the option to extend for an additional term or terminate early. Where it is reasonably certain that the Company will exercise the option, the option has been included in the lease term and reflected in the ROU asset and liability. The Company does not recognize a lease ROU asset or lease liability for short-term leases, which have lease terms of 12 months or less. Lease expense for lease payments on operating leases is recognized on a straight-line basis over the lease term.

Other Assets

Intangible assets

The Company's intangible assets consist of customer relationship assets identified as part of previous acquisitions and purchased software. Identifiable finite-lived intangible assets are amortized on a straight-line basis over their estimated useful lives, ranging from 7 to 10 years. The Company does not hold any indefinite-lived intangible assets. Intangible assets are reviewed for impairment quarterly, or when events or changes in circumstances indicate that the carrying amount may not be recoverable. The Company has not recognized any impairment charges in any of the periods presented.

The carrying value of the intangible assets was \$1,419 and \$2,884, and is included in other assets in the Consolidated Balance Sheets as of March 31, 2026 and 2025, respectively. The accumulated amortization of intangibles was \$10,751 and \$9,286 as of March 31, 2026 and 2025, respectively. Amortization of intangible assets was \$1,465, \$1,701, and \$1,701 for each of the years in the three-year period ended March 31, 2026, respectively, and is included in general, administrative and other expenses in the Consolidated Statements of

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Income. The estimated amortization expense for each of the next two fiscal years is \$1,155 and \$264, respectively, and no expense is expected beyond the second fiscal year.

Goodwill

Goodwill of \$9,566 is included in other assets in the Consolidated Balance Sheets as of March 31, 2026 and 2025, and was recorded in conjunction with previous acquisitions. Goodwill is reviewed for impairment at least annually, and more frequently if events or changes in circumstances indicate that it is more likely than not that impairment may have occurred. The Company first performs a qualitative assessment to determine whether it is more likely than not that the fair value of its reporting unit is less than its carrying amount. The reporting unit is the level at which goodwill is tested for impairment. If, based on this assessment, it is more likely than not that the fair value of the reporting unit is less than its carrying amount, or if the Company elects to bypass the qualitative assessment, a quantitative goodwill impairment test is performed by comparing the fair value of the reporting unit with its carrying amount. If the carrying amount of the reporting unit exceeds its fair value, an impairment loss is recognized in an amount equal to that excess, limited to the total amount of goodwill allocated to the reporting unit. The Company performed the annual impairment assessment as of December 31, 2025 noting that no goodwill impairment existed.

Convertible notes receivable

Convertible notes receivable of \$17,456 and \$9,657 as of March 31, 2026 and 2025, respectively, are included in other assets in the Consolidated Balance Sheets. Each note is recognized at amortized cost with interest accrued quarterly. Principal and interest obligations may be satisfied by a cash payment or converted to equity of the note issuers at the end of term or upon triggering events as defined in the note agreements. The Company considers the notes receivable to be fully collectible; accordingly, no allowance for credit losses has been established as of March 31, 2026 or 2025.

Investments

Equity method investments

Investments over which the Company is deemed to exert significant influence but not control are accounted for using the equity method of accounting. For investments accounted for under the equity method of accounting, the Company's share of income (losses) is included in equity in income of investees in the Consolidated Statements of Income. The Company's equity in income of investees is generally comprised of realized and unrealized gains from the underlying funds, portfolio companies held by the Funds and a technology investment. The carrying amounts of equity method investments are reflected in investments in the Consolidated Balance Sheets.

Measurement alternative investments

The Company's investments valued under the measurement alternative include investments for which the Company does not exert significant influence and fair value is not readily determinable. These investments are recorded at cost, less impairment, if any, and subsequently adjusted for observable price changes of identical or similar investments of the same issuer. The Company performs qualitative impairment assessments at each quarter-end on its investments recorded under the measurement alternative. The carrying amounts of measurement alternative investments are reflected in investments in the Consolidated Balance Sheets.

Fair value investments

The Company's fair value investments represent investments held by Consolidated Funds and investments previously held in private equity funds and direct credit and equity investments that were pledged as collateral on a secured financing that the Company accounted for at fair value under the fair value option. The carrying amounts of fair value investments are reflected in investments in the Consolidated

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Balance Sheets. Realized and unrealized gains and losses from investments held by the Consolidated Funds are recorded in net gain on investments in the Consolidated Statements of Income.

The Company had transferred investments to a Fund of which the Company is the general partner. Due to continuing involvement with the assets at the Fund, the Company accounted for this transfer as a secured financing as it had not met the criteria in Accounting Standards Codification (“ASC”) 860, “Transfers and Servicing”, to qualify as a sale and, therefore, had recorded a financial liability for the secured financing which was included in other liabilities in the Consolidated Balance Sheets. During the quarter ended March 31, 2026, the investments pledged as collateral were fully derecognized, with no gain or loss recognized, as the carrying amount of the liability approximated the carrying amount of the related investments at the time of derecognition.

Fair Value of Financial Instruments

The Company utilizes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques (market approach, income approach, and cost approach). The levels of the hierarchy are described below:

- Level 1: Values are determined using quoted market prices for identical financial instruments in an active market.
- Level 2: Values are determined using quoted prices for similar financial instruments and valuation models whose inputs are observable.
- Level 3: Values are determined using pricing models that use significant inputs that are primarily unobservable, discounted cash flow methodologies or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company uses these levels of hierarchy to measure the fair value of certain financial instruments on a recurring basis, such as for investments; on a non-recurring basis, such as for acquisitions and impairment testing; for disclosure purposes, such as for long-term debt; and for other applications, as discussed in their respective notes.

Categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. For a portion of the Company’s investments, net asset value (“NAV”) per share (or its equivalent) provides the lowest level of input. These investments are considered investment companies, or are the equivalent of investment companies, as they carry all investments at fair value, with unrealized gains and losses resulting from changes in fair value reflected in earnings. Investments valued using NAV are excluded from the fair value hierarchy. See Note 5 for further information.

The carrying amount of cash and cash equivalents, convertible notes receivable, fees receivable, and accounts payable approximate fair value due to the immediate or short-term maturity of these financial instruments.

Recent Accounting Pronouncements

In October 2023, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2023-06 - Disclosure Improvements: Codification Amendments in Response to the SEC’s Disclosure Update and Simplification Initiative. The amendments in this ASU incorporate 14 of the 27 disclosure requirements published in SEC Release No. 33-10532 - Disclosure Update and Simplification into various topics within the Accounting Standards Codification. The amendments represent clarifications to, or technical corrections of, current requirements. For SEC registrants, the effective date for each amendment will be the date on which the SEC removes that related disclosure from its rules. Early adoption is prohibited. The amendments will be applied retrospectively to all prior periods presented in the consolidated financial statements. The Company is currently assessing the impact of the new requirements.

In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures, to enhance transparency and decision usefulness of income tax disclosures. The Company adopted ASU 2023-09 for the fiscal year ended March 31, 2026 on a prospective basis. The adoption did not have a material impact on the Company’s consolidated financial statements, but resulted in additional income tax disclosures, as noted in Note 12.

In November 2024, the FASB issued ASU 2024-03, Income Statement (Topic 220): Reporting Comprehensive Income - Income-Expense Disaggregation Disclosures, which requires public companies to disclose, in interim and annual reporting periods, additional information about certain expenses in the financial statements. The amendments in this ASU will be effective for annual periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted and is effective on either a prospective basis or retrospective basis. The Company is currently assessing the impact of the new requirements.

In May 2025, the FASB issued ASU 2025-04, Compensation—Stock Compensation (Topic 718) and Revenue from Contracts with Customers (Topic 606): Clarifications to Share-Based Consideration Payable to a Customer, which requires entities that issue share-based consideration to a customer within the scope of Topic 606 to apply the share-based payment guidance in Topic 718 to measure and classify such awards and clarifies how vesting conditions and expected forfeitures affect the timing and amount of the related reduction of revenue. The amendments in this ASU will be effective for annual periods (including interim periods within annual periods) beginning after December 15, 2026. Early adoption is permitted and is effective on either a modified retrospective or a retrospective basis. The Company elected to early adopt retrospectively during the three months ended December 31, 2025. The adoption of ASU 2025-04 did not impact prior periods.

In September 2025, the FASB issued ASU 2025-06, Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40), which modernizes accounting guidance for internal-use software costs. The updated standard reflects current development practices, including agile methodologies, by removing references to “development stages” and clarifying that capitalization begins when management authorizes and commits to funding for a software project, and it is probable the project will be completed and perform its intended function as intended. ASU 2025-06 is effective for annual periods beginning after December 15, 2027, with early adoption permitted. The Company is currently assessing the impact of the new requirements.

