🚀 We're raising our first seed round on [Wefunder](#), and you can reserve your spot now!

Before we officially launch, we're opening early reservations for those who have followed and believed in Metroair.

No commitment until the campaign goes live.

What we're building:

The Multicruiser — a modular eVTOL aircraft powered by our patented Rimfoil ducted rotor technology, which reduces aerodynamic drag by two-thirds compared to conventional rotors.

- ✅ 3 issued U.S. patents
- ✅ Recognized by DARPA & U.S. Army
- ✅ 35+ years of aerodynamics R&D behind it

This isn't just an aircraft. It's the foundation of a 3D urban transportation platform, aircraft, Hub Vertiports, and AI-managed air corridors.

👉 Reserve your spot: <https://lnkd.in/eQ8XnzJP>
