ADDITIONAL RISK FACTORS SPECIFIC TO YOUR NOTES

An investment in the notes is subject to the risks described below, as well as the risks described under “Risk Factors” in the accompanying prospectus and “Additional Risk Factors Specific to the Notes” in the accompanying prospectus supplement. You should carefully consider whether the notes are suited to your particular circumstances. The notes are not secured debt.

Please note that in this section entitled “Additional Risk Factors Specific to Your Notes,” references to “holders” mean those who own notes registered in their own names, on the books that we, Nomura or the trustee maintain for this purpose, and not those who own beneficial interests in notes registered in street name or in notes issued in book-entry form through DTC or another depositary. Owners of beneficial interests in the notes should read the section entitled “Legal Ownership and Book-Entry Issuance” in the accompanying prospectus.

We urge you to read all of the following information about some of the risks associated with the notes, together with the other information in this pricing supplement before investing in the notes.

You Are Subject to Nomura’s Credit Risk, and the Value of Your Notes May Be Adversely Affected by Negative Changes in the Market’s Perception of Nomura’s Creditworthiness

By purchasing the notes, you are making, in part, a decision about Nomura’s ability to pay you the amounts you are owed pursuant to the terms of your notes. Substantially all of our assets consist of loans to and other receivables from Nomura and its subsidiaries. Our obligations under your notes are guaranteed by Nomura. Therefore, as a practical matter, our ability to pay you amounts we owe on the notes is directly or indirectly linked solely to Nomura’s creditworthiness. In addition, the market’s perception of Nomura’s creditworthiness generally will directly impact the value of your notes. If Nomura becomes or is perceived as becoming less creditworthy following your purchase of notes, you should expect that the notes will decline in value in the secondary market, perhaps substantially. If you sell your notes in the secondary market in such an environment, you may incur a substantial loss.

Because Nomura Is a Holding Company, Your Right to Receive Payments on Nomura’s Guarantee of the Notes Is Subordinated to the Liabilities of Nomura’s Other Subsidiaries

The ability of Nomura to make payments, as guarantor, on the notes, depends upon Nomura’s receipt of dividends, loan payments and other funds from subsidiaries. In addition, if any of Nomura’s subsidiaries becomes insolvent, the direct creditors of that subsidiary will have a prior claim on its assets, and Nomura’s rights and the rights of Nomura’s creditors, including your rights as an owner of the notes, will be subject to that prior claim.

Nomura’s subsidiaries are subject to various laws and regulations that may restrict Nomura’s ability to receive dividends, loan payments and other funds from subsidiaries. In particular, many of Nomura’s subsidiaries, including its broker-dealer subsidiaries, are subject to laws and regulations, including regulatory capital requirements, that authorize regulatory bodies to block or reduce the flow of funds to the parent holding company, or that prohibit such transfers altogether in certain circumstances. For example, Nomura Securities Co., Ltd., Nomura Securities International, Inc., Nomura International plc and Nomura International (Hong Kong) Limited, Nomura’s main broker-dealer subsidiaries, are subject to regulatory capital requirements that could limit the transfer of funds to Nomura. These laws and regulations may hinder Nomura’s ability to access funds needed to make payments on Nomura’s obligations.

The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors

In addition to our and Nomura’s creditworthiness, a number of other economic and market factors will influence the value of the notes. The following factors, which are beyond our control, may influence the market value of your notes:

- supply and demand for the notes, including inventory positions with Nomura Securities International, Inc. or any other market-maker;
- the time to maturity of the notes;
- interest and yield rates in the market generally and expectations about future interest and yield rates; and
- economic, financial, political, regulatory or judicial events that affect the debt markets generally.

Each of these factors may influence the market value of your notes if you sell your notes before maturity. If you sell your notes prior to maturity, you may receive less than the principal amount of your notes.

There Are No Prior Markets for the Notes and if Markets Develop, They May Not Be Liquid.

There can be no assurance that any liquid markets for the notes will ever develop or be maintained. Nomura Securities International, Inc. and other affiliates of ours currently intend to make a market for the notes, although they are not required to do so. Nomura Securities International, Inc. or any other affiliate of ours may stop any such market-making activities at

any time. Even if a secondary market for the notes develops, it may not provide significant liquidity and the notes may not trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your notes in any secondary market could be substantial.

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount.

If you sell your notes before the maturity date, you may have to do so at a substantial discount from the issue price and as a result you may suffer substantial losses.

The Notes May Be Redeemed Prior to The Maturity Date.