In December 2025, the FASB issued ASU 2025-11, Interim Reporting (Topic 270) Narrow-Scope Improvements, which requires entities that present interim financial statements in accordance with U.S. GAAP to follow clarified guidance on the form, content, and required disclosures of those interim financial statements, including disclosure of events since the end of the last annual reporting period that have a material impact on the entity. The amendments in this ASU will be effective for interim periods within annual periods beginning after December 15, 2027. Early adoption is permitted and is effective on either a prospective basis or retrospective basis. The Company is currently assessing the impact of the new requirements.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Revenues

The Company recognizes revenue in accordance with ASC 606, Revenue from Contracts with Customers.

Management and advisory fees

The Company earns management fees from services provided to its specialized funds, customized separate accounts, and distribution management clients, and advisory fees from services provided to advisory clients where the Company does not have discretion over investment decisions. Revenue is recognized when control of the promised services is transferred to customers in an amount that reflects the consideration the Company expects to receive in exchange for those services. The Company serves as the general partner, managing member or investment manager of the specialized funds. Customized separate accounts are generally contractual arrangements involving an investment management agreement between the Company and a single client. In some cases, a customized separate account will be structured as a partnership with a subsidiary of the Company serving as general partner or managing member. The Company determined that the partnership of the Fund is generally considered to be the customer with respect to specialized funds, while the individual investor or single limited partner is the customer with respect to customized separate accounts and advisory clients.

Management fees generally exclude the reimbursement of any expenses paid by the Company on behalf of its customers pursuant to its contracts, including amounts related to professional fees and other fund administrative expenses. For the professional and administrative services performed by third parties that the Company arranges for the customer, the Company concluded that the nature of its promise is to arrange for the services to be provided and it does not control the services provided by third parties before they are transferred to the customer. Therefore, the Company is acting as an agent. Accordingly, the reimbursement for these expenses paid on behalf of the customer is generally presented on a net basis.

The Company also incurs certain costs for which it receives reimbursement from its customers in connection with satisfying performance obligations. For these costs, the Company concluded it controls the services provided by its employees and the specified services provided by other parties prior to the transfer of those services to the customer, as the Company is responsible for directing and integrating the services into the overall deliverable and assumes primary responsibility for fulfilling the promise to the customer. The Company therefore determined it is the principal in these arrangements in accordance with ASC 606. Accordingly, the Company records the reimbursement for these costs incurred on a gross basis as revenue in management and advisory fees and as expense in general, administrative and other expenses in the Consolidated Statements of Income.

The Company considers its performance obligations in its customer contracts to be one of the following based upon the services promised: asset management services, arrangement of administrative services, distribution management services, or reporting, monitoring, data and analytics services.

For asset management and arrangement of administrative services, the Company satisfies these performance obligations over time as the services are rendered and the customer simultaneously receives and consumes the benefits of the services as they are performed. The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised services to the customer. Management fees from these performance obligations for contracts where the Company has discretion over investment decisions are generally calculated by applying a percentage to unaffiliated committed capital, net invested capital under management or NAV and are usually billed quarterly. For many customers, fees are based on committed capital during the investment period or net invested capital through the remainder of the fund or contract term. The management fee base is subject to factors outside the Company's control and, therefore, estimates of future period management fees are not included in the transaction price, as those estimates would be considered constrained. Advisory fees from these performance

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

obligations for contracts where the Company does not have discretion over investment decisions are generally based upon fixed amounts and are usually billed quarterly.

For distribution management services, the Company satisfies these performance obligations at a point in time when shares are sold/liquidated and the proceeds are delivered and the customer receives and consumes the benefits of the services. Distribution management fees are generally calculated by applying a percentage to the amounts sold/liquidated and are billed at the completion of each transaction.

For reporting, monitoring, data and analytics services, the Company satisfies these performance obligations over time as the services are rendered and the customer simultaneously receives and consumes the benefits of the services as they are performed. Reporting and monitoring fees are generally calculated by applying a fixed rate multiplied by the number of funds monitored and are billed quarterly. Data and analytics fees are generally received on an annual basis and recognized over the service term.

The Company incurs certain costs related to the organization and syndication of new Funds. These costs generally include professional fees, legal fees, and other related items. The Company expenses these costs as they are incurred. Prior to the first closing of a new Fund, the Company incurs costs that it generally does not have an enforceable right to reimbursement, as the contractual obligation of the Fund to reimburse the Company is contingent upon the Fund's successful formation. As such, no receivable or contract asset is recognized during the interim period between cost incurrence and the Fund closing. Once the Fund is successfully formed and has held its first closing, the Company recognizes those costs and any subsequent costs as revenue in the Consolidated Statements of Income as the Fund is then able to reimburse the Company for these costs.

Equity-based consideration payable to a customer

In connection with the Guardian Transaction described in Note 3, the Company issued a warrant for shares of its Class A common stock to a customer. The Company measured the fair value of the warrant using the grant-date fair value determined under Topic 718. The fair value of the warrant is recognized as a reduction of management fee revenue over the contract performance period as the Company provides the related asset management services.

Incentive fees

Specialized funds and certain contracts with certain customized separate accounts provide incentive fees, which generally range from 5% to 12.5% of profits, when investment returns exceed minimum return levels or other performance targets.

Incentive fees are subject to significant variability due to their dependence on investment performance over multi-year periods and/or the terms of the applicable fund or account agreements. Accordingly, incentive fees are considered variable consideration in asset management services. Some incentive fees are constrained by a contingency relating to "clawback," or the obligation to return distributions in excess of the amount prescribed by the applicable fund or separate account documents. Any incentive fees considered to be constrained are not recognized until it is probable that a significant reversal will not occur. In assessing whether the constraint should be applied, the Company considers factors including, but not limited to: the stage of the Fund and degree to which the underlying portfolio has been realized; historical clawback experience across similar Fund vintages; the ratio of cumulative distributions to total value; the amount and probability of additional future capital contributions to the Fund or account, including unfunded commitments and follow-on investment opportunities; and current and expected future market conditions. The constraint assessment is performed at each reporting date and requires significant judgment.

Incentive fees are typically only required to be returned on a net of tax basis due to a clawback. As such, the tax-related portion of incentive fees is typically not subject to clawback and is, therefore, recognized as

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

revenue immediately upon receipt. The tax-related portion is estimated based on the applicable statutory tax rates in effect at the time of receipt.

The Company estimates the amount and probability of additional future capital contributions to specialized funds and customized separate accounts, which could impact the probability of a significant reversal occurring, when applicable. The additional future capital contributions relate to unfunded commitments or follow-on investment opportunities in underlying portfolio investments. Incentive fees received before the revenue recognition criteria have been met, which are included in other liabilities in the Consolidated Balance Sheets.

Compensation and Benefits

Compensation and Benefits consists of (a) base compensation comprising salary, bonuses and benefits paid and payable to employees, (b) equity-based compensation associated with the grants of restricted stock and performance awards and (c) incentive fee compensation, which consists of carried interest and performance fee allocations as detailed below.

Equity-based awards issued are measured at fair value at the date of grant. The fair value of the restricted stock grant is based on the closing stock price on the trading day before the date of grant less the present value of expected future dividends. The fair value of the performance awards are based on a Monte-Carlo simulation valuation model at the date of grant. Expense related to employee equity-based compensation is recorded using the straight-line method over the vesting period. See Note 10 for more information regarding accounting for equity-based awards.

Incentive fee compensation expense includes compensation directly related to incentive fees. Certain employees of the Company are granted allocations or profit-sharing interests and are thereby, as a group, entitled to a 25% portion of the incentive fees earned by the Company from certain Funds and certain managed accounts, subject to vesting. Amounts payable pursuant to these arrangements are recorded as compensation expense when they have become probable and reasonably estimable. Incentive fee compensation may be expensed before the related incentive fee revenue is recognized.

Non-Operating Gain (Loss)

Non-operating gain (loss) consists primarily of gains or losses recorded on sales of other assets, strategic technology investments and adjustments to the payable to related parties pursuant to the tax receivable agreement.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Deferred income taxes are recognized for the expected future tax consequences attributable to temporary differences between the carrying amount of the existing tax assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied in the years in which temporary differences are expected to be recovered or settled. The principal items giving rise to temporary differences are certain basis differences resulting from the acquisitions of HLA units. Realization of the deferred tax assets is primarily dependent upon (1) historic earnings, (2) forecasted taxable income, (3) future tax deductions of tax basis step-ups related to the IPO and subsequent unit exchanges, (4) future tax deductions related to payments under the tax receivable agreement, and (5) the Company's share of HLA's temporary differences that result in future tax deductions. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized.

