1. THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES

The Company. Boursa Investments, Inc. (the “Company”), a California corporation, is a registered broker-dealer licensed by the United States Securities and Exchange Commission (“SEC”) and is a member of the Financial Industry Regulatory Authority. The Company provides broker-dealer services as an introducing broker-dealer clearing customer transactions through another broker-dealer on a fully disclosed basis.

Accounting Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Fixed Assets. Fixed assets are stated at cost less accumulated depreciation. Maintenance and repairs which do not extend asset lives are expensed as incurred. Depreciation is provided on the straight-line method over the estimated useful lives of the assets (generally three years). Purchases greater than \$1,000 are capitalized.

Concentration of Credit Risk. The Company maintains bank accounts with cash balances that exceed federally insured limits. No credit losses have been experienced on these accounts. Management believes that any potential credit losses would be minimal and, accordingly, no reserve for such losses has been established.

Accounts held at Clearing Firm. The Company maintains funds and securities at its clearing firm, Wedbush Securities, including a security deposit of \$100,007. The total balance of the Company’s cash assets held by Wedbush Securities is \$93,522.

Segment Reporting. Segment Reporting: The Company is engaged in a single line of business as a securities broker dealer, which is comprised of several classes of services, including principal transactions and agency transactions. The Company has identified its President as the chief operating decision maker (CODM), who uses net income to evaluate the results of the business, predominantly in the forecasting process, to manage the Company.

Additionally, the CODM uses excess net capital, which is not a measure of profit and loss, to make operational decisions while maintaining capital adequacy, such as whether to reinvest profits or pay dividends. The Company’s operations constitute a single operating segment and therefore, a single reportable segment, because the CODM manages the business activities using information from the Company as a whole. The accounting policies used to measure the profit and loss of the segment are the same as those described in the summary of significant accounting policies.

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). Boursa Investments, Inc.'s management is responsible for compliance with the exemption provisions and its statements.

My review was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and accordingly, included inquiries and other required procedures to obtain evidence about Boursa Investments, Inc.'s compliance with the exemption provisions. A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on management's statements. Accordingly, I do not express such an opinion.

Based on my review, I am not aware of any material modifications that should be made to management's statements referred to above for them to be fairly stated, in all material respects, based on the provisions set forth in paragraph (k)(2)(ii) of Rule 15c3-3 under the Securities Exchange Act of 1934.