If the notes are redeemed early, the holding period following which you may receive the redemption amount could be as little as approximately one year. There is no guarantee that you would be able to reinvest the proceeds from an investment in the notes at a comparable return for a similar level of risk in the event the notes are redeemed prior to the maturity date. Conversely, the note may not be redeemed early by the issuer in cases where market conditions have led to a decline in the value of the notes.

There May Not Be an Active Trading Market for the Notes—Sales in the Secondary Market May Result in Significant Losses.

The notes will not be listed on any securities exchange, and there may be little or no secondary market for the notes. Nomura Securities International, Inc. and other affiliates of ours currently intend to make a market for the notes, although they are not required to do so. Nomura Securities International, Inc. or any other affiliate of ours may stop any such market-making activities at any time. Even if a secondary market for the notes develops, it may not provide significant liquidity and the notes may not trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your notes in any secondary market could be substantial.

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount.

If you sell your notes before the maturity date, you may have to do so at a substantial discount from the issue price and as a result you may suffer substantial losses.

Tax Risks

The Tax Treatment of the Notes Is Uncertain.

Significant aspects of the tax treatment of the notes are uncertain. You should consult your tax advisor about your own tax situation. See “U.S. Federal Income Tax Considerations” in the prospectus and “U.S. Federal Income Tax Considerations” in this pricing supplement.

U.S. FEDERAL INCOME TAX CONSIDERATIONS

See the section “*U.S. Federal Income Tax Considerations*” in the accompanying prospectus, subject to the limitations and exceptions set forth therein, for a discussion summarizing certain U.S. federal income tax consequences of the acquisition, ownership and disposition of the notes. For purposes of that discussion, the notes should be treated as Fixed Rate Notes.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws.

SUPPLEMENTAL PLAN OF DISTRIBUTION

We have agreed to sell to Citigroup Global Markets Inc. (the “distribution agent”), and the distribution agent has agreed to purchase from us, the aggregate principal amount of the notes specified on the front cover of this pricing supplement. The distribution agent has agreed to purchase the notes from us at a price of 99.80% of the principal amount. The distribution agent's commission will be 0.20%. The distribution agent will offer the notes to the public at the price to public set forth on the front cover of this pricing supplement. If all of the notes are not sold at the original issue price, the distribution agent may change the offering price and the other selling terms. Certain dealers who purchase the notes for sale to certain fee-based advisory accounts may forgo some or all of their selling concessions, fees or commissions.

To the extent the distribution agent resells notes to a broker or dealer less a concession equal to the entire underwriting discount, such broker or dealer may be deemed to be an “underwriter” of the notes as such term is defined in the Securities Act of 1933, as amended. If the distribution agent is unable to sell all the notes at the public offering price, the distribution agent proposes to offer the notes from time to time for sale in negotiated transactions or otherwise, at prices to be determined at the time of sale.

In the future, the distribution agent may repurchase and resell the notes in market-making transactions. For more information about the plan of distribution, the distribution agreement and possible market-making activities, see “*Plan of Distribution (Conflicts of Interest)*” in the accompanying prospectus.

The distribution agent and/or its affiliates have performed, and in the future may provide, investment banking and advisory services for us from time to time for which they have received, and expect to receive, customary fees and commissions. The distribution agent and its affiliates may, from time to time, engage in transactions with, and perform services for, us in the ordinary course of business.

VALIDITY OF THE NOTES

In the opinion of Mayer Brown LLP, as counsel to the Issuer and the Guarantor, when this pricing supplement has been attached to, and duly notated on, the master note that represents the notes pursuant to the Indenture referred to in the prospectus and prospectus product supplement, and issued and paid for as contemplated herein, (i) such notes will be valid, binding and enforceable obligations of the Issuer, and (ii) the related Guarantee will be a valid, binding and enforceable obligation of the Guarantor, in each case entitled to the benefits of the Indenture, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith). This opinion is given as of the date hereof and is limited to the laws of the State of New York, the laws of the State of Delaware and the federal laws of the United States of America. Insofar as this opinion involves matters governed by Japanese law, Mayer Brown LLP has relied, with the Issuer's permission, on the opinion of Anderson Mori & Tomotsune, dated as of July 16, 2026, filed as an exhibit to the Registration Statement by the Issuer on July 16, 2026, and this opinion is subject to the same assumptions, qualifications and limitations as set forth in such opinion of Anderson Mori & Tomotsune. This opinion is subject to customary assumptions about the Trustee's authorization, execution and delivery of the Indenture and the genuineness of signatures and to such counsel's reliance on the Issuer and other sources as to certain factual matters, all as stated in the legal opinion dated July 16, 2026, which has been filed as Exhibit 5.2 to the Issuer's Registration Statement on Form F-3 dated July 16, 2026.