HLA is organized as a limited liability company and treated as a "flow-through" entity for income tax purposes. As a "flow-through" entity, HLA is not subject to income taxes apart from certain U.S. state and local taxes and foreign taxes attributable to its operations in foreign jurisdictions. Any taxable income or loss

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

generated by HLA is passed through to and included in the taxable income or loss of its members, including HLI. As a result, the Company does not record income taxes on pre-tax income or loss attributable to the NCI in the Consolidated Funds and Partnerships and HLA, except for certain U.S. state and local taxes and foreign taxes discussed above. HLI is subject to U.S. federal and applicable state corporate income taxes with respect to its allocable share of any taxable income of HLA.

The Company analyzes its tax filing positions in all of the U.S. federal, state, local and foreign tax jurisdictions where it is required to file income tax returns, as well as for all open tax years in these jurisdictions. The Company evaluates tax positions taken or expected to be taken in the course of preparing an entity's tax returns to determine whether it is "more-likely-than-not" that each tax position will be sustained by the applicable tax authority.

Tax Receivable Agreement

The Company's purchase of HLA Class A units concurrent with its IPO and periodic exchanges by holders of HLA units for shares of the Company's Class A common stock, or cash, pursuant to the exchange agreement, result in increases in its share of the tax basis of the tangible and intangible assets of HLA, which will increase the tax depreciation and amortization deductions that otherwise would not have been available to HLI. These increases in tax basis and tax depreciation and amortization deductions reduce the amount of cash taxes that HLI would otherwise be required to pay in the future. HLI has entered into a tax receivable agreement with the other members of HLA (the "TRA Recipients") that requires it to pay them 85% of the amount of cash savings, if any, in U.S. federal, state, and local income tax that HLI actually realizes (or, under certain circumstances, is deemed to realize) as a result of the increases in tax basis in connection with exchanges by the TRA Recipients described above and certain other tax benefits attributable to payments under the tax receivable agreement.

Segments

Operating segments are defined as components of an enterprise for which separate financial information is evaluated regularly by the chief operating decision makers ("CODM") in deciding how to allocate resources and assess performance. The Company's CODM are its co-chief executive officers. The Company is managed as one reportable segment that provides private market investment solutions. These solutions derive revenues from customers and are offered in formats covering some or all phases of private markets investment programs.

Financial information, annual operational plans and forecasts are reviewed by the CODM at the consolidated entity level. Consolidated net income is the primary measure of performance used by the CODM to establish objectives and allocate resources, with compensation and benefits being reviewed in more detail as a significant expense. Segment profit and loss is presented in the Consolidated Statements of Income, with additional detail provided in Note 11 "Compensation and Benefits" relating to the significant expenses reviewed by the CODM. The measure of segment assets is not regularly presented to the CODM.

Concentrations of Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash, cash equivalents, restricted cash and fees receivable. The majority of the Company's cash, cash equivalents, and restricted cash is held with one major financial institution and exposes the Company to a certain degree of credit risk. Substantially all cash amounts on deposit with major financial institutions exceed Federal Deposit Insurance Corporation insured limits. The concentration of credit risk with respect to fees receivable is generally limited due to the short payment terms extended to clients by the Company.

The Company derives revenues from clients located in the United States and other foreign countries.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

The below table presents revenues by geographic location:

	Year Ended March 31,		
	2026	2025	2024
United States	\$ 310,354	\$ 314,608	\$ 224,700
Other foreign countries ⁽¹⁾	448,639	398,355	329,142
Total revenues⁽²⁾	\$ 758,993	\$ 712,963	\$ 553,842

⁽¹⁾ For the years ended March 31, 2026, 2025 and 2024, no individual foreign country had material attributed revenue.

⁽²⁾ Revenues are attributed to countries based on location of the client or investor.

For the fiscal year ended March 31, 2026, two evergreen Funds accounted for approximately 18% and 15% of the Company's total revenues, respectively. For the fiscal year ended March 31, 2025, one evergreen fund accounted for approximately 14% of the Company's total revenues.

Dividends and Distributions

Dividends and distributions are reflected in the consolidated financial statements when declared.

Reclassifications

Certain prior period amounts have been reclassified to conform to current year presentation. These reclassifications did not affect the Company's consolidated financial position, results of operations, comprehensive income, cash flows, or stockholders' equity.

On the Consolidated Balance Sheets and Consolidated Statements of Income, Comprehensive Income and Stockholder's Equity, the Company reclassified "Non-controlling interests in Partnerships" and "Non-controlling interests in Consolidated Funds" into a single line titled "Non-controlling interests in Consolidated Funds and Partnerships".

In the Investing Activities section of the Consolidated Statements of Cash Flows, the Company reclassified "Purchase of convertible notes" and "Purchase of investments" into a single line item titled "Purchase of convertible notes and investments".

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

3. Revenue

The following tables present revenues disaggregated by product offering, which aligns with the identified performance obligations and the basis for calculating each amount:

	Year Ended March 31,		
	2026	2025	2024
Management and advisory fees			
Specialized funds	\$ 374,405	\$ 315,214	\$ 261,012
Customized separate accounts	141,535	134,400	128,826
Advisory	20,473	22,806	24,229
Reporting, monitoring, data and analytics	35,766	29,244	24,711
Distribution management	2,170	2,619	5,054
Fund reimbursement revenue	9,867	9,581	8,104
Total management and advisory fees	<u>\$ 584,216</u>	<u>\$ 513,864</u>	<u>\$ 451,936</u>
	Year Ended March 31,		
	2026	2025	2024
Incentive fees			
Specialized funds	146,293	182,092	89,988
Customized separate accounts	24,282	16,204	11,918
Consolidated Funds and Partnerships			
Specialized funds	4,202	803	—
Total incentive fees	<u>\$ 174,777</u>	<u>\$ 199,099</u>	<u>\$ 101,906</u>

Strategic Partnership

On November 2, 2025, the Company entered into a long-term strategic partnership (the “Guardian Transaction”) with The Guardian Life Insurance Company of America (“Guardian”). Through this partnership, the Company will oversee Guardian’s existing private equity portfolio and future commitments to private equity for the next 10 years. On December 31, 2025, the Company issued a warrant related to a maximum of 400,000 shares of its Class A common stock (the “Warrant”) to Guardian in a private placement transaction.

On December 31, 2025, the Company recognized an asset of \$8,367 recorded in other assets in the Consolidated Balance Sheets, associated with the Warrant shares that were vested and exercisable upon issuance, subject to clawback provisions. The asset, along with the remaining grant date fair value of the Warrant, will be recognized as a reduction of management fee revenue over the contract performance period as the Company provides the related asset management services.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

4. Investments

Investments consist of the following:

	March 31,	
	2026	2025
Equity method investments in Funds	\$ 567,888	\$ 453,636
Other equity method investments	—	386
Fair value investments	—	12,190
Measurement alternative investments	206,555	198,142
Total Investments	<u>\$ 774,443</u>	<u>\$ 664,354</u>

Investments of Consolidated Funds and Partnerships consist of the following:

	March 31,	
	2026	2025
Equity method investments in Funds	\$ 20,841	\$ 19,292
Fair value investments	505,237	77,408
Total Investments of Consolidated Funds and Partnerships	<u>\$ 526,078</u>	<u>\$ 96,700</u>

Equity method investments

The Company's equity method investments in Funds represent its ownership in certain specialized funds and customized separate accounts. The strategies and geographic location of investments vary by Fund. The Company has a 1% interest in substantially all of the Funds. The Company's other equity method investments represent its ownership in a technology company to develop an AI-powered investment assistant for private markets.

The Company's equity method investments in Funds consist of the following types:

	March 31,	
	2026	2025
Primary funds	\$ 39,972	\$ 35,251
Secondary funds	70,601	60,545
Direct investment funds	100,116	94,257
Customized separate accounts	163,090	141,088
Evergreen funds	194,109	122,495
Total equity method investments in Funds	<u>\$ 567,888</u>	<u>\$ 453,636</u>

The Company evaluates each of its equity method investments to determine if any were significant pursuant to the requirements of Regulation S-X. As of and for each of the years ended March 31, 2026 and 2025, no individual equity method investment held by the Company met the significance criteria, and, as a result, the Company is not required to present separate financial statements for any of its equity method investments.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

The summarized financial information of the Company's equity method investments in Funds is as follows:

	March 31,	
	2026	2025
Assets		
Investments	\$ 59,976,551	\$ 50,486,273
Other assets	2,231,251	1,242,238
Total assets	<u>\$ 62,207,802</u>	<u>\$ 51,728,511</u>
Liabilities and Partners' Capital		
Debt	\$ 369,438	\$ 494,430
Other liabilities	851,571	741,822
Total liabilities	1,221,009	1,236,252
Partners' capital	60,986,792	50,492,259
Total liabilities and partners' capital	<u>\$ 62,207,801</u>	<u>\$ 51,728,511</u>

	Year Ended March 31,		
	2026	2025	2024
Investment income	\$ 916,410	\$ 870,828	\$ 625,176
Expenses	531,670	487,339	403,517
Net investment income	384,740	383,489	221,659
Net realized and unrealized gain	4,470,303	1,690,743	2,672,499
Net income	<u>\$ 4,855,043</u>	<u>\$ 2,074,232</u>	<u>\$ 2,894,158</u>

Measurement Alternative Investments

The following table summarizes the activity related to the Company's measurement alternative investments:

	Year Ended March 31,		
	2026	2025	2024
Carrying amount, beginning of the year	\$ 198,142	\$ 175,522	\$ 168,732
Adjustments related to equity investments			
Purchases	8,000	13,853	6,311
Sales / return of capital	—	—	(176)
Net change in unrealized gain (loss) ⁽¹⁾	413	8,767	1,177
Net realized loss	—	—	(522)
Carrying amount, end of year	<u>\$ 206,555</u>	<u>\$ 198,142</u>	<u>\$ 175,522</u>

⁽¹⁾ Net change in unrealized gain (loss) consists of fair value adjustments for observable price changes of identical or similar investments.

