Focus on making progress, not perfection.

Focus on making progress, not perfection.

Every good thing takes time. You can't rush things. Growth is not linear, but a journey; one filled with challenges and opportunities to push to your destination. No one can do it for you, it's your journey. And there will be days you'll want to give up, but you can keep going. There are no shortcuts to get there, so you have to embrace the process.

Think progress, not perfection. Allow yourself to grow in the process. Make room for failure too. Just do your daily practice and cultivate a kind heart. Bet on hard work. Abandon impatience. The results will come down when they're ready. Remember, consistent small steps are way better than just one big step with no further progress.