The following table summarizes the cumulative gross unrealized gains and cumulative gross unrealized losses related to the Company's measurement alternative investments:

	As of March 31,		
	2026	2025	2024
Cumulative gross unrealized gains	\$ 79,414	\$ 79,002	\$ 70,235
Cumulative gross unrealized losses	\$ (43,289)	\$ (43,289)	\$ (43,289)

Hamilton Lane Incorporated

(In thousands, except share and per share amounts)

5. Fair Value Measurement

The following tables summarize the Company's financial assets and financial liabilities recorded at fair value by fair value hierarchy level:

As of March 31, 2026					
	Level 1	Level 2	Level 3	NAV ⁽¹⁾	Total
Financial assets:					
<i>Consolidated Funds</i>					
Fair value investments	107,379	—	6,305	391,553	505,237
Total financial assets	<u>\$ 107,379</u>	<u>\$ —</u>	<u>\$ 6,305</u>	<u>\$ 391,553</u>	<u>\$ 505,237</u>

As of March 31, 2025					
	Level 1	Level 2	Level 3	NAV ⁽¹⁾	Total
Financial assets:					
Fair value investments	\$ —	\$ —	\$ 12,190	\$ —	\$ 12,190
<i>Consolidated Funds</i>					
Fair value investments	—	—	3,916	73,492	77,408
Total financial assets	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 16,106</u>	<u>\$ 73,492</u>	<u>\$ 89,598</u>

Financial liabilities:					
Secured financing ⁽²⁾	\$ —	\$ —	\$ 12,190	\$ —	\$ 12,190
Total financial liabilities	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 12,190</u>	<u>\$ —</u>	<u>\$ 12,190</u>

⁽¹⁾ The fair value amounts presented in this column are intended to permit reconciliation of the fair value hierarchy to the amounts presented in Note 4.

⁽²⁾ Secured financing is recorded within other liabilities in the Consolidated Balance Sheets.

The following table lists information regarding all investments recorded at estimated fair value based upon the NAV:

As of March 31,				
	2026		2025	
	Fair Value	Unfunded Commitment	Fair Value	Unfunded Commitment
Direct investment funds	\$ 54,138	\$ 8,097	\$ 13,698	\$ 1,232
Secondary funds	337,415	65,428	59,794	11,126
	<u>\$ 391,553</u>	<u>\$ 73,525</u>	<u>\$ 73,492</u>	<u>\$ 12,358</u>

The investments valued under NAV can only be redeemed through distributions received from the liquidation of the underlying investments, and the timing of distributions is currently indeterminable.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

The following is a reconciliation of fair value investments for which significant unobservable inputs (Level 3) were used in determining value:

	Private equity funds	Direct equity investments	Total investments
Balance as of March 31, 2024	\$ 5,519	\$ 7,552	\$ 13,071
Contributions	—	—	—
Distributions	(452)	—	(452)
Net (loss) gain	(802)	373	(429)
Transfer in	—	—	—
Transfer out	—	—	—
Balance as of March 31, 2025	<u>\$ 4,265</u>	<u>\$ 7,925</u>	<u>\$ 12,190</u>
Contributions	9	—	9
Distributions	(15)	(371)	(386)
Net gain (loss)	165	(1,201)	(1,036)
Transfer in	—	—	—
Transfer out ⁽¹⁾	(4,424)	(6,353)	(10,777)
Balance as of March 31, 2026	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>

⁽¹⁾ During the quarter ended March 31, 2026, the Company fully derecognized the investments held as collateral and related Secured financing liability that was previously recorded within other assets and liabilities, respectively in the Consolidated Balance Sheets.

The following is a reconciliation of investments held by the Company's Consolidated Funds for which significant unobservable inputs (Level 3) were used in determining value:

	Direct equity investments
Balance as of March 31, 2024	\$ —
Contributions	4,391
Distributions	(116)
Net gain	20
Transfer out ⁽¹⁾	(379)
Balance as of March 31, 2025	<u>\$ 3,916</u>
Contributions	11,731
Net gain	25
Transfer out ^{(1) (2)}	(9,367)
Balance as of March 31, 2026	<u>\$ 6,305</u>

⁽¹⁾ Transfer out relates to a change in valuation approach on an equity investment from Level 3 to NAV practical expedient based upon the availability of information.

⁽²⁾ Transfer out relates to deconsolidation of a previously consolidated fund entity which held Level 3 investments.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

The valuation methodologies, significant unobservable inputs, range of inputs and the weighted average input determined based upon relative fair value of the investments used in recurring Level 3 fair value measurements of assets were as follows:

		March 31, 2026			
	Fair Value	Valuation Methodology			
Investments held by Consolidated Funds					
Direct equity investments	\$ 6,305	Recent precedent transactions			
		March 31, 2025			
	Fair Value	Valuation Methodology	Significant Unobservable Inputs	Range	Weighted Average
Private equity funds	\$ 4,265	Adjusted NAV	Selected market return	(1.0)% — 1.4%	(0.7)%
Direct equity investments	\$ 7,925	Adjusted NAV	Selected market return	0.62%	0.62%
Investments held by Consolidated Funds					
Direct equity investments	\$ 3,916	Recent precedent transactions			

For the significant unobservable inputs listed in the table above, a significant increase or decrease in the selected market return would result in a significantly higher or lower fair value measurement, respectively.

6. Variable Interest Entities

The Company holds variable interests in entities that are considered VIEs because limited partners or members do not have substantive participating rights to remove the Company as the general partner, managing member and/or investment manager or to terminate the entity without cause by simple majority vote. The Company's variable interest primarily consist of direct equity interests in the Funds. In these capacities, the Company, generally acts as sponsor of the applicable Funds and has the authority to make all significant investment and operating decisions.

The Company evaluates whether it holds a variable interest in an entity by reviewing its equity ownership and whether the Company absorbs risk created and distributed by the entity. Fees received by the Company are not variable interests when (i) the fees are compensation for services provided and are commensurate with the level of effort required to provide those services, (ii) the service arrangement includes only terms, conditions, or amounts that are customarily present in arrangements for similar services negotiated at arm's length and (iii) the Company's other economic interests in the VIE held directly and indirectly through its related parties, as well as economic interests held by related parties under common control, where applicable, would not absorb more than an insignificant amount of the entity's losses or receive more than an insignificant amount of the entity's benefits. Evaluation of these criteria requires judgment.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

For entities determined to be a VIE in which the Company has a variable interest, an evaluation is required to determine whether the Company is the primary beneficiary. The Company evaluates its economic interests in the entity specifically determining if the Company has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance ("the power") and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE ("the benefits"). When making the determination on whether the benefits received from an entity are significant, the Company considers the total economics of the entity, and analyzes whether the Company's share of the economics is significant. The Company utilizes qualitative factors, and, where applicable, quantitative factors, while performing the analysis.

VIEs which the Company controls as the primary beneficiary have been consolidated in the Company's consolidated financial statements. The portion of the consolidated subsidiaries owned by third parties and any related activity is eliminated through non-controlling interests in the Consolidated Balance Sheets and net income attributable to non-controlling interests in the Consolidated Statements of Income.

Consolidated Variable Interest Entities

The Company consolidates general partner entities of certain Partnerships and Consolidated Funds in which it is currently the primary beneficiary, which are not wholly-owned by the Company. The deconsolidations during the years ended March 31, 2026 and 2025 did not impact the Company's Consolidated Statements of Income.

The following table presents the assets and liabilities of consolidated VIEs that are included in the Consolidated Balance Sheets.

	March 31,	
	2026	2025
Assets of Consolidated Funds and Partnerships:		
Cash and cash equivalents	\$ —	\$ 48,112
Investments	487,357	96,700
Other assets	9,516	460
Total assets	<u>\$ 496,873</u>	<u>\$ 145,272</u>
Liabilities of Consolidated Funds and Partnerships:		
Subscriptions in advance	\$ 55,561	\$ —
Other liabilities	12,902	922
Total liabilities	<u>\$ 68,463</u>	<u>\$ 922</u>

Non-consolidated Variable Interest Entities

Certain Funds that are VIEs are not consolidated because the Company has determined it is not the primary beneficiary based upon the Company's equity interest percentage in each of the applicable VIEs. As of each of March 31, 2026 and March 31, 2025, the total remaining unfunded commitments to the non-consolidated VIEs was \$185,210 and \$185,680, respectively. Investor commitments are the primary source of financing for the non-consolidated VIEs.

The maximum exposure to loss represents the potential loss of assets recognized by the Company relating to these non-consolidated VIEs. The Company believes that its maximum exposure to loss is limited because it establishes separate limited liability or limited partnership entities to serve as the general partner or managing member of the Funds.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

The carrying value of assets and liabilities recognized in the Consolidated Balance Sheets related to the Company's interests in these non-consolidated VIEs and the Company's maximum exposure to loss relating to non-consolidated VIEs were as follows:

	March 31,	
	2026	2025
Investments	\$ 284,958	\$ 256,350
Fees receivable	43,607	48,601
Due from related parties	7,573	4,723
Total VIE assets	336,138	309,674
Non-controlling interests	(2,190)	(2,497)
Maximum exposure to loss	<u>\$ 333,948</u>	<u>\$ 307,177</u>

7. Furniture, Fixtures, and Equipment

Furniture, fixtures, and equipment consist of the following:

	March 31,	
	2026	2025
Computer hardware and software	\$ 21,703	\$ 18,179
Furniture and fixtures	7,314	7,336
Leasehold improvements	34,303	33,317
Office equipment	4,029	3,965
	<u>67,349</u>	<u>62,797</u>
Less: accumulated depreciation	32,332	25,211
Furniture, fixtures, and equipment, net	<u>\$ 35,017</u>	<u>\$ 37,586</u>

Depreciation expense was \$8,413, \$7,583 and \$6,485 for the years ended March 31, 2026, 2025 and 2024, respectively, and is included in general, administrative and other expenses in the Consolidated Statements of Income.

8. Debt

The Company's debt consisted of the following:

	As of March 31,					
	2026			2025		
	Principal Outstanding	Carrying Value	Interest Rate	Principal Outstanding	Carrying Value	Interest Rate
Term Loan	\$ 84,375	\$ 84,076	5.50 %	\$ 93,125	\$ 92,736	6.25 %
2020 Multi-Draw Facility	96,250	96,005	3.50 %	100,000	99,691	3.50 %
Senior Notes	100,000	98,339	5.28 %	100,000	97,876	5.28 %
Total Debt	<u>\$ 280,625</u>	<u>\$ 278,420</u>		<u>\$ 293,125</u>	<u>\$ 290,303</u>	

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

On October 1, 2025, the Company amended its existing 2022 Multi-Draw Term Loan Agreement (as amended, the “2022 Multi-Draw Facility”) with JPMorgan Chase Bank, N.A. (“JPMorgan”). The amendment included a decrease in the aggregate principal amount available to be borrowed from \$75,000 to \$50,000, modified dates related to principal and interest payments and revised interest rates for borrowings to the greater of the prime rate minus 1.35% or 3.00%. The 2022 Multi-Draw Facility matures on October 1, 2029. As of March 31, 2026 the Company had no outstanding balance under the 2022 Multi-Draw Term Facility

The Term Loan and Security Agreement (as amended, the “Term Loan”) has an \$87,500 borrowing capacity, a maturity date of July 1, 2029, and an interest rate of a floating per annum rate equal to the prime rate minus 1.25% subject to a floor of 3.00%. The Revolving Loan and Security Agreement (as amended, the “Revolving Loan Agreement”) has a \$50,000 borrowing capacity, a maturity date of October 6, 2027, and an interest rate of a floating per annum rate equal to the prime rate minus 1.50% subject to a floor of 2.25%, the Company has no outstanding balance under the Revolving Loan Agreement. The 2020 Multi-Draw Term Loan and Security Agreement (as amended, the “2020 Multi-Draw Facility”) provides for a term loan in the aggregate principal amount of \$100,000, has a maturity date of April 1, 2030, and the interest rate is a fixed per annum rate of 3.50%.

On October 8, 2024, HLA issued \$100,000 aggregate principal amount of its 5.28% Senior Notes due October 15, 2029 (the “Senior Notes”), pursuant to a Note Purchase Agreement (the “Note Purchase Agreement”), among HLA and the institutional purchasers party thereto in a private placement transaction. Interest on the Senior Notes is payable semi-annually in arrears, commencing on April 15, 2025. Interest on the Senior Notes accrues from and including October 8, 2024.

The aggregate minimum principal payments on the Company’s outstanding debt are due as follows:

For the fiscal year ending March 31,

2027	\$ 21,875
2028	32,500
2029	55,000
2030	158,750
2031	12,500
Thereafter	—
Total	\$ 280,625

The carrying value of the Company’s Term Loan as of each of March 31, 2026 and 2025 approximated fair value. The 2020 multi-draw facility had an estimated fair value of \$91,768 and \$99,305 as of each of March 31, 2026 and 2025, respectively. The Company’s Senior Notes had an estimated fair value of \$94,641 and \$99,222 as of each of March 31, 2026 and 2025, respectively. The estimated fair value of debt is based on then-current market rates for similar debt instruments and is classified as Level 2 within the fair value hierarchy.

9. Equity

The Company has two classes of common stock outstanding, Class A common stock and Class B common stock.

Class A common stock

Holders of Class A common stock are entitled to one vote for each share held of record on all matters submitted to a vote of stockholders. Additionally, holders of shares of Class A common stock are entitled to receive dividends when and if declared by the Board of Directors, subject to any statutory or contractual

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

restrictions on the payment of dividends and to any restrictions on the payment of dividends imposed by the terms of any outstanding preferred stock.

Class B common stock

Holders of Class B common stock are entitled to ten votes for each share held of record on all matters submitted to a vote of stockholders, but have *de minimis* economic rights. Holders of Class B units of HLA hold shares of Class B common stock at a one-to-one ratio. Class B units (together with the corresponding shares of Class B common stock) may be exchanged for shares of Class A common stock on a one-to-one basis, or, at the Company's election, for cash in an amount equal to the net proceeds from the sale of shares of Class A common stock equal to the number of shares of Class B common stock being exchanged, subject to certain restrictions.

Shares of Common Stock Outstanding

The following table shows a rollforward of the Company's common stock outstanding:

	Class A	Class B
March 31, 2023	38,611,919	15,409,507
Shares issued (repurchased) in connection with offerings	1,867,322	(1,744,872)
Shares issued in connection with ESPP	27,179	—
Shares repurchased for employee tax withholdings	(38,557)	—
Forfeitures	(54,595)	—
Restricted stock granted	134,538	—
March 31, 2024	40,547,806	13,664,635
Shares issued (repurchased) in connection with offering	1,562,281	(1,486,223)
Shares issued in connection with ESPP	22,633	—
Shares repurchased for employee tax withholdings	(35,260)	—
Forfeitures	(29,826)	—
Restricted stock granted	1,429,904	—
March 31, 2025	43,497,538	12,178,412
Shares issued (repurchased) in connection with offering	378,705	(341,962)
Shares repurchased and retired	(199,000)	—
Shares issued in connection with ESPP	29,184	—
Shares repurchased for employee tax withholdings	(49,128)	—
Forfeitures	(85,518)	—
Restricted stock granted	125,703	—
March 31, 2026	43,697,484	11,836,450

Income and equity allocations to NCI interests are based upon the relative ownership percentage of the Consolidated Funds and Partnerships held by non-controlling owners. The reallocation adjustment between HLI stockholders' equity and NCI in HLA relates to the impact of changes in economic ownership percentages during the period and adjusting previously recorded equity transactions to the economic ownership percentage as of the end of each reporting period.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Share Repurchases

During the three months ended March 31, 2026, the Company repurchased 199,000 shares of its Class A common stock under the Stock Repurchase Program at a weighted-average price of \$100.43 per share, for an aggregate purchase price of approximately \$19,986 under the Stock Repurchase Program.

HLA Operating Agreement

In accordance with the limited liability company agreement of HLA (the “HLA Operating Agreement”), profits and losses from HLA are allocated on a pro rata basis based upon each member’s economic interests. The HLA Operating Agreement provides that distributions are made on a pro rata basis to pay income taxes owed by the members on their share of HLA’s taxable income. In addition to these tax distributions, HLA made distributions in excess of required tax distributions to members in an aggregate amount of \$49,718, \$46,383, and \$43,053 for the years ended March 31, 2026, 2025, and 2024, respectively.

September 2025 Offering

In September 2025, the Company and a selling stockholder completed a registered offering of an aggregate of 528,705 shares of Class A common stock at a price to the underwriter of \$146.51 per share (the “September 2025 Offering”). The shares sold consisted of 150,000 shares held by the selling stockholder and 378,705 shares newly issued by the Company. The Company received \$55,484 in net proceeds from the sale of its shares and used all of the proceeds to settle exchanges of a total of 341,962 Class B units and 36,743 Class C units by certain members of HLA. In connection with the exchange of the Class B units, the Company also repurchased for par value and canceled a corresponding number of shares of Class B common stock. The Company did not receive any proceeds from the sale of shares by the selling stockholder.

February 2025 Offering

In February 2025, the Company and a selling stockholder completed a registered offering of an aggregate of 1,572,536 shares of Class A common stock at a price to the underwriter of \$159.00 per share (the “February 2025 Offering”). The shares sold consisted of 10,255 shares held by the selling stockholder and 1,562,281 shares newly issued by the Company. The Company received \$248,403 in net proceeds from the sale of its shares and used all of the proceeds to settle exchanges by certain members of HLA of a total of 1,486,223 Class B units and 76,058 Class C units. In connection with the exchange of the Class B units, the Company also repurchased for par value and canceled a corresponding number of shares of Class B common stock. The Company did not receive any proceeds from the sale of shares by the selling stockholder.

March 2024 Offering

In March 2024, the Company and a selling stockholder completed a registered offering of an aggregate of 1,922,322 shares of Class A common stock at a price to the underwriter of \$108.00 per share (the “March 2024 Offering”). The shares sold consisted of 55,000 shares held by the selling stockholder and 1,867,322 shares newly issued by the Company. The Company received \$201,671 in net proceeds from the sale of its shares and used all of the proceeds to settle exchanges by certain members of HLA of a total of 1,744,872 Class B units and 122,450 Class C units. In connection with the exchange of the Class B units, the Company also repurchased for par value and canceled a corresponding number of shares of Class B common stock. The Company did not receive any proceeds from the sale of shares by the selling stockholder.

Warrant Instrument

In connection with the Guardian Transaction, the Company issued the Warrant allowing for purchases of up to 400,000 shares of Class A common stock, with a grant date fair value of \$19,618. The Warrant will

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

expire on February 29, 2036. The Company accounts for the Warrant as equity as it is indexed to the Company's common stock and can only be settled in cash at the Company's election.

Upon issuance, 150,000 shares of Class A common stock with a weighted average exercise price of \$131.56 per share became exercisable. The remaining shares will vest evenly over a 10 year period subject to minimum annual contract commitments.

The fair value of the Warrant was estimated using a Black-Scholes valuation method using the following assumptions:

Closing share price as of grant date	\$	132.24
Weighted average exercise price		161.46
Risk Free Rate		4.18%
Dividend rate		1.63%
Volatility ⁽¹⁾		35.00%
Expected term		10.2 years

⁽¹⁾The Company estimates expected volatility based on the historic volatility of its own Class A common stock.

10. Equity Based Compensation

2017 Equity Incentive Plan

The Company has adopted its 2017 Equity Incentive Plan, as amended and restated (the "Plan"), which permits the issuance of up to 10,000,000 shares of Class A common stock, which may be granted as incentive stock options, nonqualified stock options, stock appreciation rights, restricted stock, performance stock, restricted stock units or performance stock units. Awards under the Plan generally vest over four to five years, with options expiring not more than ten years from the date of grant, three months after termination of employment or one year after the date of death or termination due to disability of the grantee. As of March 31, 2026, there were 6,057,616 shares of Class A common stock available to grant under the Plan. Pursuant to the terms of the Plan, awards may not be granted after September 5, 2034.

Employee Share Purchase Plan

The Company has adopted its Employee Share Purchase Plan, as amended ("ESPP"), which permits eligible employees to elect to purchase the Company's Class A common stock via paycheck deductions. The purchase price is 85% of the closing price of the Company's Class A common stock on the last trading day of each offering period, which begins the first day of each fiscal quarter and ends on the last day of that fiscal quarter. The Company's initial offering period started January 1, 2019. At inception, there were 1,000,000 shares available for purchase through the ESPP and 805,511 shares were available as of March 31, 2026.

Restricted Stock Awards

Holders of restricted stock have all of the rights of a stockholder with respect to such shares, including the right to vote the shares but not the right to receive dividends or other distributions. Substantially all of the awards vest over four years in equal annual installments. On each vesting date, the related employee tax liabilities are either paid in cash by the employee or stock is sold back to the Company at the then-current fair

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

value to offset the required minimum tax withholding obligations. Forfeitures are recognized as they occur. Compensation expense related to the awards is recognized ratably each month over the vesting period.

A summary of restricted stock activity for the year ended March 31, 2026 is presented below:

	Total Unvested	Weighted- Average Grant-Date Fair Value of Award
March 31, 2025	506,550	\$ 114.15
Granted	19,958	\$ 141.73
Vested	(177,986)	\$ 102.50
Forfeited	(29,473)	\$ 124.64
March 31, 2026	<u>319,049</u>	<u>\$ 121.35</u>

The weighted-average grant-date fair value per share of restricted stock awarded during the years ended March 31, 2026, 2025 and 2024 was \$141.73, \$138.52, and \$105.48, respectively. The total fair value of restricted stock that vested during the years ended March 31, 2026, 2025 and 2024 was \$19,162, \$18,283, and \$14,122, respectively. As of March 31, 2026, total unrecognized compensation expense related to restricted stock was \$35,190 with a weighted-average amortization period of 2.5 years.

The total tax (expense) benefit recognized from share-based compensation for the years ended March 31, 2026, 2025 and 2024 was \$892, \$867 and \$(125), respectively.

Performance Awards

The Company grants performance stock awards to certain employees that are subject to both a market based vesting and a service-based vesting condition (“Performance Awards”). Holders of Performance Awards do not participate in dividends until both their market-based and service-based vesting requirements have been met. Due to the existence of the service requirements on Performance Awards, compensation expense is recognized ratably over the respective minimum service periods from the grant date through the vesting date. The fair values of Performance Awards are based on a Monte Carlo simulation valuation model.

The Performance Awards granted on September 16, 2025 will vest based upon (i) achieving a compound annual growth rate of total shareholder return of at least 8% as of September 16, 2030 and (ii) continued employment through September 16, 2030.

Below is a summary of the grant date fair value based on the Monte Carlo simulation valuation model and the significant assumptions used to estimate the grant date fair value of the Performance Awards granted September 16, 2025:

Grant Date Fair Value	\$ 75.27
Closing share price as of grant date	147.58
Risk Free Rate	3.6%
Volatility ⁽¹⁾	35.0%
Dividend Yield	1.5%

⁽¹⁾ The Company estimates expected volatility based on the historic volatility of its own Class A common stock as well as a portfolio of selected stocks of companies believed to have market and economic characteristics similar to its own.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

A summary of Performance Award activity for the year ended March 31, 2026 is presented below:

	Total Unvested	Weighted- Average Grant-Date Fair Value of Award
March 31, 2025	1,616,282	\$ 101.01
Granted	105,745	\$ 75.27
Forfeited	(56,045)	\$ 35.08
March 31, 2026	<u>1,665,982</u>	\$ 101.59

As of March 31, 2026, total estimated unrecognized expense related to the unvested Performance Awards was \$113,650.

11. Compensation and Benefits

The Company has recorded the following amounts related to compensation and benefits:

	Year Ended March 31,		
	2026	2025	2024
Base compensation and benefits	\$ 228,630	\$ 208,222	\$ 166,394
Incentive fee compensation	20,078	34,868	25,477
Equity-based compensation	50,867	31,407	12,133
Total compensation and benefits	<u>\$ 299,575</u>	<u>\$ 274,497</u>	<u>\$ 204,004</u>

The Company provides defined contribution plans covering eligible employees subject to minimum age and service guidelines. Eligible employees may contribute a percentage of their annual compensation subject to statutory guidelines. The Company makes discretionary and/or matching contributions to the plans, which amounted to \$4,101, \$3,215 and \$4,341 for the years ended March 31, 2026, 2025 and 2024, respectively, and is included in compensation and benefits expense in the Consolidated Statements of Income.

12. Income Tax

The Company's income before income taxes consisted of the following:

	Year Ended March 31,		
	2026	2025	2024
Domestic income before income taxes	\$ 452,327	\$ 353,992	\$ 276,021
Foreign income before income taxes	10,596	8,285	5,640
Total income before income taxes	<u>\$ 462,923</u>	<u>\$ 362,277</u>	<u>\$ 281,661</u>

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Components of income tax expense consist of the following:

	Year Ended March 31,		
	2026	2025	2024
Current:			
Federal	\$ 39,823	\$ 27,768	\$ 31,551
State and local	3,498	5,619	4,395
Foreign	3,636	3,041	1,811
Total current income tax expense	\$ 46,957	\$ 36,428	\$ 37,757
Deferred:			
Federal	\$ 17,955	\$ 14,144	\$ 13,148
State and local	9,921	(1,760)	3,556
Foreign	370	(303)	(7)
Total deferred income tax expense	28,246	12,081	16,697
Total income tax expense	<u>\$ 75,203</u>	<u>\$ 48,509</u>	<u>\$ 54,454</u>

The Company adopted ASU 2023-09 on a prospective basis. See Note 2 - Summary of Significant Accounting Policies for additional details on the adoption of ASU 2023-09. A reconciliation of the U.S. federal statutory income tax rate to the Company's effective tax rate pursuant to the disclosure requirements of ASU 2023-09 for the year ended March 31, 2026 is as follows:

	Amount	ETR
U.S. Federal Statutory Tax Rate	\$ 97,214	21.0 %
State and Local Income Tax, Net of Federal (National) Income Tax Effect ⁽¹⁾	10,382	2.2 %
Foreign Tax Effects		
Other Jurisdictions	1,692	0.4 %
Effect of Changes in Tax Laws or Rates Enacted in the Current Period		
Effect of Cross-Border Tax Laws	2,637	0.6 %
Tax Credits	(1,500)	(0.3)%
Changes in Valuation Allowances	(6,605)	(1.4)%
Nontaxable or Nondeductible Items		
NCI	(29,093)	(6.3)%
Other	355	0.1 %
Other Adjustments	121	— %
Effective tax rate	<u>\$ 75,203</u>	<u>16.3 %</u>

⁽¹⁾State taxes in CA, NY and PA made up the majority (greater than 50 percent) of the tax effect in this category.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

A reconciliation of the U.S. statutory income tax rate to the Company's effective tax rate is as follows:

	Year Ended March 31,	
	2025	2024
Federal tax at statutory rate	21.0 %	21.0 %
State income taxes, net of federal benefit	1.2 %	2.8 %
NCI	(5.6)%	(6.4)%
Valuation allowance	(4.4)%	1.6 %
Other	1.2 %	0.3 %
Effective tax rate	<u>13.4 %</u>	<u>19.3 %</u>

The significant components of deferred tax assets are as follows:

	Year Ended March 31,	
	2026	2025
Basis difference in HLA	\$ 306,551	\$ 329,129
Tax Receivable Agreement	54,743	57,255
Valuation allowance	(69,565)	(79,432)
State taxes	—	394
Other	1,363	1,179
Total deferred tax assets	<u>\$ 293,092</u>	<u>\$ 308,525</u>

As of March 31, 2026 and 2025, the Company did not have net operating loss carryforwards.

In connection with the September 2025 Offering and related unit exchanges, the Company recorded a deferred tax asset of \$12,402, presented net of a valuation allowance of \$1,584 for the portion of tax benefits for which realization is not more likely than not. In conjunction with this recognition, the Company also recorded a payable to related parties of \$10,280 pursuant to the tax receivable agreement, recognized through equity.

The Company believes it is more likely than not that the deferred tax assets (except those identified above) will be realized based on the Company's forecasted income. The net change in the valuation allowance was a decrease of \$9,867.

As of March 31, 2026, 2025, and 2024, the Company had no unrecognized tax positions. The Company does not expect any material increase or decrease in its gross unrecognized tax positions during the next twelve months. If and when the Company does record unrecognized tax positions in the future, any interest and penalties related to unrecognized tax positions will be recorded in the income tax expense line in the Consolidated Statements of Income.

The Company files income tax returns as required by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Company may be subject to examination by federal and certain state and local tax authorities. As of March 31, 2026, the Company's federal income tax returns from 2022 remain open and are subject to examination.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Pursuant to the disclosure requirements of ASU 2023-09, the following table summarizes income taxes paid (net of refunds) exceeding five percent of total income taxes paid (net of refunds) in the following jurisdictions:

	Year Ended March 31, 2026
U.S. Federal	\$ 44,501
U.S. State and Local	6,363
Foreign	3,569
Total income taxes paid (net of refunds)	<u>\$ 54,433</u>

In December 2021, the Organization for Economic Co-operation and Development (“OECD”) introduced a 15% global minimum tax under the Pillar Two Global Anti-Base Erosion model rules. Several OECD member countries have enacted tax legislation based on certain elements of these rules that became effective on January 1, 2024. Other jurisdictions have announced the intent to implement these rules, but the rules remain subject to significant negotiation, potential change, and phase-in periods. As of March 31, 2026, the Company is not subject to the Pillar Two model rules and will continue to monitor legislative developments and the potential impact on future periods.

On July 4, 2025, the One Big Beautiful Bill Act (“OBBBA”) was signed into law in the United States. The OBBBA contains several provisions revising the U.S. federal corporate income tax by, among other things, extending many expiring provisions from the Tax Cuts and Jobs Act of 2017, modifying the international tax framework, and restoring favorable tax treatment for certain business provisions. As of March 31, 2026, the OBBBA did not have a material impact on the Company’s income tax expense.

Tax Receivable Agreement

The Company has recorded a payable to related parties pursuant to the tax receivable agreement of \$235,425 and \$240,648 as of March 31, 2026 and 2025, respectively. Payments of \$12,000 and \$11,924 were made during the years ended March 31, 2026 and 2025, respectively. In the event that the valuation allowance related to tax benefits associated with the tax receivable agreement is released in a future period, an additional estimated payable of \$28,943 will be due.

13. Earnings per Share

The following table presents the basic earnings per share (“EPS”) for a share of Class A common stock:

	Year Ended March 31,		
	2026	2025	2024
Net income attributable to HLI	\$ 249,180	\$ 217,417	\$ 140,858
Weighted Average Shares	41,605,636	39,922,212	37,858,177
Basic EPS of Class A common stock	\$ 5.99	\$ 5.45	\$ 3.72

Shares of the Company’s Class B common stock do not share in the earnings or losses attributable to HLI, and, therefore, are not participating shares. As a result, a separate presentation of basic and diluted EPS of Class B common stock under the two-class method has not been included. Shares of the Company’s Class B common stock are, however, considered potentially dilutive to the Class A common stock because the Class B units to which the Class B common stock corresponds are exchangeable for shares of Class A common stock

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

on a one-for-one basis, at which time the share of Class B common stock is surrendered in exchange for a payment of its par value.

The following table presents the diluted EPS for a share of Class A common stock:

	Year Ended March 31,		
	2026	2025	2024
Numerator			
Net income attributable to Class A common stockholders - basic	\$ 249,180	\$ 217,417	\$ 140,858
Adjustments to net income:			
Assumed vesting of employee awards	567	544	90
Assumed conversion of Class B and Class C units	72,665	—	58,209
Net income attributable to Class A common stockholders	\$ 322,412	\$ 217,961	\$ 199,157
Denominator			
Weighted-average shares of Class A common stock outstanding - basic	41,605,636	39,922,212	37,858,177
Assumed vesting of employee awards	421,111	385,606	82,742
Assumed conversion of Class B and Class C units	12,442,646	—	15,961,548
Weighted-average shares of Class A common stock outstanding	54,469,393	40,307,818	53,902,467
Diluted EPS of Class A common stock	\$ 5.92	\$ 5.41	\$ 3.69

The adjustments to net income for dilutive shares are based upon the additional income that would be allocated to HLI for the change in its ownership percentage due to the dilutive shares and adjusted for the incremental income tax expense related to the additional allocated income. Net income (loss) recorded by HLI on a standalone basis will determine if the Class B and Class C units are dilutive or antidilutive in each respective period.

The following table presents the weighted-average Performance Awards and the Warrant shares excluded from diluted EPS that would have been antidilutive or for which the market or performance conditions have not been achieved as of the period reported:

	Year Ended March 31,		
	2026	2025	2024
Performance Awards	1,346,727	774,359	528,282
Warrant Shares	99,726	—	—
Outstanding Class B and C units of HLA	—	14,016,324	—

14. Related-Party Transactions

The Company considers its employees, directors, and equity method investments to be related parties.

Revenue and Receivables

The Company has investment management agreements with various specialized funds and customized separate accounts that it manages. The Company earned management and advisory fees from Funds of \$481,400, \$412,952, and \$350,792 for the years ended March 31, 2026, 2025 and 2024, respectively. The Company earned incentive fees from Funds of \$168,731, \$193,657, and \$97,860 for the years ended March 31, 2026, 2025 and 2024, respectively.

Fees receivable from the Funds were \$132,154 and \$156,776 as of March 31, 2026 and 2025, respectively, and are included in fees receivable in the Consolidated Balance Sheets.

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

Sale of Consolidated Fund

On October 23, 2025, the Company completed the sale of its interests in a wholly-owned Consolidated Fund to a Fund that the Company manages for \$92,278 in cash. As a result of the sale, the Company derecognized all of the assets and liabilities of the Consolidated Fund, including \$70,143 of cash held by the Consolidated Fund, during the year ended March 31, 2026. After the deconsolidation, the Company did not retain an equity interest but remains the investment manager of the fund.

15. Supplemental Cash Flow

	Year Ended March 31,		
	2026	2025	2024
Cash paid during the year for interest	\$ 11,850	\$ 10,399	\$ 11,049
Cash paid during the year for income taxes	\$ 54,433	\$ 27,036	\$ 39,758
Non-cash operating activities:			
Establishment of lease liability in exchange for ROU asset	\$ 7,030	\$ 5,087	\$ 5,903
Deconsolidation of net (assets)/ liabilities held by deconsolidated fund	\$ 6,042	\$ (3,568)	\$ 6,095
Other	\$ —	\$ 311	\$ —
Non-cash investing activities:			
Investments purchased by Consolidated Fund not yet paid	\$ (5,800)	\$ —	\$ —
Deconsolidation of investments held by deconsolidated fund	\$ 23,846	\$ 9,758	\$ 103,990
Transfer of equity method investment in Funds from deconsolidated fund	\$ 12,324	\$ 27,240	\$ 32,018
Conversion of note receivable	\$ —	\$ 2,161	\$ —
Purchase of other equity method investment	\$ —	\$ —	\$ 2,000
Non-cash financing activities:			
Establishment of payable to related parties pursuant to tax receivable agreement	\$ 10,280	\$ 49,029	\$ 37,526
Dividends declared but not paid	\$ 22,520	\$ 20,233	\$ 17,628
Members' distributions declared but not paid	\$ 27,066	\$ 26,810	\$ 23,815
Warrant related asset	\$ 8,367	\$ —	\$ —

16. Commitments and Contingencies

Litigation

In the ordinary course of business, the Company may be subject to various legal, regulatory, and/or administrative proceedings from time to time. Although there can be no assurance of the outcome of such proceedings, in the opinion of management, the Company does not believe it is probable that any pending or, to its knowledge, threatened legal proceeding or claim would individually or in the aggregate materially affect its consolidated financial statements.

Incentive Fees

The Funds have allocated carried interest still subject to contingencies that did not meet the Company's criteria for revenue recognition in the amounts of \$1,546,358 and \$1,260,277, net of amounts attributable to NCI, at March 31, 2026 and 2025, respectively.

If the Company ultimately receives the unrecognized carried interest, a total of \$386,589 and \$315,069 as of March 31, 2026 and 2025, respectively, would potentially be payable to certain employees and third parties

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

pursuant to compensation arrangements related to carried interest profit-sharing plans. Such amounts have not been recorded in the Consolidated Balance Sheets or Consolidated Statements of Income as the payment is not yet probable.

Leases

The Company's leases consist primarily of operating leases for office space and office equipment in various locations around the world, which have remaining lease terms of one year to 12 years. Some leases have the option to extend for an additional term or terminate early. Short-term lease costs are not material.

The following table shows lease costs and other supplemental information related to the Company's operating leases:

	Year Ended March 31,		
	2026	2025	2024
Operating lease costs	\$ 9,512	\$ 9,275	\$ 8,972
Variable lease costs	\$ 2,220	\$ 1,961	\$ 1,442
Cash paid for amounts included in the measurement of operating lease liabilities	\$ 9,518	\$ 9,012	\$ 8,995
Weighted average remaining lease term (in years)	10.5	11.6	12.6
Weighted average discount rate	3.6%	3.5%	3.5%

As of March 31, 2026, the maturities of operating lease liabilities were as follows:

For the fiscal year ending March 31,	
2027	\$ 9,673
2028	9,225
2029	8,552
2030	8,074
2031	7,429
Thereafter	48,600
Total lease payments	\$ 91,553
Less: imputed interest	(13,494)
Total operating lease liabilities	<u>\$ 78,059</u>

Commitments

The Company serves as the investment manager of the Funds. The general partner or managing member of each Fund is generally a separate subsidiary of the Company and has agreed to invest funds on the same basis as the limited partners in most instances. The Company's aggregate unfunded commitment to the Funds was \$272,151 and \$312,215 as of March 31, 2026 and 2025, respectively.

In connection with certain of the Company's strategic technology investments, a percentage of realized gains will be paid to one of the Company's Co-CEOs for overseeing the initial investments and up to 15% may be paid as a discretionary bonus to other employees as those gains are realized. The Company has an unrealized net gain on strategic investments of \$34,086 as of March 31, 2026.

The Company offers an Employee Investment Program ("EIP") through which certain employees are able to invest directly into certain Funds as individual limited partners ("LPs"). The employees also have an option

Hamilton Lane Incorporated
Notes to Consolidated Financial Statements

(In thousands, except share and per share amounts)

to enter into a loan agreement with a third-party lender to fund committed capital. The loan is collateralized by the underlying LP's interest in the fund and return of capital distributions are utilized to pay the outstanding loan balance. The Company entered into a separate agreement with the third-party lender to backstop the employee's performance under the loan with a commitment to purchase the LP interest from the lender at the greater of fair value or the outstanding balance of the loan in the event of a default by the employee. As of March 31, 2026 and 2025, the total amount of outstanding loans at the third-party lender under the EIP was \$1,663 and \$1,280, respectively, and the Company believes the risk of default by an employee to be remote.

17. Subsequent Event

On May 21, 2026, the Company announced a quarterly dividend of \$0.60 per share of Class A common stock to record holders at the close of business on June 18, 2026. The payment date will be July 7, 2026.

On May 21, 2026, the Company announced that its board of directors had approved an increase in the authorization under its stock repurchase program to permit the Company to purchase up to \$100,000 of Class A common stock, net of amounts already repurchased under the pre-existing authorization, with no share count or duration limitations. As of May 21, 2026, the total amount outstanding under the Company's stock repurchase authorization was approximately \$80,000.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our management, including our Co-Chief Executive Officers and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as such term is defined in Exchange Act Rule 13a-15(e)) as of March 31, 2026. Our disclosure controls and procedures are intended to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including the Co-Chief Executive Officers and Chief Financial Officer, to allow timely decisions regarding required disclosure.

In designing and evaluating our disclosure controls and procedures, management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on management's evaluation, our Co-Chief Executive Officers and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level at March 31, 2026.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with U.S. GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, with the participation of our Co-Chief Executive Officers and Chief Financial Officer, evaluated the effectiveness of our internal control over financial reporting as of March 31, 2026, based on the criteria described in the Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the results of its evaluation, management concluded that our internal control over financial reporting was effective as of March 31, 2026.

Attestation Report of the Registered Public Accounting Firm

Ernst & Young LLP, an independent registered public accounting firm, has issued an unqualified attestation report on the effectiveness of our internal control over financial reporting as of March 31, 2026, which is included in Part II, Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes to our internal control over financial reporting that occurred during the quarter ended March 31, 2026 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Trading Arrangements

During the three months ended March 31, 2026, none of the Company's directors or officers adopted, terminated or modified any contract, instruction or written plan for the purchase or sale of our securities that was intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) of the Exchange Act or any non-Rule 10b5-1 trading arrangement (as defined in Item 408 of Regulation S-K).

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, to be filed no later than 120 days after the end of our fiscal year ended March 31, 2026 in connection with our 2026 annual meeting of stockholders (the “Proxy Statement”) under the headings “Election of Directors”, “Executive Officers”, “Corporate Governance” and “Delinquent Section 16(a) Reports”, if any. Accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

Item 11. Executive Compensation

The information required by this Item is incorporated by reference to, and will be contained in, the Proxy Statement, under the headings “Corporate Governance”, “Executive Compensation” and “Director Compensation”. Accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated by reference to, and will be contained in, the Proxy Statement under the headings “Ownership of Common Stock” and “Equity Compensation Plan Information”. Accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated by reference to, and will be contained in, the Proxy Statement under the headings “Certain Relationships and Related-Party and Other Transactions” and “Corporate Governance”. Accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

Item 14. Principal Accountant Fees and Services

The information required by this Item is incorporated by reference to, and will be contained in, the Proxy Statement under the heading “Ratification of Appointment of Independent Registered Public Accounting Firm”. Accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

PART IV

Item 15. Exhibits and Financial Statement Schedules

The following documents are filed as part of this Form 10-K:

1. All financial statements. See Index to Consolidated Financial Statements in Part II, Item 8 of this Form 10-K.
2. Financial Statement Schedules. Financial statement schedules are omitted as they are either not required or the information is otherwise included in the consolidated financial statements.
3. Exhibits. See Exhibit Index.

Item 16. Form 10-K Summary

Omitted at the Company's option.
